☞ *The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance, postage not included. Post-office orders to be made payable to* Joseph Smith.

IT was the necessary result of the circumstances under which the liberty of the press was established in this country, that the connection which subsisted between our public journals and the Services should have been somewhat illicit. Nor is it unnatural that a great empire should jealously raise bulwarks around the centres of her power and existence, and guard against the effects of that glare of publicity which floods the phenomena of all her social, and much of her political life.

We put out our horns—we expose our eyes to the light—trail the molluscous body along the ground—but we keep the heart securely covered inside its shell.

In despotic countries, where the press is dependent on the will of one man, or on the whims of an irresponsible censorship, greater freedom is allowed to military and naval men in their intercourse with its organs than in our own, for the very obvious reason, that the expression of their opinions is there subjected to official control.

In India, where the forms of government closely resemble those of pure monarchical states, officers of the highest rank make large use of the press for the diffusion of their views; and many of them—such as Mansfield and Edwardes—gained reputation by their pens ere they won it by the sword.

During the last war the old Muscovite world was astonished by seeing long letters in the *Invalide Russe* from officers serving in Sebastopol, mingled with official reports and announcements; and at its close they were frighted from their propriety by the spectacle of two officers of the highest rank, who had headed great armies in the field, leading their columns down Almas of letter-press, till the contest, which raged for some time by the permission of the Czar, was terminated by his orders. Nor was Austria indifferent to the uses of the press during her struggle with Hungary, or in the recent war with France. Appeals to the loyalty, traditional attachment, or religious fervour of the various races subject to her rule, were promulgated by official sanction—for without it they could not have been issued at all—in the narrow sheets of Tyrolese, Illyrian, and Croat journals. The representatives of the public papers who followed the French army were decorated by the Emperor, and if we admit that free and constitutional Sardinia has by no means imitated the liberality of her Imperial ally, we must attribute the course she adopted to the supreme exigencies of the state. For us in England there is the one great fact—freedom of the press, untrammelled by the smallest ligament of official supervision. The tame eagle is sure of being fed, but he were a sorry bird who would exchange the noble flight and the easy soar of outspread pinion for the cage and chain, even though with them came the certain daily prey, safety from the fowler's snares and a refuge from the tempest.

We have thus to make the best of our position—to accept the situation as it exists. It would be treason to forfeit the smallest particle of the most absolute independence, or to contract by a hair's-breadth the freedom of thought and utterance, for the sake of enjoying—if that were possible—the entire confidence of the authorities. But it is quite compatible with the maintenance of these essentials to evince every disposition to appreciate and allow for the difficulties of official life and the necessities of the public service.

It may be safely affirmed that the English press has hitherto not failed to exhibit patriotism in its largest sense, in dealing with such subjects. The exceptions are few, and small even when it appeared to men in office that they were many and large. As we were once told by a high military authority in Austria, if it had not been for the English press, all Germany, believing the accounts in the French and the Russian papers, would have concluded that the English army was late at the Alma—mad at Balaklava—asleep at Inkermann—disgraced on 18th June, and annihilated on 8th Sept. But the English journals, which could not be suspected of any official suppressions, were accepted as accurate expositors of the facts, and throughout the cognate Fatherland it was known that, amid great disasters, the army and navy had displayed the highest qualities of which British soldiers and sailors are capable—and none are capable of higher—that Alma was glorious for our arms—that Inkerman was as grand as Thermopylæ—that it was owing to circumstances which in no degree affected the character of our infantry, though they might be damaging to the judgment of their chiefs, we were not successful in the assaults on the place, which were unsuccessful in every point except one—and that, at the end of the war, we were "ready to go on," whilst our ally evinced his sense of failing powers by a patent anxiety for peace.

It is strange enough that a nation which is the offspring of war and conquest—the essence of fighting races—with the blood of Viking, Norman, Saxon, and Celt—and who knows what infusion of Roman?—running in its veins—should have always exhibited a certain amount of contempt for military sciences and for pure soldiery. No people on earth are more martial; but none know so little, or care less, about the principles of war. We English have never invented a system of fortification, though it cannot be said we did not need castles even when our fleet protected our shores. We have never organised a military system, or even an order of battle. All improvements in implements of war—except Armstrong's gun, which has yet to be tested in actual service—have come from abroad; and such grand discoveries and immense improvements as we have made in the mechanical arts are, in a military sense, apparently more advantageous to our neighbours than to ourselves. Our treatises on the science of war are translations, mere fragmentary essays or dry text-books and manuals. It seems as if, in our undoubted power of fighting, we scorned all adjuncts; and, indeed, not a few even now maintain that the introduction of Minerva to the British Mars will terminate in the youth's entire ruin. There is a large mass of the public which has yet to find out that the British officer is more intelligent, better educated, and more accomplished in all manly arts and useful acquirements than three-fourths of those whom they call the educated classes in civil life. As the officers of the Services advance in the estimation of their fellow-countrymen, and feel that they are elevated from the empty popularity of a passing enthusiasm for some bloody victory, to the higher level of permanent national esteem, they will seek to vindicate their position by a thorough acquaintance with the principles of their art; and we shall see them elucidated with all the clearness and vigour of the English intellect.

Without any detriment to the public service, every military and naval question can be argued in the columns of a newspaper, with advantage to the profession; every theory can be discussed; every proposition ventilated. The time is auspicious for the establishment of a journal that may deserve to become the organ of the Services, and the means of intercommunication between them and the public, for whose interests they exist. It is in no vague sense that our soldiers and sailors are citizens: but our citizens have yet much to learn of the feelings and constitution of army and navy; and, when they have learned all, they will respect the barrier which must necessarily separate the professions in their abstract duties and rights, and mode of action and thought, from the civil world. The Press has been rarely resorted to generously, confidently, and fully—it has been made the medium of official announcements useful to men in offices—time-servers have endeavoured to turn it for their private ends—its praise has been eagerly sought, whilst its censure has been resented as impertinence—but in the hour of need there is no one so high or so great that he will not seek to speak with its million tongues, and to move his fellow-countrymen by its machinery.

In all honour, we aspire to be the organ of the Services—so far as they can have an organ at all. It begins now to be understood that such great questions as the government and administration of the Army and Navy—the mode of recruiting our regiments and manning our fleets—the future of the Indian army—the condition of our arsenals, dockyards, and barracks—the constitution of the Militia—our defensive organisation—are of vital national importance. Related to them closely—we had almost said subordinately—are the questions of internal government, of colonial government, of financial reform, of trade and agriculture, in endless ramifications.

But, amid all the various bodies which are affected by the discussion of these subjects, there is one which may beconsidered as entireyly free—free as that Press which gave it birth, and which cherished and nurtured it into full vigour and maturity. The Volunteers are now nearly able to guide their own steps and to go their own way. The rifle fever has spread far and wide—it has ceased to be a mere epidemic, and is now an endemy which bids fair to flourish on British soil for ever. We desire to extend and perpetuate the disease, because we believe it will ensure our body politic against much more terrible disorders. If—as we earnestly pray it may be—shot is never fired in anger by Volunteers on English ground—the effects of this great movement which has roused up the fires which were all but smothered beneath cotton and shoddy—and loads of mint, anise, and cumin, will nevertheless be enormous. In sincerity we declare our conviction that invasion is not in the least degree likely now—in a year we think it will be a mere dream or a theoretical speculation. But it must be by the possession of actual physical force that we dissipate the danger into thin air, amid the ghosts of obsolete abstractions. The force of public opinion did not prevent the march of the Russians into the Principalities—it was not moral power, but the gathering of the German legions, and the aspect of the Quadrangle, which made the peace of Villafranca. No force is so powerful as that which is innate, independent of foreign treaties or alliances, which may be fallacious and entangling.

In submission to his officers—in discipline—in organisation—the Volunteer must be inferior to the soldier on land or sea in fitness as a military machine—to manœuvre in face of an enemy—to engage him in pitched battle. But he is only just inferior to him—he is more intelligent than the ordinary soldier, inasmuch as he comes from a better class in life, and for the purposes of a defensive warfare, adequately supported, he is the material of the best warrior in the world.

If the Volunteers restrict their movement to its legitimate objects, and maintain the spirit of unselfishness and practical utility which characterise it up to the present moment, they will give the empire the strength which is derived from the support of a nation of freemen in arms. But if they seek to usurp the functions or emulate the uses of a regular army, they will necessarily fail, and, in their failure, deprive England of an invaluable support in the hour of danger.

W. H. R.

We learn from Queenstown that fears were entertained for the safety of H.M.S. Urgent, which left Portsmouth on Sunday with the 24th Regiment, 2nd battalion, on board. We have seen letters from the ship dated Falmouth, Tuesday. She had put in there in consequence of the weather, and would remain until it moderated. Great crowding, discomfort, and sickness on board.

Captain R. B. Baker, 39th Regiment, has been appointed Fort-Adjutant at Bermuda, in succession to Captain Betts, 26th Regiment.

Lieut. F. W. M. Chalmers, Rifle Brigade, is acting provisionally as Aide-de-camp to Major-General Lawrence, C.B., commanding the Third Infantry Brigade at Aldershott, in the room of Brevet-Major Oldershaw, Royal Artillery.

Digitized by Google

THE ARMY.

2nd Life Guards. No less than five cornetcies are vacant in this Regiment.

King's Dragoon Guards. Cornet Bowyer, the senior of his rank, is about to retire from the service.

7th Dragoon Guards. Cornet Redman is on his way from Kurrachee to England *viâ* the Cape, in charge of discharged soldiers.

5th Lancers. Reported as likely to move from Newbridge to Aldershott in April.

9th Lancers. Will very probably be moved up to Aldershott in the summer, as cavalry manœuvres on a large scale are contemplated.

13th Light Dragoons. Lieut.-Colonel Holden is about to retire from the Army.

14th Light Dragoons. This regiment may be expected in England about May next, and will in all likelihood be quartered at Exeter. The number of Lieutenants has been reduced to the Home establishment, Lieut. Haldane being cashiered, and the vacancy not filled up, and Lieut. Giles being transferred to the 7th Hussars.

17th Lancers. Captain Gibsone is on his way home from Calcutta to England in command of discharged soldiers.

MILITARY TRAIN.—A memorial has been erected in Bristol Cathedral to the officers and men of the Second Battalion Military Train, by the officers and men of the other battalions of the corps less fortunate than their comrades in their opportunities of displaying great valour, and of doing good service in the field as cavalry, under the command of Lieut.-Colonel Robertson, C.B. The slab, which is designed and executed by Mr. Edward Richardson, of Harewood Square, bears the words—Lucknow, Alumbagh, Azurghur, Jugdespore, at the angles, and the word India at the top, surmounting a trophy of arms, with the shako, sabre, and carbine borne by the Train, and is inscribed as follows:—"To the memory of the officers, non-commissioned officers, and soldiers of the Second Battalion Military Train, who, during the rebellion in India, in the years 1857, 1858, 1859, while serving as light cavalry, fell on the field of battle, died of their wounds, or of sickness consequent thereon, Captain Henry Nason, Lieut. William H. Dawson, both killed while charging the rebels at the head of their respective troops. Staff-sergeants: T. Butler, C. Curtis, T. Meehan, E. Reid, F. West, W. Cunningham, J. T. Wilkins, G. Taylor, H. Powell, W. F. Allen. Sergeants: W. M'Question, S. Pennyfield, S. M'Ray, T. Porley, J. O. Keefe. Corporals: W. Budd, R. Church, J. Collins, G. M'Elroy, W. Stoll. Privates: W. Allman, T. Badger, D. Calder, J. Carr, J. S. Chettle, A. Consani, J. Dunn, T. Daniels, J. Fear, J. Foulds, M. Fox, J. Gobby, J. Gray, S. Hale, J. M. Hall, J. Hall, R. Hamstead, R. Hay, D. Hogan, T. Jones, J. Keeley, H. Land, T. Madden, J. Morgan, J. Parr, R. Penman, A. Reilly, T. Rogers, H. Samways, G. Sharman, J. Silcox, S. Silk, W. Springett." Sir James Outram invariably speaks of the services of this battalion as cavalry with the warmest praise.

Royal Artillery. The G Field Battery is ordered from Longford to Athlone, the garrison of which latter place it is understood is about to be strongly reinforced by Artillery.

ROYAL ENGINEERS.—Lieut. Clayton, R.E., has been appointed to the command of the expedition about to be despatched to New Zealand, to be employed in the survey and other engineering operations about to be undertaken by the government in that island.

A detachment of the Royal Engineers, under the command of Captain Henry Wray, has left Chatham for Belize, America, to be employed on the government survey in order to settle the question of boundary.

The Royal Engineers sent out to British Columbia, are employed in tracing and making roads, erecting buildings, and cutting down and preparing timber for building purposes. The officers and men have been exposed to a great many hardships, and have to "rough" it, but the climate is described as an exceedingly healthy one. At the last date the Royal Engineers were erecting a large and commodious theatre at Queensborough, then head-quarters. The surveying parties have pushed forward into the interior, and were engaged in surveying the Oregon boundary. The scenery is described as most romantic, with abundance of game on which the surveying party subsists. Everything is exceeding dear, but the men earn sufficient money to lay by 80*l.* or 100*l.* a year each, several of them having made large sums by purchasing land and reselling it.

The following alterations have recently taken place in the Royal Engineers: The 30th company, under the command of Captain W. H. Noble, removed from Shorncliffe to Dover. Colonel Burgman is ordered to proceed from Guernsey to the Mauritius. Colonel Stace, from Gosport, will succeed Colonel Burgman in the command at Guernsey. Lieut.-Colonel Dill has obtained permission to return to England from the Cape of Good Hope on sick leave. Lieut.-Colonel Nicholson, C.B., removed to Dover. Colonel Robertson, on leave from Limerick, and Captain Gordon Gray, from Aldershot. Major Du Cane, on passage to the West Indies. Captain E. M'Graine, appointed to the command of the 20th company at Swan River. Captain Wray, late of the Inspector-General of Fortifications' office, employed on special service. Lieut. Papillon, appointed to the command of the 8th company in China, vice Maitland, returned home on sick leave. Lieut. Sandford, appointed to the command of the 26th company at Bermuda, vice Captain Walker, on leave. Lieut. Grover, from Shorncliffe, ordered to the Inspector-General of Fortifications' office, London district. Lieut. Clayton, ordered for special duty; Lieuts. Engledue and Maud, ordered from Aldershott to Chatham; Lieut. Vetch, from Chatham to Shorncliffe; Lieut. Garnier, to Plymouth; Lieut. Stewart, to Guernsey; Lieuts. Davison and Moysey, on leave.

Scots Fusilier Guards. The promotion of Colonel Walker, C. B., to the rank of Major-General, causes a step without purchase in this regiment. Colonel Ridley becomes Regimental Lieut.-Colonel; Colonel Dalrymple, Major; Captain the Hon. R. Mostyn, Captain and Lieut.-Colonel; and Lieutenant Stephenson, Lieutenant and Captain.

10th Regiment, 2nd Battalion, Head-Quarters.—Four Companies, 20 officers and 400 men, are to embark at Cork in H.M.S. Urgent for the Cape. The Depôt will proceed to Plymouth to join the 11th Depôt Battalion.

13th, 2nd Battalion. A draft of 2 officers and 60 men is ordered from the Depôt at Fermoy to embark for the Cape in the Mauritius.

24th Regt. [2nd bat.]. Arrived at Portsmouth by rail from Aldershott on Saturday, the train being taken into the dockyard, the troops marched at once on board the *Urgent* for Cork. This is stated to be the first time that a train conveying troops has entered the dockyard, the custom being for the troops to leave the train at the company's station at Landport, and march through the town. The 24th marched without its ammunition. The following are the officers and the number of troops, &c., embarked:—Col. C. H. Ellice, C.B.; Major Bazalgette; Captains Glyn, Clarke, Barclay, Browne, Gaskell, Tarte, and Hitchcock; Lieuts. Franklin, Pulleine, Foott, Hallowes, Ogilvy, Farquharson, Leech, Chamberlin, Goldsmith, and Sawbridge; Ensigns Hewitt, Wardell, Airey, Paton, Hitchcock, and Bromhead; Paymaster Streatfield; Quartermaster Cusack; Surgeon Holloway; Assistant Surgeons Colohan and Hollingsworth, and two officers' wives; 37 sergeants, 17 drummers, 39 corporals, 616 privates, 50 soldiers' wives, 42 soldiers' children. Adjt. Surplice embarked with the regiment, but landed again and joined the detachment at Winchester, in consequence of orders received by telegram to that effect. The part of the regiment stationed at Winchester consists of the Honourable Major Finch, two captains, four subalterns, ten sergeants, three drummers, eight corporals, and 95 privates, with their proportion of women and children. There also remain 17 in the custody of the civil power, and two men in the garrison hospital at Portsmouth.

56th Regiment. Expected to be ordered from Belgaum to Bombay and Aden, relieving the 28th Regiment at the former place and a wing of the 57th at the latter.

57th Regiment. Relieves the 56th at Belgaum.

59th. A draft of 2 officers and 103 men from the Depôt at Athlone is to embark in the Mauritius for the Cape to join the same companies.

67th Regiment. A large draft (3 officers and 167 men) will shortly be sent from the Depôt at Athlone to the service companies in China.

87th Fusileers. The Depôt consisting of 5 officers and 175 men have arrived at Youghal from Cork, to be stationed.

91st Regiment was inspected at Kamptee by Brigadier Carthew, commanding the Nagpore forces, on the 16th of October. Two companies under Captain Lane, with a force of the Madras Artillery, are in pursuit of several bands of rebels, or robbers, in the neighbourhood of Chendwanah. Lieut. Hale and Quartermaster Patterson have leave to Europe. A Court-martial assembled at Kamptee on Oct. 29, for the trial of a Captain of the 91st, on charges preferred against him by Colonel Bertie Gordon.

CAVALRY DEPÔT, MAIDSTONE.—The depôts attached are those of the Carabineers, Inniskilling Dragoons, 12th Lancers, and 14th Light Dragoons. The last-named depôt will shortly be moved to meet the service troops of the regiment on their return from Bombay.

2nd West India Regiment. Capt. J. D. Reece and Lieut. Walshe have arrived in England from the West Indies.

MEDICAL STAFF.—Assistant-Surgeons Fraser and Kennedy have arrived in England, the former from Jamaica, and the latter from Trinidad.

The garrison of Canterbury, consisting of Depôts of the 1st, 2nd, 3rd, and 7th Dragoon Guards, 7th and 8th Hussars, 17th Lancers, Cape Mounted Rifles, and the 4th Depôt Battalion of Foot (64th, 70th, 82nd, 90th, and 98th), now numbers 2200 men. The conduct, health, and appearance of the troops are excellent. They look what they are, steady, contented soldiers, and this is due very largely to the system of management adopted by Colonel Gibsone, Commandant, and Colonel Armstrong, C.B., commanding the Depôt Battalion. The work is hard; but every indulgence is given to the well-behaved, so that each man feels that he is sure to be taken care of if he will only take care of himself. The Depôt of Cape Mounted Rifles, probably the youngest soldiers in the world (they average 15½ years), is composed of a noble set of lads, who promise to be a credit to the Service. In the barracks there are large reading-rooms well supplied with books, newspapers, periodicals, and games, and in the heart of the city a flourishing Soldiers' Institute, supported entirely by the citizens of Canterbury, between whom and the garrison a most friendly feeling exists. These resorts after work tell very effectually, and are largely attended. The Chaplain-General visited Canterbury on Monday last, and delivered a lecture in St. George's Hall, on "Great Men from Humble Life," which was exceedingly effective, and interested his auditors throughout.

THE CAMPS.

The total number of troops at present in the Aldershott division, including men on furlough, amounts to 16,000 of all arms, of which number about 13,000 are actually in camp, divided into three brigades of infantry and one of cavalry, as follows:—1st brigade (Major-Gen. Lord W. Paulett) consisting of the 1st battalion of the 11th, second of the 19th, the 58th, and Royal Elthorne Militia; 2nd brigade (in the command of which Major-Gen. Cameron is about to succeed Major-Gen. Spencer) includes the 2nd battalion of the 11th, 2nd battalion of the 18th, 2nd battalion of the 21st, and the King's Own or 1st Tower Hamlets Militia. The 3rd brigade (commanded by Major-Gen. Lawrence) consists of the 2nd battalion of the 12th Regiment, 1st battalion of the 16th, 2nd battalion of the 11th, and the 2nd or Royal Lanarkshire Militia. The cavalry brigade (Major-Gen. Lawrenson) is composed of the 18th Hussars and 5th Dragoon Guards, with two troops of Horse Artillery. With the infantry are four field batteries, with detachments of the Royal Engineers, Military Train, and a complete hospital staff—in fact, the whole *personnel* and *matériel* necessary to enable a division of 15,000 men to take the field at a moment's notice.

Colonel Bloomfield, commandant of the Colchester camp, will be absent on leave till the 10th of January, and the command has, till that period, devolved on Col. Dixon, C.B., of the 9th Depôt battalion.

Preparatory to the embarkation of a large draught of men to India early in the spring, detachments from the various depôts in Colchester camp continue to be sent to Landguard Fort for rifle practice, and the main body, under the training of Capt. Chapman of the 34th, and Capt. Swann of the 54th, have progressed satisfactorily in rifle instruction. The usual periodical inspection of General Hay, Inspector-General of Musketry, has just concluded, and that gallant officer appears highly satisfied with the efficiency of the men.

The troops at the Curragh consist of the 30th and 55th Regiments, the Kerry Militia, and a portion of the 5th Battalion of the Military Train.

Mr. Sidney Herbert has authorised an allowance of 1s. per day for recruiting services, in 1858, to each Staff Officer of Pensioners who, during that time, passed twenty approved recruits.

A circular has been issued from the Horse Guards requesting General Officers and Commanding Officers of Infantry regiments serving abroad, to state whether, in their opinion, the issue of the new leather leggings now in use by regiments at home, might be advantageously extended to the troops under their command.

The Duke of Cambridge has issued instructions to the effect that men of the Army Hospital Corps are not to be employed as servants to medical or other officers, or as orderlies or fatigue-men.

Recruiting parties have been directed in future to ask the recruit, before handing him the enlisting money, whether he is marked with the letter "D"; and no expenses will be allowed in the case of a man so marked, unless it be proved that he has denied it on being asked the question.

The Secretary of State for War and the Duke of Cambridge have issued injunctions that whenever the number of troops at a station permits, Boards of Survey should have an officer of another corps on them, and a Military Store or Commissariat officer likewise. This rule is to apply to Boards for the inspection of annual clothing, arms, equipments, &c., but not to small consignments.

Orders have been issued from the War Office to all commanding officers of artillery in the different districts to send up immediately a return of all ordnance mounted in the different forts and batteries along the coast, specifying the nature and state of each gun, with the quantity of ammunition available, and how packed and made up, whether magazines are convenient, and the quantity of ammunition in each. Orders have also been received to have a strict examination of every gun and carriage, and report the most minute defect.

Two batteries of 18-pounders, with all their equipment, have lately been sent to Pembroke Dock, and have been mounted and put together by the Hampshire Artillery. No shed having been constructed for them, the guns have been packed in Pater Battery; the perishable articles about them have been put into store. If required, and horses provided, these batteries, or any part of them, could be made ready to move with about an hour's notice.

The statement in a daily contemporary that Lieut.-Colonel Barry had gone to Paris on a mission connected with his command of a portion of the artillery destined for China, was erroneous. The artillery will be commanded by Lieut.-Colonel Crofton, with the rank of Brigadier-General, which will, we fear, scarcely give him proper weight and standing in the allied councils, as the French artillery will be under the command of a Major-General, at least, with a considerable staff. Lieut.-Colonel Barry will command one of the Armstrong batteries.

No precise time has yet been fixed for the trial of the 68-pounder on Whitworth's principle, against the 70-pounder Armstrong gun. But the challenge has been given and accepted.

In a foot-note in "My Diary in India" there is a statement in reference to the neglected condition of Havelock's resting-place in the Alumbagh, from which it might be inferred that the writer desired to impute blame to that able and active officer, Major Crommelin of the Bengal Engineers, for non-performance of the request of the general's son. Nothing could be further from his intentions. He is certain Major Crommelin knows this is true.

There appears to be a general movement of the European mind towards China and the Eastern seas. According to reports of a non-official, but reliable, character, the Duc de Brabant is exerting himself to infuse a new element into the Anti-Sinensian confederation, and is desirous of giving the Belgian army an opportunity of displaying its valour under the walls of Pekin. It is stated that the proposed force is to consist of 32 guns (4 batteries), and 8000 men. Ships are to be hired; the force is to be attached to the French; and M. Bourbel is to be Belgian Plenipo! Even bird's-nest soup may be spoiled by too many cooks.

WAR OFFICE, PALL-MALL, JAN. 3.

Royal Regiment of Artillery.

The under-mentioned Gentlemen Cadets to be Lieutenants, viz.:—

Edwin Marshall.	William Reynolds Stirke.
Charles Edmund Baker Leacock.	Pringle David Barclay.
Henry Gordon Palmer.	Henry Graves.

Thomas Jesson.	Richard Tracey Millett.
Simon Simpson.	James Lancaster Bell.
Christopher William Townsend.	Henry Edward Baines.
Francis Foster Barham.	Henry Thomas Thompson Sandes.
George Augustus Noyes.	James Robert Yule.
Henry St. John Cole Bowen.	Robert Townsend Farquhar.
Edmund Hill Wickham.	John Younger.
Robert Joseph Pratt Saunders.	Thomas Mulrenan.
Vincent Wing.	Charles John Deshon.
Seymour de Lacy Lacy.	Francis Charles Hughes Hallett.
Morton Lawrence Porter.	William Francis Nelson.
Frederick Schack.	Hugh Fife Ashley Brodie.
Henry Llewelyn Williams.	Edward Ireland.
	Richard William Chute.
	George Mackenzie Bent Hornsby.

Corps of Royal Engineers—Brevet-Major Francis Edward Cox to be Captain, vice Stokes, placed on the Seconded List.

Lieutenant Charles John Darrah to be Second Captain, vice F. E. Cox.

The under-mentioned Gentlemen Cadets to be Lieutenants, with temporary rank; viz.:—

Henry John W. Wolsteyn Gehle.	William Masterton.
Charles William Whinfield.	Reginald Frank Morris.
Studley Vidal Smith.	George Harris.
Archibald Lewis Buckle.	Louis John George Forrier.
Peter Godfrey Tarbet.	Stephen Weston Jenner.
William Henry Patten.	Arnold Charles Wallinger.
William Henry Collins.	Henry Robinson.
John Herbert Smith.	Augustin Charles Colin Mackenzie.
Albert James Hepper.	Edward Harvey.

MEMORANDUM.—The next Examination of Candidates for direct Commissions in the Army will be held on Wednesday, the 1st of February next, and following days.

WAR OFFICE, PALL MALL, JAN. 6.

Royal Regiment of Horse Guards—Charles Fitzgerald Rushout Rushout, Gent., to be Cornet, by purchase, vice Maxwell, appointed to the 15th Light Dragoons; Jan. 6.

1st Dragoons—William Wemyss Frewen Hay, Gent., to be Cornet, by purchase, vice Robert Stuart, who has retired; Jan. 6. Arthur Mesham, Gent., to be Cornet, by purchase, vice Osborne, promoted; Jan. 7.

Military Train—Ensign Henry Adams to be Lieutenant, without purchase; Lieutenant John Devine to be Adjutant, vice Thompson, who resigns the Adjutancy only; Jan. 6.

3rd Regiment of Foot—Thomas Gordon Goff Caulfield, Gent., to be Ensign, by purchase, vice Hobson, promoted; Jan. 6.

4th Foot—Gentleman Cadet John George Hepburn, from the Royal Military College, to be Ensign, without purchase, vice Durant, promoted; Dec. 31.

6th Foot—Lieutenant James Thomas Nugent to be Instructor of Musketry; Dec. 12.

8th Foot—Edward Williams, Gent., to be Ensign, by purchase, vice Bannatyne, promoted; Jan. 6.

11th Foot—Gentleman Cadet William Malo de Rune Barclay, from the Royal Military College, to be Ensign, without purchase, vice Deedes, whose appointment, as stated in the Gazette, of the 30th Dec., has been cancelled; Dec. 31. John Henry Healey, Gent., to be Ensign, by purchase, vice Price, who retires; Jan. 6.

12th Foot—James Edward Harris, Gent., to be Ensign, by purchase, vice Thomson, appointed to the 79th Foot; Jan. 6.

15th Foot.—Richard Collingwood Robinson, Gent., to be Ensign, by purchase, vice Luck, promoted; Jan. 6.

22nd Foot—Ensign Richard Nathaniel Cartwright Foll, to be Lieutenant, by purchase, vice Plunket, who retires; Jan. 6.

23rd Foot—Thomas Albin Saunders, Gent., to be Ensign, by purchase, vice Liddell, promoted; Jan. 6.

24th Foot—Philip Conolly, Gent., to be Ensign, by purchase, vice Chamberlin, promoted; Jan. 6.

25th Foot—Ensign Horace William Scriven, from the 3rd Foot, to be Ensign; Jan. 6.

28th Foot—Serjeant-Major Alfred Beere, to be Ensign, without purchase, vice Horniblow, promoted; Jan. 6.

29th Foot—The promotion of Brevet Lieutenant-Colonel John Ross Wheeler, Captain Lindsay Farringdon, Lieutenant John James Hood Gordon, and Ensign William Boycott, to be antedated to the 2nd December, 1859.

31st Foot—Ensign Andrew Hamilton, to be Lieutenant, by purchase, vice Leeson, promoted; Ensign Arthur Johnson Danyell to be Lieutenant, by purchase, vice Fairfax, promoted in the 15th Foot; Jan. 6.

35th Foot—Wilfred Tolson, Gent., to be Ensign, by purchase, vice Dillon, promoted; Jan. 6.

40th Foot—Legh Richmond Phillips, Gent., to be Ensign, by purchase, vice Lucas, promoted; Jan 6.

53rd Foot—Walter Ernest Sax Battiscombe, Gent., to be Ensign, by purchase, vice Auchinleck, promoted; Jan. 6.

57th Foot—Henry Miller Powell, Gent., to be Ensign, by purchase, vice Charles Mansfield Clarke, promoted; Jan. 6.

58th Foot—Lieutenant Robert William Archibald to be Instructor of Musketry, vice Hingeston, promoted to a Company; Dec. 17.

59th Foot—Henry Harcourt Griffiths, Gent., to be Ensign, by purchase, vice Macnamara, promoted; Jan. 6.

60th Foot—Thomas Wentworth Martin Edmunds to be Ensign, by purchase, vice Nevinson, promoted; Jan. 6.

76th Foot—Ensign Robert Davies, from the Military Train, to be Quartermaster, vice Packwood, whose appointment as stated in the Gazette of 20th December, has been cancelled; Jan. 6.

77th Foot—Charles Cæsar Welman, Gent., to be ensign, by purchase, vice Jackson, promoted; Jan. 6.

80th Foot—William Keily Westropp, Gent., to be Ensign, by purchase, vice Ridout, promoted; Jan. 6.

83rd Foot—Captain John Smith Keats, from half pay Waggon Train, to be Captain, repaying the difference, vice Sweeny, who exchanges; Lieut. Julian Wakefield to be Captain, by purchase, vice Keats, who retires; Ensign Hubert Cornish Whitlock, to be Lieutenant, by purchase, vice Wakefield; Jan. 6.

84th Foot—Lieut. Joseph H. F. Blyth, from half pay, 88th Foot, to be Lieutenant, vice Magrath, promoted in the 25th Foot; Ensign Henry Arkwright, to be Lieutenant, by purchase, vice Blyth, who retires; Jan. 6.

87th Foot—Ensign Rentone George Felix Poynter, to be Lieutenant, by purchase, vice Lynch, promoted; Jan. 6.

91st Foot—Henry Hyde Roberts, Gent., to be Ensign, by purchase, vice Hamilton promoted; Jan. 6.

92nd Foot—Ensign Robert Alexander Emmet to be Lieutenant, by purchase, vice Hunton, who retires; Jan. 6.

95th Foot—Lieutenant John Nicholas to be Instructor of Musketry, vice John North Crealock, promoted to a Company; Aug. 1.

CHAPLAINS' DEPARTMENT.

The commissions of the following Officers, as Chaplains of the Fourth Class, to bear the dates stated against their respective names, in lieu of 1st April, 1859, as stated in the Gazette of that date: The Rev. Joseph O'Dwye; April 12, 1858. The Rev. Michael Cuffe; the Rev. Thomas Moloney; Sept. 7, 1858.

BREVET.

Captain John Smith Keats, 83rd Foot, to be Major in the Army; Nov. 9, 1846.

Brevet-Major John Smith Keats, 83rd Foot, to be Lieutenant-Colonel in the Army; June 20, 1854.

MEMORANDUM.—The Christian name of Paymaster Stuart, half-pay 38th Foot, is William only, and not William T., as stated in the Gazette of March 30, 1858.

ADMIRALTY, DEC. 23.

Corps of Royal Marines—Gentleman Cadets to be Second Lieutenants—John Thomas Lye, William Menzies, Edward Martin, Charles Coates, George Farquharson Pengelly, Edward Nicol William Holbrook, the Hon. Henry Aylmer, Edmund Hicks Beach Lysons, Francis Mordaunt Shairp, William La Trobe Cockcraft, Patrick William O'Connor, Augustus James Hill, Erskine Tudor Risk, William Dutton Calder, Albert George Sidney Hawes, Nassau William Irwin Hampden; and William Henry Wells.

STATIONS OF THE BRITISH ARMY.

(Corrected up to 7th January, 1860).

[Where two places are mentioned, the last-named is that at which the Depôt is stationed.]

1st Life Guards—Windsor
2nd do.—Regent's Park
Royal Horse Guards—Hyde Park
1st Dragoon Guards—Bangalore; Canterbury
2nd do.—Lucknow; Canterbury

ROYAL MARINES.—The following Gentleman Cadets have been appointed to commissions in the corps of Royal Marine Light Infantry, and attached to the divisions named:—John Thomas Lye, to the Portsmouth division; William Menzies, to the Chatham division; Edward Martin Charles Coates, to the Portsmouth division; George Farquharson Pengelly, to the Plymouth division; Edward Nicol William Holbrook, to the Plymouth division; Honourable Henry Aylmer, to the Plymouth division; Edmund Hicks Beach Lysons, to the Woolwich division; Francis Mordaunt Shairp, to the Plymouth division; William La Trobe Cockeraft, to the Portsmouth division; Patrick William O'Connor, to the Portsmouth division; Augustus James Hill, to the Portsmouth division; Erskine Tudor Risk, to the Chatham division; William Dutton Calder, to the Chatham division; Albert George Sydney, to the Woolwich division; Nassau William Irwin Hampden Stephens, to the Portsmouth division; and William Henry Wells, to the Chatham division.

A CURIOUS COURT MARTIAL.

At a General Court Martial holden at Colombo on the 3rd November, 1859, and continued by adjournments to the 17th of the same month, of which Col. John Garvock, A.Q.M.G., was President, and Capt. John Purcell, 50th Regiment, Deputy-Judge-Advocate, Ensign Francis Pearson Murray, Ceylon Rifle Regiment, was arraigned upon the following charges, viz.—

1st charge. For conduct highly unbecoming the character of an Officer and Gentleman, in having at Colombo on or about to 21st day of June, 1859, made a statement, and thus occasioned the circulation of a Report, prejudicial to the reputation and character of his brother Officer Ensign Guy William Frederick L'Estrange, Ceylon Rifle Regiment, to the effect that up to that date, he (Ensign G. W. F. L'Estrange) had failed to meet a bill or promissory note, held by Messrs. Brodie, Bogue, & Co., for a sum of 57*l.* 10*s.*, or thereabouts, which bill or promissory note had been backed by him, Ensign Francis Pearson Murray, for his, Ensign G. W. F. L'Estrange's, accommodation, such statement being groundless and utterly false.

2nd charge. For conduct highly unbecoming the character of an Officer and a Gentleman, in having at or about the time and place specified in the first charge, borrowed money, in the following instances, on the false pretence of paying the bill referred to in the same charge, and which he, Ensign Francis Pearson Murray, stated had not been paid by Ensign G. W. F. L'Estrange, there being at that time no such bill in existence.

1*st Instance.*—In obtaining from Ensign Thos. Fletcher Roddy, C. R. Regt., or through his instrumentality, the sum of 40*l.*, under the pretext of meeting in part the bill for 57*l.* 10*s.* referred to in the first charge, and represented by Ensign Francis Pearson Murray not to have been paid by Ensign G. W. F. L'Estrange.

2*nd Instance.*—In obtaining from Mr. Roche Victoria the sum of 20*l.* professedly to complete the sum required to pay the bill referred in the first instance.

3rd Charge. For falsely stating at Colombo on or about the 15th day of September, 1859, that he, Ensign Francis Pearson Murray, Ceylon R. Regiment, had, when on leave of absence, received from Colombo, in a letter from Ensign G. W. F. L'Estrange the sum of 60*l.* in six 10*l.* notes through the Gampola Post Office, on or about 12th day of August, 1859, in repayment of a loan made by him on the 21st day of June, 1859, to Ensign G. W. F. L'Estrange, to enable him to pay the bill referred to in the first and second charges, the whole of such conduct being unbecoming the character of an Officer and a Gentleman.

To which charges the prisoner pleaded not guilty.

The Court were of opinion, that the facts alleged in the first charge—the words "For conduct highly unbecoming the character of an Officer and a Gentleman"—and "such statement being groundless and utterly false"—being excepted, were proved; but th y attached no criminality thereto, and do therefore acquit the prisoner.

With respect to the second charge, they found that the facts alleged therein — the words, "For conduct highly unbecoming the character of an Officer and a Gentleman" —and "false pretence" being excepted, had been proved; but they attach no criminality thereto.

With respect to the third charge, they acquitted the prisoner. Major-General Lockyer took exception to the finding on the first charge, whereupon the Court reassembled, and having adhered to their finding, offered the following remarks in justification.

"It seems to them that the chief point which they have been called on to determine is whether the facts alleged in the first and second charges, having been proved, any criminality in connection with them attaches to the prisoner.

The bill in question was met, the Court are well aware, on the 8th day of June, having been dishonoured on the 6th, but there is no evidence except that of Ensign L'Estrange to show that the prisoner was placed in full possession of the facts; the whole question as it appears to the Court is one having reference to the credibility of Ensign L'Estrange in a matter in which he is very nearly concerned; and after a careful deliberation of seven hours and a half, the Court arrived at the opinion that sufficient reliance is not to be placed on him, in consequence of statements on his part contradicted by other evidence, to which they attach more weight.

Under these circumstances they beg respectfully to adhere to their finding."

Ensign Murray was therefore released from arrest. Both the members of the court and Major-General Lockyer made some very strong remarks on the pernicious system of accommodation bill drawing, the latter remarking that the pay and colonial allowances were now sufficient to enable officers to subsist comfortably without having recourse to such expedients.

The following officers, who went up for admission to the Staff College last November, passed the requisite examination to the satisfaction of the Examiners, but were not successful owing to there being no vacancies beyond those filled up by the candidates heading the list:—Capt. S. S. Windham, 3rd Battalion Rifle Brigade (1296 marks); Lieut. J. Knox, 19th Regiment (1233 marks); Lieut. J. E. D. Hill, 97th Regiment (1232 marks); Lieut. H. B. Pulleine, 2nd Battalion, 24th Regiment (1178 marks); Capt. R. C. Healy, 16th Regiment (1171 marks); Lieut. W. Galbraith, 85th Light Infantry (1155 marks); Capt. Wadman, King's Dragoon Guards (921 marks); Capt. A. Dunlop, 3rd West India Regiment (851 marks). Four candidates failed, two in mathematics, one in French and mathematics, and one withdrew from the examination.

Lieut. Gould, 2nd Battalion 13th Light Infantry, has become Garrison-Adjutant at Grahamstown, vice Lieut. Marshall, Cape Mounted Rifles. Lieut. Brew, 1st West India Regiment, is acting as Garrison-Adjutant at the Gambia.

Colonel Smyth, 2nd Regiment, has been appointed Commandant of the Cape Town and Western District at the Cape, in the room of Lieut.-Colonel Burmester, 59th Regiment.

Captain M'Donnell, 4th Dragoon Guards, has been appointed an extra Aide-de-camp to H.E. the Lord Lieutenant of Ireland.

THE NAVY.

PROMOTIONS AND APPOINTMENTS.

ADMIRALTY, JAN. 2.—APPOINTMENTS.—Captain E. S. Sotheby, C.B. (1852), to the Conqueror, 101, screw steam-ship, vice Willcox, who has been superseded at his own request.

Commander P. De Saumarez, to the Dasher, 2, paddle-wheel steam-vessel, at Portsmouth, vice Hore, whose period of service has expired.

Paymaster G. J. Starr (1850) to the Nile, 90, screw steam flag-ship, at Devonport, commissioned.

Clerks H. C. T. Medder and W. H. Martin to the Nile.

Assistant-Paymaster F. D. L. Patch (1857) to the Nile.

Assistant-Clerk T. Forder to the Nile.

ADMIRALTY, JAN. 3.—APPOINTMENTS.—Captains G. E. Patey (1851) to the Cumberland, 70, at Sheerness, vice Captain Halstead, whose period of service has expired; and H. D. Rogers, C.B. (1854), to the Centurion, vice Captain Patey.

Lieutenant J. J. Gregory (1859) and W. B. A. F. Paterson to the Alacrity; F. W. Wilson (1853) to the Mersey, 40, screw steam frigate, with the Channel squadron; J. L. Trotter (1859), T. W. Chapman (1857), and W. Jardine (1855), to the Nile.

Masters J. Busden (1851) to the Mersey; C. J. Polkinghorne (1849) to the Nile; and T. Pounds to the Alacrity.

Assistant-Clerks. A. L. Lyne to the Centurion; G. Robinson to the Fisgard, 42, at Woolwich; A. Yockney and J. Oxland to the Marlborough, 131, screw steam flag-ship, Mediterranean station; W. A. Stevens to the Wellesley, 72, at Chatham; A. S. Ramsay, to the Hawke, 60, screw steam-ship, on coastguard service on the coast of Ireland; G. E. Marcon, E. Robinson, R. Harris, and H. Stembridge, to the Chesapeake, 51, screw steam frigate, East India and China station, as supernumeraries.

ADMIRALTY, JAN. 4.—APPOINTMENTS.—Lieutenants V. Williams (1856) to the Ariadne, 26, screw steam frigate, at Chatham; C. M. Le Mesurier (1856) to the Conqueror, 101, screw steam-ship, Mediterranean station; and A. Henderson (1855) to be additional to the Hogue, 60, screw steam-ship, on coastguard service at Greenock, for service in the Goshawk tender.

Chief Engineers T. Ramsay (1848) to the Nile; and F. Foreman (1854) to the Emerald, 51, screw steam frigate, with the Channel squadron.

Staff Surgeon G. D. Maclaren (1837) to the Dauntless, 31, screw steam-ship, on coastguard service at Newhaven.

Surgeons M. Thomson (1832) to the Russell, 60, screw steam-ship, on coastguard service at Falmouth; J. Bower, M.D. (1841), to the Edinburgh, 60, screw steam-ship, on coastguard service at Leith; J. Gallagher, M.D. (1846), to the Blenheim, 60, screw steam-ship, on coastguard service in Portland Roads; and T. Nelson, M.D. (1849), to the Pembroke, 60, screw steam-ship, on coastguard service at Harwich.

First Class Assistant-Engineers E. J. B. Bird to the Nile; and E. Lilley to the Conqueror.

Third Class Assistant-Engineer F. F. Sutton to the Nile.

Acting Third Class Assistant-Engineers J. Gibson to the Nile; and S. G. Hill to the Asia, 84, at Portsmouth, as supernumerary.

Clerk C. H. Stone to the Britannia, 120, training-ship, at Portsmouth.

ADMIRALTY, JAN. 5.—APPOINTMENTS.—Commander G. T. M. Purvis (1854), to be inspecting commander in the Coast Guard Service, vice Mackenzie, appointed to the Nile.

Staff-Surgeon T. W. Jewell (1838), to the Pembroke.

Surgeons Dr. J. W. Reid, M.D. (1854), to the Nile; R. Pottinger (1847), to the Neptune; T. Nelson, M.D. (1849), and C. M'Shane (1855), to the Fisgard, 42, at Woolwich.

Midshipman C. M'Laughlin, to the Ariadne.

Master's Assistant W. W. Anderson, to the Nile.

Assistant Paymaster F. O. L. Patch (1857), to be secretary's clerk in the Impregnable, 104, flag-ship, at Devonport.

Naval Cadets J. Marshall, D. C. Harris, F. F. Liardet, and J. Evans, to the Nile; A. FitzGeorge, to the Royal Albert, 121, screw steam-ship, with the Channel squadron; T. L. Mallony, P. Hast, W. H. Henderson, and J. Bedingfield, to the Nile, as supernumeraries for disposal; R. F. Warden and W. S. Lee, to the Diadem, 32, screw steam-frigate, with the Channel squadron; J. S. Alexander and J. E. Greenhow, to the Mars, 80, screw steam-ship, at Portsmouth; L. B. Crosbie and E. G. Hulton, to the Edgar, 91, screw steam flag-ship, for particular service; G. A. Ellis, J. H. O'Brien, and J. W. L. Jeckyll to the Queen, 86, screw steam-ship, at Sheerness; N. Byng, J. H. E. Parker, H. Russell, E. S. Nuthall, A. P. Whipham, R. B. Pipon, P. Aldrick, C. V. Anson, R. J. Hughes, G. H. Alcock, W. L. Bamber, and J. S. Brome, to the Marlborough, 131, screw steam-ship, Mediterranean station, as supernumeraries for disposal.

ADMIRALTY, JAN. 6TH.—W. B. A. F. Paterson to the Cumberland. Master.—W. H. Parker to the Emerald. Second Master.—Charles W. Ross to the Supply. Paymaster.—W. E. L. Neale, additional, to the Wellington. Assistant Surgeons.—W. C. Fairbairn, additional, to the Impregnable: Stephen Sweatman confirmed to the Archer. Acting Assistant Surgeons.—Dr. M. J. Rahilly to the Gladiator; Wm. McCombie to the Imaum; J. F. Kensey to the Renown.

Lieutenant William Melancthon Sanctuary (1854), acting-mate of the Queen, 116, in the Mediterranean, where he was wounded, and lieutenant of the Waterloo, flag-ship at Sheerness, from January, 1857, to 1859, to be commander on the reserved half-pay list, vice Lloyd. Commander Sanctuary has received for his valuable services in the Russian war the silver naval medal, and a pension for wounds. He was also promoted to be lieutenant, and rewarded with the Legion of Honour and the Medjidie.

Ardent, 3, Commander Parish, at Plymouth, having been repaired, will proceed shortly to South America.

The Basilisk, 6 paddle, Commander George A. Phayre, arrived at Spithead on Tuesday morning from Jamaica, from which she sailed on the 26th of November, and has since come round to Sheerness. She brings home 12 seamen volunteers from merchant vessels on the station. Captain Phayre reports having experienced terrific weather off the Western Islands.

Calypso, 18, sailing, Captain Frederick B. Montresor.—A letter received, bearing date Port La Union, Central America, 28th November, 1859, states that the admiral was still at Vancouver's Island by last advices. "We are on the coast of Central America, attending on Mr. Whyke, the minister extraordinary. He expects to finish his mission about the beginning of the year, when I imagine we shall proceed to Valparaiso, which we have not visited for some eighteen months, but no one knows for certain. The Alert, 7, screw, Commander William A. R. Pearse, is ordered again to Panama."

Castor, 36, one of the three vessels selected by the Admiralty from the fleet lying in ordinary at Chatham, to be used as training ships for the Naval Coast Volunteers, has been brought up to Chatham Dockyard from the ordinary, to be fitted and brought forward for the service for which she is intended. She will be supplied with only her maindeck guns, as the whole of her armament will not be required. It is intended for the Castor to be stationed in the Thames, and as soon as she has been completed, the Trincomalee, 24, and the Brilliant, 20, will be towed from Gillingham Reach to Chatham Dockyard to be made ready and supplied with their heavy guns, both those vessels being ordered to be fitted for the same service.

Charybdis, 21, screw corvette, being fitted at Chatham for the first division of the steam reserve, has taken on board her armament, and is now shipping her shot, shell, and other stores required for that service.

Emerald, 51, screw, Captain Cumming, was paid wage at Plymouth on Monday last. The orders for granting leave to her crew at that port have been countermanded, and the ship will proceed to Portsmouth, when the crew will be granted leave, most of them being east countrymen.

Enterprise, 4, Arctic discovery ship, which has been employed in harbour duty as a coal depôt at Sheerness, has been brought up from that port to Chatham to be placed in ordinary. It is intended to break this vessel up.

Espoir. Arrangements are now completed for the launch of this splendid little gun-vessel from No. 6 dip at Pembroke yard. The launch will take place to-day. Her armament will consist of one 68-pounder, 95 cwt., pivot gun, 10 feet in length, and four 24-pounder howitzers. The keel of a precisely similar vessel, to be named the Nimble, has also been laid down in the same yard, and will be brought forward with all possible despatch.

Euryalus, 51. Letters for this ship at Malta, 31st ult., report that she was to leave next day for Palermo on her way home, and she would be at Leghorn about 15th inst., and Gibraltar about 5th Feb. The officers and crew had been keeping their Christmas, — the latter remembering very warmly their old friend the Viceroy of Egypt, who had provided liberally for their comforts when at Alexandria. Her Majesty the Queen had sent out a first-rate dinner for the gun-room mess from Windsor.

Galatea, 26, in dock at Chatham, being fitted for the steam reserve, has a large number of artificers employed on her, and, although she has only been docked but a short time, great progress is making in completing her for that service.

Gladiator, Captain Hickley, merely touched at St. Thomas's, and was infected with yellow fever, of which she only freed herself (not without loss) by a sudden return to Halifax, Nova Scotia. The crew contracted the disease at St. Thomas's, although she only remained there a very short time, and selected her own anchorage at a distance from the coaling wharf.

Himalaya, Captain John Seccombe, has commenced the embarkation of the Armstrong guns, &c., some time under orders for China. According to present arrangements her powerful cargo of men and stores will be conveyed from Woolwich to Purfleet, where she has been moored, from the presumption that her progress further up the river might be attended with danger, and where all her cargo is being taken in. The entire cargo is stated to be between 2000 and 3000 tons. The Himalaya is ordered to be in readiness for sea on or about the 15th inst. Letters complaining of the trying position in which they were recently placed have reached Plymouth from some of the crew of the Himalaya. The men complain that they were detained for eight days idle in the Sound within sight of their homes, where their families had to "enjoy" Christmas separated from them, because the ship was under what is termed "sailing orders" for a foreign post.

Howe. This magnificent three-decker, pierced for 121 guns, now in course of construction at Pembroke Dockyard, is so nearly completed that she will be ready by March next, and will be launched in the early part of the spring. The following are the chief dimensions of this first-rate, which is the largest vessel of her rating in the navy, viz.: Length over all, 300 feet; Ditto between perpendicular, 260; Ditto of keel, for tonnage, 220; Breadth, extreme, 61; Ditto for tonnage, 60 feet, 2 inches; Ditto moulded, 59 feet, 4 inches; Burthen in tons, 4236. The Howe is the same length as the Victoria, recently launched at Portsmouth, but is of greater beam, and is also of heavier burthen by 110 tons.

Hydra, 6, paddle, Commander Hamilton, left Devonport on Monday evening, for the West Indies.

Icarus, 11, screw, Commander Salmon (promoted for distinguished services out of Shannon, 51, screw, in India), arrived at Spithead on Tuesday morning from the eastward, having been five days and a-half knocking about in the Channel and experiencing most terrific weather. The ship behaved exceedingly well under all circumstances. She saluted the flag of the commander-in-chief, which compliment was duly acknowledged by the flag-ship Victory.

The Immortalité, 51, screw, commenced taking in her boilers under the steam crane in the steam-basin at Portsmouth. The four boilers weigh nearly 107 tons.

Lynx, a letter from H.M.S. Lynx, dated Zamibou, Oct. 23, says:—"On our arrival here we found a war going on between the Sultan and his brother, the latter having possession of the town. The Assaye steam frigate lying here landed here 100 men, and we landed 50, with a gun and rockets, under Lieutenant Barclay, the whole forming a field detachment. The rebels were driven out of the town, and the Sultan's brother taken prisoner. He has been conveyed in the Assaye to Muscat."

Nile, 90, Devonport, has been commissioned by Capt. E. K. Barnard (1857). Commander J. F. C. Mackenzie has also been appointed to this ship, which is selected as the flag-ship of Rear-Admiral Milne, K.C.B., the newly-appointed commander-in-chief in North America and the West Indies. Chief Engineer Mr. Thomas Ramsay. She is to have a complement of 830 officers and men.

Prince of Wales, 131. A large number of hands are employed on this ship to prepare her for launching in the course of the month.

Queen Charlotte, 104, old sailing-ship, is about to take the place of the Excellent, gunnery ship, at Portsmouth, Capt. Hewlett, C.B., the crew of the latter ship being transferred to her. The Queen Charlotte will henceforth bear the name of the Excellent.

The Rhadamanthus, Master-Commander Pullen, arrived at Portsmouth yesterday, with machinery, &c.

Sanspareil, 70, Devonport. Capt. A. P. E. Wilmot (1854) has commissioned this ship, and the following appointments have been made:—Chief Engineer, William Pitt (1858); Second Class Engineers, Jeremiah Lloyd and John A. Kitt (acting); Third Class Engineers, G. W. Robins and W. Frazer (acting).

Valorous left Greytown for Jamaica on the 22nd of November, but returned to Aspinwall on the 2nd of December, for a fresh supply of coals, not being able to reach Jamaica with the quantity she had on board, having encountered very strong breezes from the north-east, with a foul head-wind, to within 145 miles of the island, when she was put under sail (double-reefed topsails and courses) to try to beat up, but being unable, bore up for Aspinwall on the 30th. Valorous left Aspinwall for Jamaica on the 30th.

The following ships have been chartered by the War Department to receive military stores:—the Young Marquis, the Storm Nymph, the May Sprout, the Cherub, and the Iris; the Llewellyn and Jabez; the Palestine, for Barbadoes; and the Biton.

A court of inquiry is about to be held at the Royal Clarence Victualling-yard, Gosport, to investigate certain alleged irregularities in the supply of cattle for the use of the navy by the contractor. The court will comprise the Comptroller of the Victualling Department of the Navy and Captain Superintendent Hastings, assisted by W. J. Hollyer, Esq., the Deputy-Judge-Advocate of the Fleet, on the part of the Admiralty.

A dismasted Danish schooner, coal-laden, having sought refuge in Plymouth Sound on Sunday morning, the Royal Albert signalled Port Admiral Sir B. Reynolds, who instantly ordered steam to be got up on board the Hydra. Meantime the Royal Albert's launch went into Cawsand Bay to the disabled vessel, and she ultimately obtained shelter in Catwater.

A court-martial assembled on board the Victory flag-ship at Portsmouth on Monday, to try Lieutenant Thomas Woore Simeon, of the Perseverance, for acting in a manner unbecoming the character of an officer and a gentleman, by falsely stating to Mr. W. T. Wilson, the surgeon of the Perseverance, that a claim which Mr. Watkins, the landlord of the Commercial Hotel at Portsea, then had upon him, was a claim upon him by a creditor in London, from whom he had not expected so sudden a call (as the debt was of recent date), which statement the said lieutenant knew at the time he made it to be false, but upon the faith of which statement Mr. Wilson consented to become responsible for or on behalf of the prisoner, in respect or on account of such claim. The court was composed of Captains Gordon (president), Harris, Farquhar, Hewlett, Hillyar, and Ewart. The court found the charge not proved, and therefore acquitted the prisoner.

The Lords of the Admiralty have directed a number of pieces of timber, belonging to the old frigate Shannon, lately broken up at Chatham dockyard, to be forwarded to Somerset House to be preserved in the model-room of the Admiralty, where they will be converted into blocks and stands for the various models, in order to be kept as relics of that famous old frigate. A considerable quantity of the timber has been sent to Portsmouth to be used at that dockyard, most of the timbers being as sound as they were when the frigate was built.

Each of the crew of the Fox has been presented by Lady Franklin with an elegant silver watch, valued at 10*l.*, bearing a suitable inscription on the outer case, surmounted by an engraving representing the Fox in full sail.

The Council of India have taken up the following ships for the conveyance of Government stores to India, viz.:—the Liverpool, 1454 tons; the Earl of Eglinton, 1274 tons; the Camperdown, 993 tons; and the Ardbeg, 925 tons, all for Calcutta; the Howden, 1122 tons, for Bombay; and the Helvellyn, 1017 tons, for Madras.

The annual competitive examination for apprentices in Chatham Dockyard has just been completed, when the number of candidates who presented themselves for entry was 40, the selection being made by the Admiralty.

The recent Admiralty circular in reference to the repair of ships' defects by the assistant-engineer is, with extra cheque pay attached to its performance, resented by some of that body as derogatory to their class; but it appears to us that those who do so, place an erroneous construction on the words of the circular. It does not seem to be intended as compulsory. The extra pay should be given to those who perform work beyond that included in their original engagement, whether it be performed on board their own ships or therwi se.

Brigadier Sir Richard La Saussaye, who commanded the first Spanish brigade that landed in Morocco, and who has displayed military skill and conspicuous gallantry in the various affairs that have since taken place, has been raised to the rank of Major-General. General La Saussaye is an Irishman, and was formerly in the Spanish Royal Guard, when that *corps d'élite* existed. He is brother to Sir Matthew Sausse, Chief Justice of Bombay.

Woodcock, 2, sc. gunboat, Lieut.-Com. G. S. Bosanquet, 1855, East Indies.
Wrangler, 4, sc., Lieut.-Com. R. J. Douglas, 1853, particular service.

To the Editor of the ARMY AND NAVY GAZETTE.

SIR,—My *penchant* for the sister service often leads me to spin a yarn with the veteran Blue-jackets of the Coast Guard contiguous to my residence, and I gather from them, one and all, but the same expression of sympathy at the fate of the 108 *Princess Royal* prisoners, and a professional regret at the untowardness of such an occurrence, just now especially, when seamen are so much sought after, and on the very eve too of the operation of a new incentive to enlistment, in the Naval Reserve Admiralty Order.

When a grievance, real or imaginary, gets possession of the minds of a crew, or a regiment, it surely is not prudent, or judicious, to batten the former down under hatches, or confine the latter to barracks *en masse* indiscriminately, as is the custom, but too often? For fermentation, like steam in a boiler, becomes only the more dangerous from being confined and compressed; but, to weight the safety-valve, and then sit on it too, becomes only the reckless engineer of a racing Mississippi steamer.

Why is a ship's crew debarred the great boon accorded to the army, of making their complaints *personally* to the actual admiral of the port, or station, by being drawn up as a body, like a regiment is, *twice a year*, before the Inspecting General Officer, and being encouragingly asked by him —"Men, have you *any complaints* to make? If so, I am here to receive them."

How many martinets have been checked in the army by the knowledge that such a day of reckoning was awaiting them, like the sword of Damocles suspended threateningly over their heads.

I am, Sir, truly yours,
PHILORTHOS.

THE MILITIA.

A correspondent directs attention to the manner in which the Militia are at present "neglected," and he observes truly that if there really be a "danger of invasion," the whole of the Militia should be called out, instead of a few skeleton battalions being incoporated for 21 days' drill. The fact is, however, that it is only in case of invasion being imminent, or very likely, or of such a war abroad as would require us to assume an attitude of armed attention, or as would denude the United Kingdom and Ireland of regulars, that the Militia should be universally and even very largely embodied. It is a perversion of their uses to call Militia regiments out for several years, and to make them in effect battalions of the line in time of peace. But it is equally unadvisable to allow the mass of the Militia to fall into a state of inanition or decay. There are, in fact, very few regiments of Militia which can be kept up to their strength, or indeed to more than one-half of their proper force—make every possible allowance that you will for the deficiencies of supply inherent in a Volunteer system. In a Welsh county the other day, the county regiment called out for 21 days' drill, mustered just 150—less than a company of most European formations, when they should have been at least 800 strong. Some enthusiastic "Volunteers" are demanding the ballot, on the ground that young men would join the Frieschutz to escape the Militia, but that is a very poor argument. It is evident that the Militia in their present condition are not at all in the state of the force which did such good service in the last war. But though the Volunteer movement shows that the people desire to resist invasion; though some assert its probability, and all admit its possibility; the action of Government by no means indicates apprehension of any immediate or approximating danger of the sort. In the days of the old panic, which was justified by gigantic preparations to fulfil a deliberate menace, all the carts and waggons on the coast were numbered by order of Government, and the owners were directed to load them with the women and children, and drive them into the interior, on the appearance of a hostile force: the cattle, sheep, and horses were also to be driven away, and provisions and corn-stacks, &c., to be burned and destroyed, thus in some degree anticipating the miseries of invasion, by accepting the attempt as a certain and accomplished fact. One may put up a lightning-conductor without being liable to an accusation of timidity, but if he flings his bed out of window because there is a look of thunder in the air, he will scarce escape the whipping of his neighbours' tongues. Up with your conductors by all means, but keep your beds in-doors till the fire is declared.

2nd Surrey, Captain Pope, half-pay, 6th Foot, has been appointed Adjutant of the Corps. Captain Pope was for some time in command of the invalid depôt at Chatham.

Norfolk Artillery. The Honorary Colonelcy of this regiment vacant by the death of Lord Hastings is not likely to be filled up. Lieut.-Col. Astley commands the corps.

Antrim Artillery. A general Court-martial has been ordered to assemble at Shorncliffe, for the trial of 1st Lieut. Joseph W. O'Donnell of this corps.

Durham Artillery are under orders to remove on the 10th inst. from Fort Gomer to the Isle of Wight. On the 11th inst. one wing will proceed on duty to detached forts. The head-quarters to be at Parkhurst.

Waterford Artillery will remove from Haslar, and occupy quarters vacated by the Durham.

Tipperary Artillery remove from detached forts in the Isle of Wight, and occupy quarters vacated by the Waterford.

1st Regiment of Royal Cheshire Militia—John Orred, Gent., to be Lieutenant, vice Hicks, resigned; Dec. 20.

King's Own Light Infantry Regiment of Militia—Arthur Ussher, late a Lieutenant in the Waterford Artillery, to be Lieutenant, vice Hamilton, promoted; Dec. 28.

1st Regiment of the Royal Surrey Militia—Lieut.-Colonel George Palmer Evelyn to be Lieut.-Colonel Commandant; Dec. 31.

South Mayo Rifles—The Lieut.-Colonelcy of this regiment has become vacant by the death of Lieut.-Colonel J. R. Palmer, formerly of the 17th Lancers.

Worcestershire Militia.—2nd Regiment.—Benjamin Elliott Ogle, Gent., to be Ensign, vice James Sattherthwaite Rudd, promoted; Dec. 27.

1st Regiment of King's Own Staffordshire Militia—James Wilkinson, Gent., to be Ensign, vice Gatehouse, promoted; Dec. 30.

East Kent Regiment of Militia—George Taddy Hatfield, Gent., to be Ensign, vice Coventry, promoted; Dec. 31.

2nd Regiment of Royal Cheshire Militia — Lieutenant James Taylor has been removed from the strength of the regiment, being absent without leave.

YEOMANRY.

2d Regiment Royal Bucks Yeomanry Cavalry—Henry Collingwood Ibbetson, Gent., to be Cornet, vice Charles Powell, promoted; Augustus Shakespear Oliver Massey, Gent., to be Cornet, vice Philip Chetwode Browne, promoted.

The Staff of the 12th Brigade of Royal Artillery are ordered to proceed to the head-quarters of the brigade, at the Mauritius, on Wednesday next. The officers comprising the staff are—Lieut.-Colonels Turner, C.B.; J. N. A. Fresse, C.B.; and Cockburn; Colonels P. Benn; and J. M'Coy. Adjutant Le Mesurier, C.B.; Quartermaster Keating, and Surgeon Prothero.

VOLUNTEERS.

LONDON RIFLE BRIGADE.

At a Court of Lieutenancy held on Monday letters were read from the Secretary at War conveying her Majesty's approval of Captain Montague Hicks (governor of Whitecross Street Prison) as Lieut.-Colonel, and of Mr. Henry Wilkes Masterton as Captain of the London Rifle Brigade. It was forthwith resolved that the commission of Lieut.-Colonel should be signed for Captain Hicks, which was done accordingly. Before the close of the day he was sworn into office, together with Captain Allen. With regard to Mr. H. W. Masterton a long discussion took place, from which it appeared that that gentleman, although recommended for a commission by the council of the Brigade, had been seen neither by that body nor by the Committee of Lieutenancy, to whom it had been referred to inquire into the qualifications and respectability of the candidates for commissions; that he had never been present at drill or performed any duty with the brigade, and that he was only known to one commissioner. The confirmation of his appointment was therefore postponed by the unanimous decision of the court.

CAMBRIDGESHIRE.

2nd Company Wisbeck or Cambridgeshire (Rifles), formed, 22nd December, 1859. Officers: J. D. Fryer, Captain; F. Jackson, Lieutenant; R. Young, Ensign; F. Fawssett, Honorary Surgeon. 5th Company Warwickshire. Uniform as above.

6th Company Warwickshire. Effectives, 100. Uniform as above.

7th Company Warwickshire. Uniform as above.

8th Company Warwickshire. Uniform as above.

YORKSHIRE.

1st Subdivision Yorkshire, West Riding (Rifles), formed 12th September, 1859. Officers: Walter Morrison, Captain; John Ingleby, Ensign. Effectives, 43; honorary, 15. Subscriptions, 331*l.* Forward in rifle practice. Uniform: silver grey, with black facings, scarlet collar and cuffs; forage cap with bronze ornaments; Knickerbocker trowsers, with black leather gaiters. Accoutrements: common brown leather belt, &c.; support sword-bayonet, two cartridge boxes, and cap-pouch; no cross-belt.

Undaunted by the defective state of the law, which bars all parties in Ireland from participating in the volunteer movement, the people of Cork are about making an experiment with a view of bringing the matter to an issue. A local paper (*The Constitution*) states that preparations are making for the formation of a rifle corps for the city and county, and the parties promoting it intend immediately placing themselves in communication with the authorities, in order that the necessary powers may be obtained to carry out the object. It is added that the Mayor of Cork has signified his readiness to subscribe 1000*l.* towards the expenses, and donations to a very large amount have been promised in case the corps is established.

SIR DE LACY EVANS ON THE VOLUNTEER MOVEMENT.

Sir De Lacy Evans has sent the following letter to Captain Kennicot, the Mayor of Folkestone, with a cheque for twenty guineas. "I was very glad to hear that volunteer artillery and rifle training progresses so satisfactorily in your mayoralty; both will be useful, but it is evident that on the sea coast defence by cannon would come first into requisition. In my humble opinion, if by any want of consideration the stalwart and loyal, though of humble means, be excluded from this voluntary armament, the high value and importance of the movement, as contributory to the national safety, will be seriously diminished. But I have been chiefly induced to offer some few remarks by the published letter of your county member, Mr. Deedes, which reflects such credit on his foresight, knowledge of the subject, and public spirit. He, in fact, remonstrates with those he represents, on their previous apparent apathy as to these preparations; and not without reason; for, strange to say, the northern and central portions of the kingdom are far more advanced in their exertions than the maritime counties; for it is certain that if an enemy should effect a landing in force on our shores, it is these latter which, from first to last, will have to bear the chief brunt and calamities of the war. It is through the maritime districts, reaching as they do from the metropolis to the coast, that must lay, technically speaking, the lines of communication of the hostile forces. These are, in fact, the roads and tracts of country along which the contending troops advance or retreat, bringing up their supplies, &c. Of the disasters, miseries, and spoil which befel the inhabitants of districts thus exposed, the pages of Mr. Russell, respecting the recent operations in the Crimea, those of Napier, M. Thiers, and other narrators of the Peninsular War, contain deplorable but authentic details. Now, Kent and Essex are perhaps peculiarly thus situated. As for Kent, we have unfortunately the best authority for the belief that it has been indulging to the most regretable extent in a false security. But the bowmen of Kent were, in ancient times, distinguished in well-fought fields by their skill as marksmen. You have in your county one of the best schools in Europe for instruction in the use of the small

Digitized by Google

arms of precision of the present day. There are facilities also for the practice of ordnance of various calibres along your whole coast. I will venture to hope, therefore, that our modern men of Kent will rapidly recover the time that has been lost, and if conflict should occur, will prove themselves not unworthy of their ancestors."

WAR OFFICE, PALL MALL, JAN. 3.

Kent Rifle Volunteers—8th Company—John Scott Russell, Esq., to be Captain; James Hiscutt Crossman, Gent., to be Lieutenant; William Morphew, Gent., to be Ensign; Dec. 22.

Royal Mid-Lothian or Edinburgh Yeomanry Cavalry—James Turnbull, Gent., to be Cornet, vice William Roy, deceased; July 20.

Mid-Lothian Coast Artillery Volunteer Corps, or First Division of the Artillery Volunteer Force in the County of Edinburgh—Sir James Gardiner Baird, Bart., to be Major-Commandant; Dec. 16. 1st Company—W. A. Parker, Esq., to be Captain; Sept. 16. William Durelp Bentley, Gent., to be First Lieutenant; J. C. Graeam, Gent., to be Second Lieutenant; Nov. 17. 2nd Company—George Tod, Esq., to be Captain; D. Clenie Gregor, Gent., to be First Lieutenant; William Watson, Gent., to be Second Lieutenant; Nov. 17. 3rd Company—Frederick Hayne Carter, Esq., to be Captain; George Rowland, Gent., late Captain Edinburgh City Artillery Militia, to be First Lieutenant; Alexander Edmonstone, Gent., to be Second Lieutenant; Nov. 17. 4th Company—David Craig, Esq., to be Captain; Allan Livingstone, Gent., to be First Lieutenant; Henry Harrison, Gent., to be Second Lieutenant; Nov. 15.

Leith Rifle Volunteer Corps.—Henry Hawker Arnaud, Esq., to be Major-Commandant; Dec. 6. To be Captains—Donald Robert Macgregor, Esq.; William Marjoribanks, Esq.; John Gillon, junior, Esq.; Andrew Fyffe Kedslie, Esq.; Dec. 6. To be Lieutenants—William Strachan Gavin, Gent.; George Barclay, Gent.; Alexander Tod, Gent.; William Henry, Gent.; Dec. 6. To be Ensigns—James Smith, Gent.; James Thomas Hardie, Gent.; James Lawrence Boyd, Gent.; John Kidd, Gent.; Dec. 6.

1st Company Renfrewshire Artillery Volunteers—John Scott, Gent., to be Captain; Adam Leitch, Gent., to be First Lieutenant; Robert Sinclair Scott, Gent., to be Second Lieutenant; Jan. 2.

Cambridgeshire Rifle Volunteers—2d Company—Frederick Daniel Fryer, Esq., to be Captain; Francis Jackson, Esq., to be Lieutenant; Richard Young, Esq., to be Ensign; Jan. 2.

2nd Company of the Monmouthshire Volunteer Rifle Corps (called the 1st Pontypool)—Richard Bean Roden, Esq., to be Captain; William Bailey Hankins, Gent., to be Lieutenant; Henry Tothill, Gent., to be Ensign; Dec. 31.

2nd Lancashire Artillery Volunteers—Alfred Bright, Gent., to be first Lieutenant; Dec. 31.

Warwickshire Rifle Volunteers—2nd Company—Richard Caldicott, junr., Gent., to be Ensign; Jan. 2.

London Rifle Volunteer Brigade—George Montagu Hicks, late Captain 41st (The Welsh) Regiment, to be Lieutenant-Colonel; Dec. 30.

1st Company of Dorset Artillery Volunteers—Frederick Hinton, Gent., to be Captain; John George Sarsfield Macnamara Moore, Gent., to be First Lieutenant; George Cartwright, Gent., to be Second Lieutenant; Dec. 29.

6th Company of Staffordshire Rifle Volunteers—Richard Edwards, Esq., to be Captain; Gilbert Elliot, Esq., to be Lieutenant; William Baker, Esq., to be Ensign; Dec. 28.

1st Company of Cheshire Artillery Volunteers—George Harrison, Esq., to be Captain; Dec. 30.

1st Company of Norfolk Artillery Volunteers—John Stephenson, Esq., M.D., to be Honorary Surgeon; Jan. 3.

MILITARY ORGANISATION.

The accomplished gentleman who wrote letters to the *Times* from the head-quarters of the French army during the late Italian war, has written in the columns of our contemporary some articles on Military organisation, the substance of which we reproduce.

After forty years of peace the four out of the five great powers of Europe have, within a short period, been called upon to display their military resources on a large scale. Of these, three broke down—England and Russia in the Crimea, Austria in Northern Italy. France alone has stood the test on two great occasions, each presenting circumstances entirely different. Her organisation proved good in a long siege, carried on at 2000 miles from her shores, and it proved itself efficient in a short and brilliant campaign in the open field. These two occasions offered almost every species of trial to which an army can be subject,—camping out in a severe winter on an inhospitable shore, subject to all kinds of privations, forced marches under an Italian sun, tedious trench duties and road-making, brilliant attacks and obstinate defences; and through all these trials the French army passed successfully enough to ensure ultimate victory. Inquiring into the causes of this enviable superiority, he goes back to the close of the great war in 1815. There the victors lay down on their laurels full of the consciousness of their superiority, and lulled by the sweet hope of having attained the greatest amount of perfection in their military organisation. With the conquered it was exactly the reverse. Adversity had not instructed them in vain. They began to overhaul their system, and though a reaction against Napoleonic institutions naturally animated those in power, that feeling was only practically manifested to the extent of remodelling the Napoleonic system so as to bring it into harmony with the necessities of the situation. From that he comes to the year 1830, "which," he says, "is the starting point of the present French army, and since that time there is scarcely one single thing, either in arms, accoutrements, manœuvres, system of promotion, organisation, or administration of the different branches of the service, which has not been thoroughly remodelled or altogether changed. These last thirty years were one continual study to make the single soldier, as well as the whole system, efficient. Inventions were made to supply deficiencies, chance discoveries were applied to useful purposes; the great advance in mechanics, industry, and manufacture was put into requisition; improvements made by other nations were studied, adopted, and perfected." He gives instances of these improvements and their origin. The fatigues, heat, and bivouacs of Algeria soon convinced the French military authorities of the absurdity of encasing the soldier in clothes which do not allow the free action of every limb, and we see the result of this conviction in the loose trowsers and the comfortable capote of the French soldier. Means of transport is a great difficulty in all campaigns, but more especially against Arabs and Kabyles. Instead, therefore, of starting from the premiss that such and such means of transport were required for the soldier, the soldier has been taught to carry everything which he wants. It was found that the *vin ordinaire* of La Belle France was injurious in the climate of Algeria, and that the natives used coffee as a stimulant. It was tried, and found to answer. The Arabs were no match for the regular French soldier, but it was often difficult to reach them. They made up by quickness what they wanted in steadiness. The War Ministry stooped down to learn from them how to fight in loose order, and make the most of individual strength and agility, as well as of the obstacles of the ground. His concluding moral is, that what he considers to be the French superiority lies in the application of a very few principles applicable to all countries, not excepting our own. The first of these is that the military systems of standing armies, like everything else, have to follow the spirit of the age, and that the race in this matter belongs to the swiftest. That our age, which is so often accused of materialism and egotism, has given a value to the individual, as such, which he never possessed before; that consequently it would be folly to keep up the machine system, which was formerly the pattern of standing armies. That in this age of wonderful material development the military systems ought to take advantage of all the newest improvements in this respect. That in this age of easy communication and rapid intercourse between nations each ought to look about and profit by the skill or follies of the others. That this ought to lead, not to imitation, but to emulation; it ought to stimulate invention, and thus develop the particular genius of each by the proper application of the improvements devised by the others. That in a system, military or any other, there must be harmony, and that if one essential part be changed, the others must be modified likewise.

In a second letter he dwells at length upon the Rifle as an institution to which everything else must be brought into harmony, if not subordination, and in this respect, notwithstanding his strong admiration for French military organisation, he speaks hopefully of England:—"She has sought and introduced the most perfect rifle hitherto invented, and is now intent on making her soldiers worthy of their weapon. And in this respect England is already at the head of all others, for she is the first, and hitherto the only one, who has made rifle shooting the object of the systematic education of the infantry soldier. But there it has remained for the present. It has not yet been understood that the rifle is a revolution in and subversion of the old system, and that with the rifle everything else must be reformed and brought into harmony;—that the movements meant for old Brown Bess are ineffective and dangerous in an age of rifles; that a soldier educated as a machine will wield it only imperfectly; that he must have the greatest amount of bodily health, strength, and agility; that he must be trained and clothed accordingly; that in this utilitarian age even soldiers' dresses must be calculated on usefulness rather than ornament; that the command and administration must follow in the same direction,—less routine and fewer councils, but more independent action and responsibilities."

In a third letter, the same correspondent dwells forcibly on the necessity of disencumbering the soldier. "Now that he is given a beautiful weapon and taught to use his faculties to make it formidable in his hands, he feels every moment his efficiency is impaired by every incumbrance which impedes the free movement of his body." He is careful, however, to inculcate that "this individual development does not mean that the British soldier should become a Bashi-Bazouk,—every one for himself and no one for all; on the contrary, the more the principle is adhered to, the more easily disciplined and guided will be the soldier."

COURT-MARTIAL AT MALTA.

On the 1st November last, Quartermaster G. Pittendrigh, of the 21st Battalion 3rd Foot, was tried by general court-martial on two charges preferred against him by Lieut.-Colonel Maude, C.B.—the first of which charges was grave, being for culpable neglect in having, at Malta, in the month of September, 1858, laid before his superior officer, Lieut.-Colonel Maude, for signature, a camp equipment return, dated 1st September, 1858, which was certified by him as quartermaster to be correct, but which he knew to be false. The prosecution, which was supported by the evidence of Colonel Maude, Captain Burnside, and Ensign Jackson, and the defence, occupied three days. The prisoner was assisted by Dr. Sciortino and Mr. Page. For the defence, before entering into a refutation of the charges brought against the prisoner, objection was made to the admissibility and legality of the first charge for which he was arraigned. It was contended in writing that no such charge as the one made could be based on the articles of war which should guide the Court. For article 93, which it appeared the prosecutor chiefly invoked against the prisoner, says that—"Who shall intentionally give in any false return whatsoever of arms, ammunition, clothing, money, stores, or any provisions belonging to us, or for the use of our forces, &c., shall, if an officer, on conviction of any one of the aforesaid offences be cashiered."—How then could the prosecutor alter the article by leaving out the word "intentionally," which is expressly mentioned, and substituting "culpable neglect"? The words "culpable neglect" could not be made to supplant the word "intentionally" used in article 93, regarding a return of clothing. On these and other grounds the prisoner submitted to the Court that the charge, as made, had no standing in the articles of war, and, it being erroneous and illegal, was liable to be quashed. On the 27th inst., the Court assembled to deliver sentence. It then appeared that the prisoner had been found guilty, and was highly recommended by the Court; but the Judge-Advocate-General cancelled the proceedings on the ground of illegality as set forth in the defence, and the prisoner was released from arrest, and ordered to return to his duty.

MOVEMENTS AT MALTA.—The corvette Scourge, Captain his Serene Highness Prince Victor of Hohenlohe-Langenberg, left for Sicily on the 29th Dec. Admiral Mundy's squadron is still at Corfu. The ships of war in port on the last day of the year were the Renown, 91, Racoon, 22, Euryalus, 51, Exmouth, 90, Gannet, 11, Lapwing, 4, Banshee, 2, Caradoc, 2, and Tartarus, 4; the fleet under the command of Admiral Fanshawe being at Gibraltar. The French postal packet Danube arrived on the 28th, bringing as passengers—Lieutenants Hamilton and Rundel, of the 3rd Buffs, and Paymaster G. K. Leet. The English yacht Jupiter, commanded by the Hon. A. Hobart, of the guard-ship Hibernia, left for Syracuse on the 23rd, having on board Captain Dumaresq, Royal Engineers, and Captain R. Egerton of the Rifle Brigade.

To the Editor of the ARMY AND NAVY GAZETTE.

SIR,—May I beg the insertion of the following in your first number, if you consider the subject of sufficient interest, now that the Volunteer movement has been taken up so enthusiastically in both England and Scotland.

In Ireland the question is continually asked, Are we to be allowed to arm? May I, through you, sir, repeat this question? If not, will we receive a sufficient force from England to prevent invasion and protect our lives and property? or are we solely to rely on the police force of the country, with the few troops which would be left us should danger be apparent? I know, sir, those are questions of vital importance to the well affected and loyal inhabitants of Ireland who have property to protect, as many speak of emigrating, unless assured that they will be allowed to protect themselves, or that Government will engage to do so. Now, sir, if Government can place confidence in a military police (essentially Irish), why not in the inhabitants who have a much larger stake in the country? I do not advocate the arming of all classes indiscriminately, nor is it done I believe in England, but are the well affected and loyal to be left at the mercy of the mob, while the troops would be in the field, supposing an invasion to take place? In fact, the dread of arming the disaffected is a mistake of those who do not know the present feeling in Ireland, the disaffected will not join any Volunteer force, they would be too closely watched. No, sir, depend on it, not a disaffected man would take the oath of allegiance! Whereas, if the Volunteers are embodied it will show the Government whom they can depend on.

AN OLD RIFLEMAN.

The Spanish expedition against Morocco is making progress, but more slowly than is usual in cases where regular armies contend with barbarian levies. Since the first landing of Spanish troops in Ceuta two months have now elapsed, and 30,000 troops have, up to the present, been landed in Africa. For the first six weeks the Spaniards limited themselves to resisting the repeated attacks of the Moors; within the last fortnight they have advanced in the direction of Tetuan, and they are now in military occupation of the Moorish country for somewhat more than three leagues beyond their own town of Ceuta. The plan of campaign is said to be simply a march along the coast to Tetuan, and the capture and occupation of that place. The march along the coast could not, perhaps, be safely effected without cavalry, and hence the delays that have hitherto characterised the operations; but the bad state of the Spanish military and naval organisation is sufficiently indicated by the fact, that it has taken two months to transport an army of 30,000 men across the narrow straits. The individual qualities of the Spanish soldier—his patience, sobriety, and courage—have been fully exemplified in the present campaign. The final result will doubtless be victory for Spain; but at a greater loss of life and money than was probably contemplated when the war was commenced.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.—Her Majesty's Government having, with the sanction of Parliament, determined on establishing a Reserve Volunteer Force of Seamen trained to the Use of Arms:

This is to Give Notice,

That any Seaman possessing the following qualifications may be inrolled as a Royal Naval Volunteer in the Reserve Force, and will thereupon be entitled to the advantages and be subject to the obligations mentioned below:—

Qualifications for the Reserve.

1. A Volunteer must be a British subject:
2. He must be free from infirmity:
3. He must not be over thirty-five years of age:
4. He must within the ten years previous to his joining the Reserve have been five years at sea, one year of that time as an A.B.

Advantages of the Reserve.

1. A Volunteer will at once receive an annual payment or retainer of 6l., payable quarterly:
2. He will, if he fulfils his obligations and is in the Reserve the requisite time, receive a pension of not less than 12l. a year whenever he becomes incapacitated from earning a livelihood, or at sixty years of age if not previously incapacitated:
3. He may elect either to take the whole pension himself, or to take a smaller pension for himself during his life, and to allow his wife a pension after his death, for the remainder of her life:
4. He will not, on account of belonging to the Reserve, forfeit any interest in any Friendly or Benefit Society:
5. His travelling expenses to and from the place of drill will, when necessary, be provided:
6. He will, during drill, receive, in addition to the retaining fee, the same pay, victualling, and allowances as a seaman of the fleet, according to his rating:
7. He will, if called out on actual service, receive the same pay, allowances, and victuals, and have the same prospect of promotion and prize money, as a continuous service seaman of the fleet, according to his rating, and he will on joining receive the same clothing, bedding, and mess traps:
8. He will, if wounded or injured in actual service, receive the same pension as a seaman in the Navy of the same rating:
9. He will be eligible to the Coast Guard Service and Greenwich Hospital:
10. He may quit the Reserve, if not at the time called out for actual service, at the end of every five years; he may also quit it, when not called out, on paying back the retainers he has received; or, without payment, if he passes an examination as a Master or Mate, and obtains bonâ fide employment as Master or Mate.

Obligations of the Reserve.

1. A Volunteer must attend drill for twenty-eight days each year; he may do so, so far as the convenience of the public service will permit, at a time and place convenient to himself; but he cannot in any case take less than seven days' drill at one time:
2. He must not, without special permission, proceed on a voyage that will occupy more than six months:
3. He must appear before some Shipping Master once in every six months, unless he has leave to be abroad longer, and he must report every change of residence and employment:
4. In order to earn a Pension he must continue in the Reserve as long as he is physically competent to serve, and he must also have been in the force fifteen years if engaged above thirty, or twenty years if engaged under thirty. In reckoning this time actual service in the fleet will count double:
5. Volunteers may be called upon for actual service in the Navy by Royal Proclamation. It is intended to exercise this power only when an emergency requires a sudden increase in the Naval Force of the country:
6. A Volunteer may in the first instance be called out for three years. If there is then actual war, and he is then serving in one of Her Majesty's ships, he may be required to serve for two years longer; but for the additional two years he will receive 2d. a day additional pay:
7. Volunteers when on drill or actual service will be subject to Naval Discipline:
8. A Volunteer who fails to fulfil the obligations of the Reserve will forfeit his claim to Retainer and Pension, and if he fails to join when called out for actual service may be treated as a Straggler or Deserter from the Navy.

The Inrolment will commence on 1st January, 1860.

Full Information and detailed conditions may be obtained on application to the Shipping Master at any Port in the United Kingdom, or to the Officers of Customs in the Channel Islands and Isle of Man.

V. R.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.—Leave for long Voyages.—Special Leave for Voyages exceeding Six Months will be granted to All Volunteers on the following Conditions:—

1. The Leave is to be for one ship, and for one voyage only at a time, and to be renewed for each voyage. The ports or countries at which the ship is to touch must be all specified, or if any of these are not specified the voyage must be limited by the articles to twelve months.
2. The Volunteer must have completed his twenty-eight days' drill for the year before the Leave will be given.
3. On an emergency the Reserve may be called out for service at home or *abroad*. If the Volunteer is then abroad, he must, if summoned, join any of H. M. ships abroad; under the same penalties, in case of refusal, as in case of refusal to join in the United Kingdom.
4. The arrears of retainer due will be paid on the Volunteer's return in the ship for which Leave is given.
5. The Admiralty reserve power to withhold this Leave if at any time on an emergency the Volunteers are required for the defence of the country. They also reserve power to withhold the Leave at the end of each Volunteer's first five years of service, when he may, if he pleases, quit the force.
6. Subject to these reservations, it is the intention of the Admiralty to grant Leave upon the above conditions for the first five years of the service of each Volunteer who joins the Reserve under the present Regulations.

Age of Admission. During the year 1860 the age of admission will be extended from 35 to 40.

*** *For further Information apply to a Shipping Master.*

Board of Trade, Whitehall, S.W., 12th December, 1859.

KINGSTON VOLUNTEER RIFLE CORPS.—Wanted immediately, a SERGEANT, to act as SERGEANT-MAJOR. Apply by letter, stating qualification, to W. Phillips, Esq., Kingston-on-Thames.

SIX-FEET VOLUNTEER GUARDS.—Gentlemen desirous of JOINING this CORPS, who have not already sent in their names, are requested to do so on or before TUESDAY, the 10th of JANUARY, soon after which date it is intended to hold the first General Meeting, and to proceed with the business of the Corps. Address to the Hon. Secretary, S.F.V.G., Committee Rooms, 38, Conduit Street, W.

SERGEANT-MAJOR.—The Committee of the SUNDERLAND VOLUNTEER CORPS are prepared to receive applications for the appointment of a SERGEANT-MAJOR to the Corps. The applicants to give references, full particulars of previous service, and to state the terms required.

2, Sunniside, Sunderland. Arthur W. Dixon, Secretary.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c. vid EGYPT. The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.—For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

Just published, price 7s. 6d.

A HANDY-BOOK FOR RIFLE VOLUNTEERS. With 14 Coloured Plates and Diagrams. By Capt. W. G. HARTLEY, Author of "A New System of Drill."

"By far the very best work of the kind to which the rifle volunteer movement has given birth. This book will supersede all that have appeared on the same subject."—*United Service Gazette.*

"This is multum in parvo, decidedly the best guide or manual for volunteers and riflemen we have yet seen."—*Naval and Military Gazette.*

REMARKS ON NATIONAL DEFENCES, and on the Instruction of Volunteer Corps and other Defensive Bodies. By Sir DUNCAN MACDOUGALL. With Plates.

W. Clowes & Sons, Military Publishers, 14, Charing Cross, S.W.

THE NEW INDIAN MUTINY MEDALS.

MESSRS. E. & E. EMANUEL, Goldsmiths to the Queen, Portsea and Portsmouth, have the honour to announce that they are prepared to supply Miniature Copies of the above, with Bars and Brooch complete, registered and free by post; as also the New Miniature Medal for Persia, and the Miniatures to every British and Foreign Order and Medal.

Portsmouth, January 2, 1860.

THE ARMY AND NAVY GAZETTE, and all the other LONDON NEWSPAPERS, regularly SUPPLIED in Town, and forwarded to all parts of the United Kingdom, India, China, Australia, and foreign countries. A list for 1860, with politics, days of publication, &c., sent gratis.

Advertisements inserted in all the London and Country Newspapers. Wm. Dawson & Sons, Newsvendors, Booksellers, and Stationers, 74, Cannon Street, City, E.C. Established 1809.

MR. ALBERT SMITH will RE-COMMENCE his CHINA and MONT BLANC REVISITED, on TUESDAY EVENING NEXT, JANUARY 10. Stalls can now be secured at the Egyptian Hall, Piccadilly.

CHRISTMAS PANTOMIMES.—The best PRIVATE BOXES at all the theatres may be obtained at W. R. SAMS' Royal Library, 1, St. James's Street.

NOTICES TO CORRESPONDENTS.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not authenticated by the name of the writer, given in confidence to the Editor.

A "Well Wisher, &c.," is thanked for his sensible communication, and is informed that the Editor fully agrees in nearly every one of the propositions it contains.

The Editor begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

Army & Navy Gazette.

LONDON, SATURDAY, JANUARY 7, 1860.

Whatever disappointment was felt at the partial character of the successes gained by our Navy in the Russian war, there was no reason to believe that the Board of Admiralty had failed in their duty; nor was there any complete *bouleversement* of the naval system and administration like that which took place in the organisation of our Army. Of course the marine was less severely tested; it did less, because it could do no more. One officer, indeed, alleged that the fleet entrusted to him was manned by crews better versed in sartorial arts than in the duty of men-of-war's men; but it was not given to the gallant admiral to show that they were actually deficient in fighting powers; and on the whole it may be admitted the Admiralty make a good show in ships and men, and can point to tolerable results for the expenditure of the enormous sums entrusted to them. Having said so much, we must be permitted to remark that it is matter of no little surprise the case should be so, considering the composition of the Board. Naval men will at once perceive that we allude to the office of the First Lord—but it is not because he is a civilian, and not a naval man who fills it, but because he as a civilian quite overrides the naval element in the Board, that we object to his present enormous powers. It is the civil First Lord, whose place depends on a parliamentary majority, who makes all appointments, confers all distinctions, and determines promotions. By some process which is scarcely scrutable, the civilian cuckoo has pushed all the naval birds out of their nest, and reigns there in their stead, whilst the parent flutters her wings in vain, and declares she does not know what to do with the hardy usurper. It is not profitable to inquire by what means the office of Lord High Admiral—who was the delegate of the Crown, and had absolute power over the naval forces of the kingdom—fell into the hands of the First Lord, and became a civil perquisite. It is evident, however, that the duties and rights of that office are now executed and enjoyed by a civilian, instead of a naval man, or at least—instead of a soldier who fought on sea as well as by land, as was the fashion in former days. The Army is still directly controlled by the Crown, which is almost as absolutely the fountain of all honour, promotion, and appointments, as in the time when the Sovereign took the command of his armies in the field, and led them to battle in person. The Navy has had interposed between it and the Monarch the shade—we do not know whether it is cold or hot—of the Board of Admiralty, which, on investigation, and in effect, is resolved into the First Lord and his Private Secretary. The naval portion of the Board are little more than ad-lateral officers, who perform the duties of recording angels, now and then with tears in their eyes, and hearts bowed down by weight of woe. Of course all civilians show good reason why this should be so: but though there is a great amount of truth in their arguments—some of which can scarcely be urged without offence to naval officers—we are of opinion that no valid argument can be advanced against increasing the strength and aggrandising the powers of the Naval element in the Board. With that view we think not only that there might, but that there ought to be an officer with powers somewhat analogous to those of the Commander-in-Chief of the Army, who should have control of the general appointments and promotions, with special exemptions and reservations, subject to the power of rejection and selection of the names on the part of the First Lords. This naval officer who might be called First Admiral, or Naval Commander-in-Chief, should be assisted by two naval officers, who would, however, be of inferior powers, and it would be a part of his duty to go on tours of inspection at intervals—to examine the Dockyards, to overhaul the ships of the Reserve, and Guard-ships, and now and then to hoist his flag as First Admiral, and take command of the Channel Fleet in an experimental cruise. We should thus have the best means of testing the efficiency of our arrangements for the manning of the fleet, and the excellence of our dockyards and arsenals. The present mode of going down to Portsmouth on certain state days to pay compliments, to look at polished platters—and, maybe, whitened sepulchres—to go over departments all brightened up and prepared beforehand for inspection, is obviously unsatisfactory, and, for a practical people, very absurd. We want to know how the every-day work is done, and not how the people who do it look when dressed in their holiday attire, and out for the day.

The First Admiral, or Naval Commander-in-Chief, aided by his Staff, could also examine and report on the condition of the coast defences, and could test in many ways the actual condition of our fleet and of individual ships, and the merits of officers and crews; and he would, if a man of ability and discrimination, be the best guide the First Lord could have in framing the estimates, which—as the latter would be responsible to Parliament for them—must be left ultimately to his decision. Thus restricted, the patronage and power of the First Lord would still be very great indeed. The estimates and expenditure would be under his control; all the appointments to dockyards and civil offices under the Admiralty would be his, and the higher nominations would be mainly influenced by his opinion. We shall return to this subject in our next number. The importance of it is great. We are willing to let well alone; but why should not well be made better, if the way to do it is clear and open? There is no responsibility in the present system. The Board is a bundle of Secretaries, tied up hard and fast by the First Lord and his Secretary; but if the First Lord be assailed in Parliament, he at once holds up his Board to protect him, and the concrete receives any amount of invective and sarcasm on a rhinoceros hide, tested beyond proof by long experience, and steeled by the happy consciousness of perfect strength, and by the individual conscience of each member, which tells him, "It was not I who did it. I had nothing to do with it!"

In determining the future system and establishment of the British Army, one of the first amd most important elements to be considered, is the re-organisation of the forces in India. The number and description of troops required for our greatest dependency, which at this moment absorbs one-half the regular army, must necessarily be made the basis upon which to frame an estimate of our wants for imperial purposes. The future of the Indian army, therefore, is one of the most immediately interesting questions connected with the military—all the more so, perhaps, from the fact that it is yet wrapped in mystery. With every respect for the individuals composing the Royal Commission of 1858, we can hardly say that the constitution of that tribunal gave rise to great hopes at the outset, and the result furnished no agreeable disappointment. The opinions, both of the commissioners and the witnesses examined, were pretty evenly divided as to the expediency of maintaining purely an Imperial army, as distinguished from a force of which European regiments for local service should form a considerable proportion. The Government, however, appeared to give a kind of casting vote in favour of a local force, and the question was all but settled, when the news of the insubordination of the Company's European troops altogether unsettled the official determination. Since then the question has remained entirely open. We are informed, however, that the very potent considerations of expense influence the probabilities slightly in the direction of a local force. The authorities declare that, examine it how you will, a local European regiment of 1000 men costs less than a battalion of the line of equal strength. We believe they are also not entirely free from difficulties connected with the amalgamation of two different systems of promotion and retirement among the officers, which would necessarily follow an absorption of Her Majesty's Indian into Her Majesty's Imperial Army.

With respect to the former of these considerations we must to a great extent bow to the official dictum, as regards the question of expense. It has been investigated very closely by persons free from leanings one way or the other, and looking at it entirely as a question of cost, we shall only say on this point, we hope the wholesome commercial maxim, that the best article is the cheapest, may be borne in mind, and that the most extravagant of all policies—a policy of small economy—may not be pursued. With regard to the difficulties in the way of an amalgamation, we cannot consider them as presenting any grave administrative difficulty, even at the outset, while whatever the difficulty might be, a very

Digitized by Google

few years would diminish it to an infinitesimal point. We have two entirely different systems in the Indian and the Imperial Army, in which a large number of individuals have important vested interests. In the former, officers, besides investing money in their promotion, have subscribed largely to funds, and are entitled to allowances from them, either now or at a future time. In the latter, very large sums have been sunk in the purchase of commissions. In bringing the two systems into one, some difficulties would unquestionably arise, but it appears very forcibly to us that they are difficulties of a character that require the interposition of an actuary rather than of a military administrator. Take stock of each individual's rights at the present moment, and secure them to him, and let him know precisely how much of those rights he will be allowed to retain if he changes his position. If he sacrifices anything, he will do so voluntarily and with his eyes open. So much as regards the rights of individuals—of the actuary's business. The part of the statesman is to determine the character of the new system—to say whether we shall bring the Imperial system into the Indian Army, the Indian system into the Imperial, or, whether he may not avail himself of the present forced convulsion in the military system of India, to devise something for the whole army that will enable it to profit by the experience acquired in every department of military administration and organisation during the last few years. We have had a war testing the Imperial Army and a war testing the Indian Army. We have had inquiries and commissions without end. Is not the present a most favourable opportunity for collecting together all our knowledge thus dearly acquired, and devising for the Queen's Army all over the world a plan which shall preserve the large proportion which is worthy of preservation of our present system, and at the same time blot out the excrescences which are plainly discernible on its surface?

While we should be sorry to see any violent disturbance of the regimental system, about the excellence of which we believe there is scarcely a second opinion among military administrators or professional soldiers, we cannot be blind to the fact, that there are some of its elements which might with great advantage be modified. In the first place, to our minds, it is too complicated as regards the respective ranks. There are three descriptions of duty to be performed by a regimental officer, viz., that of field officers, that of captains, and that of subalterns. We have five kinds of officers to do it. Why, then, should we keep up the unnecessary distinctions of major and ensign in the line? There are no majors or ensigns in the Artillery. Again, where so very much depends upon the capacity and temper of a commanding officer, we have no sufficient guarantee in our present system that we shall get (not the best, for we are not so Utopian as quite to expect that, but) a good man. Going to the other end of the officers' list we have no security, with all our examination tests, that we shall get for regimental officers young gentlemen of a class likely to know and do their duty properly. Nor is the means we adopt of indoctrinating them into the school of regimental efficiency the best that could be devised. Lastly, and as affecting the whole of these points, we have to consider the purchase system, not upon high moral or abstract considerations, but as regards its practical effect upon the efficiency of the officers of the army.

Although the tribunal to which this last most important subject was referred, some two or three years since, was perhaps as competent as any the country could produce, and although it spared no trouble or research in eliciting everything that bore upon the subject, the result was not entirely satisfactory. A certain moral blow was dealt, a kind of premonitory attack made upon the system, both directly and in the shape of reluctant sustainment by a large proportion of the Commissioners. The purchase system is almost universally popular among the poor men of the Army and among the majority of the rich men. We consider that it has some very great and weighty advantages, for which we have never yet seen a substitute suggested that could be practically obtained. Without it we confess we see no means of obtaining officers for general commands at an age very much short of senility, and we need therefore scarcely add that we should look upon its abolition as a very dangerous measure. But regarding at it in connection with the question to which we have before alluded—the unnecessary number of grades of regimental officers—we think some change might be made which would keep up the stream of promotion substantially at its present rate, and yet diminish to a very slight point the inequalities and injuries to which individual officers are occasionally subject. In the Foot Guards, since 1854, purchase above the rank of regimental captain has been virtually abolished. When a regimental major or lieutenant-colonel retires by the sale of his commission, he receives only the price of his company, and the consequent promotions above that rank are made by seniority without purchase, those of the subordinate ranks being given by purchase, as, if a captain had sold out. Why not adopt this system in the Line, if we are afraid of the very attractive—but, like many attractive things, the somewhat dangerous—theory of promotion by selection? By absorbing the rank of major into that of lieutenant-colonel, making it unattainable by money, and by abolishing the rank of ensign, we should have an officer obliged to purchase only one step—his troop or company—after his entry into the service, while among 37 out of 40 combatant regimental officers, we should keep up the same inducements to accelerate promotion as at present. The non-purchaser would thus have but one obstacle instead of four in the way of his regimental advancement, the purchase system would advantageously touch 37 officers out of 40 to the full extent, as at present, and the remainder to some extent, viz., the price of a company. If we added some better kind of probation, than the present for young officers we believe we should have the regimental system of the Army as near perfection as could be expected. At present we submit a candidate for a commission to an examination, many features of which have nothing to do with his efficiency as a good officer to do company duty. We then, on his being Gazetted, send him to a depôt battalion, where there is no *esprit de corps*, where there are few steady officers, and where he is thrown altogether into the society of some score of youths just like himself, most of whom he will probably never see again after he joins his regiment. Now, if instead of this very unwholesome system, every candidate were simply required to pass an examination in those matters which are necessary to enable him to keep the accounts and do the office business of a company, then sent to a college, where for seven or eight months he would be well drilled and made thoroughly acquainted with the practical duties of a company officer, he would escape the depôt, and be available for service on joining his regiment. If an institution of this kind were made first self-supporting, a saving to the country might be effected, inasmuch as on an average there are about three ensigns of each regiment at depot battalions learning their duty. If these officers were taught their business at a public college, at their own expense, the number of subalterns might be reduced without a loss to any one, and with a gain to the public purse. We believe that some such steps as we have indicated might be considered, not unprofitably, by the authorities, and certainly at no time with more advantage than the present.

We had much rather avoid any reference to the very painful affair at Aldershott, which has terminated in the removal of the 2nd Battalion of the 24th Regiment to Cork, and not improbably, eventually to a very disagreeable tour of foreign service. There is, of course, nothing to be said in palliation of the disgraceful conduct of the men; but we may deduce one moral from the circumstance perhaps not altogether valueless. In the formation of the various 2nd Battalions, the commanding officers have had very peculiar and serious difficulties to contend with in bringing their men into soldierlike condition. The class of recruits has not been the very best, but the chief difficulty is the want of non-commissioned officers. We can well imagine and make allowance for the almost hopeless feeling with which a colonel must enter on his task of forming a regiment, with the aid of non-commissioned officers only a shade removed from the motley class of recruits whom they are expected to mould into that which they are not themselves, viz., efficient soldiers. It is an instance of the blind leading the blind, in which we must naturally expect some accidents. We sincerely trust and hope that we shall not have again to chronicle such a dastardly outrage as that which marked the day of the whole year especially dedicated to peace and good will.

It may not be out of place to remark that, after five o'clock in the evening, the field officer of the day is the sole commanding officer in camp.

General Knollys resides at Bagshot, nine miles away. Lord W. Paulet's residence is in London; the Major-Generals Lawrenson and Spencer, and all the other staff officers reside at Farnham or the adjacent villages, and the only heads of departments left in camp are the officers commanding Royal Engineers, the principal Medical Officer, and the Assistant-Commissary-General.

No officer has been appointed as yet to succeed Admiral Bowles at Portsmouth. The gallant officer will not haul down his flag till 1st March.

We have reason to believe that nothing is yet officially settled respecting the increase of the army. It was some time since stated that second battalions would be raised in each regiment up to and including the 35th. Subsequently, it appears to have been resolved that 20 men per company were to be added to each regiment not on the Indian establishment, and one or two of the regiments proceeding to China were actually strengthened to that extent. This plan, however, has been stopped, and at present it is not decided in what shape the proposed augmentation shall be made. We may add that until the meeting of Parliament, the views of the Government are not likely to be made public, the whole matter very much depending on the still undetermined question of the reorganisation of the Indian army.

With the view of securing the uniform and general efficiency of the Volunteer Corps, it is the intention of the Government to appoint an Inspector-General of Volunteers, who will be assisted by six sub-inspectors of the rank of Brigade-Major. Each of the sub-inspectors will be assigned a district for his particular supervision, the Inspector-General controlling the whole arrangements.

Major-General Cameron, C.B., who has resigned the Vice-Presidency of the Council of Army Education for the command of a brigade at Aldershott, will, in all probability, be succeeded in the former office by Major-General Rumley, who now commands a brigade at Gibraltar.

A new Royal Warrant will shortly appear regulating the rank and emoluments of Paymasters in the army. It is, we understand, likely to embrace the following changes: 1. Depôt, Battalion, and District Paymasters to have the honorary rank of Major, the twelve seniors receiving 2*s.* 6*d.* a day, extra pay. 2. Regimental Paymasters to have the relative rank of Captain for five years; after that the honorary rank of Major. 3. A more liberal rate of half-pay to be granted.

The details of the force to be sent under Sir J. Hope Grant to China between this and March are being arranged in India. We believe it will consist of eight European regiments, of which four—the 1st Royals, 2nd Batt.; 2nd Royals, 1st Batt.; 3rd Buffs, 1st Batt.; and 67th are in China, or on their way thither, and two each are to come from Madras and Bombay respectively—4000 Sikhs, two regiments of irregular cavalry, and one of European cavalry, with eight troops and batteries of artillery. Rumour asserts that either the King's Dragoon Guards, or 7th Hussars, will be the cavalry regiment sent; and that the 31st and 66th Regiments from Bombay, and the 44th and 66th from Madras, will complete the infantry force.

Colonel the Hon. St. George Foley, C.B., who has been acting as Military Secretary to Major-General Straubenzee, at Hong Kong, has been appointed British Military Commissioner at the Head-Quarters of the General Commanding the French expeditionary corps to China.

Brevet-Major the Hon. A. H. Anson, V.C., 7th Hussars, and Captain F. R. C. Grant, 5th Lancers, have been appointed Aides-de-camp to Lieut.-General Sir James Hope Grant, K.C.B., Commander-in-Chief of the China Expedition.

At an examination recently held to supply vacancies in the senior class at the Staff College, Captain the Hon. W. Feilding, Coldstream Guards; Captain Hartman, half-pay, formerly of the 15th Hussars; and Captain Norris Goddard, 2nd battalion 17th Regiment; were successful. These officers will accordingly proceed to join the senior class at Sandhurst.

We have much pleasure in stating that Her Majesty has been graciously pleased to apportion a suite of apartments in Hampton Court Palace to Mrs. Hodson, widow of Major Hodson, of "Hodson's Horse."

Lieut. Harmer, 81st Regiment, has succeeded Lieut. Coupe, 15th Regiment, as recruiting officer at Omagh. Lieut. Fagan, 4th Regiment, has been moved from Cambridge to Reigate, and Lieut. Lockhart, 92nd Highlanders, from Reigate to Cambridge.

Captain J. Cumming Clarke, 13th Light Infantry, has been appointed A.D.C. to Lieut.-General Wynyard, at the Cape, in succession to Captain Wynyard, 58th Regiment, who has retired from the service.

Some of our contemporaries announce that Lord Clyde may be expected in England about the middle of this month. We are more inclined to think, however, that the gallant General will arrive about the end of February, where doubtless the country will give him such a reception as his great services deserve.

THE ITALIAN CAMPAIGN OF 1859.*

As a Christmas or New-Year's gift book, the purchaser of this volume will probably value it for Mr. Bossoli's striking collection of illustrative sketches. Another class of purchasers, however, will be attracted towards it by for the sake of the narrative of the campaign, written by an eye-witness of its most momentous scenes, a sharer in the fatigues and pleasures of the march and the bivouac, if not in the dangers and excitement of the battle. The author describes his work as "a carefully-drawn picture of the campaign as it presents itself" to his mind. This is a correct description. The labour bestowed has not been bestowed in vain, for the picture is clearly and succinctly as well as carefully drawn. In short, it is a valuable contribution to the history of the campaign, well deserving the attention of all who desire to be informed on the most striking features of field operations since the great French wars. The narrative deals very lightly with the political questions which form so large and potential a portion of the war. The writer altogether abstains from discussing the origin of the strife, and, in this treatment of the subject, we shall imitate him.

The campaign may be divided into three periods, beginning with the rush of the French army into Italy, and ending with the peace of Villafranca. The first period, from April 19 to May 20, brought the hostile armies face to face on the Po and the Sesia. The second period, from May 20 to June 21, having the famous flank movement and Magenta for its principal events, carried the Allies to the river Chiese and the Austrians behind the Mincio. The third period, from June 21 to July 10, includes the great battle of Solferino, the passage of the Mincio, and the peace of Villafranca.

The Austrian government committed a political error at the outset of the war, and followed it up by committing a military error. On the 19th of April the Vienna cabinet determined to demand the disbanding of the Italian volunteers then collecting in Piedmont. Having resolved on this step, the Austrians should have followed it up by immediate military operations; whereas the ultimatum was allowed to become generally known four days before it was presented, and when it was handed in to Count Cavour on the 23rd, an answer was demanded in three days, instead of four-and-twenty hours. The consequence was, that the Austrians, committed to an offensive campaign, lost seven days by this half-measure, and subsequently they lost three more out of deference to a request from the British Government. The time lost by Austria was made the most of by Piedmont and her ally. Before the ultimatum was presented the Sardinian troops, about 70,000 strong, were in position from Ivrea, under the Alps, to Novi, under the Apennines; Alessandria and Casale gave strength to the centre of the line; the works on the Dora Baltea covered the road to Turin through the low country, and lines of railway connected Genoa with the two fortresses and with the capital. Before the ultimatum was presented also, the French troops were on the sea, coming from Marseilles, Toulon, and Algeria, and ascending the heights of Mount Cenis. With the vast force at his disposal, General Gyulai might either have marched upon Turin, or—what would have been more effective—upon Novi. In the latter case he would have struck in between the French at Genoa, and the Sardinians in and to the left of Alessandria. But when he crossed the Ticino on the 29th of April, his opportunity of either seizing Turin or Novi had passed away, for on the 29th there were nearly 30,000 Frenchmen in front of Genoa, and an equal number about Susa. Thus the French had secured the two flank lines of communication, and were prepared to concentrate in any direction by the 1st of May. Every day brought more troops and material to Genoa and Turin, but mainly to the former, and the position of the allies, tolerably safe at the very outset of the Austrian invasion, had become impregnable by the middle of the month. The offensive movements of the Austrians, now pointing to Turin, now to Novi, were extremely contemptible, and were and are quite unintelligible upon any recognised military principles. The conduct of the Allies, on the other hand, was prudent. Sheltered by Alessandria and Casale, with the river Po covering their front, from the hills of Montferrat they looked down upon the columns of the Austrians, meandering to and fro without a purpose and without a plan. Count Gyulai's system seems to have consisted in feeling about until he met with some resistance, and then drawing back. Thus he moved forward troops as far to the west as Trino and San Germano, and as far to the south as Tortona, but they did nothing except break bridges and make requisitions. The Allies, on the other hand, spent the time in watching these aimless pursuits, and in completing their preparations for an offensive movement. These were hastened by the arrival of the French Emperor himself at Genoa, on the 12th of May. We are told that the French were not prepared for war. If so, how massive and efficient must be that peace establishment which can enable the French ruler to transport a large army across mountains and seas, and bring it into position in front of an enemy in a fortnight?

Having lost the initiative, and being utterly incapable of regaining it, Count Gyulai was reduced to the hopeless task of endeavouring to make his adversary show his hand. At first he occupied the line of the Sesia, and the line of the Po below its confluence with that river, having outposts in the country towards Turin, and on the road to and from Piacenza to Tortona. Finding no enemy in the low grounds and learning that large masses of French troops were on the road to Piacenza, Count Gyulai seems to have imagined that the Emperor intended to make a move on that side; an error everything but sound reasoning helped to confirm. Thus he heard of the embarkation of the 5th corps under Prince Napoleon for Tuscany, and at the same time sending Count Stadion with 20,000 men to make a reconnaissance in force towards Voghera, he found the French strong enough on that side to beat back his columns in a smart combat which has been dignified with the name of a battle. It was the first serious action; it revived the old *prestige* of the French, and it confirmed in the mind of Count Gyulai the idea that the French Emperor intended to run his head against the entrenched camp of Piacenza.

No error could have been more fatal. Count Gyulai seemed to have forgotten for what purpose Piacenza and Pavia were raised to the rank of fortresses, if it were not to render any repetition of Bonaparte's manœuvre in 1796 most hazardous, if not impracticable. The French Emperor had a sounder plan secreted in his mind, and the development of this plan forms the second period of the campaign.

The Emperor determined to turn the right flank of the Austrians, and seize the road to Milan. Massing his army to his right, he induced Count Gyulai to concentrate his troops on his left in the watery country between Mortara and the Po. As soon as Gyulai withdrew behind the Sesia, Garibaldi carried his volunteers round that flank, and crossing the Ticino boldly threw himself far in the right rear of the Austrians. The Sardinians occupied the line of the Sesia and had outposts on its left or Austrian bank. It is amazing that these movements did not shake Gyulai's faith in his wild notion of an advance of the French on Piacenza. It is true that no pains were spared to delude Gyulai, and it is probable that no one except the Emperor and his immediate confidants knew of his plan. This was to carry his whole army swiftly and secretly from right to left. In executing this bold conception he was aided by the Sardinian railways, the electric telegraph, and Austrian stupidity. Covered by the rivers and fortresses, while Gyulai was waiting for them between Mortara and the Po, the French moved with immense rapidity from Alessandria to Vercelli, and in two days the Emperor had the satisfaction of seeing his whole force united on the Sesia. Having obtained this commanding position, he lost no time in making the most of it. The movement was completed on the 30th of May; on that day King Victor Emmanuel drove the weak Austrian outposts from Palestro and Vinzaglio; and the next day, still with overpowering numbers, he repulsed an attempt to retake these villages. Gyulai, still mistaking the objects of the Allies, although he brought his troops a little nearer to Novara, neglected while there was yet time to concentrate them there, and left his weakened right to be overwhelmed. By the 1st of June the advanced guard of the French were in Novara, and Gyulai had no choice but to recross the Ticino. On the 2nd of June the French had 100,000 men on the plain of Novara, in good fighting trim, and inspired by their victories, and they were speedily joined by the Sardinians. It is clear that Napoleon III. must have formed a very correct estimate of the character of Count Gyulai, or he would hardly have attempted this magnificent operation. But to estimate aright the capacity of your opponent is one of the elements of success in war.

The race was now to the swift and resolute. Between the Allies and Milan flowed the Ticino, and if time were given the Austrians might double round by Bereguardo and Vigevano, throw themselves across the road, and dispute the passage of the river. But the Emperor was still quicker than his foe. On the 3rd of June M'Mahon had passed the Ticino at Turbigo, the point where the elder Napoleon crossed in 1800 on his march from the Alps to Milan. By this time the Austrians were over the river, and a little energy would have sufficed to bring them into line at Magenta. That energy was wanting. Whatever the cause, whether from the interference of Marshal Hess or not, they were too late. On the 4th of June, while the main body of the Austrians were miles from the battle-field, and only three half corps were at Buffalora and Magenta, M'Mahon was marching with a whole French corps from Turbigo, to be followed by two brigades of the guard, and the whole of the Sardinian army, upon Magenta, and the Emperor was crossing the Ticino by the bridge of Buffalora. Here again Count Gyulai had an opportunity of retrieving his reputation as a general. For the weak force of Austrians under Clam Gallas made so stout a fight against the double attack, and the French reinforcements came up so slowly, that there was time for the arrival of supports strong enough to enable the Austrians to maintain themselves in their formidable position. As it was, the battle was a long time doubtful. The skill and intrepidity of M'Mahon, and the fortitude and daring of the Zouaves and Grenadiers of the Guard, not only kept up the fight, but drove the Austrians from several strong positions; yet, had Gyulai moved up his disposable troops with celerity, he must have beaten the Emperor back upon the Buffalora Bridge, and forced M'Mahon to hasten to Turbigo. He did not move up his troops until reinforcements had reached the Allies, and then M'Mahon carried Magenta, and the Emperor effected his junction with his lieutenant. If, as the author of the narrative supposes, the Emperor did not anticipate a battle, he committed a grievous error, but not so great an error as that of Gyulai, whose inactivity in the morning, and whose spasmodic efforts in the afternoon were blunders of the most fatal kind.

The victory of Magenta placed Milan, and ultimately all Lombardy, in the possession of the Allies. The Emperor, acting on a sound plan, determined not to pursue the Austrians. They retired by Piacenza, Pizzighettone, and Lodi upon the Mincio, except the troops of General Urban, which, falling back from Como, where they had vainly contended with Garibaldi, had just time to retire by Cassano upon the Chiese. After the combat at Melegnano, another Austrian defeat, the Allies marched by the upper roads across the Adda, the Oglio, the Mella, their left flank skirting the mountains, their right a little thrown back. The Austrians were over the Chiese on the 16th, the Allies were approaching, and it became a question whether the Austrians would fight in the plain of Montechiaro, or on the Mincio hills, or whether they would cross the river and remain on the defensive.

This brings us to the third period. As the Allies approached the famous Quadrilateral formed by the fortresses of Peschiera, Verona, Legnago, and Mantua, and the rivers Mincio and Adige, they moved with more caution. Although the Emperor of Austria had deprived Gyulai of his command, and had taken it himself, the same vacillation characterised the Austrian plans. Twice they occupied and twice abandoned the tempting positions of Lonato and Castiglione, tempting, but already the scene of Napoleonic victories. On the 20th, they fell back behind the Mincio, and the Allies, starting forward, crossed the Chiese, and on the 22nd, their advanced columns were in Desenzano, Castiglione, and Carpenedolo, but one corps remained at Mezzano on the right of the Chiese.

It was now that the Austrians resolved to assume the offensive. They had united their army, and were able to dispose of some 180,000 men. Their project was to push nine corps across the Mincio, and occupy a long line, extending from Pozzolengo to the outskirts of Mantua. This line was to be occupied on the 23rd, and on the 24th, the right and centre were to be pushed forward to Lonato and Castiglione, while the left was to come sweeping upward through Castel Goffredo to Carpenedolo. This magnificent but impracticable plan was based upon the conjecture that the Allies would remain inactive throughout the 23rd and 24th, and thus allow themselves to be outflanked. In war, conjecture is the worst basis of operations. And so it proved. The march of the first day was made by the Austrian army, and the right and centre bivouacked at Pozzolengo, on the heights of Solferino, Cassiano, Cavriana, and about Medole and Guidizzolo on the plain below. But the extreme left wing did not stir, and the combination was a failure at the outset, because the corps of Lichtenstein, which was to flank the Allies, never approached the battle-field. The conjectured inactivity of the Allies proved to be unsound, for they were on the march early in the morning, and the Austrian position of bivouac became a position of battle. It is possible that both parties were surprised; but it is clear that the Allies were better in hand, and more ably commanded on all points of the field. The Austrian line was too extensive; there were no reserves behind Solferino—the key of the position; and the French Emperor, discovering its weak point, assailed and carried it, though at a great sacrifice of men. For many hours the Austrians were without a commander-in-chief; their old-fashioned guns were useless against the new rifled cannon; and their chiefs showed little tactical skill; nevertheless, they made a stout fight; and, though defeated, got off without a pursuit. The successes of Benedek against the gallant, but overmatched Sardinians indicate the plan which would have given them a chance of victory. If they had brought up the corps from Mantua, and had defended themselves with their left, while they fought with powerful masses on the right the Sardinians must have been routed and the French turned. How this simple plan, based on the sound principle of taking the shortest route to the enemy's line of retreat, escaped the notice of the Austrian strategists is one of those questions which time alone can solve.

Both sides, victors as well as vanquished, suffered heavy losses among these Mincio hills. The Allies admit a loss of 17,000, and the Austrians that of an equal number. Probably both understate their losses. Whatever they were, Solferino was decisive of the campaign. Both Emperors were eager for peace, and when the Allies had crossed the Mincio, which they did not deem it prudent to do until a week after the battle, just as Peschiera had been invested, and the siege-train had come up, the two Emperors, meeting at Villafranca on the 10th of July, made peace; and five days later the Emperor Napoleon was again in the capital of his empire, having in a little more than eight weeks won two great battles, wrested Lombardy from Austria, revolutionised Central Italy, and revived the military policy of the first Empire, established his reputation as a successful soldier, and disturbed Europe from end to end.

* *The War in Italy.* From Drawings by Carlo Bossoli: with a Descriptive Narrative by the Author of the *Times* Letters. (Day & Son.)

CURIOSITIES OF WAR, AND MILITARY STUDIES, &c.*

This unpretending volume is really far better than the author would have us think it is. He declares his object is "to illustrate, however imperfectly, the advantages to be derived from the practice of discipline and duty;" and he has not only been successful in obtaining this end by a series of examples, but he has at the same time combined a great deal of amusement with solid information for military readers and for the larger public, every day increasing, which takes an interest in military matters. The writer has made good use of his opportunities—and that is no small praise, for few of us have done, or will ever do so—and the contents of the volume range over an immense field, with crops of quaint growth springing up at every page about battles on Sundays, Influence of Weather on Fighting, "Sent to Coventry," Clothing of the Army, Balloons in Warfare, Milton nearly Adjutant-General (rather a drawback to have a blind officer of that rank in action), Sugar used for Earthworks, Barrack Libraries, Soubriquets of Regiments, and an overflowing harvest of similar antiquities. The volume teems with anecdotes, and we can recommend it to the least pugnacious of Quakers,—we know there are some of that evanescent sect terrible men of war—for a quiet hour's reading. Mr. Carter can no doubt find enough for a second volume in the same well-gleaned ground where he has picked up so much corn. We shall give it a hearty welcome.

THE ARMIES OF THE CONTINENT.

The political atmosphere is again clouded. The Villafranca preliminaries, already considerably modified by the Zurich treaties, are likely to be completely annulled by the recent position assumed by the Emperor of the French towards the Pope with regard to the Romagna. Rumours are already current of a treaty between Austria, Naples, and the Pope, to oppose any limitation of the territory belonging to the Papal See; the day fixed for the Congress has been adjourned *sine die;* the Austrian government has demanded explanations as to whether the pamphlet, "The Pope and the Congress," is to be taken as the programme of the policy of the French Emperor at the Congress; Antonelli has been ordered to remain at Rome till "further orders;" whilst Naples declines to send representatives should Austria and the Pope refuse to be represented at the Congress. The old saying, "that the ashes from a French corporal's pipe would suffice to set Europe a-blaze," may hold good shortly. Under these circumstances, it is of some importance to study the relative strength of the parties that may be concerned in the struggle which still hangs like the sword of Damocles suspended over the head of Italy.

The Sardinian army first deserves our notice. It is the heart of the Independence of Italy. Round the flag of Victor Emmanuel all the states of Italy must rally, They

* *Curiosities of War, and Military Studies, &c.* By Thomas Carter, Adjutant-General's Office. London: Groombridge & Sons, Paternoster Row.

Digitized by Google

must adopt the Belgian motto: "*L'Union c'est la force.*" They have already given proofs of their intention to do so. Tuscany, Modena, Parma, and the Romagna, are *de facto* annexed to Piedmont. The frontier line has been abolished, the Sardinian flag hoisted, the custom dues, laws, and municipal regulations of Sardinia, and all official enactments are headed "During the reign of Victor Emmanuel," &c. Sardinian generals command the troops in Central Italy. We shall therefore consider the armies of Modena, Parma, Tuscany, &c., as a grand reserve of the Sardinian army.

The Sardinian Army proper is composed as follows:

PERSONNEL OF THE ARMY.

STAFF (Etat-Major).

Marshal.
Generals.
Lieutenant-Generals.
Major-Generals.
Royal Corps of the Staff (Corps Royal d'Etat-Major).
Corps of the Local Staff (Corps de l'Etat-Major des Places).

GENDARMERIE.

Corps of Royal Carabineers.
Regiment of Chevaux-Legers de Sardaigne.

BODY GUARD (Gardes du Corps). PALACE GUARD (Gardes du Palais).

Staff	8	13	...
Four Companies	16	432	180
Total	24	445	180
Effective strength		469	

To this we must add two companies of "workmen," consisting of 29 officers and 630 men.

THE STAFF (*Etat-Major Général*).—The Staff of the Piedmontese army consists at the present moment of a Marshal (this post is usually vacant), 2 Generals, 9 Lieut.-Generals, and 28 Major-Generals. The attributes of these different grades are the same as those of the Marshals, Generals of Division, and Generals of Brigade of the French army. The rank of General corresponds to that of Général-en-Chef in the French army, with this difference—that the former is a step in the hierarchy, whilst the latter is simply a temporary title conferred upon the general officer who has chief command of an army. The dress of the general officers of the Sardinian army is very simple. They do not wear epaulettes.

ROYAL BODY OF THE STAFF (*Corps Royal d'Etat-Major*).—This body consists of officers from the rank of captain to that of colonel. These officers are employed with commanders of divisions; they make topographical plans, &c. The corps consists of 4 Colonels, 3 Lieut.-Colonels, 7 Majors, 19 Captains: total, 33.

LOCAL STAFF (*Etat-Major des Places*).—These appointments are reserved as a sort of retreat for officers and non-commissioned officers of the army. The Commandants de Place of the chief districts of the province have the military command of the province.

THE KING'S MILITARY HOUSEHOLD.—The *Gardes du Corps* do duty in the chamber of the royal palace; they have officer's rank, and are selected from old non-commissioned officers of all arms. The *Gardes du Palais* are taken from veterans and corporals. Their admission into this corps gives them the rank of non-commissioned officer (*sous-officier*); they have charge of that portion of the palace which is not guarded by the *Gardes du Corps*.

GENDARMERIE.—This corps is formed of picked men from every branch of the service, and watches over the internal security of the kingdom. It comprises the Corps of Royal Carabineers, foot and horse, and a regiment of Chevaux-Legers de Sardaigne. The Corps of Carabineers consists of 25 companies and the Regiment of Chevaux-Legers of six squadrons.

The gendarmerie force is thus subdivided:

	Officers.	*Men*		*Troop Horses.*
		On Foot.	*Mounted.*	
Corps of Carabineers	75	2338	635	620
Chevaux-Legers de Sardaigne.	44	„	1084	771
Total	119	2338	1719	1391

INFANTRY.

INFANTRY OF THE LINE.—The 20 regiments of Infantry form 10 brigades, commanded by Major-Generals or by Colonels. These brigades are still called by the same names they had under the old system, viz., Grenadiers of Sardinia, of Savoy, of Piedmont, of Aosta, of Coni, of the Queen, of Casal, of Pignerol, of Tavona, of Acqui.

Each regiment, when on a peace footing, is formed as follows:

	Officers.	*Troops.*	*Total.*
Staff (Etat-Major)	1	6	7
4 Battalions, each of 4 companies	6	120	126
Strength of each regiment	7	126	133
For the 20 regiments	1580	25,520	27,100

The Staff of the regiment consists of:—

The Commander of the Regiment (Colonel or Lieut.-Colonel)
4 Majors, 2 Adjutant-Majors (one a Lieutenant, the other an Ensign), 1 Paymaster (Captain or Lieutenant), 1 Commissariat officer with the rank of Lieutenant, 1 Flag-bearer, 1 Chaplain, 1 Regimental Surgeon and 2 Assistant-Surgeons, 2 Quartermasters, a chief drummer, with the Band-master, band, and full number of sergeants, corporals, sappers, &c.

To each regiment are moreover attached: a tailor, a shoemaker, 2 armourers, and 2 vivandières.

Each company consists of 1 Captain, 1 Senior Lieutenant, 2 Junior Lieutenants, 1 Quartermaster (Sergeant-Major), 4 sergeants, 9 corporals, 2 drummers, 8 picked men and 52 privates. The non-commissioned officers, corporals, and picked men are armed with musket, bayonet and sword, the drummers have a sword, and the other men have simply musket and bayonet. The dress is much the same as the French troops of the line. A small white stripe on the collar is a distinguishing mark of the picked men. The non-commissioned officers and privates do not wear epaulettes; their respective rank is indicated by the number of stripes on the collar. The superior officers, up to the Colonel, are distinguished by different forms of epaulettes.

One of the crack corps of the Sardinian Army is that of the Bersaglieri or riflemen. This corps has a staff of its own, and counts 10 battalions. The staff consists of a Colonel, a Lieut.-Colonel, 10 Majors, and the corresponding number of other officers. Each battalion has 4 companies and a depôt. Each company consists of 1 Captain, 2 Lieutenants, 2 Junior Lieutenants, 1 Quartermaster, 12 corporals and 76 men. On the peace footing the battalion consists of 23 officers and 379 non-commissioned officers and privates, giving a total of 402 men per battalion. The whole corps stands thus:

	Officers.	*Troops.*	*Total.*
Staff	12	15	27
10 Battalions	229	3780	4009
Depôt	3	38	41
Total	244	3833	4077

The dress of the Bersaglieri is picturesque and simple,—a sort of Tyrolese hat and feather, and dark tunic; it is well suited to the duties they have to perform. It was much admired by both the French and English in the late war in the Crimea. The attention of the Sardinian Government has been drawn to provide these men with a better rifle, and a premium of 400*l.* has been offered for the best made musket by the Sardinian Government.

The Chasseurs-Francs consist of a staff and 3 companies. This corps consists of those soldiers who, for offences, have been dismissed from their own regiments. It is composed as follows:

	Officers.	*Troop.*	*Total.*
Staff	6	8	14
3 Companies	12	66	78
Total	18	74	92

The number of soldiers of each company is determined by a ministerial decree, according to the wants of the service.

CAVALRY.

The Cavalry of the Sardinian army consists of four regiments of cavalry (so-called of the line), Lancers, and five regiments of Chevaux-Legers. Each regiment has a staff for active squadrons, and a depôt squadron. The staff of each cavalry regiment consists of the Commander (Colonel or Lieut.-Colonel), 1 Major, 1 Captain, 2 Lieutenants, 2 Adjutants, 2 Surgeons, 2 Veterinary Surgeons, a Paymaster, and 18 non-commissioned officers and men. The Senior Ensign is Standard-bearer. The squadron consists of 1 Captain, 2 Lieutenants, 2 Ensigns, 1 Quartermaster, 4 sergeants, 11 corporals, 4 trumpeters, 2 farriers, 1 saddler, and 110 men. The total strength of each squadron is 5 officers, 141 non-commissioned officers and men. The strength of a regiment is:

	Officers.	*Troop.*	*Total.*	*Troop-horses.*
Staff	12	18	30	12
4 Active Squadrons	20	564	584	424
1 Depot Squadron	3	18	21	8
Total	35	600	635	444
For the 9 regiments	315	5400	5715	3996

The Lancers wear a helmet, and are armed with sword, lance, and carbine. The Chevaux-Legers have sword and carbine slung at their side; they wear the kepi. The whole of the Cavalry wear the tunic. The trappings and dress have a strong resemblance to those of the French army.

ARTILLERY.

The Sardinian Artillery consists of a staff and 3 regiments.

	Offi	*Men.*	*Total.*
The Staff consists of	47	54	101
1 Reg. Artillerie de place (12 companies)	60	1048	1108
Do. Field (20 batteries, of which 2 horse)	101	2098	2199
Do. Field (8 companies)	44	861	905
Total	252	4061	4313
Horses and mules	—	1110	1110

The Sardinian Artillery is, in its way, perfect. There is a change now in this arm which is likely to affect every army in Europe. Armstrong guns and rifled cannon promise to operate a revolution in this branch of the service. That the Sardinians know how to handle their guns, we have had proof on the Tchernaya, and during the late Italian campaign. In time of peace a Sardinian battery consists of cannon and 2 howitzers.

ENGINEERS.

This branch of the service is excellent. The officers are all men of high scientific attainments. It consists of a staff and 1 regiment of sappers, each of 2 battalions and 5 companies.

	Staff.	*Regt. of Sappers.*
Superior officers	12	3
Subalterns	30	49
Men	92	973
Total	134	1025
Effective strength		1159

Such is the Sardinian army as it is actually composed: the *data* are *official*.

Major P. Stewart, of the Bengal Engineers, who has had long experience in the Electric Telegraph Department in India, is at present engaged in completing the telegraphic communications between the various dockyards and arsenals on the South Coast of England.

TRIAL OF INVENTIONS.

Our readers are aware that an Ordnance Select Committee has been for some time instituted, for the purpose of examining into the merits of any inventions relating to implements and munitions of war. This Committee assembles at least three times a week, and all persons placing inventions before it will be required to fulfil the following conditions:—

The inventor must leave with the Secretary of the Committee a written description, model, or specification of his invention; and should it be thought desirable to subject it to experimental trial, he must, when required by the Secretary, deliver at Shoeburyness, or other place named to him, a specimen corresponding with the description.

The inventor will be required to state—I. The results intended to be attained by his invention. II. The estimate cost of the invention or improvement in a state to be introduced into the service. And III. The sum which he requires—1st. For the assignment of the invention or patent to the Secretary of State for the time being. 2nd. For a licence, if patented, and afterwards for the manufacture and supply of the invention as finally approved.

The inventor must attend at his own expense any meetings of the Committee to which he may be summoned, and give all information and answer all questions then and there put to him by the Committee, for the purpose of illustrating or explaining his invention.

The inventor will bear all damage or injury that may arise to any of his specimens delivered to the Committee.

The Committee do not undertake to order a trial of any invention, unless the experiments are likely, in their judgment, to lead to beneficial results; nor do they undertake to order in any case experiments at the public cost. Before, however, any experiments are undertaken by the Committee they will apprise the inventor of the time and place of doing so; and if the experiments are to be made at his cost they will name the sum to be deposited by him with the Committee to cover the expenses thereof. The inventor will be permitted to be present at all the experiments made at his cost.

In the event of the adoption into the service of the invention, the descriptions, drawings, or models which have been furnished by the inventor will be retained by the Ordnance Select Committee as the property of the Department.

In the event of rejection, drawings or models will be considered as the property of the inventor, and will be returned to him, on his making application for the same within two months after the date of the notification of the rejection of his proposal. The Committee will, however, have the option of retaining copies of the same for purposes of record. The period within which application for the return must be made will be extended in the case of foreign inventors according to circumstances.

The Secretary of State does not undertake to purchase any invention thus offered to him.

INCREASED ACTIVITY IN CHATHAM DOCKYARD.—The orders recently received at Chatham Dockyard for the completion of those vessels which have been ordered to be built by the present Board of Admiralty, have had the effect of causing increased activity in all the departments of that establishment, most of the men employed in which being engaged in working overtime at enhanced wages. The greatest efforts are being made to complete the three line-of-battle ships, Atlas, 91, Bulwark, 91, and Rodney, 91, the last of which is undergoing the process of conversion from a sailing-ship to a screw-steamer; and, from the large number of men employed on each, there is no doubt that those vessels will be fit for launching during the ensuing summer. It would seem that the Lords of the Admiralty are desirous of increasing the number of 91-gun screw-steamers; as, in addition to those actually in progress at Chatham, and the other naval establishments, orders have been received by the master shipwright at Chatham for two more of that class of vessels to be laid down at that establishment as soon as there are vacancies on the slips now occupied. The fine steam frigate, Undaunted, 51, is making great progress, and when completed will be one of the finest frigates of that description of vessel belonging to the Royal Navy. The sailing frigate, Severn, 51, which has been converted into a screw-steamer, will also prove a valuable acquisition to that class of frigates; this vessel is so far completed that she will be ready to be undocked early in the ensuing month. By direction of the Lords of the Admiralty, a careful survey has been made of the mortar vessels lying at Chatham, which were built during the Russian war, the result of which leaves no doubt that unless some plan can be devised for arresting the ravages of the marine worm, which now infests the timbers, those vessels will be rendered entirely useless. It was supposed that subjecting the vessels to the action of the frost would have destroyed the worm, and with this view some of the mortar boats were hauled up on the slips, and having been scraped and cleansed by the convicts, had their surfaces exposed to the frosts; but notwithstanding the intense weather experienced some short time since, not the least effect has been perceptible, and it is now feared that the whole of the vessels which were built by the Government at an enormous cost will be rendered unfit for further service. The embankment of a considerable extent of marsh land adjoining the eastern extremity of the dockyard has been effected by the convicts, several hundreds of whom have been for some time past employed at that work, which has been undertaken in order to prepare for the foundations of the new steam-docks which are intended to be erected on that site, and in the construction of which the convicts will be employed.

The examination of candidates for admission to the Royal Military Academy, Woolwich, by the Council of Military Education, commenced on Wednesday last, at the Royal Hospital, Chelsea; Major-General Cameron, Vice-President, and Colonel Addison and Colonel Elwyn were the members of the Council present. The first day was confined to the medical examination. The number of candidates was about 120. The examinations extend over eleven days, terminating on Monday, the 16th inst.

The following officers have obtained leave of absence from Chatham garrison:—Colonel R. N. Phillips, commanding the 2nd battalion; Lieut. C. Enys, 20th Regiment; Ensign C. Villiers and Ensign R. M. Tod, 43rd Light Infantry; Ensign E. Packenham, 52nd Light Infantry; and Ensign G. B. Deare, 53rd Regiment.

OBITUARY.

MAJOR RIVERSDALE GLYN.—It is with sincere regret that we have to record the death of Major Riversdale Glyn, of the Rifle Brigade, on his way home from India. He was not only a favourite with his brother officers and the men of the battalion, but he was esteemed and regarded by every one of the British army, with whom, though young, his varied service had thrown him largely in contact. During the war in the Crimea he was at one time, as subaltern in the 8th Hussars, on duty with the escort of Lord Raglan, and never missed a turn of duty. While the Rifle Brigade were engaged in the most arduous duties of the siege he exchanged from the cavalry into that famous battalion, in which he saw much service. After the siege was over he enjoyed a very brief respite from active duty till he was sent with his battalion to India, where he was present at some of the most serious affairs under Lord Clyde, in every one of which he displayed the same qualities which had gained for him the regard and respect of his brother soldiers. All through Oude, up to the Terai, through the summer and winter campaigns, through the subsequent marches, he went on foot with his men till the dispersion of the rebels brought to him and his brigade a short rest, which only developed the seeds of the disease planted by exposure. The voyage home came too late. He is one more of the soldiers who have died after the battle was won of wounds gained in the struggle.

The papers announce the demise of Lord John Scott. The unexpected and melancholy occurrence took place on Tuesday morning, at his seat, Caneston Lodge, near Rugby. His lordship was a keen supporter of our national sports, particularly the turf and the chase.

COLONEL PINCKNEY, C.B.—This gallant and lamented officer adds another to swell the list of the many valuable lives sacrificed to the climate of India during the great rebellion. This sad event occurred on board the flat Gogra, in which he was embarked with his regiment, returning from his late command in Central Oude. He entered the army as ensign in the 73rd in 1825, and obtained the command of that regiment in 1854, and the C.B. for distinguished services in the Kaffir wars, and we find his name in every service in which his regiment was engaged.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BECHER—Dec. 27, at Hollybrook, Skibbereen, Ireland, the Lady Emily Becher, of a son.
CALDWELL—Jan. 2, at 10, Berkeley Square, London, the wife of Captain Henry Caldwell, R.N., of a daughter.
CAMPBELL—Jan. 3, at St. Ann's, Lewes, Sussex, the wife of Dr. John Campbell, R.N., of a daughter.
GAROOCK—Nov. 27, at Colombo, Ceylon, the wife of Colonel Garook, Assistant-Quartermaster-General, of a daughter.
GORMAN—Oct. 29, at Colombo, the wife of Captain W. J. Gorman, C.R. Regiment, of a daughter.
GRIMSTON—Jan. 3, at Mersham, Hants, the wife of Captain O. A. Grimston, of a son.
HAWKER—Dec. 30, at Fermoy, County Cork, the wife of Paymaster Hawker, Depôt Battalion, of a daughter.
HILL—Dec. 30, at Wellington House, Ramsgate, the wife of Captain William Hill, 2nd West India Regiment, of a daughter.
JAMES—Dec. 29, at Hillingdon Road, Uxbridge, the wife of H. N. A. James, Esq., late Commander of the E. I. S. Sutlej, of a son.
MACBEAN—Nov. 5, at St. Helena, the wife of Lieutenant-Colonel MacBean, St. Helena Regiment, of a son.
MCDONALD—Dec. 30, at Cork, the wife of D. D. McDonald, Esq. Surgeon-Major, Medical Staff, of a son.
MCMAHON—Dec. 29, the wife of Colonel McMahon, 5th Dragoon Guards, of a son, stillborn.
NAPIER—Jan. 4, at the Royal Military College, Sandhurst, the wife of Colonel William Napier, of a daughter.
PITCAIRN—Jan. 1, at Clifton, the wife of Major A. Pitcairn, 25th Regiment, King's Own Borderers, of a son.
SHEA—Jan. 2, at East Cosham, Hants, the residence of her father, Admiral Sir Lucius Curtis, Bart., C.B., the wife of Captain R. P. O'Shea, 2nd Battalion, 20th Regiment, of a daughter.
SPALL—Dec. 30, at St. Paul's Grove, Marquis Road, Canonbury, Mrs. Edmund Spall, of a son.
SPOTTISWOODE—Oct. 28, at Candy, Ceylon, the wife of Arthur Cole Spottiswoode, H.M. Bengal Native Infantry, of twin boys.
THAIN—Dec. 30, at 8, Howley Place, Maida Hill West, the widow of Lieut. D. D. Thain, Assistant-Commissary-General, Bombay Army, of a son.
WELMAN—Jan. 2, at Parkhurst, Isle of Wight, the wife of Major Welman, Adjutant 5th Depôt Battalion, of a daughter.
WILFORD—Dec. 13, at Kingston, Canada West, the wife of Ernest Christian Wilford, Esq., Royal Canadian Rifles, of a daughter.

MARRIAGES.

DAVIDSON—SOWTER—Dec. 22, at St. Paul's Derby, by the Rev. J. D. Massingham, M.A., William Alexander Davidson, Esq., M.D., King's Dragoon Guards, to Mary, elder daughter of the late William Sowter, Esq.
EDGAR—PRITCHARD—Dec. 31, at St. Mary's, Putney, by the Rev. William Calvert, Minor Canon of St. Paul's, assisted by the Rev. C. Robinson, the Vicar, J. Haythorne Edgar, Esq., late of the Royal Artillery, to Emily, younger daughter of the late William Pritchard, Esq., High Bailiff of Southwark.
GARDNER—ELWES—Jan. 3, at Hove Church, Brighton, by the Rev. Henry Wood, brother-in-law of the bride, and the Rev. Walter Kelly, Captain Alan Gardner, R.N., second son of the late General the Hon. William Gardner, R.A., to Amy Sophia, third daughter of the late John Payne Elwes, Esq., of Stoke College, Essex.
GLYNN—HALL—Jan. 3, at Hallow, near Worcester, by the Rev. H. G. Pepys, M.A., vicar, the Rev. Charles Glynn, M.A., vicar of Wolvey, Warwickshire, to Lucy Magdalen, daughter of Lieut.-Colonel Jasper Hall, late of the Coldstream Guards.
JOHNSON—MARTIN—Jan. 4, at Harberton, Devon, by the Rev. H. A. Martin, vicar of Laxton, Notts, Captain Charles Cooper Johnson, Quartermaster-General Department, Bengal Army, son of Sir Henry Allen Johnson, Bart., to Jemima Anne Frances, daughter of the Rev. Chancellor and the late Lady Charlotte Sophia Martin.
MOBERLY—CHASE—Jan. 5, at St. Marylebone Church, by the Rev. J. W. Reeve, the Rev. H. E. Moberly, Fellow of New College, Oxford, to Lucy Proby, youngest daughter of Lieut.-Colonel Chase, late of H.M.'s Madras Light Cavalry, and commanding the Hon. the Governor's Body-Guard.
PRENDERGAST—WHEELER—Dec. 21, at St. Cross, Winchester, by the Rev. W. Carus, Canon of Winchester Cathedral, assisted by the Rev. L. M. Humbert, Master of St. Cross, Charles O'L. L. Prendergast, Esq., 52nd Light Infantry, to Mary Katherine, youngest daughter of the late John Rogers Wheeler, of Wokingham, Berkshire.
SHEKLETON—GRAHAM—Nov. 10, at Belgaum, by the Rev. G. A. F. Watson, Captain Shekleton, Bombay Artillery, youngest son of the late Alexander Shekleton, Esq., of Dundalk, to Mary Jane Charlotte, daughter of the late T. H. Graham, Esq., surgeon, H.E.I. Company's Service.
SIDEBOTTOM—PEEL—Jan. 5, at St. James's, Piccadilly, by the Rev. Robert Nash, rector of Old Sodbury, Gloucestershire, Captain Francis Sidebottom, of Her Majesty's Indian Army, eldest son of Charles John Sidebottom, Esq., barrister-at-law, of Elm Bank, Worcester, to Flora Jane, youngest daughter of the late Right Hon. William Yates and Lady Jane Peel, of Baginton Hall, Warwickshire.
VANDERSPAR—AVARNE—Nov. 9, at Galle, by the Rev. R. Philips, Major W. C. Vanderspar, Ceylon Rifle Regiment, to Georgiana Margaretta, youngest daughter of the late J. Avarne, Esq., R.N., and granddaughter of the late Lieut.-General Avarne.

DEATHS.

ABERCROMBIE—Jan. 4, at 7, Vicarage Gardens, Kensington, Lieut.-Colonel John Abercrombie, H.M.'s Bengal Horse Artillery, aged 47, deeply regretted.
AWDRY—Sept. 25, at Calcutta, on board the ship Rowena, John Ronaldson Awdry, Esq., aged 25, the only surviving son of the late Major John Dea Awdry of the Madras Army.
BAKER—Dec. 22, at Bath, in his 66th year, Colonel George Baker, formerly of the 16th (Queen's) Lancers, and son of the late William Baker, Esq., of Bayfordsbury, Hertford.
BULFORD—Dec. 26, at Dinan, France, John Bulford, Commander in the Royal Navy, aged 77.
CARRUTHERS—Dec. 20, at Bath, of typhus fever, Emily Marianne, third daughter, aged 15 years, and on Dec. 21, Isabella Helen Coleman, second daughter of Lieut.-Colonel Carruthers, Retired List Madras Army, aged 18 years and 6 months.
CARRUTHERS—Jan. 4, at Bath, of typhus fever, Florence Olivia, eldest daughter of Lieut-Col. Carruthers, Retired List, Madras Army, aged 19 years and 11 months.
CLINTON—Dec. 30, at Weymouth, in the 15th year of his age, of congestion of the lungs, after measles, Walter Francis Clinton, Naval Cadet, H.M.S. Trafalgar, second son of Colonel and the Hon. Mrs. Frederick Clinton.
DANSEY—Dec. 30, at Bedstone Rectory, Shrewsbury, aged 7 years and 7 months, Edward Collins, eldest son of the late Captain C. E. Dansey, Bombay Fusiliers.
GLYN—Dec. 11, off Aden, on his return from India, Major R. R. Glyn, aged 28, Captain 2nd Battalion Rifle Brigade, fourth son of George Carr Glyn, Esq., M.P.
GREGG—Nov. 26, at Kingston, Jamaica, in the 24th year of his age, Charles Frederick Leopold Gregg, Esq., Assistant Military Accountant of Her Majesty's Royal Commissariat in the Island, son of the late Colonel Gregg, formerly stipendary magistrate there, and nephew of the Rev. Dr. Tresham Gregg.
LEWIS—Dec. 30, at Langhouse, Greenock, Robert Lewis, aged 44, late of H. M.'s 6th Dragoon Guards. Much regretted by all who knew him.
LEWIS—Jan. 3, at his residence, Caledonia Place, Clifton, aged 76, James Crossley Lewis, Esq., late of H. M.'s 56th Regiment.
LONG—Dec. 28, at Atherstone Place, East Gate, Lincoln, Henry Benjamin Homes Long, Paymaster, R.N., aged 71.
MILNE—Jan. 1, at her residence, the Limes, Lawton, Chesire, Henrietta Willan, widow of the late Lieut-Colonel Milne, 19th Regiment, and second daughter of the late William Belcombe, Esq., M.D., of York.
STEHELIN—Dec. 29, at Erith, of atrophy, Lavinia Theodora, wife of Captain Stehelin, late of H.M.'s 13th Regiment, L. I., aged 65.
STORKS—Dec. 30, the Rev. Thomas T. Storks, second son of Mr. Serjeant Storks, aged 47.
SYMS—Nov. 19, at Calcutta, after a long illness, Captain Frederick George Syms, Paymaster 3rd Foot (the Buffs), in his 35th year.
TIMS—Sept. 27, on his voyage home from India with troops, aged 44, Robert H. Church Tims, Esq., Commander of the Eveline, and only son of Mr. Richard Moore Tims, of Dublin.
TRANT—Dec. 26, at Nantes, in France, Clara, the beloved wife of William Trant, Esq., late of the 80th Regiment, in the 63rd year of her age.
UMFREVILLE—Jan. 2, at Greenhithe, Kent, Captain S. C. Umfreville, R.N., in his 68th year.
WEST—Dec. 29, at 12, Rue d'Angoulême, Faubourg St. Honoré, Paris, William Avery West, Esq., late of the 1st Life Guards.
WEST—Dec. 29, at 12, Rue d'Angoulême, Faubourg St. Honoré, Paris, William Avery West, Esq., late of the 1st Life Guards.
WHITE—Dec. 27, at St. Helier's, Jersey, Henrietta Patricia, widow of the late Brevet-Lieut.-Colonel Ferdinand White, C.B., of H.M.'s 8th Regiment.
WILLIAMS—Dec. 31, at Dane John Gate, Canterbury, Eliza, the beloved wife of Captain S. Williams, Paymaster 4th Depôt Battalion, after many years of severe suffering, aged 46.

OUR NAVAL RESOURCES.

By the official *Navy List* for the present month and quarter we find that the British navy consists of 518 vessels, including screw steamers of every description, exclusive of which there are 153 gun boats, 121 brigs, hulks, &c., employed in harbour service, and 47 coast-guard tenders. Of the number of vessels composing the navy no less than 314 are in commission, and doing duty in every part of the globe. The vessels in commission are distributed as follows:—65 line-of-battle ships, frigates, sloops, and gun boats attached to the East Indies and China station, 18 on the coast of Africa, 6 at Australia, 13 in the Pacific, 3 in the Brazils, 8 on the South-east coast of America, 8 at the Cape of Good Hope, 21 on the North America and West India station, 41 in the Mediterranean, 19 attached to the Channel squadron, and the remaining 112 are employed on particular service or attached as guard ships to the principal ports in Great Britain and Ireland. In addition to the above, there are 38 powerful vessels building at the various Royal dockyards, many of which are nearly ready for launching. The names of these vessels are:—Anson, 91; Atlas, 91; Aurora, 51; Barossa, 21; Belvidera, 51; Bristol, 51; Bulwark, 91; Camelion, 17; Columbine, 11; Defiance, 91; Espoir, 5; Glasgow, 51; Howe, 121; Landrail, 5; Liverpool, 51; Newcastle, 51; Nimble, 5; Orestes, 21; Orpheus, 21; Pandora, 1; Pantaloon, 10; Pelican, 17; Prince of Wales, 131; Rapid, 11; Rattlesnake, 21; Repulse, 91; Rinaldo, 17; Robust, 91; Rosario, 11; Royal Alfred, 91; Royal Frederick, 86; Royal Oak, 91; Triumph, 91; Undaunted, 51; Wolverine, 21; Zealous, 91; and Zebra, 17.

NAVAL SEA-TIME BY AN ORDER IN COUNCIL.

Captain Francis Leopold M'Clintock, LL.D., has had granted to him two years and six months *sea time*, as if the Fox during his late successful cruise had been a vessel of war instead of a private yacht. We congratulate the Duke of Somerset that the Board of which he is the head should have thrown no impediments in the way of this Royal act of grace; and that no pleas of want of precedent, departure from the rules of the service, were advanced, when it became necessary to mark in a signal manner good service to the state.

It is rumoured in naval circles that some difficulty has been made about giving Captain M'Clintock pay whilst employed in the Arctic seas. Surely this must be a mistake. which has only to be pointed out to be rectified. Sea-time always carries pay, and we know that the gallant officer has not received the slightest remuneration from Lady Franklin, although that noble-minded lady has endeavoured in every possible way to try and induce him to accept some token of her deep appreciation of his services, and of the load of gratitude his success has placed her under. We may congratulate the crew of the Fox, upon the assurance which the official letter gives them of having won the sum of 10,000*l.* which was voted by the Parliament long since, for those who should first give authentic intelligence of the fate of the crews of the Erebus and Terror. The Admiralty have evidently worded the letter so as to justify themselves in making over the said sum to the officers and crew of the Fox; and everyone, from John O'Groats to the Land's End, will, we feel sure, indorse their verdict, and say with us that it has been right well earned.

Advertisements.

NEW LINE OF ROYAL MAIL STEAMERS FROM MILFORD HAVEN TO PORTUGAL AND THE BRAZILS.—The following first-class and powerful STEAM-SHIPS are appointed to perform a monthly service between MILFORD HAVEN and LISBON, Cape de Verds, Pernambuco, Bahia, and Rio de Janeiro:—

Ships.	Commanders.	Tons Register.	Effective Horse Power.
The Milford Haven	Capt. Champion	2,221	600
Portugal	Capt. Courtenay	2,261	600
Brazil	Capt. Eustace.	2,242	600

The next ship of this line, the Milford Haven, is intended to sail with goods and passengers on Jan. 24, leaving Lisbon Feb. 1, and Rio de Janeiro about the end of February on her return voyage. These splendid ships are fitted up with every consideration for the convenience and comfort of passengers. They will carry the mails from Portugal to the Brazils, and, sailing under the Portuguese flag offer important advantages in the saving of duties at Lisbon. Through rates will be established from and to all the principal towns in the kingdom, and return tickets granted on liberal terms. All further information as to rates of freight and passage, dates of sailing, &c., may be obtained on application to Messrs. FORD & JACKSON, managers, Milford Haven; at the booking office, 33, Regent Circus, Piccadilly; and to JOHN W. WILSON, Esq., general manager, 40, Cannon Street, London, E.C. Passengers may proceed by steamer from Rio de Janeiro to Montevideo and Buenos Ayres.

THE EIGHTH YEAR.

THE CONSERVATIVE LAND SOCIETY. TRUSTEES: VISCOUNT RANELAGH and J. C. COBBOLD, Esq., M.P.

Persons desirous of INVESTING Savings and Capital, are requested to apply for the New Prospectus. The system is adapted for all classes of the community and the business can be as easily carried on by correspondence as by attendance at the Offices, No. 33, Norfolk Street, Strand, London, W.C. The Society will be found most convenient as well as eligible, as investors can make use of it either as a Depositor Savings Bank, combining a good rate of interest with the privilege of prompt withdrawal when required, and incurring no liabilities, either as a Shareholder or a Depositor. Freehold Land, the taking of which is quite optional, can be acquired in small or large lots by easy monthly repayments. Interest on shares 5 per cent., with shares in annual Bonus; on Deposit 4 per cent.

CHARLES LEWIS GRUNEISEN, Secretary.

ALLIANCE BRITISH AND FOREIGN LIFE AND FIRE ASSURANCE COMPANY. Bartholomew Lane, London, E.C. Established 1824. Branch Offices: Edinburgh, Ipswich, and Bury St. Edmunds. Capital, Five Millions sterling.

PRESIDENT.—Sir Moses Montefiore, Bart.

DIRECTORS.

Charles G. Barnett, Esq.	James Alexander, Esq.
George H. Barnett, Esq.	John Irving, Esq.
Charles Buxton, Esq., M.P.	Sampson Lucas, Esq.
Sir George Carroll.	Elliot Macnaghten, Esq.
Benjamin Cohen, Esq.	Thomas Masterman, Esq.
James Fletcher, Esq.	Jos. M. Montefiore, Esq.
Charles Gibbes, Esq.	Sir A. N. de Rothschild, Bart.
William Gladstone, Esq.	Lionel N. de Rothschild, Esq., M.P.
Samuel Gurney, Esq., M.P.	Oswald Smith, Esq.
James Helme, Esq.	Thomas Charles Smith, Esq.

Life Assurances are granted under an extensive variety of forms, with or without participation, and at moderate premiums; the rates for the Younger Ages being lower than those of many of the older and most respectable Offices.

Actual Service Risk within the United Kingdom in Volunteer Rifle and Artillery Corps, and in the Militia, is covered by the Company's Policies.

Fire Assurances both at home and abroad are accepted at very moderate premiums.

The Assured participate in the Fire Profits in respect of Policies in force for five complete years. The Return for the past Quinquennial period is in course of distribution.

FRANCIS A. ENGELBACH, Actuary and Secretary.

BONUS DIVISION.

GLOBE INSURANCE, CORNHILL AND CHARING CROSS, LONDON.

ESTABLISHED 1803.

Capital One Million, All paid-up and Invested.

The following are examples of the PROFITS accruing on Globe Participating Life Policies under the BONUS declared as at 31st December, 1858:—

AGE at Date of Policy.	Original Sum Insured.	Original Annual Premium.	Complete Years in force.	Bonus applied— By Addition to Policy.	Bonus applied— By payment in CASH.
25 Yrs.	£1000	£21 9 2	6 Years.	£72	£27 17
35 ,,	1000	28 2 6	6 ,,	72	32 15
40 ,,	1000	32 15 0	6 ,,	72	35 7
50 ,,	1000	45 12 6	6 ,,	72	42 9

(*Policies of One to Five complete Years Participate in proportion.*)

The above Profits are equivalent — if added to the Policy — to a Reversionary Sum at death equal to One Pound Four Shillings per Cent. per Annum on the Sum Insured for each of the completed years of the Policy:—Or, If taken as an Immediate Cash Payment, is, at most ages, considerably more than One Year's Premium.

The Bonus Periods are FIVE Years, and the Rates of Life Premiums, whether *With* or *Without* Profits, very economical.

FIRE, LIFE, ANNUITY, and REVERSIONARY business transacted.

WILLIAM NEWMARCH, Secretary.

*** No Charge for Volunteer and Militia Corps.

For upwards of thirty years No Extra Premium has been charged by the Globe for service in the Militia and in Volunteer Corps in the United Kingdom.

THE LONDON ASSURANCE, 7, ROYAL EXCHANGE, E.C. 30th November, 1859.

The Corporation of the London Assurance give notice to parties whose Lives are Assured in their Office, that no extra Premium will be charged to them on joining any Volunteer Corps for Service in the United Kingdom, and that all Policies will be paid in full where death ensues in consequence of such service.

JOHN LAURENCE, Secretary.

UNITED KINGDOM LIFE ASSURANCE COMPANY, No. 8, Waterloo Place, Pall Mall, London, S.W.

The Funds or Property of the Company, as at the 31st December, 1858, amounted to 652,618*l.* 3*s.* 10*d.* invested in Government or other approved securities.

Chairman.—The Hon. FRANCIS SCOTT.

Deputy Chairman.—CHARLES BERWICK CURTIS, Esq.

INVALID LIVES.—Persons not in sound health may have their lives insured at equitable rates.

ACCOMMODATION IN PAYMENT OF PREMIUMS.—Only one-half of the Annual Premium, when the Insurance is for life, is required to be paid for the first five years, simple interest being charged on the balance. Such arrangement is equivalent to an immediate advance of 50 per cent. upon the annual premium, without the borrower having recourse to the unpleasant necessity of procuring sureties, or assigning and thereby parting with his Policy, during the currency of the Loan, irrespective of the great attendant expenses in such arrangement.

The above mode of insurance has been found most advantageous when Policies have been required to cover monetary transactions, or when incomes applicable for Insurance are at present limited, as it only necessitates half the outlay formerly required by other Companies before the present system was established by this Office.

LOANS are granted likewise on real and personal securities.

Forms of Proposals and every information afforded on application to the Resident Director, 8, Waterloo Place, Pall Mall, London, S.W.

By order, E. LENNOX BOYD, Resident Director.

THE ARMY AND NAVY.

Published on the 1st of every month, price 3*s.* 6*d.*,

COLBURN'S UNITED SERVICE MAGAZINE, and NAVAL and MILITARY JOURNAL. This popular periodical, which has now been established more than a quarter of a century, embraces subjects of such extensive variety and powerful interest as must render it scarcely less acceptable to readers in general than to the members of those professions for whose use it is more particularly intended. Independently of a succession of original papers on innumerable interesting subjects, personal narratives, historical incidents, correspondence, &c., each number comprises biographical memoirs of eminent officers of all branches of service; reviews of new publications, either immediately relating to the army or navy, or involving subjects of utility or interest to the members of either; full reports of trials by courts martial, distribution of the army and navy, general orders, circulars, promotions, appointments, births, marriages, obituary, &c., with all the naval and military intelligence of the month.

"This is confessedly one of the ablest and most attractive periodicals of which the British press can boast, presenting a wide field of entertainment to the general as well as professional reader."—*Globe.*

Last of the Queues and Amenities of Warfare, etc., etc.

OPINIONS OF THE PRESS.

"A very entertaining volume, evincing great research. It is surprising what a fund of incidents and facts the author has brought together, and placed before us in an attractive form. The work is just the one suited to a soldier, inasmuch as it may be taken up to wile away an hour, and laid down at any moment, without losing its thread, or weakening its impressions."—*United Service Magazine.*

"Second to none of its class in merit, 'Curiosities of War' teems with authentic anecdotes of the British Army. We recommend our readers to buy the book, the perusal of which will endear yet more the British Army to every Englishman. The author has done both the service and the public a favour by the publication of 'The Curiosities of War.'"—*Standard.*

"Noble deeds, loyalty, and heroism, in every phase of military life, are chronicled with graphic skill, and the book will doubtless give an impetus to the spirit of the day."—*Sunday Times.*

"One of the most interesting chapters is 'Women in Battle.' The book abounds with interesting scraps and anecdotes: will be of great value to the military student."—*Court Circular.*

"Mr. Carter has a natural taste for accumulating strange or curious stories, incidents, and traits. His book will be amusing and instructive to all."—*Chatham News.*

"Will fully repay those who are daily becoming more and more interested in the public feeling that it is necessary to be fully prepared against any emergency that may arise against the liberties of the country."—*Bell's Weekly Messenger.*

This Soldiers' Book and Military Compendium is full of the most interesting anecdotes and incidents relating to various regiments, and contains the origin of every infantry corps, together with names and heroic deeds of the recipients of the Victoria Cross, arranged regimentally.

London: GROOMBRIDGE & SONS, 5, Paternoster Row, E.C.

LORD DUNDONALD'S AUTOBIOGRAPHY.

Now ready, Vol. I., complete in Two, 8vo. 14*s.*

THE AUTOBIOGRAPHY OF A SEAMAN. By THOMAS, EARL OF DUNDONALD.

"Everything about Lord Dundonald's biography is strange and romantic. He was liker Nelson than any officer of his generation. He performed brilliant exploits. His work will take its place along with 'Collingwood's Letters,' and with our best naval histories."—*Athenæum.*

London: RICHARD BENTLEY, New Burlington Street, W., Publisher in Ordinary to Her Majesty.

Now ready, in 8vo. 14*s.*

MILITARY OPINIONS. Part 1. National Defences. Part 2. The War in the Baltic and the Crimea. Part 3. Military Maxims, &c. By General Sir JOHN FOX BURGOYNE, Bart., G.C.B.

"This volume touches upon every important point which has lately been mooted with regard to the British Army and the art of war. It is a military manual containing very able and copious discussions of all that is novel in modern warfare."—*Times.*

London: RICHARD BENTLEY, New Burlington Street, W., Publisher in Ordinary to Her Majesty.

Now ready, New and Popular Edition. In Six Vols., crown 8vo. with numerous Portraits, 30*s.*

JAMES'S NAVAL HISTORY OF GREAT BRITAIN.

"A well-timed reprint of a work to which every Englishman may turn with pride and satisfaction. Its introduction into our schools may do much towards inducing our boys to embrace the Navy as a profession."—*Notes and Queries.*

"No library, public or private, can be said to be complete without this work."—*Leader.*

London: RICHARD BENTLEY, New Burlington Street, W., Publisher in Ordinary to Her Majesty.

COMPLETION OF BRIALMONT'S LIFE OF WELLINGTON.

Now ready, in 8vo. Vols. III. and IV. price 24*s.* cloth,

THE LIFE OF THE DUKE OF WELLINGTON. From the French of ALEXIS BRIALMONT, Captain on the Staff of the Belgian Army: With Emendations and Additions. By the Rev. G. R. GLEIG, M.A., Chaplain-General to the Forces and Prebendary of St. Paul's.

Vols. I. and II. with numerous Illustrations, price 30*s.*

THE third and fourth volumes take up the history of the Duke from the Battle of Waterloo, and represent him as an ambassador, as a minister, and as a citizen. They have been compiled from authentic sources; namely, the private and public correspondence of his Grace, which the present Duke permitted Mr. Gleig to consult whenever he chose to do so. Everything, therefore, which can as yet be told in regard to the most important transactions of modern times they must tell truly; while the Duke's character is brought by them more completely under the cognisance of his countrymen than it has been, or is ever likely to be, in the present, or perhaps in any future generation.

London: LONGMAN, GREEN, LONGMAN, & ROBERTS.

THE EDINBURGH REVIEW, No. CCXXV. Will be published on SATURDAY NEXT.

CONTENTS:

I. Mortality in Trades and Professions.
II. Rawlinson's Herodotus.
III. Rogers on the Coal-Fields of America and Britain.
IV. Lord Elgin's Mission to China and Japan.
V. Sir A. Alison's History of Europe.
VI. Acclimatisation of Animals.
VII. Progress of Legal Reform.
VIII. Souvenirs & Correspondence of Mme. Recamier.
IX. British Taxation.
Lord Macaulay.

London: LONGMAN & Co. Edinburgh, A. & C. BLACK.

Shortly will be published, in 8vo. Illustrated

THE NAVAL CADET'S GUIDE; OR, SEAMAN'S COMPANION. Containing Practical Rules for Fitting and Placing Riggings, Managing Sails, &c. Pompleto Illustrations of all the Standing Riggings, the Knots, Bends, and Hitches in use. Also a Catechism on Rigging Ships, Boat Sailing, Bending, Reefing and Furling Sails, Working Anchor Gear, Manœuvring, &c. By GEORGE S. NARES, Lieut. R.N., H.M.'s Training-Ship Britannia.

London: LONGMAN & Co. Portsea: JAMES GRIFFIN.

THE COLONIAL LIFE ASSURANCE SOCIETY.

Capital One Million Sterling. | **ESTABLISHED, 1846.** | **Constituted by Act of Parliament.**

HEAD OFFICE, 5, GEORGE STREET, EDINBURGH.

GOVERNOR:—THE RIGHT HONOURABLE THE EARL OF ELGIN AND KINCARDINE.

THE COLONIAL LIFE ASSURANCE COMPANY was established in 1846, and introduced new and important features into Life Assurance practice, by publishing rates calculated for Foreign residence, and by establishing Agencies abroad. By its means, also, the benefits of Life Assurance were extended to India and to the Colonies of Great Britain generally, on such beneficial terms, and under such liberal conditions, as improved knowledge and the circumstances of the times authorised and required.

The progress of the business has been most successful and satisfactory in every respect, and its extent has proved how greatly such an institution was wanted. One important feature of the Company is, that its Indian and Colonial Branches are not mere adjuncts to the business of a Home Office—after thoughts, as it were—but form part of its entire and original scheme, commanding the constant attention of those connected with its management; and as Agencies have been established in every British Colony, persons changing their residence are thus afforded the advantage of transacting with the authorised representatives of the Company in the different parts of the world they may visit.

The Home Branch of the business has at the same time received every attention, and those persons who have Assured with the Company in Great Britain and Ireland have enjoyed the advantage of the Company's liberal conditions, while they have reaped great benefit in participating in the profits of the business, which, from the peculiar constitution of the Company, have been greater, it may be safely asserted, than in Offices whose operations are confined to the United Kingdom.

The following Tabular View exhibits the Company's progress during the last six years:—

Years ending May 25.	Amount Proposed for Assurance.	Amount of New Assurances.	Annual Revenue.	Accumulated Fund.	Claims by Death.
1854	£384,217 11 0	£308,368 17 10	£58,673 3 0	£142,006 17 0	£11,499 16 0
1855	372,665 14 10	319,371 3 8	67,451 12 10	192,323 3 0	17,239 16 0
1856	413,572 13 11	339,623 6 0	76,686 17 2	223,790 4 5	17,916 5 0
1857	357,590 8 0	304,190 8 0	84,801 12 9	258,453 11 6	17,319 17 0
1858	367,489 10 4	316,809 10 4	92,519 4 11	298,332 13 5	*29,753 19 4
1859	438,900 10 2	347,006 8 8	100,904 7 5	342,354 9 4	25,557 15 8

* Including £7300 of Claims in consequence of Indian Mutinies.

It will be perceived that the Income of the Company is upwards of One Hundred Thousand Pounds.

DIVISION OF PROFITS.—The Profits of the Company have been divided on two occasions, in 1854 and 1859, when very large additions were made to Policies. For example, a Policy opened in 1846 for 1000*l.* was increased to 1235*l.* The next Division will take place in 1864.

MILITARY MEN can effect Assurances at the ordinary rates, paying the extra rate for climate and war risk when required; or they can assure at an equal annual rate of Premium, covering the risk of any service or of any Climate, and not varying with particular Service or Climate, as in ordinary cases. These rates are fixed according to the circumstances of each case.

NAVAL MEN can also effect Assurances at ordinary rates, and they may proceed to any part of the world in Her Majesty's service on payment of moderate rates of extra Premium. The Premiums may also be equalised in the same way as in the case of Military Men.

Local Boards of Management and Agencies in India, and in every British Colony, where Premiums can be paid and Claims settled.

Loans advanced on unexceptionable personal security.

WILLIAM THOMAS THOMSON, Actuary.
D. CLUNIE GREGOR, Secretary.

EDINBURGH: 5, GEORGE STREET (Head Office).
LONDON: 81, LOMBARD STREET. Resident Secretary, SAMUEL R. FERGUSSON.
DUBLIN: 66, UPPER SACKVILLE STREET. Resident Secretary, ALEXANDER SUTHERLAND.

THE STANDARD LIFE ASSURANCE COMPANY.

GOVERNOR:—HIS GRACE THE DUKE OF BUCCLEUCH AND QUEENSBERRY.
DEPUTY-GOVERNOR:—THE RIGHT HONOURABLE THE EARL OF ELGIN AND KINCARDINE.

SIXTH DIVISION OF PROFITS.—1860

IS A BONUS YEAR IN THIS COMPANY, AND ALL POLICIES NOW EFFECTED WILL PARTICIPATE IN THE DIVISION TO BE MADE AS AT 15TH NOVEMBER NEXT.

THE STANDARD WAS ESTABLISHED IN 1825. THE FIRST DIVISION OF PROFITS TOOK PLACE IN 1835; AND SUBSEQUENT DIVISIONS HAVE BEEN MADE IN *1840, 1845, 1850,* AND 1855. THE PROFITS TO BE DIVIDED IN 1860 WILL BE THOSE WHICH HAVE ARISEN SINCE 1855.

GENERAL STATEMENT OF THE PROGRESS OF THE COMPANY'S BUSINESS,

FROM 1848 TO 1858, VIZ., FROM THE 24TH TO THE 33RD YEAR OF THE COMPANY'S BUSINESS.

Years ending Nov. 15.	Amounts proposed for Assurance.	Amounts of New Assurances effected.	New Premiums exclusive of Single Payments.	Revenue in each year.	Subsisting Assurances.	Years ending Nov. 15.
1849	£528,792 13 5	£429,371 17 1	£14,743 4 8	£145,837 15 9	£3,515,827 11 4	1849

THE ACCUMULATED FUNDS EXCEED ONE MILLION SIX HUNDRED THOUSAND POUNDS, invested almost entirely in Landed and Government Securities.

CASES FROM THE BOOKS OF THE COMPANY, SHOWING THE BENEFITS OF LIFE ASSURANCE.

ON 16TH FEBRUARY, 1858, J. A. died at the age of 20, having effected an Assurance on his life for 300*l.* on 4th April, 1857, when in good health. Only one Premium of 6*l.* 9*s.* was paid to the Company.

ON 25TH DECEMBER, 1858, A. M. N. died, an Assurance for 500*l.* having been effected on her life on 15th November, 1858, when in good health, at an Annual Premium of 8*l.* 15*s.* The Assurance was in connection with a life-rent lease, and only one Premium was paid to the Company.

ON 16TH JULY, 1859, J. T. died at the age of 40, an Assurance for 3000*l.* having been effected on his life on 7th September, 1857, when in good health. Only two Premiums were paid to the Company.

These cases show how complete and satisfactory a provision Life Assurance is, from the moment a Policy is effected. The following cases illustrate further the benefits of the system with reference more particularly to Participation in the Profits:—

ON 10TH MARCH, 1858, W. M. died, aged 66. He effected an Assurance on his life in 1832 for £750 0 0
And there was added by the Company from the Profits 564 15 0
Making the sum paid £1314 15 3

ON 6TH JUNE, 1858, died J. D., aged 82. He effected an Assurance on his life in 1830 for £200 0 0
And there was added by the Company from the Profits 173 8 0
Making the sum paid £373 8 0

ON 25TH APRIL, 1859, died J. L., aged 65. He effected an Assurance on his life in 1825 for £1000 0 0
And there was added by the Company from the Profits 1152 0 0
Making the sum paid £2152 0 0

Such examples could be greatly increased by quotations from the Books, but the above cases are sufficient to illustrate the great benefits and advantages of the system.

THE CONDITIONS OF ASSURANCE are most liberal, the STANDARD having been the means of introducing into the practice of Life Assurance most of those recent improvements by which a Policy may be rendered an unchallengeable and indefeasible Security.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Secretary.

ROYAL NAVAL FEMALE SCHOOL.—St. Margaret's, Twickenham, S.W. For EDUCATING, at a reduced cost to the Parents, the DAUGHTERS of necessitous NAVAL and MARINE OFFICERS.

Under the patronage of Her Most Gracious Majesty the QUEEN.

An Election of Pupils will take place early in July next. Applications must be in Office before the 1st of May. All persons can vote who become contributors before the Election. Donations and Subscriptions in aid of the funds are respectfully solicited. Every information may be obtained from Mr. ARTHUR ELLIS, R.N., the Secretary, 32, Sackville Street, London, W.

By Order of the Committee,

FRAS. MAUDE, Capt. R.N. } Honorary
GEO. HOPE, Capt. R.N. } Secretaries.

21st December, 1859.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—The constant success of the Pupils of this Establishment at the Examinations for the Line, Sandhurst, &c., is a guarantee of the excellence of the studies there pursued. Every candidate sent to the Woolwich competitive examination has obtained admission at his first trial. The number of Officers of all ranks who come to read for the Staff continues to increase. Six of them entered the Staff College this year. Apply to Captain LENDY, Sunbury, S.W.

ROYAL NAVAL AND MILITARY ACADEMY, GOSPORT.

PATRONS:—

Her Most Gracious Majesty the QUEEN.
His Royal Highness the PRINCE CONSORT.

At every Examination for Naval Cadetships since May, 1857, Pupils from this Establishment have taken the first or second places. Those Pupils who have entered the Army and Military Colleges have been equally successful.—Applications to be addressed to the Rev. E. BURNEY, M.A., Gosport.

THE ROYAL NAVAL SCHOOL for qualifying its pupils (whether sons of Naval and Marine Officers or not) for the Universities, for the Naval, Military, and East India Company's Services, and for Mercantile, or other pursuits. The PUPILS are required to RE-ASSEMBLE on Friday and Saturday, the 13th and 14th of January next. The studies will commence in all their branches on the Monday morning following. By Order of the Council,

New Cross, Kent, S.E. ALFRED EAMES,
30th December, 1859. Secretary.

NAVAL CADETS.

ROYAL NAVAL ESTABLISHMENT.
EASTERN PARADE, SOUTHSEA.

Conducted by Mr. THOMAS EASTMAN, R.N.

Mr. EASTMAN offers advantages which cannot be obtained in Establishments for general education, since he receives Naval Pupils only, who are instructed in the course exactly required.

Pupils are taught Steam and Rigging, the former from a working model of a marine steam engine; the latter from a model of a line-of-battle-ship, 24 feet in length.

346 Gentlemen have passed as Naval Cadets, and nearly 250 as Marine Cadets, &c.

The following Gentlemen have passed as Naval Cadets from this Establishment during the past year:—

Mr. H. P. Wylly	Mr. E. S. Nuthall	Mr. A. W. Brabazon
„ R. T. Bruce	„ J. H. O'Brien	„ E. G. F. Law
„ J.H. Bainbridge	„ J. Bedingfeld	„ J. Hazel
„ W. E. Heathcote	„ F. G. Powell	„ J. Needham
	„ W. H. Roberts	„ H. W. Gibson

W. R. LOOKER & Co., ARMY, NAVY, EAST INDIA AND COLONIAL AGENTS.

Full and Half-Pay, Pensions, Retired Allowances, &c., received and remitted.

Investments made in all British and Foreign Stocks, and Dividends received and remitted.

Life and other Assurances and Insurances effected without charge for agency.

Goods and supplies of all kinds purchased, insured, and forwarded by overland or long sea routes to India, Australia, or any other part of the world.

Passage secured without extra charge, and baggage forwarded. Letters, newspapers, parcels, &c., taken charge of and forwarded.

12, Pall Mall East, London, S.W.

NAVAL CADETS.

Reduction of Examination and Age. New Regulations for Entry into Her Majesty's Service.

MESSRS. GALT & CO., Portsmouth, will be glad to forward, on application, the New Admiralty Regulations and other information necessary for passing the R.N. College,

Outfitters by appointment to H.S.H. the Prince of Leiningen.

THE GUINEA COAL COMPANY'S WALLSEND COALS, One Guinea per ton "All the Year Round."—Address, HORATIO MORGAN, 17, Wellington Street North, Strand, W.C. (next door to the Office of this Paper).

EAST INDIA ARMY, COLONIAL, AND GENERAL AGENCY.

MESSRS. SAUNDERS, OTLEY, & CO. beg to announce that they execute orders of every description transmitted to them by Regimental Messes, Officers, Members of the Civil Service, and Residents in India, Australia, and the Colonies, and generally to Act as Agents in England for the receipt and remittance of pay, pensions, &c.—Orders intrusted to Messrs. SAUNDERS, OTLEY, & Co. will be promptly, carefully, and judiciously executed. No commission charged on orders accompanied by a remittance.

50, Conduit Street, Hanover Square, London, W.

COLT'S PATENT REPEATING FIRE-ARMS.

RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

*** "COLT'S Pistol is the best repeating arm that we have."—CHARLES LANCASTER, before Government Small Arms Committee.

CAUTION.—Notice is hereby given, that certain FOREIGN FABRICANTS of REVOLVERS, attending more to cheapness of manufacture than to quality, and the rage of under-selling each other, have thereby deteriorated the article; the importation and sale of all such made rifles, carbines, revolvers, &c., bearing the patentee's trade marks and others, stamped "Colt Breveté," "Colt's Patent," &c., is illegal and forbidden. Beware of mongrel imitations and patent infringements. The genuine Pistols are stamped on the barrel, "Address, Col. Colt, London," and bear the British proof mark on the barrel and cylinder between each nipple; and can be had, in any quantity, on favourable terms, of the patentee and manufacturer,

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

RIFLE PRACTICE, 300 Yards RANGE, at OLD HORNSEY WOOD TAVERN, Upper Holloway. The Government Inspector having certified the above Enclosed Grounds as being the safest and best near London, they are now open for Public and Private Practice. A Marker always in attendance. Regulation Cartridges and Caps at the Bar. (Pigeons and Sparrows in any quantity.)

ESTABISHED A.D. 1700.

MESS REQUISITES FOR THE ROYAL NAVY.—DEANE & Co., having had the honour of supplying many of Her Majesty's ships, have prepared a special list for the guidance of Officers purchasing the above, which list Deane & Co. will forward post free, on application. Every article is warranted the best. DEANE & Co., Army and Navy Contractors and Furnishers (Opening to the Monument), London Bridge, E.C.—Established A.D. 1709.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especiallly for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. CARE, Chemist, 171, High Holborn, London, W.C., in bottles, 1s. each.

VOLUNTEER RIFLE CORPS.—GENTLEMEN about to form Rifle Corps or Artillery Companies in Maritime Towns are informed that the UNIFORM and EQUIPMENTS determined upon for general adoption may be obtained in any quantity, with great despatch, moderation in price, and general excellence, on application to H. J. & D. NICOLL.

HUGHES' "RIFLEMAN'S" Thrice Shrunk, Coloured FLANNEL SHIRTS; also their ANGLO-PARISIAN A 1 SHIRTS, 27s., 33s., 39s., 45s., per half-dozen; and FASHIONABLE COLLARS, 8s. 6d., 9s. 6d., 12s. 6d., per half-dozen, are unrivalled. Samples with infallible measuring instructions forwarded. Army, Navy, and General Outfitters, at SHIPPING PRICES, for India, China, Australia, &c. 203, Regent Street, W.

TO OFFICERS IN HER MAJESTY'S ARMY AND NAVY.

MATTHEW WILDSMITH having been favoured with the patronage of many Gentlemen in Her Majesty's Forces has paid special attention to the production of a BOOT that should combine strength with ease and comfort. He is now happy to announce that he has succeeded in obtaining a leather specially prepared which he can with confidence recommend for military use, being light in weight, pliable, and very durable. Indian and Foreign Orders executed with despatch.—1, Sherard Street, Regent Street, W., rear of County Fire Office.

INDIA AND CHINA.—Officers equipped with CAMP BEDS, OVERLAND TRUNKS, CANTEENS, and every other Campaigning requisite at Manufacturer's prices, by W. DAY & SON, Portmanteau Makers and Military Outfitters, 353 and 378, Strand, London, W.C. Established 1810.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLS & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Bond Street, W., one door from Piccadilly.

CREED & CUMBERLAND, 33, Conduit Street, corner of Bond Street, W. By Special Appointment to the Queen and the principal Courts in Europe, Artistes in draping the Real Figure. Court, Diplomatic, Military, and Naval Uniforms. Practical experience, combined with a scientific knowledge of external anatomy and the definite proportions and forms of the human figure, give them confidence in soliciting patronage.

NEW REGULATIONS FOR NAVAL CADETS, for passing the College, may be obtained on application to B. JOSEPH & Co., or sent post free to all parts of the world, with full list of prices of Outfits for young gentlemen entering the Navy.

A large stock of fashionable clothing, at moderate prices, may be had either ready made or made to order in a few hours' notice at the Hall of Commerce, 92 & 93, Queen Street, Portsea.

THE PERFECT SUBSTITUTE for SILVER. THE REAL NICKEL SILVER, introduced more than 25 years ago by WILLIAM S. BURTON, when plated by the patent process of Messrs. Elkington & Co., is beyond all comparison the very best article next to sterling silver that can be employed as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver.

A small useful plate chest, containing a set, guaranteed of first quality for finish and durability, as follows:—

	Fiddle or Old Silver Pattern.	Thread or Brunswick Pattern.	Lily Pattern	King's or Military, &c.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
12 Table Forks	1 13 0	2 4 0	2 10 0	2 15 0
12 Table Spoons	1 13 0	2 4 0	2 10 0	2 15 0
12 Dessert Forks	1 4 0	1 12 0	1 15 0	1 17 0

IT is one of the necessary misfortunes of departments, that the individual merits of each member are subject to depressing or detractive influences by the action of the minds of those who are around him, whilst his objectionable forms of thought and modes of action are developed by the absence of personal responsibility, and by the restrictions placed on the uses and influence of his own conscience. But it is not because they are in public offices, as distinguished from private establishments, that these effects are produced; it is that those who fill the offices are human beings. If we were to transfer to the head of the Admiralty to-morrow the noisiest, most bustling, conceited, and active man of business we could find in all England, and remove the Duke of Somerset, we would, in all likelihood, speedily discover that the objections preferred to the First Lord were not so much personal to the man as inherent in the office; and we would very probably learn also that we had, in the substitution, lost the advantage of the great powers of application, the executive capacity and administrative ability, which are now devoted to the public service, and that we had in his successor got all the faults and none of the official virtues of his Grace. There are many arguments of weight available against those who maintain that the Navy should be altogether administered by naval men; but one of the main reasons which force our statesmen to look out for such arguments at all is the peculiar form of our constitution, and the potency of that lever which moves our *political world*—Parliamentary influence. If the office of the First Lord were to be deprived of a certain portion of its patronage, the means of obliging the friends, and relatives—of friends—and relatives—of "the party," would be—*pro tanto*—diminished. Let us without prudery or affectation accept the fact. The Duke of Somerset with his Board is an atom of a conglomerate, whose relation to the Board can be scarcely defined or resolved by the most powerful analysis; whose connection with it in its entirety it would be as difficult to determine in length, breadth, and boundaries, as it would be to show the exact relations of an atomic particle of oak to the great tree of which it is a component. As First Lord he swells and expands so grandly when severed from his Board, that we are equally puzzled to say what he is not, and how far he does not go, if indeed he be not the whole oak itself. In his capacity of First Lord he "obliges the party," makes nominations, fills his list, empties it, controls appointments, regulates expenditure, and representing himself and all the guns of the British navy in the one House, presents himself in the person of his delegate in the other, to be asked questions, to fight the estimates and Sir Charles Napier, and, when hardly or unduly assailed, to fly to the protection of the Board, the influence of which is in reality dependent upon the weight of the professional character of its members with the First Lord. The question whether the public service would gain by a rigid settlement of the quantities of the First Lord—by a transfer of some of his powers—by the division of others, or by the introduction of a naval co-rex, who need not smell at the same rose, but who would administer a large portion of the business of our marine, leaving to his First Lord parliamentary responsibility in virtue of a selective power and the command of a veto; is—if we exclude the consideration of the party necessity of patronage—not capable of much theoretical objection. Notwithstanding the frequent assaults and bitter enmity to which it is exposed, on the whole the Admiralty has been one of our most successful public departments; but it cannot be denied that much has been given—the largest confidence—the greatest powers—much sympathy, and a cheerful compliance in giving all it wants, and in asking no questions it does not like to answer—and if this country has good ground for supposing that from old age or defective constitution, the machinery is working badly, if dockyards are defective and expensive—if ships cannot be manned—if the naval service is falling into disrepute among sailors—Parliament, under the pressure of public opinion, will not hesitate to introduce changes although they may be merely tentative and empirical. Most of the arguments adduced to support the present state of things—the working of which we admit to have been in the main very good—if pushed to a fair result, would imply that the First Lord should not only be a civilian, but that he should be more absolute and despotic than he is at present in respect to many parts of his high office; whereas it is doubtful if any changes were introduced whether they would move in that direction. Whatever we do we must remember that our actions do not altogether depend on the class we belong to, but on the fact that we are—peers and commoners—all men alike; and that though the drops of the "sangre azul" may patter more genially on the heads of the favoured few than the thicker fluid which is supposed to circulate in the veins of the proletairiat, all are subject to identical influences. One topic has been started this week the importance of which will no doubt keep it alive till Parliament meets, and that is the nominations to the Navy. Under the present system there is no chance of a boy entering the Navy unless his friends have influence enough to secure him a nomination from the First Lord, and, if his list be filled, not all the signs and tokens of a budding Nelson will avail the candidate. After nomination, indeed, comes an examination —a *quasi* competitive trial—but it is after all only a competition among the nominees of the First Lord. Just as ministries change—in periods of profound peace—the intelligent reader who attends to such matters is amused at some unusually large examination for cadetships. He may imagine it portends an increase to the Navy, or weary himself in conjecture, unless he be in the secret. The number of these candidates actually depends on parliamentary and party considerations. The out-going minister has his nominees—his last act, probably, to reward past services. The in-coming minister—full of gratitude—hastens to fill his list, to express his sense of favours to come.

VOLUNTEERS IN WAR.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Discussions are arising, and they are of importance, as to the degree and manner of training that should be given to the Volunteers.

The prevalent opinion seems to be that it is not even desirable that they should attempt to vie in attributes with the Regulars in solidity and manœuvring,—that their essence is to possess activity, to act in loose order, and to be capital rifle shots.

The opinion of soldiers of any experience, however, is that they should, on the contrary, emulate the Regulars in all soldier properties, as far as they possibly can. To say that they all can reasonably be expected to attain the same perfection is another thing; though, in some few practices, as, for instance, in the art of shooting, they will be superior, and it would be equally an error to suppose that they may not be eminently useful, though not having attained that full perfection.

The more they may be advanced, however, the better; and the desideratum is to fix upon the best progressive step that, at each stage, may place them in the most efficient condition for opposing an enemy.

I pass over the questions of clothing, equipment, and fundamental organisation, though they are all matters for much consideration, to advert to my present object, which is, the capability the Volunteers should attain of moving and manœuvring in the field, about which there exist these differences of opinion.

A battle is always fought between armies, by masses consisting of lines and columns.

If one general should advance with his masses uncovered, while the other throws out in his front a cloud of riflemen and sharpshooters, the former will most assuredly suffer greatly and be thrown into great confusion before he comes in contact with the real battle array of his opponent.

It is probably something of that kind that is contemplated by those who advocate the sole necessity for a loose order on the part of the riflemen. But to avoid that disadvantage, each army opposes its sharpshooters to those of the enemy, and they engage one another in every sense of the word, for they engage each other's attention.

It is of little consequence which of these, if acting by themselves, would gain the advantage, for their progress depends entirely on that of the masses who support them, and who advance under cover of all this turmoil. When these approach within the distance of conflict with each other, the sharpshooters on both sides necessarily disappear from between them, retiring through the intervals or round the flanks of the columns, and the real brunt of the battle then commences:—in the case, however, of the riflemen being only capable of acting in the loose order, they then become useless till the masses again separate, while, in the other case, they form in mass themselves in the immediate rear of their own force, in readiness to take their part in the heavy contest.

Supposing, then, the contending armies to be of 50,000 men each, of which 10,000 in each are riflemen: in the one case, the 10,000 are of little or no use in the actual battle, while, in the other, the whole are available; and it is just the same in a march.

The Volunteers ought not to be deterred from obtaining this very necessary power of action, by the fear of being driven into a course of practice of all the refinements of the most intricate manœuvres; a very few simple formations and movements in line and column will give them a power that may turn the fate of a great battle.

I am, Sir, &c., &c., B.

It is a usual and absurd mode of speaking and writing to call a gentleman "a quarter," when he may be a round peg in a round hole, but serving ourselves with this euphuism, we, in sober sadness call attention to a statement which comes to us from "a quarter" that cannot be questioned, in reference to the Armstrong guns lately shipped to go to China. The "quarter" can have no object in deceiving us; quite the contrary. It is corroborated by other "quarters," and the coherent story makes us anxious to put the old question, "Whom shall we hang?" It is simply this:

On hoisting up the gun-carriages to stow them in the hold of the Himalaya, at Purfleet, they were found to be *rotten!* The hooks sunk into the wood-work, which had just been turned out fresh from our arsenal at Woolwich. Have the authorities heard the tale? If not, they may probably ascertain on inquiry from the "proper quarters" that it is over true. If it be so, the Chinese, who learned something at the Peiho from civilised Europe, are scarcely so barbarous, and the Russians are not so corrupt in their dockyards, as we have always believed. The Armstrong guns were sent on board nicely done up in bags and sacking, looking like so many corpses in their shrouds. We have no doubt they will do their work well—if only their carriages will carry them.

Lieut. Gould, 2nd battalion 13th Light Infantry, has become Garrison Adjutant at Grahamstown, vice Lieut. Marshall, Cape Mounted Rifles. Lieut Brew, 1st West India Regiment, is acting as Garrison Adjutant at the Gambia.

Colonel Smyth, 2nd Regiment, has been appointed Commandant of the Cape Town and Western District at the Cape, in the room of Lieut.-Colonel Burmester, 59th Regiment.

Captain M'Donnell, 4th Dragoon Guards, has been appointed an extra Aide-de-camp to H.E. the Lord Lieutenant of Ireland.

THE ARMY.

1st King's Dragoon Guards. Major Slade has qualified as interpreter in Hindostanee.

7th Dragoon Guards. Captain Withington and Lieutenant Chaine are on leave to England to January, 1861. A wing of the regiment has moved from Sealkote to Mean Meer, to be stationed.

1st Royal Dragoons. Cornet Harvey is on leave to the 31st instant.

1st Dragoons. The following officers are on leave to the 10th of April: Major Stocks, Captains Coney and Radford, and Lieutenants Finucane, Graburn, and Park-Yates; Capt. Coleman's leave is prolonged to the 30th inst., and Capt. Graham and Cornet Glyn have been granted leave for short periods.

6th Dragoons. Lieutenant Davency has been appointed to do duty with the Scinde Horse at Jacobabad.

3rd Light Dragoons. Col. Unett and Capt. Vyse have leave from the 15th inst. to April 10th; and Capt. Blundell, and Lieutenants St. George, Phibbs, and Grant, and Cornet Strother, to January 25.

5th Lancers. Cornet Malcolmson succeeds to a lieutenancy in this regiment, by the death of Lieut. Cowan.

12th Lancers. Brevet-Lieut.-Colonel Oakes is in command of a column acting against rebels in Central India. In another part of our journal we give some particulars of his movements, which appear to have been very successful.

15th Hussars. Lieutenant Burrell is on leave to the 10th of April.

17th Lancers. Cornet Young has passed a satisfactory examination in Hindostanee, and is pronounced qualified to be an interpreter.

Royal Artillery.—The following changes are announced in the Royal Artillery:—Lieutenant R. B. Butt is transferred from No. 8 battery, 4th brigade, to No. 7 battery, 2nd brigade; and Lieutenant R. N. Young from No. 5 battery, 1st brigade, to No. 4 battery, 4th brigade. Lieutenant Gubbins is transferred from No. 4 battery, 1st brigade, to No. 9 battery, 6th brigade, and will join and do duty in the depôt brigade at Woolwich until required to embark for Malta to join his battery. Captain and Brevet-Major Henry Rogers is removed from the half to the full pay list, and will be absorbed in the first vacancy; in the meantime he is to join at Plymouth for duty. Second Captain-Major Francis Downes having resigned his situation in the Staff College, is transferred from the supernumerary to the effective list, and will join and do duty with the depôt brigade at Woolwich until absorbed. The following changes have been sanctioned:—Between Captain H. Heyman, of the 5th brigade, and Captain and Brevet-Major E. J. Carthew, of the 10th brigade; between Lieutenant E. S. Burnett, of No. 2 battery, and Lieutenant C. H. Pickering, of No. 3 battery, 11th brigade; between Lieutenant L. P. Walsh, of No. 1 battery, 4th brigade, and Lieutenant H. M. Hozier, of No. 6 battery, 4th brigade; between Lieutenant C. Trench, of No. 5 battery, 5th brigade, and Lieutenant T. C. Martelli, of No. 1 battery, 1st brigade. In consequence of the above the under-mentioned officers will proceed to stations, to join their batteries, as follows:—Captain Heyman, to Alderney; Major Carthew, to Gibraltar; Lieutenant Trench, to Woolwich; and Lieutenant Martelli, to Gibraltar.

The undermentioned force of the Royal Artillery embarks to-day in the Himalaya at Purfleet for passage to Alexandria, *en route* for China. Staff-Colonel E. W. Crofton, who will command the whole force with the rank of Brigadier-General, Captain R. Hay, and Captain L. Brabazon employed on special service. Nos. 1 and 2 batteries of the 4th Brigade, commanded respectively by Brevet-Lieut.-Colonel W. Barry and Captain T. Milwood. These batteries are provided with a complete Armstrong equipment, and number 428 of all ranks, exclusive of the following regimental officers: Captains R. Rowley and T. Harrison; Lieutenants H. Briscoe, H. Hosier, H. Phillpotts, W. Brancker, G. Harvey, and L. Gye; Lieutenant and Adjutant E. Hickes; Assistant-Surgeons A. Prescott and H. Harrison, and Veterinary-Surgeon G. Longman. The siege-train proceeds in the Adelaide screw steamer round the Cape.

The Secretary of State, by authority dated 5th December, 1859, has been pleased to approve of the following periods of duration for bugles and trumpets in the Royal Artillery being substituted for that laid down in the finance regulations, page 159, article 4, viz., in Horse Artillery and Field Batteries, 4 years; in garrison batteries, 6 years.

His Royal Highness the General Commanding-in-Chief has been pleased to award the silver medal, with annuities of 10*l*., for meritorious service, relinquished by the under-mentioned non-commissioned officers, on their being commissioned in the Coast Brigade on the 4th November, 1859—Sergeant-Major Robert Kettle, Sergeant-Major James Scott, Sergeant-Major Charles Phillips, and Sergeant James Thomson, to the following individuals:—Quartermaster-Sergeant David Hoge, depôt brigade; Quartermaster-Sergeant Charles King, 7th brigade; Staff Wheeler George Carthew, depôt brigade; and Battery Staff-Sergeant John Neill, 2nd brigade; and the gratuities of 15*l*., relinquished by the latter have been distributed as follows, viz., 5*l*. and a silver medal, for long service and good conduct, to each of the under-mentioned individuals: Master Gunner Josh. Fullarton, Major Gunner Valentine Venner, Master Gunner Richard Ware, Master Gunner Angus Clarke, Master Gunner Samuel Agnew, Master Gunner Ellis Saville, Pensioner Master Gunner Wm. Campbell, late 10th battalion, Pensioner Sergeant George Thompson, late 10th battalion, Pensioner Gunner Hugh Wood, late Horse Brigade, Pensioner Gunner James Cook, late 8th battalion, Pensioner Gunner Lawrence Lowrie, late Invalid Artillery, and Pensioner Gunner Edwd. Manney, late Invalid Artillery.

A large number of discharged soldiers, recently returned from India, have enlisted during the present week into the Royal Artillery for ten years' service.

22nd Regiment, 1st Battalion. Lieutenant Gilling has leave from Dublin to the 10th of April.

22nd Regiment, 1st Battalion at Dublin, has received a letter of readiness for embarkation for Malta. The following officers are on leave to April 10th: Major Sir G. Robinson, Captains Tyacke, Webber, Smith, and M'Bean; Lieutenants Tucker, Denny, and Vivian.

24th Regiment, 2nd Battalion. The Urgent arrived in Cork harbour on Friday night with the 10 companies of the 2nd battalion of the 24th Regiment which had been engaged in the affray with the Tower Hamlets Militia at Aldershott Camp. They had a more than usually protracted voyage, nearly six days having been consumed in the run from Portsmouth to Cork. On Sunday the troops were brought up by river steamers and landed at Penrose's-quay, from which they marched to the barracks, where they will remain, it is understood, until an opportunity offers of sending them on foreign service. The men on landing looked in anything but good condition after their long voyage, of which they loudly and bitterly complained.

26th Regiment. Captain Collins is on leave from Dublin to the 10th of April.

28th Regiment. A wing left Bombay for Mhow by train at 9 o'clock A.M. on the 10th December, and a wing of the 2nd European Regiment, which is expected to arrive shortly at the Presidency from Belgaum, will be located in the present quarters of the former.

43rd Light Infantry. A detachment of this corps is serving with the column acting against the remaining rebels in Central India, under Colonel Oakes, 12th Lancers.

86th Regiment. On Wednesday an inquest was held by E. Hoskins, Esq., coroner for South Hants, in the sergeants' mess quarters of the Clarence Barracks, Gosport, on the body of John Wagner, a soldier belonging to the 86th Regiment, who was found dead on Monday morning, on board the steamer that left Dublin on Saturday, bound for Portsmouth. From the evidence of Drummer John Fox, 83rd Regiment:—The deceased and witness travelled from Longford to Dublin on Saturday, and embarked the same day; did not recollect seeing him on Sunday. Monday morning saw him lying on a locker, with his head resting on a coil of rope. Went on deck on account of being sick, and returned and went to sleep; woke up and went to wake the deceased; found that he had rolled off the locker, but his chin was on the coil of rope, and he was quite dead and cold. The surgeon of the 86th deposed to having made a post mortem examination, and found the lungs of the deceased very much congested, and the membranes of the stomach denoted excessive drinking. He had no doubt that death was occasioned by suffocation by the rope pressing against the wind-pipe, and a verdict to that effect was returned by the jury.

91st Regiment. Lieutenant Pike has qualified as an interpreter in Hindostanee.

60th Rifles. 4th Battalion will in all likelihood move to Dublin to replace the 1st Battalion, 22nd Regiment, ordered to Malta.

1st West India Regiment. Major Murray is commanding at Sierra Leone. Captain Anton is commanding at Bathurst. Captain Fanning is second in command, and doing the duty of Paymaster. Lieutenant Bren is Fort-Adjutant at Bathurst. Captain Fraser is Civil Commandant at M'Carthy's Island. Lieutenant Holt commands at Cape St. Mary; the garrison is healthy. Captain Fanning was despatched on a diplomatic mission to the chiefs of Balee and Darsi Lamin, on the 16th of December, and returned to the garrison on the 22nd inst., having discharged the duty entrusted to him to the perfect satisfaction of the Governor.

Gold Coast Artillery.—A detachment of this corps had some work in quelling a serious riot which took place on Nov. 24, between the people of the Intin and Bentil quarters or companies into which Cape Coast Castle is divided. In consequence of some misunderstanding their old feelings of jealousy and mutual hatred broke out, and they went out to a plain about two miles from Cape Coast to fight. The authorities of Cape Coast, when they heard of these proceedings, lost no time in marching to the spot, with as large a force of regulars and municipal volunteers as could be raised. Lieutenant Williams marched boldly between the two rival parties, and the chief justice went about amongst them endeavouring to persuade them to retire. He at length read the Riot Act, but without effect. With the exception, however, of a few shots, no actual fighting took place, and the troops retired for the night. Next day the battle began in earnest, the Intins numbering 3500, and the Bentils not more than 700. The latter, notwithstanding their inferior numbers, fought with great courage. The arrival of Lieutenant Williams and his force about 9 A.M. put an end to the combat, but not before 15 men had been killed and 40 wounded.

The Melbourne screw steam-vessel, fitted up as a floating hospital for the service of the Chinese expedition, left Deptford on Saturday, and, after receiving a few cases of stores at Woolwich Arsenal, proceeded on her voyage to Hong Kong. She has on board about 90 non-commissioned officers and men of the Army Hospital Corps, and a small detachment of Royal Artillery. The Adelaide, screw-transport, having received a full cargo of war stores for China, also left for China.

The Secretary of State for India will not entertain any further claims made by officers sent to India, during the late mutinies, on account of their wives' passages to that country, unless such claims be received at the India-Office within six months of the date hereof.

COLCHESTER CAMP.

The troops stationed at the camp, Colchester, at present consist of two Depôt Battalions, the 9th and 10th, the regiment of the Dublin City Artillery Militia, and a detachment of the Donegal Militia regiment. The total number of officers is 64, men, 2500. The 9th Battalion comprises the Depôt of the 1st, 6th, 54th, 56th, 66th, and 88th Regiments; the 10th Battalion, those of the 5th, 34th, 37th, 38th, 44th, and 97th Regiments. The head-quarters of all these regiments are in the East Indies. The troops are marched out twice each week, and are in excellent health and training. One battalion has only four per cent. of their number on the sick list. As many as 200 recruits have joined the Depôts of the 10th Battalion during the past week, chiefly men who claimed their discharge from the East India Company's service, and have lately returned to England. Some have joined in their former uniforms, especially men of the Bengal Light Cavalry, but a large proportion have been in mufti, *alias* rags. Rifle practice is actively followed at the Government land, called Middlewick Farm, and by detachments on the sea coast at Land-Guard Fort.

There does not appear to be any truth in the rumour which has prevailed of late, that an Eastern District, comprehending the counties of Essex, Suffolk, Norfolk, &c., is to be formed under the command of a general officer, the head-quarters being at Colchester. The troops at Colchester and in the neighbourhood are to be, as heretofore, under a colonel on the staff; while, from the neighbouring counties, the reports are to be made direct to head-quarters.

Colonel H. K. Bloomfield returned to Colchester on the 10th instant, and resumed command of the troops stationed at the camp.

Captain H. Le M. Baynes, 88th Depôt, is acting as brigade-Major in the absence of MajorCooch, on temporary leave.

WAR OFFICE, PALL MALL, JAN. 10.

CHAPLAIN'S DEPARTMENT.

The commission of the Rev. John Francis Browne, Chaplain of the Fourth Class, to bear date 15th Sept. 1857, instead of 1st April, 1859, as stated in the *Gazette* of the latter date.

BREVET.

The under-mentioned promotions to take place consequent on the death of General Richard Blunt, Colonel of the 66th Regiment, on 25th December:—

Lieut.-General Thomas Kenah, C.B., Colonel of the 63rd Foot, to be General.

Major-General John Hobart, Lord Howden, G.C.B., Major upon half-pay Unattached, to have the rank of Lieut.-General.

Major-General James Alexander, Earl of Rosslyn, to be Lieut.-General.

Brevet-Colonel Edward Waller Forestier Walker, C.B., Scots Fusilier Guards, to be Major-General.

Captain and Lieut.-Colonel James Talbot Airy, C.B., Coldstream Guards, to be Colonel.

Brevet-Major George Blicke C. Crespigny, Paymaster of the School of Musketry, to be Lieut.-Colonel.

Captain Alfred Romaine Wragge, Royal Artillery, to be Major.

WAR-OFFICE, PALL-MALL, Jan. 13.

4th Regiment of Dragoon Guards—Cornet Edward Adolphus Ferdinand, Lord Seymour, has been permitted to retire from the Service by the sale of his Commission; Jan. 13.

15th Light Dragoons—Ensign John Evelyn K. Morley, from the 43rd Foot, to be Cornet, paying the difference between Infantry and Cavalry, vice Bury, promoted; Jan. 18.

Military Train—Cornet George Tasker, from half-pay, late Land Transport Corps, to be Ensign, without purchase, vice M'Donald, promoted; Christian Frederic Gardner, Gent., to be Ensign, by purchase, vice Townley, promoted; Jan. 13.

Scots Fusilier Guards—Major and Brevet-Colonel William John Ridley to be Lieutenant-Colonel, without purchase, vice Brevet-Colonel Walker, C.B., promoted to the rank of Major-General; Captain and Lieutenant-Colonel and Brevet-Colonel J. Hamilton Elphinstone Dalrymple to be Major, without purchase, vice Brevet-Colonel Ridley; Lieutenant and Captain the Hon. Rogers Mostyn to be Captain and Lieutenant-Colonel, without purchase, vice Brevet-Colonel Dalrymple; Ensign and Lieutenant Sussex V. Stephenson to be Lieutenant and Captain, without purchase, vice Mostyn; Dec. 26. Frederick Henry Harford, Gent., to be Ensign and Lieutenant, by purchase, vice Ford, promoted; Jan. 13.

3rd Regiment of Foot—Gentleman Cadet John Elias Durnford, from the Royal Military College, to be Ensign, without purchase, vice Scriven, appointed to the 25th Foot; Dec. 31.

16th Foot—Norman Cameron Griffith, Gent., to be Ensign, by purchase, vice Sheringham, promoted; Jan. 13. John Richard Pine Coffin, Gent., to be Ensign, by purchase, vice Jefferson, promoted; Jan. 14.

22nd Foot—Michael Edensor Heathcote, Gent., to be Ensign, by purchase, vice Ward, promoted; Jan. 13.

25th Foot—Captain Robert Small, from half pay Unattached, to be Captain; Lieutenant Henry Ridout Floyd, from the 54th Foot, to be Captain, by purchase, vice Small, who retires; Jan. 13. To be Lieutenants, without purchase—Lieutenant Edward Charles Mallet de Carteret, from the 88th Foot; Lieutenant William Boyd O'Malley, from the 82nd Foot; Lieutenant William Buxton Robertson, from the 79th Foot; Lieutenant James O. D. Annesley, from the 68th Foot; Lieutenant Henry John Evans, from the 68th Foot; Lieutenant Edward Seppings Lock, from the 82nd Foot; Ensign Louis Jones Lambert; Ensign George Terry Luder Carwithen; Jan. 13. Ensign John Price Mackinnon, from the 72nd Foot; Ensign Henry Abigail Ellis, from the 92nd Foot; Ensign Roderick John Hanley, from the 47th Foot; Ensign Abel Henry Woodroofe, from the 39th Foot; Ensign Charles Bassett Lewis, from the 44th Foot; Jan. 14. The surname of the Lieutenant transferred from the 33rd Foot in the Gazette of 13th December, 1859, is Eliot and not Elliott, as then stated.

27th Foot—Gentleman Cadet Robert Bruce Robertson Glasgow, from the Royal Military College, to be Ensign, without purchase, in succession to Lieutenant Campbell, deceased; Dec. 31.

31st Foot—Robert Taylor Masefield, Gent., to be Ensign, by purchase, vice Danyell, promoted; Jan. 13.

32d Foot—Lieutenant George Henry Powel, from the 47th Foot, to be Lieutenant, vice Walker, who exchanges; Assistant Surgeon George Simon, M.D., from the Staff, to be Assistant Surgeon, vice Bradshaw, who exchanges; Jan. 13.

33d Foot—Gentleman Cadet George Malcolm Douglas, from the Royal Military College, to be Ensign, without purchase in succession to Lieutenant Eliot, removed to the 25th Foot; Dec. 31.

38th Foot—Lieutenant John Frederick Clinton Boyle to be Captain, without purchase, vice Brevet Major Daniel, deceased; Ensign Arthur Bailey to be Lieutenant, without purchase, vice Boyle; Oct. 9.

30th Foot—Gentleman Cadet Henry Burton, from the Royal Military College, to be Ensign, without purchase, vice d'Arcey, deceased; Dec. 31.

46. Foot—Lieutenant Henry Carr William Hamond, to be Captain, without purchase, vice Connell, deceased; June 6.

Digitized by Google

47th Foot—Lieutenant George Walker, from the 32nd Foot, to be Lieutenant, vice Powell, who exchanged; Jan. 13.

43rd Foot—Lieutenant George Porter, from the 82nd Foot, to be Lieutenant, vice Acton, who exchanges; Oct. 21. Gentleman Cadet Henry Douglas Rooke, from the Royal Military College, to be Ensign, without purchase, in succession to Lieutenant Helsham, promoted, without purchase, in the 25th Foot; Dec. 31.

72nd Foot—Gentlemen Cadet Douglas James Broadley Hebder, from the Royal Military College, to be Ensign, without purchase, in succession to Lieutenat Cameron, promoted, without purchase, in the 25th Foot; Dec. 31.

73rd Foot—Brevet Lieut.-Col. Thomas Ross to be Lieutenant-Colonel, without purchase, vice Brevet-Colonel Pinckney, C. B. deceased; Brevet-Lieutenant Colonel Wyndham Ddmund Bewes to be Major, without purchase, vice Ross; Nov. 12.

76th Foot—Basil Porter, Gent., to be Ensign, by purchase, vice Greene, who retires; Jan. 13.

82nd Foot—Lieutenant Thomas Acton, from the 53rd Foot, to be Lieutenant, vice Porter, who exchanges; Oct. 21.

87th Foot—Lieutenant Anthony Butler to be Adjutant, vice Lynch, promoted; Nov. 5.

90th Foot—Brevet Lieut.-Col. John Christopher Guise to be Lieut.-Col., by purchase, vice Brevet Colonel Purnell, C.B., who retires; Brevet Lieut.-Col. Henry Hope Crealock to be Major, by purchase, vice Guise; Lieutenant Ivan S. A. Herford to be Captain, by purchase, vice Crealock; Ensign Henry James Edgell to be Lieutenant, by purchase, vice Herford; Jan. 13.

92nd Foot—George Kellie McCallum, Gent., to be Ensign, by purchase, vice Emmet, promoted; Jan. 13. The promotion of Ensign Robert Alexander Emmet, to a Lieutenancy, by purchase, and the retirement of Lieutenant Hunton, to bear date Dec. 28, instead of Jan. 6, as previously stated.

Rifle Brigade—Lieutenant Walter J. H. Ruthven to be Captain, without purchase, vice Brevet-Major Riversdale R. Glyn, deceased; Ensign William James Kempt Myers to be Lieutenant, without purchase, vice Ruthven; Dec. 12.

3rd West India Regiment—Lieutenant John Moore to be Adjutant, vice Kingsmill, who resigns the Adjutancy only; Jan. 13.

DEPOT BATTALION.

Lieut.-Col. John Lucas Wilton, C.B., from half-pay Unattached, to be Lieut.-Col., vice Brevet-Col. Norcott, C.B., who exchanges; Jan. 13.

Major Alastair McIan McDonald to be Lieut.-Colonel by purchase, vice Wilton, who retires; Jan. 13.

HOSPITAL STAFF.

Assistant-Surgeon William Bradshaw, from the 32nd Foot, to be Assistant-Surgeon to the Forces, vice Simon, who exchanges; Jan. 13.

Acting Assistant-Surgeon Thomas Callaway has ceased to do duty, there being no longer occasion for his services; Jan. 13.

BREVET.

Brevet-Colonel the Honourable Augustus Almoric Spencer, C.B., Lieut.-Colonel half-pay 44th Foot, to have the local rank of Major-General in the East Indies; Jan. 13.

Brevet-Colonel Arthur Augustus Thurlow Cunynghame, C.B., Lieut.-Colonel half-pay 51st Foot, to have the local rank of Major-General, in the East Indies; Jan. 13.

Captain Robert Small, 25th Foot, to be Major in the Army; June 28, 1838.

Brevet Major Robert Small, 25th Foot, to be Lieut.-Colonel in the Army; Nov. 11, 1851.

Captain Octavius Hamilton, 2nd European Light Cavalry, to be Major in the Army; Jan. 19, 1858.

Captain Ashton Cromwell Warner, 2d Bengal European Light Cavalry, to be Major in the Army; Nov. 19.

The promotion of Brevet-Major Græme Alexander Lockhart, 78th Foot, to be Lieut.-Colonel in the Army, to be ante-dated to 26th April, 1859.

The Commission as Major in the Army of Brevet-Major James Leith, 2d Dragoons, to be dated 28th July, 1858, instead of the 20th of that month, as stated in the Gazette of 7th September, 1858.

The Commission as Major in the Army of Brevet-Major Thomas Rattray, 64th Bengal Native Infantry, to be antedated to the 1st May, 1858.

ARMY RESERVE CORPS.

The following proclamation and regulations in reference to a reserve corps are published in Tuesday's *Gazette*:—

VICTORIA R.—Whereas by an Act passed in the 22nd and 23rd years of our reign intituled, "An Act to provide for the establishment of a Reserve Force of men who have been in Her Majesty's service," we are authorised to cause to be enrolled for this purpose any number not exceeding 20,000 men, who, after having served in our other forces, or in the forces of the East India Company, may voluntarily engage to enter such Reserve Force; and further, to make regulations concerning the term or terms of service of these men, and the declarations in relation thereto; as also regarding their pay and allowances, their arms, clothing, equipment, and pensions, and for the government of the said force, and for the infliction of fines and penalties, for absence or misconduct—our will and pleasure therefore is, that the following rules and regulations be established on these heads, and that all persons whom it may in any way concern do strictly observe and obey the same.

Given at our Court at St. James's, this 9th day of December, 1859, in the 23rd year of our reign.—By Her Majesty's command,

SIDNEY HERBERT.

REGULATIONS.

Clause 1.—Any person who, as a non-commissioned officer or soldier, shall have completed the term of service for which he was originally enlisted, not being less than ten years in infantry, or twelve years in cavalry, artillery, or engineers, or who, after five years' service, has been discharged for any cause other than misconduct, without a permanent pension, may, provided he is approved, and receives for such service by a declaration in the form hereto annexed, be enrolled to serve in the Reserve Force, under the authority of the Act 22nd and 23rd Victoria, c. 42, for such period as may be wanting to complete twenty-one years, if he originally enlisted in the infantry, or twenty-four years if he enlisted in cavalry, artillery, or engineers, reckoning two years' service in such Reserve Force as one towards the attainment of these several periods of service, provided that such person shall be enrolled within five years after his discharge from the army.

2. Till other arrangements are authorised, the persons composing this Reserve Force shall be attached during periods of training and exercise, or when called out for the other purposes specified in the said Act, to any infantry regiment or depôt, or to the enrolled pensioner force, whichever may, by the Secretary of State for War, be considered most convenient, and shall obey all orders of the officers or non-commissioned officers of such regiment, depôt, or enrolled pensioner force while so attached.

3. Every person thus enrolled shall be bound to register his place of abode in the books of the pension district in which he receives enrolment money, and to abide thereat, and not remove therefrom without giving due notice; and the distance of his residence is not, in any case, except by special authority, to exceed 30 miles from the head-quarters of such pension district.

4. All persons enrolled in this Reserve Force shall be bound to attend regularly at the hour and place of assembly, when called out for training and exercise, either with the regiment depôt or pensioner force to which they may have been attached as aforesaid, for a period not exceeding twelve days in each year, or at any time and place, when called on for the preservation of the public peace, or during such period as Her Majesty may require their services within the United Kingdom in the event of invasion or imminent danger thereof, or in case of war, on all which occasions they will be under the command of the General Commanding-in-Chief of Her Majesty's Forces, and subject to the Articles of War.

5. All persons failing to attend on these occasions without reasonable cause, or when they have volunteered their services for permanent duty, or who may be convicted of any serious misconduct or breach of discipline while so employed, or of violence or disrespect at any time towards the officers entrusted with their payment and superintendence, or who shall be guilty of any fraudulent statement at their enrolment, shall, in addition to any other penalty, be liable to dismissal from the force, with the forfeiture wholly or in part of the several advantages authorised by this warrant.

6. On the termination of the period of service for which these men have engaged in the Reserve Force, and on the fulfilment of the other conditions, they shall be entitled to the same rates of pension as they would have attained by the warrants under which they originally enlisted, had they continued to serve in the corps from which they were discharged till they contemplated the period of 21 and 24 years respectively, and they shall be permitted to add to such pension an amount equal to the good-conduct pay of which they had been in continuous receipt for two years immediately preceding the date of their discharge. Such pension, however, shall in no case exceed tenpence a day for a private, one shilling for a corporal, or one shilling and threepence for a sergeant or other superior non-commissioned officer; but, except by special authority, no service shall be reckoned for any year in which the person enrolled has not resided at his registered place of abode, or has unlawfully absented himself during any portion of the exercise for which he shall have been called out in terms of the Act before referred to.

7. All persons enrolled in the Reserve Force who may be wounded or disabled in the execution of their duty shall be entitled to the same pension as under similar circumstances and for the like service would have been granted in the regular forces of Her Majesty; and when called out on permanent or continuous duty for any period exceeding three months the whole of such period shall be reckoned according to the usual regulations of the service, and not at the rate of two years for one.

8. The staff officer of the pension district in which persons have been enrolled for this Reserve Force, or such other officers as may be appointed for that purpose, shall keep a record of the number of days' service performed by each person in the course of the year, as ascertained either from that officer's own knowledge or the report of the commanding officer of the regiment or depôt with which such person may have been trained, and also of the extent of his service prior to leaving his regiment, so that he may be enabled to report to the Commissioners of Chelsea Hospital when the right to pension has been attained in each case; and the officer or officers by whom such person has been trained shall also note, on a certificate to be given to him, whether the extent of service which he was bound to perform up to the 31st of March in each year has been regularly completed.

9. No person enrolled in the Reserve Force shall be compelled to serve in a grade lower than that which he last held in his corps, but any interval which may take place in his service while awaiting a vacancy shall not be allowed to reckon towards pension. In the event, however, of such persons agreeing to serve in a lower grade till vacancies offer, they shall be entitled to reckon such service towards the pension of the higher grade after it has been attained.

10. The sum of 4*l.* shall be allowed annually as enrolment money, which shall be issued to the persons composing the Reserve Force, in equal quarterly payments in advance on the 1st April, 1st July, 1st October, and 1st January, or at the period of being called out for training, as may be considered most expedient by the Secretary of State for War; but, before these payments, the officer by whom they are made is to satisfy himself that each man is possessed of one pair of boots, two shirts, two pair of socks, and a stock, as also that all fines for misconduct or absence during the previous trainings have been settled.

11. Every person in this Reserve Force shall receive a tunic, a pair of trowsers, and a cap, on the first and each succeeding seventh year of his enrolment, and be entitled to the same rates of pay and allowances when called out for training, exercise, or service, as are fixed for corresponding ranks in the infantry of the Line, with the addition of such amount of good-conduct pay as the enrolled man was in receipt of at the time of his discharge.

12. While serving with a regiment or depôt all persons belonging to this Reserve Force shall be liable to the same punishments and penalties for offences as are prescribed by the Mutiny Act and articles of War for Her Majesty's other forces; but when serving with the Enrolled Pensioners, minor offences may be punished by the fines and penalties authorised for that force.—By Her Majesty's command,

SIDNEY HERBERT.

I —— do declare that I was discharged* from the —— Regiment of ——, after a service of —— years; that I am of the age of ——; and that, provided my services shall so long be required, I will serve Her Majesty, her heirs, and successors, in the Reserve Force enrolled or to be enrolled for service within the United Kingdom, in virtue of the Act noted in the margin,† for such a period as, reckoned at the rate of two years for one, may be required to complete ‡—— years' service. ——— Signature of soldier.

Declared before me,§ ———

COURT-MARTIAL ON AN OFFICER.

Lord Clyde has administered a sharp rebuke to the officers composing a court-martial. The proceedings are recorded as follows:—

Head-quarters, Camp Futtehgurh, Nov. 14, 1859.

At a general court-martial, re-assembled at Cawnpore, on Friday, the 23rd of September, 1859, Lieutenant George Cortlandt Buller Taylor, of Her Majesty's 1st Regiment of Bengal European Light Cavalry, was arraigned on the following charge:—

Charge.—With conduct unbecoming the character of an officer and to the prejudice of good order and military discipline, on the following instances:—

1st Instance.—In having, at Cawnpore, shortly before twelve o'clock on the night of the 18th of August, 1859, entered into an unseemly altercation, on the public road, with Sergeant-Major G. H. Fleury, of the Cawnpore Depôt, who, by his (Lieutenant Taylor's) order, was taken a prisoner to the main guard of the 1st Light Cavalry, and there handcuffed and leg-ironed, the leg-irons being removed in about an hour, and the sergeant-major, still handcuffed, then placed in confinement in one of the regimental cells, and kept there till about eleven o'clock on the morning of the 19th of August; he, Sergeant-Major Fleury, having done nothing whatever to justify the indignities to which he was thus subjected by Lieutenant Taylor.

2nd Instance.—In having at Cawnpore, shortly before twelve o'clock on the night of the 18th of August, 1859, entered into an unseemly altercation on the public road with Mr. J. Wilson, engine driver of the East Indian Railway, who, by his (Lieutenant Taylor's) order, was taken a prisoner to the main guard of the 1st Light Cavalry, and there leg-ironed, the leg-irons being removed in about an hour, and Mr. Wilson then placed in confinement in one of the regimental cells, and kept there till about eleven o'clock on the morning of the 19th August; he, Mr. Wilson, having done nothing whatever to justify the indignities to which he was thus subjected by Lieutenant Taylor.

Finding.—The Court find the prisoner, Lieutenant George Cortlandt Buller Taylor, of Her Majesty's 1st Regiment of Bengal European Light Cavalry, guilty of the charge brought against him; and on the 1st instance of the charge guilty, with the exception of having entered into an unseemly altercation on the public road with Sergeant-Major Fleury, of the Cawnpore Depôt, of which he (the prisoner) is not guilty, and is acquitted; and on the 2nd instance of the charge guilty, with the exception of having entered into an unseemly altercation on the public road with Mr. J. Wilson, engine driver of the East Indian Railway, of which he (the prisoner) is not guilty, and is acquitted.

Sentence.—The Court sentences the prisoner, Lieutenant George Cortlandt Buller Taylor, of Her Majesty's 1st Regiment of Bengal European Light Cavalry, to be reprimanded in such way as his Excellency the Commander-in-Chief may direct.

Revised Sentence.—The Court respectfully adheres to its original sentence.

"The finding is approved, but the sentence is not confirmed." (Signed) CLYDE,
General, Commander-in-Chief, East Indies.
Lucknow, Oct 27, 1859.

REMARKS BY THE COMMANDER-IN-CHIEF IN INDIA.

The sentence is, in Lord Clyde's opinion, quite inadequate to the very serious offence of which Lieutenant Taylor has been correctly convicted. It is true that this officer has expressed his deep sorrow for what has occurred, pleading youth and inexperience for his improper conduct, which he allows that he cannot for an instant attempt to defend. He also states that, on becoming aware of the impropriety of his behaviour, he endeavoured to atone for the outrage he had committed, by doing everything in his power to appease the wounded feelings of the aggrieved parties, but that his endeavours were unsuccessful; and Lieutenant Taylor adds that he is threatened with an action in the Supreme Court, at the instance of Mr. Wilson, unless the matter is compromised by the immediate payment of 5000 rupees.

The Court, it may be presumed, had these circumstances under their consideration when they awarded punishment; but a sentence of simple reprimand is so manifestly insufficient under the mildest view of the case, that the Commander-in-Chief is unable to sanction it in any way, and declines to order its infliction.

The Court having had the opportunity of re-considering its sentence, has now the full responsibility of the result of this trial.

It is by such inadequate proceedings that the reputation of military tribunals is lowered in the eyes of the public, to the prejudice of discipline, and the good name of Her Majesty's forces.

Lieutenant Taylor is to be released from arrest, and directed to return to his duty.

By order of the Right. Hon. the Commander-in-Chief.
D. M. STEWART, Lieut-Colonel,
Assistant-Adjutant-General of the Army.

---

* Any person engaging in the Reserve Force should, before enrolment, produce his parchment certificate of discharge to confirm these particulars, and show that he has not left his regiment with a bad character.

† 22 & 23 Vict. c. 42.

‡ Here insert 21 years, if the former service has been in infantry, or 24, if in cavalry, artillery, or engineers.

§ A justice of the peace.

THE NAVY.

ADMIRALTY, JAN. 9.—APPOINTMENTS.—Midshipmen E. C. Foot, to the Mutine, 17, screw steam-sloop, at Portsmouth; F. Rougemont to the Neptune, 120, at Portsmouth; R. J. F. Edgecumbe, J. C. Best, J. J. F. Bell, C. J. C. St. Clair, and W. J. Boteler, to the Nile, 90, screw steam flagship, at Devonport.

JAN. 7.—Commander F. A. Herbert (1858), to the Excellent, 46, gunnery-ship, at Portsmouth.

Chief Engineer T. T. Murray (1852) to be additional to the Fisgard, 42, at Woolwich, for charge of the machinery of the Basilisk, when that ship shall have been paid off.

Master's-Assistants R. H. Hebden, H. S. Edwards, T. L. Mourilyan, W. Garner. G. Royle, and T. Potter, to the Chesapeake, 51, screw steam frigate, East India and China station, as supernumeraries; H. Husband to the Nile; F. W. Raikes and P. C. Smith, to the Himalaya, screw steam store-ship, at Devonport; R. S. Evatt, to the Ariadne, 32, screw steam frigate, at Portsmouth; H. W. Davidson, G. J. H. M'Carthy, F. W. Moffat, J. F. Atkinson, W. Terry, R. P. Tully, B. M. West, and T. H. Flood, to the Marlborough, 131, screw steam-ship, Mediterranean Station, as supernumeraries.

Assistant-Paymaster E. A. M. Chaffers, to the Nile.

Acting Third-Class Assistant-Engineers W. W. Smith, to the Asia, 84, guard-ship at Portsmouth, as supernumerary; J. Gordon, to the Wellington, 72, guard-ship, at Devonport, as supernumerary; J. Anderson, to the Conqueror, 101, screw steam-ship, at Devonport; and P. M'Allister to the Firebrand, 6, paddle-wheel stream frigate, at Portsmouth.

JAN. 10.—Captains C. F. Schomberg (1851), to the Cumberland, 70, at Sheerness, vice Captain Patey, whose appointment has been cancelled; and D. Curry (1846), to the Aboukir, 90, screw steam-ship, with the Channel squadron, vice Captain Schomberg.

Lieutenant C. E. Stevens (1853) to the Britannia, 120, training-ship, at Portsmouth, for service in the Sealark, 8, sloop, at Portsmouth, vice Commander Lowther, promoted.

First-class Assistant-Engineer J. M. Sales to the Wellington.

Second-class Assistant-Engineer C. Homer to the Firebrand.

Master's-Assistant R. H. Hawes to the Saracen, 4, brig, West India and China Station.

Clerk J. W. Silverlock to the Diadem, 32 steam frigate, with the Channel squadron.

Midshipmen G. E. Price, F. M. S. Osborn, and G. Jervis, to the Algiers, 91, screw steam-ship, with the Channel squadron; C. Laprimandaye, to the Queen, 86, screw steam-ship, at Sheerness; L. R. Moncrieff, and H. G. Audoe, to the Mars, 80, screw steam-ship, at Portsmouth; M. J. Dunlop to the Royal Albert, 121, screw steam flagship, with the Channel squadron; T. H. Falcon, and W. B. Littlehales, to the Ariadne; C. R. T. Russell, to the Scylla, 21, screw steam-corvette, for particular service; J. Fellowes, R. H. Bogle, and W. D. Barrow, to the Diadem.

JAN. 11.—Lieutenant G. D. Bushe (1859) to the Trafalgar, 90, screw steam-ship, with the Channel squadron.

Lieutenant Ray, R.N., Admiralty agent on the West India station, has been promoted to the rank of commander on the reserved list.

JAN. 12.—Commander G. T. S. Winthrop (1846) to the Argus, 6, paddle-wheel steam sloop (coast guard tender), vice Grandy, promoted.

Second-class Assistant-Engineer E. T. Read to the Hogue, 60, screw steam-ship, on coast-guard service at Greenock, for service in the Jackdaw, gun-boat.

Acting Assistant-Surgeon G. W. L. Harrison (1858) is confirmed as assistant-surgeon in the Ariadne, 26, screw steam frigate, at Portsmouth.

Advice steam-tender, M. Raymond, second master from Queenstown, arrived at Plymouth on Sunday with newly raised men.

Alacrity, 4, screw, Commander J. K. E. Baird, yesterday received her marines.

Arethusa, directed to be built as a 50-gun sailing-ship, to be converted into a screw frigate.

Ariadne, 26, screw frigate, Captain Vansittart, got under weigh yesterday at Spithead, and proceeded to the trial ground in Stokes Bay, in charge of Captain G. T. Gordon, commanding steam reserve at Portsmouth, to test her speed at the measured mile, under the supervision of Mr. G. Murdoch, Inspector of Machinery Afloat, and Mr. Miller, Assistant-Chief Engineer. Six runs were made at the measured mile, and gave a speed in knots of nearly 12¼, the maximum being, with the tide, 14·694 The draught of water was—forward, 20ft. 3 in.; aft, 22ft, 9in.; pressure of steam, 20lb.; vacuum, 25; revolutions of engines, mean, 59; wind, E. by S., force 2. The common propeller was used with the corners cut parallel; diameter 20ft., pitch 25ft. The engines, which worked exceedingly well throughout the trial, are of 800-horse power (nominal) by Maudsley, Field, and Sons, and are of 3ft. 8in. stroke only, instead of being 4ft. as in the Diadem. The speed of the ship may be considered to have been very fairly developed, even when brought into comparison with our fastest frigate, the Mersey, the latter vessel having realised during her most successful trial a speed of slightly over 13¼ knots, exceeding the Ariadne by a trifle over half-a-knot, the Ariadne being one-fifth less power, and only one-twelfth less tonnage than the Mersey.

Barossa, under construction at Woolwich, is about to be launched at an early date.

Basilisk, steam sloop, has been taken into the basin at Woolwich, to return stores, preparatory to being paid off.

Brilliant, 20, the second of the vessels selected by the Admiralty for the use of the Naval Coast Volunteers as training-ships, is now undergoing the necessary alterations at Chatham, to adapt her for the service to which she will be applied. She is to have her main-deck guns put on board, after which she will be removed to the Thames, where she is to be stationed.

Cæsar, 90. A letter received at Plymouth from an officer belonging to Her Majesty's ship, Cæsar, dated Gibraltar, December 29, says:—"As Christmas Day came on a Sunday, the Admiral gave the men holyday on Monday. The Sunday passed off very quietly. I wish you could have seen our lower deck on Monday. It was adorned with green boughs from end to end, with wreaths and festoons of oranges and lemons. The ports were closed, and each mess illuminated with a chandelier made of coloured paper and tinsel. The men had well-spread tables, and here and there were painted signs and mottoes. There were singing and music all day, and we had the old Christmas hobby-horse. In the evening many officers were chaired, and carried round the main and lower decks by some of the men, with lights and cheering. Yesterday the Spanish squadron moved from Algesiras to Tetuan, in Morocco. It consisted of one sailing two-decker, two steam frigates, one sailing sloop, and five paddle-wheel vessels of various rates. It is doubtful if any but vessels of light draught of water will be of much service."

Charybdis, 21, having been fitted in all respects for the steam reserve ordinary, has been inspected at Chatham by Capt. E. P. Halstead, superintendent of the steam reserve in the Medway, who arrived at Chatham Dockyard in the steam gunboat Thrasher for that purpose. Capt. Halstead was accompanied over the vessel by Capt. G. Goldsmith, C.B. (superintendent of the dockyard), Mr. O. W. Lang (the master shipwright), and Mr. J. I. Fincham, his first assistant, a considerable time being occupied in the survey of the vessel, which was found to be in a most satisfactory condition.

Constance, 50, at Devonport, is to be fitted with a screw propeller.

Cyclops has arrived at Kurrachee from Muscat, after completing a minute survey of the whole coast from Cape Ras Al Had to Kurrachee.

Dee, paddle-steamer, Master Commander Pullen, is discharging machinery and boilers for the Duncan, 101, and Nelson, 91, in the steam-basin at Portsmouth.

Devon, lighter, arrived at Pembroke, on Sunday last, with jury rigging for the Espoir; and the Hamoaze, lighter, with stores from the eastern yards.

Espoir, 5, screw, steam-gun vessel, was launched at Pembroke Yard on Saturday last, and as soon as she is jury rigged will be navigated to Devonport to receive her engines.

Greyhound, 17, screw, Commander Sullivan, fitting at Devonport, will in a few days be ready for service.

Icarus, 11, screw sloop, Commander Nowell Salmon, sailed on Thursday for the West Indies and North America.

Immortalité, 51, screw. Opinion is rather divided as to the merits of the new bow of this frigate. She has been lengthened about 16 feet forward, and the alteration is expected to give her increased speed. To obtain this now indispensable quality for frigates of her class, the Immortalité has been made so sharp as to amount to "leanness." From the manner which her upper works overhang she has an appearance of weakness forward, which the weight of her lower guns and anchors will be likely to put to a severe test. Speed in ships of war is a most important quality, and where two ships are equal in all other respects, the swiftest will be certain to win. Yet we question the propriety of making our heavy frigates so lean forward as to make them "wet" ships, or more likely to cut into the body of a wave, than to rise buoyantly over it. Of course we speak conjecturally, and wait for the test of the measured mile in Stokes Bay.

Implacable, 72, at Devonport, is being rigged by the men belonging to the Steam Reserve, and boys from the Royal Adelaide.

Industry, iron steam-vessel, Master-Commanding Hodges, at Woolwich, has been undocked after repairs, and is ordered to receive a cargo of stores for Rio de Janeiro and Ascension.

Melpomene, 51, screw, Captain Ewart, at Spithead, it is expected will proceed to Gibraltar.

Mutine, 17, screw sloop, Commander W. Graham, sailed from Portsmouth on Monday morning for Portland.

Niger. From a letter just received from Auckland, New Zealand, we are glad to find that H.M.S. Niger, commanded by that excellent officer Captain Cracroft, had lately arrived at that port, and the writer speaks in admiring terms of the order, comfort, and discipline of the crew, and of his gratification at having been invited to attend divine service, which was performed on board by the Rev. Mr. Lloyd, one of the resident clergymen, whom he accompanied to the vessel, where they were kindly introduced into the cabin by Captain Cracroft, who explained the nature of the service he was himself (having no chaplain) in the habit of performing every Sunday. Orders were then given to toll the bell, and on the main deck they found all the officers and men assembled. They all united in singing the Morning Hymn in a most devout and impressive manner. Their delight and astonishment did not cease, as the service proceeded, to find the responses loudly and reverently read by the whole crew, the *Venite* and *Glorias* chanted by the boys, led by a flute and cornet; and, after a suitable sermon, the doxology was sung. Captain Cracroft kindly presented a donation of 5*l.* to the Auckland Bethel Union, who were truly happy to have it in their power to send on board large supplies of the *British Workman*, *British Messenger*, and tracts; also Bibles and Prayer Books which they had received from the Prayer-Book and Homily Society.

North Star, 28, lately employed in the Arctic exploring service, has gone into dock at Chatham, to be taken to pieces.

Pembroke. Some very interesting "New Year's Entertainments" have been given on board H.M.S. Pembroke, at Harwich, by which the officers, crew, and coast-guard, with the families and friends of each, have been much amused. Concerts, theatricals, a Christmas tree, and a magic lantern have been made available for the entertainments; and on Saturday, an oratorio, the "Messiah," was very creditably performed.

Perseverance, Commander E. R. Power, sailed on Thursday from Portsmouth for the Channel Islands.

Porcupine, 3, paddle, steam surveying-vessel, Captain Otter, was paid wages at Devonport on Tuesday, and the crew granted leave.

Prince of Wales (a converted three-decker) is in a very forward state, and will be ready for launching on the 26th inst. Her ways have been laid and poppets nearly completed. Her figure-head is an exact likeness of His Royal Highness the Prince of Wales, and will be in position next week.

Queen, 86, screw, Captain Charles F. Hillyer, has entered upwards of 600 men of her complement.

Retribution, from Trincomallee, arrived at Galle on Dec. 14th.

Rhadamanthus, paddle-steamer, Master Commander Sturdee, sailed yesterday from Portsmouth for Woolwich.

Rodney, 91, screw, which has been in dock at Chatham under conversion, has been floated out into the river Medway. She is now a splendid ship, with a new stern, having been lengthened 25 feet. Her figure-head is also new, it being a correct bust of the late Lord Rodney; the ship is moored alongside the sheerhulk, to receive her engines from Messrs. Maudeslay and Co.

Royal Albert, 121, flag of Admiral Sir Charles Fremantle, in Plymouth Sound, has embarked supernumerary boys for the fleet, preparatory to sailing for Portland.

Sansparicl.—A seaman of this ship, lying in the basin at Devonport, fell from the bow on Tuesday, and fractured his leg and ribs severely.

Siren.—A Court-martial assembled on board the Termagant, on the Brazil station, on the 24th November, for the trial of Lieutenant Graves, late of Her Majesty's ship Siren, on charges preferred against him by Commander Balfour, of the latter ship. The prisoner challenged two members of the court as prejudiced against him, as proved by opinions they had been known to express towards the prisoner. After some consideration it was admitted the objections were well founded, and the court was dissolved accordingly. Mr. Herbert R. Holmes, acting mate of the Siren, had been sentenced by the court-martial to be severely reprimanded, and to serve six months in present rank before receiving his acting lieutenant's commission, for insolent and contemptuous conduct towards his superior officer, Commander Balfour. John Blizzard, gunner, R.M.A., for striking and maltreating Sergeant Smedley, R.M., when in the execution of his duty, to which charge the prisoner pleaded guilty, was sentenced to receive 48 lashes, and to be imprisoned for six months.

Surprise, Commander Lord E. H. Cecil. At the time of the departure of the mail from Sierra Leone, the Surprise was on the beach, inside Lighthouse Point, having been hauled up to examine defects, &c. A board of surveying officers from Her Majesty's ship Centaur having examined the Surprise, had reported both false and main stern-posts started from the keel, that they were both very much decayed and worm-eaten, and that the tennon of the former was eaten nearly through. Temporary repairs were being effected by placing iron knees as supports, &c., but as the vessel required general repairs to her hull, it was recommended by the surveying officers that she should be docked as soon as possible for that purpose. Several fine young men have been entered by her from the merchant vessels in the port, a great number having lately volunteered for the Royal Navy.

Wanderer, screw despatch vessel, Commander M. Pechell, arrived at Spithead on Tuesday morning from the Mediterranean. She sailed from Malta, December 17, experienced heavy gales, and anchored under the lee of the island of Galeta on the 20th of December for 46 hours, and inside Cape Talas (near Carthagena) for 20 hours; starting again from the latter place on the 27th, and arriving at Gibraltar on the 30th. She left the rock on the 2nd inst. with light winds from the southward, and veering to a stiff breeze from the westward, on the 3rd increasing to a heavy gale; on the 4th and 5th had bulwarks considerably damaged, starboard binnacle washed away, stern port burst open and washed away, two jibs and mizen split, and mizen-boom carried away. On the evening of the 6th the weather moderated and veered round from north to the eastward, and became fine. The ship had a splendid run up Channel on Sunday night, with clear bright weather, and anchored at Spithead at 10·10 A.M. yesterday. She brings home a few supernumerary invalids.

DEVONPORT DOCKYARD.—Mr. Sturgess, third-class clerk in the storekeeper's office, has been transferred to Deptford; and Mr. W. G. Gilbert, of Malta-yard, is appointed to this yard. The following superannuations have taken place:—Richard Pasco, leading man of riggers, on 52*l.* 3*s.* 4*d.* per annum; Samuel Organ and J. Lander, shipwrights, on 46*l.* 19*s.* per annum, each; and Henry Broad, smith, on 45*l.* 5*s.* 2*d.* per annum.

PEMBROKE DOCK.—It is expected that the Howe, 131, will be ready for launching in the beginning of March. She will be the largest ship, by measurement, in the Navy. The new foundry has been in operation some time, and they make many castings which had formerly to be sent round from other dockyards. It is supposed the means of constructing machinery of all sorts will soon be got ready.

Amongst other changes in the *Navy List* for this quarter we notice that the clerk of the works at this establishment has been made one of the principal officers of the yard, and will for the future take rank next the store-receivers.

Commodore Charles Wise, now senior officer on the west coast of Africa, is spoken of as likely to receive some home appointment in the civil service of the Crown. The Vesuvius, 6, at present under that officer's command, will have completed her three years' commission in April next.—*Plymouth Mail.*

In accordance with an Admiralty order received at Woolwich Dockyard on Monday, Mr. Penfold, accountant to the establishment, has been superannuated on a retiring pension of 600*l.* per annum. Mr. Penfold has been fifty years in Government service, having been appointed accountant to Woolwich Dockyard about five years since, at 500*l.* per annum.

In order to procure the necessary space for the extension of Chatham Dockyard, the Lords of the Admiralty have given notice to the Mayor and Corporation of the City of Rochester, as conservators of the river Medway, that they intend stopping up St. Mary's Creek on the eastern side of the dockyard, and converting the whole of the land thus gained into extensive docks and steam basins, the foundations for which will be executed by convicts.

We are informed that a scheme for a Naval Reserve has been laid before the Admiralty by Sir Charles Napier, which will, it is thought, ensure a Reserve of well-trained able seamen. The outline of the plan is this: the Reserve to consist of men who have served the required ten years in the Navy, and are in receipt of short service pensions, to take which under the present system men have great objections,

Digitized by Google

which this will entirely remove. These men hold their pensions; are bound by the regulations for the Reserve now in force, and at the expiration of twenty-one years' servitude, *i.e.*, ten years in the Navy and eleven in the Reserve, are entitled to the long service pension.

A Court assembled on board the Impregnable flag-ship, at Devonport, on Wednesday morning, for the trial of James Martin, gunner, Royal Marine Artillery, belonging to Her Majesty's ship Royal Albert, for attempting to strike his superior officer, First Lieutenant C. F. Daly, R.N., and using violent and disgusting language towards the said Lieutenant Daly. Also on John Dillon, private, Royal Marine Artillery, for violently striking the said First Lieutenant Daly in the mouth and knocking him down. In both cases the prisoners sprang on the officer from between the guns on the main deck, when he was going his round of duty. The sentence on James Martin was that he be hanged at the yardarm of any of Her Majesty's ships; and on John Dillon that he receive 50 lashes, be imprisoned two years, and lose all pay. It is probable that the capital sentence will not be carried out.

Mr. Donald M'Kay, of Boston, U.S., the builder of the Great Republic, Lightning, and other clipper ships, entertains a poor opinion of our naval architects. Speaking of the Donegal, 101 guns:—"The man who designed her appears to have derived his ideas of naval architecture from a Dutch galliott; her model is a disgrace to the Board of Admiralty that sanctioned it." After visiting the Royal dockyards of Deptford, Woolwich, and Chatham, he adds—"The scantling of all these vessels is very light compared with that used in our navy yards, and I have no hesitation in asserting that our models, for speed, are very superior to any that I have yet seen in the Royal dockyards." Let the Admiralty remember the adage, "*Fas est doceri ab hoste*," and act upon it. There is at present in the Dublin docks a model for a gunboat from the American lakes; let them take a lesson for speed combined with light draught of water. Since the repeal of the navigation laws in 1849, it may be well to look at the comparative state of the shipping in our trade and that of the United States, showing the increase or decrease of foreign in both. This is the way to judge of trade, free to the foreigner in this country, but closed against him in the United States, where the increase of foreign shipping since 1858, was but 804,212, including British, and of their own 2,002,160 tons; while in the United Kingdom the increase of foreign was 1,623,378, and of British only 1,057,159 tons inward in the same period. We want free trade fully carried out, that our shipping may have the same privileges in foreign countries as theirs have here. In 1812 our mercantile navy stood as three to one compared with the rest of the world, but now as one to three. Then Britain was mistress and sovereign of the seas, now the tonnage of the United States exceeds that of the United Kingdom.—*Dublin Evening Mail.*

According to the amended code of regulations recently issued by the Board of Admiralty relative to the examination of lads desirous of being admitted as apprentices in Her Majesty's dockyards, and who formerly obtained the certificates, after examination, from the respective schoolmasters attached to the various dockyards, the examination was yesterday performed at Woolwich, for the first time, by the Civil Service Commissioners appointed to proceed on circuit, when a number of youths between the ages of fourteen and fifteen years satisfactorily passed the prescribed examinations, and were admitted to the factory. The reception of first and second-class lads for ten years continuous service in Her Majesty's Navy continues at Woolwich without abatement since the issue of the Royal proclamation. The weekly enrolment averages about 60. Thursday being the day appointed for the medical attestation, 80 well-conditioned, stout, healthy, and intelligent lads, principally between 19 and 20 years of age, of the first-class, and standing 5 feet 6½ inches in height, were yesterday entered on the books of the receiving-ship Fisgard, at Woolwich. About 250 applicants were admitted to the offices, the majority of whom were rejected by the Medical Examination Board.

ROYAL NAVAL COLLEGE, PORTSMOUTH.—The Christmas recess commenced on the 23rd December, and will terminate on the 23rd instant. The officers are to assemble at the College on the 23rd, and recommence their course of studies at the usual hour on Tuesday morning, the 24th, when all officers are expected to be present. R. S. Hewlett, Captain-Superintendent. The above order does not apply to officers waiting examinations.

The following officers studying for steam are absent during the recess. Royal Navy:—Captain W. H. Dobbie, Commanders S. H. Henderson, H. R. Waterlaw, A. M. Lyons, Hon. A. L. Corry, W. C. Wilson, C. W. Buckley, E. Madden, A. H. Johnston, T. H. Smith, J. Moresby, H. D. Grant, W. C. Smithett, Lieut. E. G. F. Knowles. Royal Marines:—Lieuts. F. W. Gray, E. H. Moore, F. H. C. Owen, H. H. Kelly, A. Donald, F. Bacon, R. H. Dwyer, J. W. Lillicrap, I. Inmann, H. G. Anson, R. E. Allen, J. L. Needham, W. G. S. Beckfield, Hon. Wm. Aylmer, E. M. Coates, G. Pengelly, E. W. N. Holbrook, and J. T. Lye.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It may appear premature to question the wisdom or to predict the failure of this mode of raising a Reserve force of seamen for the Navy. The measure, as you are aware, came into operation on the 1st of this month, and any fisherman or coast boatman in the United Kingdom can now at once, if he is a British subject, free from infirmities, not over thirty-five years of age, and has been five years at sea, receive an annual payment of 6*l.*, payable quarterly, provided that he enrolls himself as a Naval Volunteer. And further, if he fulfils certain conditions, he will receive a pension of 12*l.* when he is incapable of earning his livelihood or arrives at sixty years of age.

There are other inducements, as intricate as it is possible for official ingenuity to make them, now posted at the entrances of all our naval ports and custom-houses, which are expected to overcome the dislike which, somehow, exists in the minds of our coast population to enter the Navy. And yet few, if any, of the 200,000 "long shore" men of these islands have up to the present time accepted the *boon* offered them by the legislature.

At Portsmouth, for instance, where I have made inquiry at the proper quarters, the answer is, that not a man has enrolled himself, and as your paper is now distributed in every part of the kingdom, I should like to hear whether the scheme has met with similar apathy elsewhere.

It will be very unfortunate if this incentive to enlistment begins with a failure, as it is generally more expensive to have to increase our bidding with such men as sailors than to offer acceptable terms at first. I fear, however, that the "obligations of the reserve" more than counterbalance the "advantages" offered. From what I can glean, the men do not object to the Drill, Active Service, or Pension clauses, or indeed to any other condition, except that of not being allowed to proceed on a voyage occupying more than six months.

That the Government anticipated some objection would be raised to the latter condition is evident, for the Board of Trade issued on the 12th of December last another circular, announcing that "special leave for voyages exceeding six months will be granted to all Volunteers on the condition that leave is to be for one ship and for one voyage only at a time, and to be renewed for every voyage. And also that each Volunteer must have completed his twenty-eight days' drill for the year before the leave will be given."

There are other conditions attached to this second circular, subject to which the Admiralty will grant leave for the first five years of the service of each Volunteer joining the Reserve under the present regulations. Nevertheless, now that the scheme has gone forth, I fear the country cannot congratulate itself upon its success. However, the object must be attained, for a Reserve Force of trained seamen must be found equal at least to the reserve force of seamen-soldiers now ready ticketed and labelled, belonging to our powerful neighbour on the other side of the channel. I should rejoice to see the present plan expand into a great success, and I hope the maritime population may take a lively interest in the measure; but knowing something of "salt-water" human nature, I wait with anxiety to learn whether 6*l.* per year and a small pension are sufficient inducements to raise a body of trained seamen sufficiently strong to insure the peace and tranquillity of these islands.

I am, sir, yours obediently,
AN OLD MAN-O'-WAR'S MAN.

Portsmouth, Jan. 11, 1860.

THE ADMIRALTY BOARD.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—"Hitherto the relative inefficiency of the British Navy, as compared with the navies of our great maritime rivals, has been a theme reserved for the grumbling of a few discontented naval officers, or a few opposition speeches in committee on naval estimates."

Now, making every allowance for the customary geniality of an Edinburgh Reviewer, every line of this sentence is pregnant with bitter, but wholesome, truth.

The "relative," and, let us trust, temporary, "inefficiency" has many ramifications; but the primary cause is to be distinctly traced to the extraordinary constitution of its controlling power as represented by the Admiralty Board, so ably expounded in your first and last impression, and which will in future receive, let us hope—for we hope much of you—your most earnest attention.

All other naval reforms, whether in organisation or architecture, discipline or expenditure, are comparatively futile without an entire reconstruction of the existing administrative power.

For, in these days of rapid communication, which afford such facility for combination, it does not require much penetration to perceive that naval or military success must more than ever depend on the grasp and capacity of its home administration; which for all purposes of war should rest in one superior mind, with the advantage (?) of consulting others in matters of import; and it is but natural to infer that military or maritime power will be more ably wielded by those whose life has been passed in the study of their profession, than those that have been brought up to any other; at least, we have not yet seen an Old Commodore selected for the Woolsack, or a rural dean for the Horse-Guards; though, perhaps, the Hertfordshire Incumbent would be less abroad there than some quondam occupants of that establishment. But all manner of men save naval or military ones, are culled from political byeways for the position of First Lord of the Admiralty, who, together with his Private Secretary, as you most truly remark, are in effect the Board.

Now, what are the arguments in favour of placing a man wholly unacquainted with a profession at the head of it? In common life there are none—what are they in life nautical? It can hardly be because it takes less time to make a sailor than anything else, for it is generally allowed that unless you take to it very young you can never make one at all.

It is argued, then, and perhaps justly, that a man bred in the Service would have many friends and followers, who from its present constitution would be enabled to monopolise all its patronage and employment, and that naval men have been tried, and such found to be the case: granted, but that only demonstrates another evil.

It is true that in time of peace the equitable distribution of patronage is the chief duty of the First Lord, apart from his political one, but if that is enough to perplex him then, much more in time of war when his energies should be directed to "*la grande guerre*" with its skilful and rapid combinations, instead of the minor details of Government support. In other words, he may be capable of supporting the Government, but not the nation.

Again, how much ulterior success must depend on the choice of commanders to carry out his tactics (if he has any). What can he know of them professionally? It is true he may consult his colleagues, but that must place him more or less in a position of dependence and irresponsibility, with which, if possible, the official world are so careful to envelop themselves—and which is, perhaps, more easily assumed by a Board than any other body. So long as the Board is "up," you can point to it; but only want to take it down, or rub it up a little, and where is it?—why, about as tangible as a mathematical line; you can't even hang a disaster on it, much less one of its members.

The real reason is that an irresponsible political partisan is a more facile instrument for the Government, and more *au fait* at the distribution of political rewards; for officers in the navy, strange as it may seem, do not succeed from service or seniority to the command of stations or ships. Each one the First Lord has to give away—and he gives away the whole—is a piece of patronage which is hotly contested for by numerous competitors with political or private interest; and those whose delicate sense of their own merits is coupled with a judicious combination of flattery and audacity, are too often enabled to supplant the unassuming claims of sterling worth.

Again, let us consider, which is not impossible, that the office of First Lord becomes vacant, not in time of peace, but during war, and a Home Secretary, or Chancellor of the Exchequer, or any other "politico" who may be available, is selected for the military command of the largest marine in the world. However high-minded he might be, and however determined to make all his appointments subservient to the good of his country, is it not unreasonable to expect that he will be able to discriminate between the conflicting struggles of merit and interest, in the enormous amount of patronage he must dispense? He may consult his colleagues, it is true; but in peace, much more in war, they are overburdened with work. How can he judge for himself? He must trust to others, or he can only work in the dark; as for expecting a comprehensive development or application of the resources of the empire, that would be too absurd.

We therefore believe that though the Government may be as well served under the present irresponsible system, the nation will be better served by placing a naval chief as the supreme and responsible head of her naval administration, with no patronage whatever to dispense, save in the choice of commanders for the various squadrons he may employ, as he will be indubitably the best judge of the men most likely to carry out his plans. Call him what you like, that is a matter of very little importance, and let the Cabinet select him from the list of flag officers holding active employment, and give him a seat in the Cabinet; but do not allow him to hold his appointment for more than five years during peace, during war longer if deemed expedient to the public service. Let the other Lords be selected from the admirals and captains holding active employment, one to go out by rotation every year, the secretaries introducing the estimates and attending to the Parliamentary duties.

We may then, and not till then, hope for systematic organisation of our resources, and that in future contests they may be ably wielded, and if not, the country will know who is responsible, and may act accordingly.

I am, Sir, your obedient servant,
London, Jan. 12th. A CAPTAIN, R. N.

THE MILITIA.

The Durham Artillery, consisting of 5 officers, 10 sergeants, 213 rank and file, 21 women, and 24 children, proceeded on Tuesday by steamer from Fort Gomer and Portsmouth to the Isle of Wight; one wing for duty in the detached forts; the head-quarters to be stationed at Parkhurst.

The Tipperary Artillery have arrived at Gosport from the Isle of Wight, and occupy quarters vacated by the Waterford at Haslar.

The Waterford Artillery have been removed from Haslar to Fort Gomer.

Lieutenant Alexander Thomas Ewens having obtained a first-class certificate at the School of Musketry, at Hythe, has been appointed by his Royal Highness the General Commanding-in-Chief, with the concurrence of the Secretary of State for War, to act as Instructor of Musketry to the Stirling, &c., Regiment of Militia, vice Junor, retired.

Antrim Rifle Regiment.—Edward Cole Magenni, Gent., to be Ensign, vice William Mitchell, whose appointment has been cancelled.

Antrim Artillery.—T. C. Hamilton Parks (late lieutenant East York Militia) to be Second Lieutenant, vice Markham, promoted.

West Kent Light Infantry Regiment of Militia.—Captain Bertie Mathew Roberts to be Adjutant, vice Lynch, resigned.

3rd Regiment of the Royal Surrey Militia.—Ralph Connor, Gent., to be Quartermaster.

1st Regiment of Derbyshire Militia.—Captain John Remington Breading to be Quartermaster.

Durham Militia Artillery.—Second Lieutenant Mark Quayle, resignation accepted.

90th or Stirlingshire, &c., Highland Borderers Light Infantry Regiment of British Militia.—Her Majesty has been pleased to accept the resignation of the commission of Ensign Edgeworth Horrocks from the 23rd Dec.

The name of Ensign Kelly is Waldron Edward Roper Kelly, and not Rosser, as gazetted on 15th November last.

Hertfordshire Yeomanry Cavalry—Northern Troop.—Charles Cholmeley Hale, Gent., to be Captain, vice S. H. V. Heathcote, resigned.

Hungerford Yeomanry Cavalry.—Edwin Martin Atkins, Gent., to be Cornet.

Royal 1st Devon Regiment of Yeomanry Cavalry.—James Howard Buller to be Lieutenant, vice Snow, resigned.

Lancashire Hussar Yeomanry Cavalry—Thomas Arthur Southwell, Gent., late of the 13th Light Dragoons, to be Cornet; Jan 4.

West Kent Light Infantry Regiment of Militia—Bertie Mathew Roberts, Esq., Adjutant, to serve with the rank of Captain; Jan. 10.

East Kent Regiment of Militia—The notice of Commission of Ensign Hatfeild, inserted in the Gazette on the 6th Jan. instant, should have been as follows:—"Charles Taddy Hatfeild," instead of "George Taddy Hatfield."

FRENCH NAVY.—Vice-Admiral Regnault de Genouilly has been appointed titular member of the Council of Admiralty, vice the Rear Admiral Aubry Bailleul, by an Imperial decree, Jan. 8th.

General de Montauban the Commander-in-Chief of the French expeditionary force to China, embarked at Marseilles on Thursday, for his destination, *via* Suez. He may be expected to arrive at Hong Kong early in March.

VOLUNTEERS.

METROPOLITAN.

We understand that a proposal to form a Volunteer Club has been exceedingly well received, and that Lord Elcho, Lord Ranelagh, Lord Lichfield, and Captain Sir John Mildmay have joined the provisional Committee. It has obtained many promises of support, and the Club is so far advanced that the first meeting will be held on 9th February.

CIVIL SERVICE BRIGADE.—The council of this brigade, composed of representatives from the several departments in which separate corps have been formed, assembled for the first time on Saturday, at the Audit Office, Somerset House, when it was announced that the total strength of the brigade already amounted to 660 effective and 410 honorary members; and it was decided to apply immediately to the Lord-Lieutenant for authority to increase the effective strength of the corps from 400, for which number the Queen's sanction has already been obtained, to 1000 men—a number which it is anticipated, from the daily accessions of recruits, will shortly be attained. The gentlemen of the Post-Office Corps now amount to upwards of 100 effectives.

INNS OF COURT.—The Lord Chancellor on Thursday administered the oath of allegiance to a number of the corps. In the course of his observations, the noble and learned lord said: "Gentlemen, in my early youth, when a student of law, I myself was a soldier; and perhaps I might say, "Militavi non sine gloria." I served in a most distinguished corps, 'The Inns of Court Volunteers' of that day, remarkable for its discipline and efficiency; and I had the honour of being reviewed in Hyde Park by His Majesty King George III. along with above 100,000 volunteers then and there assembled, ready to march to the coast on the first alarm of the sailing of the armada at Boulogne, which only waited a fair wind for Sandwich or Pevensey (hear, hear!) Gentlemen, we did our duty while the war lasted; but we, or rather the Government of that time, must be blamed for allowing all the volunteer corps in the kingdom—amounting, I believe, to between 300,000 and 400,000 men—to be disbanded and dissolved as soon as peace was proclaimed. (Hear, hear.) For nearly half a century we have had no citizen soldiers among us, and we have depended for our safety against invasion on defenders regularly in the pay of the State, who, renouncing all civil employments, professionally devote themselves to arms. (Hear, hear.) These are most gallant defenders, and we place unbounded confidence in their heroism; but they may be greatly outnumbered by the immense bands of veteran troops who may be disembarked on our shores; and they ought to be supported by our citizens voluntarily trained to arms in every county, city, and parish in the realm. (Hear, hear.)

LONDON RIFLE-BRIGADE.—1120 gentlemen have enrolled themselves as effective members, and the members are hourly increasing.

On Wednesday afternoon a considerable section of the brigade met at Guildhall, to receive a communication from the Lord Mayor. The brigade having been formed by Lieut.-Col. Hicks, the Lord Mayor addressed it, saying,—You are no doubt aware that on the 21st of July last, in this hall, and in the presence of a much larger number of my fellow citizens than I have now the pleasure of addressing, Lord Elcho proposed, and that gallant old sailor, Sir C. Napier, seconded, a motion that I should be nominated to the colonelcy of the intended brigade (strong symptoms of mutiny manifested by groans, hisses, and cries of "oh, oh!"). One moment, if you please, gentlemen. Let me tell you it is not military to jump at conclusions. Take an old soldier's advice; go steadily forward, make your mark and win it (cheers). The motion above referred to was carried unanimously, and subsequently it was intimated to me by Earl De Grey and Ripon that the authorities of the War Office would have great pleasure in forwarding my commission on making my application in the usual way. At that time the brigade numbered barely 500; but so steady has been its progress since, that it now numbers nearly 1200 efficient men (hear, hear). When the brigade took a flourishing position, a rumour gradually spread abroad that his Royal Highness the Duke of Cambridge would not object to accept the colonelcy (loud cheers). Deeming it my duty to make myself acquainted with the real sentiments of his Royal Highness on the subject, I sought an interview with the illustrious duke, who frankly and fairly stated that if I, as Lord Mayor of London, requested him to take the command of the London Rifle Brigade, he should not be unwilling to comply with the request, although his time was already occupied by other important duties. Feeling that such an appointment—that of His Royal Highness the Commander-in-Chief—would confer no small distinction upon you, I considered it to be my duty, at once and without hesitation, to resign my appointment into the hands of the duke, who, on the 9th instant kindly condescended to accept the title of colonel of the London Rifle Brigade (tremendous and long-continued applause).

A vote of thanks was passed to the Lord Mayor, but not unanimously.

LONDON WELSH CORPS.—At a quarterly meeting of the Most Honourable and Loyal Society of Ancient Britons, held at the Welsh School, Ashford, Middlesex, on the 10th inst., J. R. Kenyon, Esq., D.C.L., vice-treasurer, in the chair, the question of raising a London Welsh Rifle Corps was discussed at some length. Letters were read from the President of the Society, Lord Dynevor, Sir Thomas Phillips, C. A. Wood, Esq., and others, highly approving of the proposal. It was ultimately arranged to convene a public meeting in London early in the ensuing session of Parliament, to proceed further with the movement, and Mr. William Jones was desired to ascertain, as well as he could, the views of the leading Welsh in London on the subject.

PADDINGTON.—In a few days' imperfect canvass, a sum of 922*l.* 19*s.* has been raised, including 770*l.* 15*s.* in donations, and 152*l.* 4*s.* in annual subscriptions. Mr. Raikes Currie, Vice-Chancellor Kindersley, Sir George Nichols, General Downing, Mr. Edwin James, M.P., Mr. Serjeant Gaselee, Colonel Holland, Lieut.-Col Wortley, Mr. H. Kemshead, Captain Packe, and Mr. E. Baylis were present at a meeting a few evenings ago, at which steps were taken to form a corps for the district.

SOUTH MIDDLESEX.—Lord Ranelagh, the commandant of this corps, having been early in the field, has enlisted large numbers of recruits. The regiment now contains nearly 900 effectives, about 1200 including honorary members. It is divided into several companies,—the Chelsea, Fulham, Brompton, and some others, with a metropolitan company for receiving all members who may join the corps for the advantages its parade-ground and club-house offer, without wishing to be incorporated with any of the local companies. Each company has a drill-ground or room of its own, in addition to that at Beaufort House, Walham Green, the head-quarters of the regiment. The corps is at present supplied with long Enfield rifles. The original intention had been to withdraw them after a time, and substitute the short Enfield and sword; and Lord Ranelagh has, since then, decided that the longer weapon carries more accurately, and does not now desire to make the change. He intends, however, to try all kinds of rifles during the summer at Walham Green, and, if possible, adopt the best. Captain Godbold acts as adjutant with great ability.

On Monday night a very crowded meeting of the inhabitants of the district of North Kensington was held in Pearce's Riding School, Westbourne Grove, with a view to fill up the 1st Kensington Company of the South Middlesex Rifle Volunteers, and to form a company for North Kensington. Among the noblemen and gentlemen present were Lord Ranelagh, Lord Radstock, Lieut.-General Tulloch, the Hon. E. C. Curzon, Mr. H. J. Neild, Colonel Evelyn, the Rev. J. P. Gell, Mr. T. J. Serle, Dr. Burke Ryan, Dr. Tulloch, Captain Godbold, and Mr. Hammersley.

A resolution was moved by Mr. H. J. Neild, approving the present movement for forming volunteer rifle corps. Differing in opinion from Sir John Burgoyne as to the possible efficiency of a volunteer force such as was now being raised, Mr. Neild contended that the best bred men had always been found the most effective, and that men well nurtured and brought up were the most enduring. The Rev. F. P. Gell, in seconding the motion, stated incidentally that a French gentleman, while in conversation recently with his (Mr. Gell's) wife on the volunteer movement, actually told her that the French would be in England in May next. (The statement elicited some laughter.) Colonel Evelyn said, the principle now being adopted in South Middlesex, and of which he heartily approved, was to form a company in each district, as a nucleus around which any number of men might rally in case of an emergency. The number of volunteers now enrolled was estimated at, he believed, about 80,000; but we ought not to be content with that, seeing that in Paris alone there were 200,000 National Guards. It was moved by Lieutenant-General Tulloch, and seconded by Dr. Burke Ryan, that steps be taken to fill up the First Kensington Company, and to form a company for North Kensington. Lord Radstock imagined a great number of people in the meeting resided, not in North Kensington, but in Paddington, which had started a rifle corps of its own, and he cautioned them against rushing to join the South Middlesex. Lord Ranelagh, in a good-natured speech, stated that he was in the field volunteering as early as June last in that and other parts of South Middlesex. He advised the meeting to join whatever corps was most convenient and accessible to them, and spoke of the pains he had been at to establish the South Middlesex as a permanent system by, amongst other arrangements, renting Beaufort House as a club for the corps, at 300*l.* a-year, for which he and another gentleman had made themselves personally liable for twenty-one years. He added that the present number of the corps was 1200, of whom about 800 or 900 were effective members, and the subscriptions amounced to about 1400*l.*

ST. PANCRAS.—At a meeting of the committee of management on Monday evening Mr. Bodkin announced that Messrs. Shoolbred, drapers, of Tottenham Court Road, were ready to give the names of sixty young men on their establishment as ready to join the corps, and that the firm would defray the whole expense of their outfit.

ST. PANCRAS AND NORTH MIDDLESEX.—On Thursday this brigade received a vast accession of strength, not only in the shape of effectives, but in contributions—one of the latter from the Duke of Bedford, who, in a letter expressing his wishes for the success of the corps, and regret that his health will not permit him to take an active part in the council, announced himself as a donor of 25*l.*

THE LONDON SCOTTISH.—On Wednesday afternoon, a meeting of members of the London Scottish Rifle Corps was held at No, 429, Strand, to take into consideration the resolve of the committee respecting the kilt. It appeared, from several speeches which were delivered, that upon the origination of the Scottish Rifle Corps it was suggested that, in order to distinguish the Highland from the Lowland volunteers, the former should wear the kilt and be called the Kilt Company. Subsequently, at a general meeting of the corps, a resolution in favour of such a company was carried, and many gentlemen enrolled themselves under the supposition that their section of the corps would be allowed to be kilted like the Highland Volunteers of 1803. A few days ago, however, the committee met, and, after some discussion, passed a resolution to the effect that they had reconsidered the question of the kilt, and, being of opinion that it was for several reasons unsuitable for volunteers, had decided that it should only be considered in the light of full dress, tantamount, in the opinion of several of the gentlemen present, to its utter rejection. Several reasons were assigned for the resolve of the committee, and amongst others that the kilt was indecent. The whole question gave rise to a very animated discussion, and many strong observations were indulged in. The charge of indecency was indignantly rebutted, and it was said that Her Majesty allowed her own children to wear the kilt in her presence, and that many of the volunteers had worn it during the greater portion of their lives. After a very lengthened discussion, it was agreed that the kilt should be retained.

WEST MIDDLESEX RIFLES. — Head-quarters, Lord's Cricket Ground. Date of formation, June 27th, 1859. On the 1st of January, 1860, the state of the corps was as follows: Number of enrolled members, 240; honorary ditto, 164. Donations and annual subscriptions, 1693*l.* Names of officers already nominated—1st. Company: Lord Radstock, Captain; William Kinnebrook, Lieutenant; James Williamson, Ensign. 2nd Company; Lawrence Oliphant, Esq., Captain; John W. Bridgman, Lieutenant; George Richardson, Ensign; Sergeant-Major Pennymore, Adjutant, with the rank of Lieutenant. State of drill, forward, with the manual and platoon exercise, marching, &c. Uniform: a brownish grey Cheviot tweed suit, consisting of tunic, trowsers, and forage cap, trimmed with scarlet and black facings. Accoutrements: a patent leather regulation belt and pouches. Sergeant-Major Pennyward of the Coldstream Guards has been appointed Adjutant.

It is proposed by the Messrs. O'Byrne to form a "Prince of Wales Rifle Volunteer Corps" of members of a certain number of clubs in London.

CAMBRIDGESHIRE.

WHITTLESEY.—Her Majesty has been graciously pleased to accept the services of a sub-division of Rifle Volunteers for this town, which will take rank as a subdivision in the county of Cambridge. Drilling has been just commenced, and is carried on with spirit three times in the week.

2ND CAMBRIDGESHIRE (OR WISBECH) RIFLE VOLUNTEERS.—Frederick Daniel Fryer, Captain. A meeting was held at the Town Hall for swearing in and enrolling the members, on the 9th inst., when nearly all the members attended and were sworn, the absentees being unavoidably prevented. Captain Fryer afterwards mustered the company in the large hall of the Corn Exchange, and addressed them in an appropriate manner. He was heartily cheered at the close of his address. It is arranged to hold a special service in the parish church of Wisbech, on the 24th inst., at which the volunteers will attend in uniform and in military order, and after service they propose to dine together at the Rose and Crown Hotel.

CARNARVONSHIRE.

Various meetings have been held at Carnarvon, Bangor, Portmadoc, Pwllheli, and other places. At Bethesda and Bangor three or four companies have been formed, mainly supported by the generous funds subscribed by the Hon. Colonel E. G. D. Pennant. At Carnarvon a company is formed, and Portmadoc can already boast of upwards of 80 effectives and 50 honoraries, while Pwllheli is not behindhand in zeal and numbers.

CORNWALL.

PADSTOW.—On Friday, the 1st Company of Cornwall Artillery Volunteers paraded in full uniform, 60 strong, at Prideaux Place, the residence of their captain, Mr. C. G. Prideux Brune, when they were inspected by Lord Vivian, the Lord-Lieutenant of the county. The same day, the ladies of Padstow held a "Christmas-tree" in behalf of the band fund, which was numerously attended, and through their kind exertions upwards of 80*l.* was realised.

CUMBERLAND.

At a large and influential meeting held at Maryport on Friday night, it was resolved that a volunteer artillery corps should be formed at that seaport for the town and district. Several volunteers gave in their names at the meeting, and 155*l.* was subscribed.

In Carlisle the corps of artillery, formed in addition to the company of rifles, have commenced drill. The members having found that Captain Prevost could not accept the command, being a staff officer, have chosen Mr. Thomas Salkeld, of Holm Hill, as captain; Mr. S. G. Saul, Carlisle, first lieutenant; and Mr. J. G. Mounsey, second lieutenant. There are now about 40 members, and they propose to have guns in position at the new port of Silloth, about 20 miles from Carlisle.

DERBYSHIRE.

BELPER.—A public meeting of the inhabitants of Belper and the neighbourhood has been held in the County Court-room at Belper, for the formation of a rifle corps. Lord Belper presided, and spoke at great length, taking a general view of the state of England and the Continent, contending that the establishment of rifle corps was a pacific, and not a warlike movement. Letters were read from the Duke of Devonshire, regretting his inability to attend, and from Mr. T. W. Evans, M.P., who was prevented by a severe domestic calamity. Several other speakers addressed the meeting, and at the conclusion nearly 400*l.* was subscribed, and about 40 volunteers enrolled. Among the donations were, the Duke of Devonshire, 50*l.*; Lord Belper, 50*l.*; Mr. A. R. Strutt, 50*l.*; Mr. G. H. Strutt, 20*l.*; Rev. W. Hull, 10*l.* 10*s.*; Mr. J. C. Topham, 10*l.*; Mr. J. Browne, 10*l.*; Mr. W. Webster, 10*l.*

DEVONSHIRE.

BOURN.—Sir J. Trollope presided at an influential meeting held on Tuesday, for the purpose of forming a rifle corps for Bourn and its neighbourhood. A committee was appointed to receive the names of volunteers, to draw up rules and regulations, and to make other necessary arrangements. About 60*l.* was subscribed in the room, and a number of volunteers enrolled.

DEVONPORT RIFLE CORPS.—The members of this corps will be sworn in on Monday next at two o'clock in the afternoon. The members will assemble at their practice ground in full uniform, and then march direct to the Guildhall, headed by the band of the 36th Regiment. There the Mayor and Magistrates will be in readiness to receive them. And after the riflemen have been sworn in it is expected that Major-General Hutchinson will address them.

EXETER.—An enthusiastic public meeting, convened by the Mayor of Exeter (Mr. T. E. Drake), was held in the Guildhall, on Saturday, for the purpose of receiving the report of the committee of the existing rifle corps, and to consider the propriety of establishing an artillery corps for the city. The Mayor presided. The report, which was highly satisfactory, stated that two companies for the city had already been formed, and that two more would shortly be established. It was stated that 60 citizens had enrolled their names as artillery volunteers, and it was resolved that the artillery corps, which might be said to be already formed, should be connected with the rifle corps. Subscriptions amounting to 200*l.* were raised at the meeting.

EXMOUTH.—On Monday, a public meeting was held in this town, Mr. E. Divett, M.P., presiding, for the purpose of establishing an artillery corps. The attendance was nume-

Digitized by Google

rous, and a most enthusiastic martial spirit prevailed, which was enhanced by the appearance of the Woodbury and Topsham Artillery Corps in full uniform, under the command of Captain Brent, and the Exmouth Rifle Corps, under the command of Captain Peters. It was unanimously resolved to establish an artillery corps for the town, and several volunteers were enrolled. It was stated by Mr. Divett that the Government was prepared to establish a battery at Exmouth provided a sufficient number of men to man it were raised.

DORSETSHIRE.

PORTLAND.—The volunteer movement has extended to this well-known island in the English Channel, and resulted in the formation of an Artillery Corps, composed principally of the officials and artisans employed on the works connected with the Breakwater now in course of construction. The subscriptions already promised are very liberal, and no difficulty whatever is anticipated in raising the necessary funds for the equipment of the corps. The Lord Lieutenant of the county having tendered its services to the Government, the Secretary at War, Mr. Sidney Herbert, has signified to his Lordship Her Majesty's gracious acceptance of the same, and that it will rank as the second artillery corps in the county.

WEYMOUTH.—A rifle corps has been established here, and, so far as can at present be judged, no difficulty will be experienced in forming at least two companies. Upwards of 100 of the inhabitants have already volunteered, the subscriptions amount to over 700*l.*, and hopes are entertained that 1000*l.* will be collected.

ESSEX.

HARWICH.—The Volunteer Artillery Company formed here has obtained nearly 50 members, and it is expected that Major Bowness will be appointed to the command.

BISHOP'S STORTFORD.—A company is in course of formation in this town, Sawbridgeworth, Much Hadham, and Stansted. Several donations have been received, and a number of gentlemen have enrolled themselves. Mr. J. Archer Houblon has aided the movement with a donation of 25*l.*

HOLBEACH.—The provisional committee of this corps (a subdivision of the South Holland) having obtained the requisite number of effective volunteers to form a subdivision of a company at Holbeach, are now in communication with the Lord-Lieutenant of the county on the subject of its speedy enrolment. The cost of equipment will be about 4*l.*

GLAMORGANSHIRE.

1st Glamorgan Artillery, formed November, 1859. Head Quarters: Swansea. Officers: George Grant Francis, Captain; Robert Eaton, 1st Lieutenant; Washington H. Brown; 2nd Lieutenant; Thomas Williams, M.D., Honorary Surgeon. Effectives: 70; honorary, 74. Subscriptions: 150*l.* Under active and satisfactory drill. Uniform: blue, with scarlet facings, ornaments, silver. Device of corps: the arms of Glamorgan, surmounted by a cannon; crest, a grenade issuing from a mural coronet; motto, "Deeds, not words.

HAMPSHIRE.

A large and influential meeting, attended by all the principal gentlemen of the neighbourhood, was held at the Crown Hotel, Bishop's Waltham, on Thursday, for the purpose of forming a volunteer rifle corps for the united parishes of Bishop's Waltham, Droxford, Hambledon, Soberton, Meonstoke, Corhampton, Warnford, Westmeon, Upham, and Durley. Mr. Walter Long, of Preshaw Park, in the chair. Upwards of 300*l.* were at once subscribed. A part of the corps is to be formed of mounted rifles.

HERTFORDSHIRE.

WATFORD, OR 2ND HERTS.—A very numerously attended and influential meeting was held on Tuesday evening at Mr. Carey's Lecture-hall, Watford, in furtherance of the extension of the above corps, the Earl of Verulam, Lord-Lieutenant of the county of Hertford, in the chair. Among the noblemen and gentlemen present were:—the Earl of Clarendon, Lord Ebury, Lord Rokeby, the Hon. R. Capel, Mr. Alderman Copeland, M.P.; Mr. Clutterbuck, Mr. Robins, Mr. Stewart, Rev. Mr. James, Rev. Mr. Houchin, &c. The Earl of Clarendon, in moving the first resolution, said that the movement, although as yet only in its infancy, had produced a very salutary effect throughout Europe. It was the most complete scheme that had been devised to secure peace, and place us beyond the recurrence of unmanly panics, of which Englishmen should be ashamed. The Emperor was a man of great sagacity, and possessed experience that had been dearly bought. What was the experience he derived from the Russian War? The lesson he learnt then (his Lordship was betraying no confidence, the opinions of the Emperor being well known) was, that they ought to be able at a given time and a given day to carry the precise amount of forces required to any given point, and he determined that in future France should not be without the means of transporting 50,000 men. He was quite right in determining that the armies of France should be placed in a state to uphold the position of the nation, and he had been enabled to send out 100,000 men in an extraordinary short space of time to commence a gigantic war. Considering the complete condition of the French army and the resources of France, it would be utter imbecility on the part of that Government if they allowed 48 hours to elapse after a declaration of war without taking decisive steps, and he would ask then if those 48 hours would not be spent in confusion here. The rising of the people of England would be like the rising of a flock of sheep; without arms, without discipline, and totally unprepared, they would be but brave men rushing to certain destruction; but when they were properly organised and equipped an invasion would be impossible. (Loud cheers.) The proceedings passed off very successfully.

KENT.

CANTERBURY RIFLE CORPS.—The attesting of the 5th and 6th companies of the Kent Rifle Volunteers took place before the Right Worshipful the Mayor, on Thursday last, in the Corn Market. Unfortunately the day was very wet, and consequently the attendance of visitors was but small. The absence of the ladies was particularly remarked; but we feel sure this was caused not by any want of patriotic spirit, but solely by the steady rain which was falling. The two corps, preceded by the Mounted Rifles' band, marched in very good and soldierly array from the Cathedral yard to the Corn Market. Some of the officers and here and there a private had obtained their uniforms; but they were by no means general. The corps was addressed by Captain Plummer, and by the Mayor. The Rev. H. P. Wright also made a particularly happy speech upon the Christian and defensive character of the Volunteer movement.

ROCHESTER.—This corps numbers 60 effectives, and a band is in course of formation.

SITTINGBOURNE.—This district, including Milton, has commenced the formation of a rifle corps, and the officers have been selected.

TUNBRIDGE WELLS.—A meeting of the volunteers of this district was held on Monday evening at the Town Hall. Sir Walter Stirling was in the chair, and there was a good attendance of volunteers. The corps now numbers 66 effective members, with the prospect of a considerable increase.

CHERITON AND NEWINGTON.—At a public meeting held at the Star Inn, Newington, it was resolved to form a Volunteer Artillery Corps for this district, and 50 members were enrolled.

DURSLEY.—A public meeting was held at the Town-hall yesterday for the purpose of forming a Rifle Corps for Dursley and its vicinity. The meeting was exceedingly well attended. It was stated that nearly 150*l.* had been collected, and 30*l.* as annual subscriptions. At the conclusion of the meeting 63 persons entered their names as volunteers.

DEPTFORD DOCK AND VICTUALLING-YARD.—An numerously attended meeting of officers, artisans, and labourers from the several departments was held at the Dockyard School-room yesterday afternoon. Several workmen who belonged to the former Dockyard Battalion expressed their willingness to join the corps.

A public meeting in aid of the extension of the above corps was held yesterday evening at the Lecture-hall, Deptford. The hall was crowded to excess in every part, and among the audience were upwards of 200 ladies. A detachment of the corps attended in uniform, accompanied by a band. Mr. Thomas Norfolk presided, and among the gentlemen on the platform were Mr. Angerstein, M. P., the Rev. Mr. Granville, Mr. Barker, Mr. Wade, and others. The following resolution—"That this meeting pledges itself to do all in its power to support the corps now in existence for the towns of Greenwich and Deptford, and at present enrolled as the first subdivision of Kent Rifle Volunteers," was passed, and after a vote of thanks to the chairman, the proceedings, which had been throughout of a very noisy and turbulent character, terminated.

LANARKSHIRE.

LESMAHAGOW.—At a numerous and enthusiastic meeting of the Lesmahagow Volunteer Rifle Corps, held in the parish school-room on Saturday last, after the election of the officers, it was announced that 500*l.* had been subscribed, and that the captain, Mr. Brown, of Auchlochan, most handsomely stated he would find and maintain at his own expense a drill sergeant during all the period he had the honour to command the corps.

LANCASHIRE.

THE VOLUNTEER MOVEMENT IN LIVERPOOL. — The various corps formed in this town are prosecuting their drill with great zeal, their interest in the movement being still unabated. It is stated that the Earl of Derby is about to equip his numerous tenantry.

BURNLEY.—An official communication from the Lord-Lieutenant has been received, to the effect that the services of the corps have been accepted by Her Majesty, and that it would rank as the 17th Lancashire. Proceedings are now being taken for the immediate formation of a second company. The funds of the corps now reach near 900*l.*, and about 120 men have been sworn in.

SUFFOLK.

STRADBROKE.—A large and influential meeting was held in the corn-exchange on Monday, for the purpose of raising a rifle corps for the hundred of Hoxne, in conjunction with the hundreds of Hartismere and Thredling. About 50*l.* was subscribed, and 15 effective volunteers enrolled themselves.

WOODBRIDGE.—Lieut.-General Spink has presented 5*l.* 5*s.* to the funds of the East Wilford Company, which now amount to upwards of 420*l.* in donations, and 72*l.* in annual subscriptions.

COMMISSIONS SIGNED BY LORDS LIEUTENANT.

3rd Company of Derbyshire Volunteer Rifles—John Hallewell, Esq., to be Captain; James Ball White, Gent., to be Lieutenant; John Sanders Clarke, Gent., to be Ensign; Charles Booth, Esq., M.D., to be Honorary Surgeon.

2nd Subdivision of Berks Rifle Volunteers—George Charles Cherry, Esq., to be Ensign.

7th Middlesex Rifle Volunteers—John Reynolds, jun., Gent., to be Lieutenant.

6th Company of Essex Rifle Volunteers—Sir Claude William Champion de Crespigny, Bart., to be Captain; John Fitzsimmons Bishop, Esq., to be Lieutenant; Henry Egerton Green, Esq., to be Ensign.

1st Subdivision of Essex Rifle Volunteers—William Garnham Luard, Esq., to be Lieutenant; Charles Wood, Esq., to be Ensign.

1st Subdivision of the Hertfordshire Rifle Volunteers—The Hon. Reginald Algernon Capel to be Lieutenant; Charles Francis Humbert, Gent., to be Ensign.

8th Company of Cheshire Rifle Volunteers—Samuel Pearson, jun., Esq., late Lieutenant in Her Majesty's King's Dragoon Guards, to be Captain; Charles Edward Procter, Gent., to be Lieutenant; George Edward Adshead, Gent., to be Ensign.

2nd Devonshire Rifle Volunteers—Charles Duperrier to be Captain; Walter Damant to be Lieutenant; Mortimer John Collier to be Ensign.

3rd Devonshire Rifle Volunteers—John Beer to be Captain; William Clark to be Lieutenant; William Paul Swain to be Ensign.

3rd Devon Artillery Volunteers—William Cotton to be Second Lieutenant.

8th Aberdeenshire Rifle Volunteers—Hardy Robinson, Esq., to be Captain; Ensign Charles Lyall Grant to be Lieutenant; George Black Bothwell, Esq., to be Ensign, vice Grant, promoted.

1st Pembrokeshire Artillery Volunteers—John Maule Sutton, Esq., to be Captain; John Gwynne, Gent., to be First Lieutenant; Andrew Stevens Reed, Gent., to be Second Lieutenant.

7th Company of Surrey Rifle Volunteers—William Reade Brenden, Gent., to be Lieutenant; James Vogan, jun., Gent., to be Ensign.

South London Rifle Volunteer Corps—Alexander James Scrutton, Esq., to be Ensign.

2nd Company of Cinque Ports Rifle Volunteers—William Alexander Mackinnon, Esq., M.P., to be Captain; Edwin Dawes Saunders, Esq., to be Lieutenant; Francis Bellingham, Esq., to be Ensign; Robert Coke Nash Davies, Esq., to be Honorary Surgeon.

1st Company of Cinque Ports Artillery Volunteers—Edward Luard Wollaston, Esq., to be Captain; Edward Ferrand Astley, Esq., to be First Lieutenant; Percy Simpson Court, Esq, to be Second Lieutenant.

COMMISSIONS SIGNED BY LORDS LIEUTENANT.

Cambridge University Rifle Volunteers—James Baker, Esq. (late 8th Hussars), to be Major; Octavius Sturges, Esq. (late Bombay Artillery), to be Captain; Duncan Barroch, Esq., B.A., to be Lieutenant; Alfred Edward Northey, Esq., to be Ensign; Jan. 10. Robert Burn, Esq., M.A., to be Captain; Richard Digby Cleasby, Esq., to be Lieutenant; Henry Evelyn Oakley, Esq., B.A. to be Ensign; Jan. 11.

1st City of Edinburgh Artillery Volunteers—Thomas Bell, Esq., to be Captain; Archibald Campbell. Esq., to be First Lieutenant; John Morehead M'Farlan, Esq., to be Second Lieutenant; Jan. 10.

Lanarkshire Artillery Volunteers—1st Company—John Brooks Wright, Esq., to be Captain; Matthew Bulloch, Gent., to be First Lieutenant; Adam Cunningham Scott, Gent., to be Second Lieutenant; Jan. 5.

Lanarkshire Rifle Volunteers—30th Company—Alexander Crum Ewing, Esq., to be Captain; Dugald Macfie, Gent., to be Lieutenant; Allen McNaughton, Gent., to be Ensign. 31st Company—James McIntosh, Esq., to be Captain; William Eglin, Gent., to be Lieutenant; James McGregor, Gent., to be Ensign. 34th Company—John Clark Crawford, Esq., to be Captain; Thomas Russell, Gent., to Lieutenant; John McFarlane Wilson, Gent., to be Ensign. 35th Company—John Kerr Clark, Esq., to be Captain; James Thomas Henderson, Gent., to be Lieutenant; John Russell, jun., Gent., to be Ensign. 36th Company—John Warren Law, Esq., to be Captain; John Young, Gent., to be Lieutenant; Alexander Cunningham Shirreff, Gent., to be Ensign. 40th Company—William Rigby, Esq., to be Captain; Joseph Wellington Whitehall, Gent., to be Lieutenant; John Parry, Gent., to be Ensign; Jan. 7.

5th Company of Staffordshire Rifle Volunteers—Frederick Walton, Esq., to be Lieutenant; Henry Underhill, Esq., to be Ensign; Jan. 4. 9th Company of Staffordshire Rifle Volunteers—William Adams, the younger, Esq., to be Captain; John Nash Peake, Esq., to be Lieutenant; William Simms Bull, Esq., to be Ensign; Jan. 4.

6th Division of Lancashire Rifle Volunteers—Joseph Peel, Esq., to be Captain; Marcus Brown-Westhead, Esq., to be Captain; William Romaine Callender, the younger, Esq., to be Captain; Frederick Charles Ede, Gent., to be Lieutenant; Walter Bousfield Westhead, Gent., to be Lieutenant; Edward Overall Bleackley, Gent., to be Lieutenant; Robert Porter Hickson, Gent., to be Ensign; Isaac Cleave, Gent., to be Ensign; Peter Mawdsley, Gent., to be Ensign; Dec. 20.

5th Division of Lancashire Artillery Volunteers—Robert Raynsford Jackson, Esq., to be Captain; William Coddington, Gent., to be First Lieutenant; George Whewell, Gent., to be Second Lieutenant; Jan. 9. 3rd Division—William Evans, Gent., to be Second Lieutenant; Dec. 5.

7th Company of Surrey Rifle Volunteers—William Tiffin Iliff, jun., M.D., to be Honorary Surgeon; Jan. 9.

4th Company of Surrey Rifle Volunteers—Edward Hooper Galton, Gent., to be Honorary Surgeon; Jan. 9.

Kent Artillery Volunteers, 4th Company—Lazarus Simon Magnus to be Captain; Jan. 9.

Kent Rifle Volunteers, 9th Company—Maudestly Gaussen Best, Esq., to be Captain; William Stevens, Esq., to be Ensign; Dec. 31.

East York Rifle Volunteers, 4th Company—Charles Morgan Norwood, Esq. to be Captain; John Joseph Thorney, Esq., to be Lieutenant: George Hall Ringrose, Esq., to be Ensign; Jan. 5.

1st Gloucestershire Artillery Volunteers—John Battersby Harford, Esq., to be Captain; Jan. 7. William Montague Baillie, Esq., to be Captain; Jan. 9. Henry Grant, Esq. (late 74th Regt.), to be Captain; Jan. 10. Francis Philip Egerton, Esq. (Commander Royal Navy), to be Captain; Jan. 11. Francis Tothill, Gent., to be First Lieutenant; Sholto Vere Hare, Gent., to be First Lieutenant; Francis Walter Savage, Gent., to be First Lieutenant; Charles Daniel Cave, Gent., to be First Lieutenant; Henry Lucas Bean, Gent. (late North Somerset Yeomanry), to be Second Lieutenant; George Garrard, Gent., to be Second Lieutenant; Edward Gore Langton, Gent., to be Second Lieutenant; Henry St. Vincent Ames, Gent., to be Second Lieutenant! Anthony Graves Power, Esq., M.D. (late Staff Assistant Surgeon), to be Surgeon; Jan. 10.

18th Middlesex Rifle Volunteers—John Charles Templer, Esq., to be Captain; Dec. 30.

21st Middlesex Rifle Volunteers—Francis Alfred Hawker, Esq., to be Captain; Charles Vine, Gent., to be Lieutenant; James Duncan Campbell, Gent., to be Ensign; Jan. 2.

MEMORANDUM.—5th or Royal Elthorne Light Infantry Regiment of Middlesex Militia.—The Queen has been graciously pleased to accept the resignation of the Commission held in this Regiment by Lieutenant William Robinson Truman. Resignation accepted Jan. 4.

Glamorganshire Rifle Volunteers, 7th Company—Arthur Pendarves Vivian, Esq., to be Captain; John Richards Homfray, Esq., to be Lieutenant; Jan. 3.

(Errata in the London Gazette, Jan. 6.)

2d Company of the Monmouthshire Volunteer Rifle Corps, called the 1st Pontypool—Richard "Beam" Roden should be Richard "Brown" Roden; "William" Bailey "Hankins" should be "Richard" Bailey "Hawkins."

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times*.)

The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance; and the postage—uniformly 1d. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street (North), Strand, London, W.C.
[Late "Household Words" Office.]

MR. ALBERT SMITH with his CHINA REPAIRED and MONT BLANC REVISITED, 1859. Every Night (but Saturday) at 8, and TUESDAY and SATURDAY Afternoons at 3 o'clock. Stalls 3s., which can be taken at the Box Office, Egyptian Hall, daily, from 11 till 5; Area 2s., Gallery 1s.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21s. ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

NOTICES TO CORRESPONDENTS.

A "CAPTAIN R.N., ON FULL-PAY and C. B.," is informed that the question he raised in his letter was fully considered, and the inversion which he would have approved of was rejected because it would have been contrary to universal custom. Is he a Member of "the Army and Navy Club?"

"HYTHE" is informed that in service in the field the officer to whom he refers takes his regimental rank and position with his battalion.

THE EDITOR returns his thanks to the officers of Volunteers who have been kind enough to furnish him with information respecting their corps. Any notices of enrolments, augmentations, and effective states and proceedings, sent to the ARMY AND NAVY GAZETTE, &c., Office, on Thursdays, shall appear in the next publication.

THE EDITOR is obliged very unwillingly to postpone Reviews of Books and Pamphlets till next week. He takes this opportunity of stating, that treatises on naval and military subjects will naturally have precedence of works of less special interest: but that the ARMY AND NAVY GAZETTE, &c., will contain notices of books and pamphlets on topics of importance; and that in Biography, Travel, Natural Philosophy, and History, the reviews will be full.

THE EDITOR admits into the columns of the ARMY AND NAVY GAZETTE, &c., the expression of all opinions in reference to the organisation and administration of Army, Navy, Volunteers, and to the matters indicated in the prospectus, provided they are properly conveyed; but he does not necessarily identify his own sentiments with those of his Correspondents.

Army & Navy Gazette.

LONDON, SATURDAY, JANUARY 14, 1860.

We trust there are no military men so short-sighted as to seek to exempt military affairs and military patronage from the influence of that great public opinion which governs the country to the extent even of controlling the decrees of Parliament. The Queen is undoubtedly the head of the Army, and may dispose of its patronage according to her Royal Pleasure. But if this were to be maintained in practice as well as in theory, we might some day find ourselves arriving at the very dangerous and illegal doctrine that the Queen *can* do wrong. They are very injudicious friends of the Army who say that the public have no right to watch and criticise the manner in which its affairs are administered, and who would seek to establish for the Commander-in-Chief an immunity from public censure which is given to no other great Officer of State. The patronage of the Horse Guards has been very much diminished of late, and the most important gifts at the disposal of the Duke of Cambridge are the Colonelcies of regiments. One or two recent appointments of this kind—the respective nominations of Lord Cardigan and General Ashburnham to the 5th Dragoon Guards and 82nd Regiment—have given rise to public comment of a very decided character, and we think the occasion is one on which we may usefully consider the whole question of the manner in which this practice has been exercised of late years.

We regard the Colonelcy of a regiment as a First-Class good-service pension, which should be given to the general officer who best deserves it by his services in the field. It requires the performance of no duties, involves no responsibility, and is a simple reward for good service and gallant conduct. By the manner in which the Commanders-in-Chief have of late years awarded it, it would appear to have been sometimes regarded in this light and sometimes as a routine promotion which every officer might attain on his approaching by seniority the head of the Major-Generals' list. Lord Hardinge generally adopted the latter view, and when a regiment became vacant in his time, it was easy to predict that the senior officer would have it. When the Duke of Cambridge took the chief command, he seems to have resolved to pursue a different policy—one of the first regiments he had to recommend an officer for, was the 2nd Royals, and instead of naming the next senior officer, he went far down the list and selected Sir James Schoedde, a gallant old officer with fourteen Peninsular clasps. Again, a few months ago when Sir Hugh Rose completed his Central Indian Campaign, his position, some thirty or forty down the list, was not allowed to interfere with his richly earned appointment to the Colonelcy of the 45th Regiment. But we are sorry to think that His Royal Highness does not always seem to act in accordance with the boldness and strong sense of justice which animated such departures from routine, and that unfortunately not unfrequently, seniority and not service is the title to promotion. When we speak of seniority we use a word, which if unexplained, is likely to mislead. Seniority on the Generals' list is not actual seniority in the service. It depends altogether on the rapidity with which an officer has achieved his promotion to the rank of Lieutenant-Colonel. Those who acquire that rank rapidly, of course become senior as Generals to those who reach it slowly; and thus we find that Lord Cardigan — a remarkable instance of quick regimental promotion—is junior by twenty-two years to Sir Michael Creagh, the officer next below him on the list. What is called seniority on the general's list is therefore a delusion, and certainly ought not to be regarded as a claim for the first class of good-service pensions. Nevertheless, we are sorry to see that the present acting head of the army has not the boldness to disregard it as a rule. Of the two officers whose appointments were lately visited with public condemnation, we have no desire to speak in offensive terms. Of Lord Cardigan and the painful 25th of October, 1854—of General Ashburnham and his debateable conduct both on the Sutlej and in "turning up" in England, when he was despatched on active service, we do not mean to say more than that clearly the services of neither the one nor the other entitled them to such substantial reward. If, indeed, the Generals' list no longer comprised officers who had fought and bled profusely wherever British arms triumphed during this century, there would have been some excuse; but when we find many officers of this class unrewarded, we feel that the Duke of Cambridge requires every support which the public can give him in doing what is right and just—always, not occasionally. Let us take the dry and simple record which Hart supplies of two Generals whose claims have been postponed to those of their far less distinguished or altogether undistinguished seniors on the list—the first is a cavalry, the second an infantry officer. Here is the record of their services:—

"Major-General Maclean served with the 13th Light Dragoons in every action and affair in which it was engaged in the Peninsula from Dec. 1810, until wounded and taken prisoner at Couches, 13th March, 1814, was present with his regiment during the Waterloo campaigns; engaged in the command of the Rear-guard for the Brigade on the 17th of June, and throughout the action on the 18th. Accompanied the 13th Dragoons to India, in February, 1819; was employed in command of a cavalry Brigade with the field force at the capture of Kurnool, and served uninterruptedly with his regiment for 22 years, when he returned with it to England, and was placed on half-pay as second lieut.-colonel. He has received the war medal with six clasps for Albuera, Vittoria, Pyrenees, Nivelle, Nive, and Orthes."

Lord Cardigan's services at Balaklava, and his "temerity" (he is fourteen years junior to General Maclean), were considered as constituting a claim superior to this when the colonelcy of the 5th Dragoon Guards was to be disposed of. Let us now look into the services of an Infantry officer.

"Major General John Cox, with the exception of a few months, served throughout the whole of the Peninsular war with the 95th (Rifle Brigade), commencing with the first affair, at Obidos, 15th August, 1808. He was also engaged in the following battles, sieges, actions and affairs: Battles of Roleia and Vimeira, and surrender of Lisbon; subsequent campaign in Spain with Sir John Moore's army, including its retreat, outpost affairs at Talavera, night-defence of the post of Barba del Puerco against very superior numbers; affairs of Gallegos and Barquilla; action at Almeida, and defence at the bridge against every effort to force it; affairs Mora at Morta and Jula; battle of Busaco; affairs at Alenquez, Anida, and Santarem; defence of the Lines of Torres Vedras; actions with Marshal Massena's rear guard at Pombal, Redenha, Condeixha, Caza Nova, Foz d'Aronca, Ponte de Marcella, Freixadas, and Sadbugd at Almaida five successive days; at Manalva bridge; battles of the 3rd and 5th of May at Fuentes d'Onor; affairs at Nares d'Aver and Forcaylos; siege and storming of Ciudad Rodrigo; action at San Milan; battle of Vittoria; actions with the French rear-guard at Echamanos, Pampeluna, and forcing the heights of Santa Barbara, and Pass of Echalar; at Vera, and carrying the entrenchments in its pass; battles of the Pyrenees; several affairs at outposts; battles of Nivelle and Nive; action at Tarbea; victory of the 18th June at Waterloo, and capture of Paris. He was wounded at Vimeira by a musket ball; received a contusion in the head at Redenha; compound fracture of the left arm at the storming of Ciudad Rodrigo, while clearing the left breach, and left leg badly fractured (ball lodged) in driving the enemy from the heights of Tarbes. Joined the army in Belgium, under the Prince of Orange, in the autumn of 1814, served the Waterloo campaigns in that country, and with the Army of Occupation in France until its embarcation for England in 1818. He has received the war medal with ten clasps."

Major-General Cox has yet to obtain the reward of his services, while not only General Ashburnham, who, the unerring Hart records, "commanded a brigade of the army of the Sutlej at the battles of Ferozeshah and Sobraon, for which he has received a medal and one clasp," but Generals Arbuthnot, Beresford, and Home, about whom Hart is silent, inasmuch as they never saw a hostile force, have been all deemed worthy of colonelcies. General Home indeed was passed over very often, and he is by some supposed to have a kind of negative claim from some injustice done him by the nomination of a junior officer, which deprived him of the command in Canada. This was sufficient, perhaps, to entitle him to another command, but not to a piece of patronage which excluded officers like General John Cox from that which they have richly earned. We are well aware that in these matters great pressure is brought to bear upon the Commander-in-Chief which sometimes succeeds in influencing his better judgment and his well-known sense of justice. If he were to disregard these considerations and boldly do what he knows to be right, —as he began and maintained his rule at the Horse Guards by doing—he would have the warm support of the public, and of those who, like ourselves, are advocates of the true interests of the Army.

It would be the most serious charge that could be preferred against a free press, if it could be maintained that its influence on the public services were detrimental to discipline and to order on land or sea. But there is no doubt the charge, if not frequently made directly, is often insinuated by officers, especially of the navy, though the arguments preferred in support of it are rarely of any weight. We are bound however to give them every consideration, and to examine their statements dispassionately. It would be—to us at least—matter of profound regret, if we thought that the disgraceful riot at Aldershott, or the scandalous scenes on board the *Princess Royal*, could be, in the most remote degree, traced to any influence of the press, exercised even in the best spirit or the most legitimate way. But we wash our hands, and give ourselves absolution. The fact is, officers have *now* got a ready and handy—above all an indefinite excuse—for occurrences of that kind, in attributing to "the newspapers" what is really due to very different agencies. If mutinies and riots were new—things strange in our armies and fleets; if the national safety had not been menaced more than once by our own sailors; if we had now heard, for the first time, of military outrage, we should be alarmed at every word we wrote, and come to the conclusion that it would be as well that soldiers and sailors should not be taught—or even permitted—to read and write. But any officer who has the least knowledge of the history of his profession must admit, not only that mutiny and riot have been accidental occurrences in army and navy long before the day when a great mutiny necessitated the passing of an Act to enable the authorities to deal with mutiny, and before the Articles of War were framed to punish offences already existing, and formidably prominent—he must perforce grant too, that when mutinies and riots were most serious, the Press scarcely existed at all, that it certainly had no influence in the army and navy, and that if it had been then as flourishing as it is at present, soldiers and sailors were not in those days exactly the men to be our "constant readers." It would appear, then, that such evils in the services have diminished inmagnitude and frequency; and we venture to assert with confidence, that if the Admiralty and War Office, and Horse Guards, were to search their records, they would find that in the days of hard flogging and no newspapers, violence and insubordination were far more frequent than they are at present. And, indeed, what respectable journal holds out inducements for the soldiers or sailors in Her Majesty's service to disregard their oaths and their obligations, and to despise discipline and the rules of the service? The acts of superiors may be sometimes discussed with asperity, but the highest personages and officers are subject to the same censure. Who would pretend to find excuses for the insolence or rudeness of a Post Office clerk to Mr. Rowland Hill, or impudence of a messenger in Downing Street to Lord John Russell, on the ground that the conduct of their chiefs had been unfavourably commented upon in the public press? Soldiers and sailors, it may be said, are different creatures, and are more open to such influences—they ought to be taught to look upon their superiors as impeccable. But is it possible to go back a hundred years and to maintain such a position in the face of Military Schools, Naval Instructors, the spread of education in the services, and the establishment of open libraries? Can there be an instance satisfactorily proved of any crime having been committed at

Digitized by Google

the instigation of a newspaper? It is true that the question of flogging has been warmly, and sometimes intemperately, discussed, but it has been argued with heat by its friends as well as its opponents. Is there any one who will maintain soldier or sailor ever committed an offence for which he would necessarily be flogged in order to give a crucial proof that he disapproved of flogging? Besides, it is not so much in the Press, as in Parliament, that the consideration of this most painful subject is urged, and after all, the opponents of the use of the lash do not so much rely on the effects flogging produces on those subject to its influence as the serious injury it inflicts on the services in keeping out men who cannot be flogged as long as they stay out. The whole question of the influence of the Press on the services is to large to be discussed in one short article. We shall gladly hear both sides upon it, and say our say at the close, animated, as we are, solely by the desire to promote by every means in our power the interests and welfare of the Navy and Army, on which the peace and prosperity of the Empire depend.

It was announced on good authority, some weeks since, that the Government was about to take some decided step respecting Cavalry commissions, with a view of terminating the present very unsatisfactory state of things, and inducing young gentlemen to accept the sixty or seventy cornetcies now, and likely for some time to remain, vacant. The Secretary of State for War proposed that for the future all Cavalry commissions should be purchased at Infantry prices; that steps should be taken for preventing large extra sums being paid for promotion; that stoppages for forage should be abolished; and that each Cornet, on joining, should be furnished with two chargers for regimental purposes from the re-mount horses. We believe the views with which these reforms were urged were not only sound in themselves, but were put forward with a clearness and ability that should have convinced even so rigid and unimpressionable a tribunal as the Treasury. We feel no doubt that Mr. Sidney Herbert, with his intimate knowledge of the working of every branch of our military system, must have pointed out the scarcity of Cavalry subalterns as a great moral blot, and a serious practical inconvenience; and he scarcely could have omitted to suggest that, as young men of wealth no longer sought for Cavalry commissions, it was desirable that the system should be so altered that young men who were not wealthy might be induced to enter the Cavalry as they do the Infantry, in sufficient numbers to fill the commissioned ranks. However, notwithstanding the force of these suggestions, the question is for the present practically shelved by the Treasury. That body considers any abolition of stoppages for forage, any diminution of the regulated price of promotion, any gift of chargers,—in fact, any additional attraction offered, would only have the effect of increasing the amount paid beyond regulation for promotions; and it absolutely refuses to impose an additional expense upon the public, until some arrangement is made by which extra payments should be abolished, or at least reduced to exceptional cases. The Commander-in-Chief is asked why he cannot cause promotions by purchase to take place at regulated prices, under the present as well as the projected system, and he is reminded by the financial members of the Ministry that, if officers pay large sums now, they will very probably continue to pay similar sums for a better article, no matter what may be the price fixed as "Regulation." If a Cavalry troop be worth 5000*l.* or 6000*l.* at present, and if people pay so much for it, they argue that it will not be very easy by any arbitrary alteration to bring it down in the market much below that figure.

While we regret thisresult, which will in all probability leave our Cavalry regiments unofficered in the junior ranks, we must at the same time admit there is some truth in the suggestions of the Treasury. But when the Treasury argues from the fact that the Duke of Cambridge does not stop the payment of extra money now, we think it takes somewhat unfair ground. The payment of extra money is decidedly illegal; but the Duke of Cambridge, Sir Charles Yorke, Mr. Sidney Herbert, Lord Grey—all army administrators, in fact, are well aware that the rule is to violate the law, and the exception is to respect it. So much has this illicit practice become an institution, that Lord Grey stated before the Royal Commission on Purchase, that, if the system were done away with, compensation to existing officers ought to be made, not only for the regulation sums paid by them, but that their interests should be equitably considered as regards the extra amount customary in their respective regiments. If we are not mistaken, it was the intention of the War-Office in carrying out the projected changes in the Cavalry, to introduce a similar principle in compensating officers now holding commissions; and, however much it may jar against a legal mind to hear of the authorities conniving at the violation of an Act of Parliament, the arrangement appears to us to be fair and equitable. You cannot undo the past; the custom sprung there into existence; you should not punish the present generation of officers for a fault in which they have merely the example of several generations before them. The Duke of Cambridge may therefore fairly consider that, inasmuch as nearly all the present officers of Cavalry have transgressed, almost with the connivance of the authorities, it is hardly fair to make them the scapegoats, because they happen to be in the army at a time when the system has, to a certain extent, come to a dead-lock. But, assuming that compensation was made to the present officers, and that there was an end to any vested interest in the shape of extra money, the Commander-in-Chief might, we think, very honestly undertake to abolish large extra payments as a rule. An officer is scarcely likely to purchase promotion at a price much beyond that which he may expect to receive when he disposes of his commission; and the ground once cleared, an occasional promotion from another regiment of the same class might be made, so as to import an amount of uncertainty into the matter sufficient to discourage any large investment beyond the legitimate price. So far from being a disadvantage, this might be done, now and then, with great advantage to regiments and in strict justice to deserving officers. The present conventional rate of purchase in the Cavalry is really very absurd. A lieutenant-colonel of Cavalry gives from 12,000*l.* to 13,000*l.*, and a captain, 5000*l.*, or perhaps a little more, whereas, in the most favoured corps in the service the same ranks are attainable, with much less work, for something under two-thirds of the above sums. We presume such prices will not be given for the future, for the simple reason, that the class of officers now being coaxed into the Cavalry, when their turn comes to purchase, will not be found prepared to imitate their more wealthy predecessors. Any officer paying a high price for promotion now, does so with his eyes open, and on selling out, will very probably find occasion to regret his investment.

Undoubtedly, among the causes of the dearth of Cavalry officers may be included the examination which has to be gone through, and the expensive tone of Cavalry regiments at home. Both of these causes we should like to see more earnestly considered by the authorities, and by commanding officers. We cannot help regretting, meantime, that Mr. Sidney Herbert's promising suggestion has fallen to the ground. Before very long something similar to it must be adopted. The position of Cavalry officers must be improved, and the calls upon their purses diminished greatly, or in two or three years we shall have no Cavalry officers at all.

It is not merely the unsettled condition of European politics which induces us to congratulate Mr. Sidney Herbert on the steps which he has taken to carry the Act of 1859 into effect; we want an Army of Reserve, not as an active army—but as the materials of one. We desire to be able to lay our hands on 20,000 trained men in a moment of danger. With an adequate Fleet, a Reserve of ships and sailors, an efficient Army, a properly organised Militia, disembodied, but trained and susceptible of rapid collection and concentration, a generous and enthusiastic, above all, a numerous Volunteer Army, and an Army of Reserve consisting of trained soldiers, we really think that England can regard the future with calm and dignity; that she can turn her eye indoors satisfied that no storm can unroof the house or break the doors, and see to her domestic affairs in peace and security, abhorring little wars abroad, and anxious for nothing so much as the extension of good-will and commerce all over the world, and among the nations, her neighbours and kinsmen far and near. We never had a Reserve before. We have not got it yet; but it is probable that the nucleus will present itself to us in the rather expensive but very excellent article of the discharged soldiers of the late Anglo-Indian army. The recruiting-sergeant, however, is bidding against Mr. Secretary Herbert, and hundreds of the soldiers who have landed here and in Ireland are already in the Artillery, Military Train, and other corps, their money exhausted and their moody moment gone by. However, these men would never have formed any very large proportion of the new force, inasmuch as the Reserve is to consist of men who have served 10 years in infantry and 12 in cavalry; but it is to be hoped that there are plenty of soldiers in retreat who have served the prescribed time, and are not yet so averse to limited and contingent duty in their old character, but that they will embrace the offer which has been made to them. We can scarcely doubt the materials exist in abundance; that they will be available, we sincerely trust; and the Press will do good service, for which no doubt the Government will feel due gratitude, if it exerts itself to make known the exact duties, obligations, and advantages of the new Army Reserve.

The soldier who enrols himself in the Reserve is liable to be called out in peace-time once a month, 12 days in the year, for inspection and exercise, for which service he receives six shillings and eightpence a-day. He must have a certain fixed place of abode within 30 miles of the place of his registration. Each year of his service in the Reserve will advance him towards the attainment of his pension; for it has been considered expedient to provide that soldiers who left the Army on the expiration of the term of their first enlistment, namely, after 10 years for the foot and 12 for horse, shall, on joining the Reserve, be permitted to take up their time, and to count for each two years of service in the Reserve one year towards the completion of the periods of 21 and 24 years' service which would have entitled them to pension in the ordinary course of service in infantry and cavalry. The Reserve must go wherever it is ordered, when called out by the Queen. There seems to be some uncertainty in reference to the circumstances under which it is contemplated to demand its services, but enough has been done to show the desire of Mr. Sidney Herbert to carry out the Act of Parliament, to provide an efficient Army of Reserve at a very small cost; and, in common with those who like peace and quietness, we wish the scheme every success and permanent existence.

His Royal Highness the General Commanding-in-Chief, will hold a levee at the Horse Guards at One on Monday, the 23rd instant.

Rear-Admiral Sir Alexander Milne was yesterday appointed commander-in-chief of the North American and West Indian Station, in the room of sir Houston Stewart, whose period of service has expired.

It is rumoured that Major-General Windham will shortly succeed Major-General Sir Sidney Cotton, K.C.B., in command of the Division on the Affghan frontier.

The promotion of Lieut-Colonel J. Talbot Airey C.B., of the Coldstream Guards, to the rank of Colonel over the heads of eleven Lieut.-Colonels of the Guards has given rise to much remark, and very erroneous impressions. It is in strict accordance with the recommendations of the Royal Commission of 1858, on promotion in the higher ranks of the army. One of these recommendations was, that no officer should acquire the rank of full Colonel save those who should pass five years in certain qualifying positions as Lieutenant-Colonels, but that existing rights should be so far respected, that those who held commissions as field officers before the 20th of June, 1854, should rise by the regulations then in force. Colonel Airey is a Major of 1851, and the eleven officers before him on the Lieutenant-Colonels' list were only Captains before the 20th of June, 1854, and have not since completed the required qualifying service. He, therefore, goes over their heads.

It is rumoured that Major-General Sir James Scarlett, now commanding at Portsmouth, will succeed General Knollys in the command of the Division at Aldershott. We believe the rumour is somewhat premature, although not improbably it may be eventually justified by the fact. General Knollys has now held the command at Aldershott since the institution of the camp, and we trust that in future the changes in the commands may be more frequent. Aldershott was intended as a school of instruction, not merely for soldiers, but for generals; and if every general is left there for five years, we shall not have very many who have qualified by the lesson.

The Indian papers state that Major-General Sir John Inglis will be moved to the Bangalore command, in the room of Major-General Beresford, now on his way home. Should an arrangement to this effect have been made in India, Major-General Spencer would go to Bengal, instead of Madras, as was originally intended. We regret, however, to hear that Sir John Inglis's health is not good, and that his return home is not improbable.

We read in an Indian paper: "It is stated that thirty colonels of the Bengal Army are to be absorbed, which it is calculated will delay promotion for about four years." We believe there is no foundation for the statement.

We believe that Lord Cardigan will before long resign the office of Inspector-General of Cavalry, and rumour—only rumour, however—states that Major-General Lawrenson will succeed to that post, Lord George Paget obtaining the Cavalry Brigade at Aldershott.

PLAN OF ORGANISATION FOR A VOLUNTEER RIFLE COMPANY OF 100 EFFECTIVES,

IN THE CASE OF ONE DRILL-INSTRUCTOR ONLY BEING AVAILABLE.

1. Let the commanding officer select the 10 smartest and most intelligent men in the company as candidates for the ranks of sergeant and corporal. It is necessary that they should be men who, from their character, are likely to command the respect of the other volunteers; and there are two requisites which it is indispensable that they should possess; viz., a patient temper and a quick eye.

2. These 10 picked volunteers, who may be called candidates, should then be formed into a squad under the drill-instructor, and carefully taught all the lessons prescribed in the "Drill, &c., for Volunteer Rifle Corps," of which they should each have a copy.

3. After they are perfect in these lessons, each candidate in succession should be called upon to drill the remainder of the squad.

4. The instructor, in superintending, must pay particular attention that in communicating drill the candidates not only repeat the explanations correctly, but also see that each motion is properly performed, *and that no mistake, however trifling, is passed over without correction.*

5. By this time the instructor will be able to judge whether any of the candidates do not possess the necessary qualification for becoming drill-instructors; in which case, other volunteers can be selected to replace those candidates who may be found to be incompetent.

6. As soon as the candidates have been reported by the instructor as able to communicate drill, the remaining 90 volunteers can be assembled, and broken up into 10 squads of 9 each, each squad to be handed over to a candidate, who will become its instructor.

7. The sergeant-instructor will superinted the instruction of the whole of the squads; he will report to the commanding-officer when the squads have been instructed.

8. The commanding officer can then inspect each squad, and make his selection of the candidates depend upon their success in drilling their squads. In this way emulation will be excited among the candidates, to whom it should be explained beforehand that the appointments will be made according to merit, and that proficiency in drilling will be taken as the test of qualification for promotion.

9. The 10 candidates can then be appointed as follows:—1 colour-sergeant, 4 sergeants, and 5 corporals.

10. The drill of the candidates can be carried on in any large room in the evenings; and it will be sufficient if they meet for this purpose for an hour and a-half, or two hours, every evening till they master the drill.

11. In the same way, the drill of the volunteers, when formed into squads, can be carried on in the evening. Any moderately sized room will suffice for the drill of a squad, and if a sufficient number of rooms can be obtained, a company may be drilled in any weather, and without interfering with the ordinary occupations of the volunteers.

12. The musketry instruction can be taught in the same way, by getting a properly-qualified instructor (if possible, one who has passed at Hythe) in the first instance to drill the sergeants and corporals. All the sergeants and corporals should be provided with copies of the "Regulations for Instruction in Musketry."

13. After all the volunteers have been drilled, it would contribute very greatly towards keeping up the efficiency of the company if the sergeants and corporals would meet together once a week, or once a fortnight, in the evening, for the purpose of practising communicating drill. To provide against casualties, four or five other volunteers might be selected and taught to communicate drill by the sergeants and corporals; and, if found competent, they might be appointed lance-corporals.

14. By adopting this plan a volunteer company would be in a much more healthy state as regards organisation than if it had been drilled entirely by sergeants from the Line or Militia, as it would possess within itself the requisite machinery for drilling.

VOLUNTEER CAVALRY

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As I have no doubt that your appeal to the Services will meet with the response it deserves, and that your columns will be resorted to for the discussion of professional matters, I take the liberty of seeking, with your assistance, advice which I am confident you will assist me in obtaining.

I have had very conflicting replies to my inquiries as to what arms were best adapted to corps of mounted Volunteers. Perhaps some of your readers may enable me to arrive at a conclusion. I assume that it would be hopeless for them, with any amount of practice for which they have time, ever to think of competing with, or facing, regular cavalry. But I suppose they might well qualify themselves for outpost and escort duty, to harass foraging and other parties of the enemy, to interrupt their communications, and for other duties of that nature. If I am right in this opinion, I should be glad to have the advice of experienced military men as to the best arms for this description of service.

I am aware that the Government consider that mounted Volunteers should look upon themselves only as Infantry on horseback. But would not that be to disregard one of the peculiar capabilities of the country. England is famous throughout Europe for its horses and its horsemen. Could we not do something better with them than merely making them rather long-legged Infantry? But if we act on the Government principle, and devote their attention chiefly to rifle-shooting, I suppose they must have some weapon besides the rifle. I assume that a mounted corps cannot carry a fire-arm much longer than a cavalry carbine—with which a sword-bayonet of the regulation size would of course be useless. But would military men consider the long sword-bayonet of the "Cent Gardes" a useful weapon? A Light Dragoon sword would be useful on horseback or on foot to a man who had learnt to use it; but would Volunteers be likely to become efficient swordsmen with the practice they are likely to have? And would not a sword of that length, however worn, be found very inconvenient when skirmishing on foot?

I have been advised by a person I believe very competent, to use a revolver instead of a sword. But this, with the carbine, would lead to the disadvantage of each man requiring two kinds of ammunition; one of which would not to be supplied by Government; and of having no arm at all when his ammunition is expended. Perhaps a good sword and a revolver would be the best arms, devoting as much time as possible to sword exercise, instead of rifle practice. We must not forget to consult the prejudices and the inclinations of Volunteers; and I find among the former, the opinion that a man does not look like a soldier without a sword; and among the latter the desire to wear the sword that they or their fathers have worn in former mounted corps.

There is another point to be considered. All the men in this neighbourhood (and, I suppose, in others,) who would join a mounted force, can ride as well as any dragoon; and many of them own horses of 100*l.* or 200*l.* value. Is not this an additional reason against treating them merely as mounted Rifles? But, whether as mounted Rifles or as Light Irregular Horse, what would be the best pattern of sword to use?

If, by your publication of these questions, you should elicit the opinions of competent authorities in reply to them, you will not only be doing a service to the country in assisting the Volunteer movement, but you will confer a favour on

Your obedient servant, M.

Jan. 12th, 1860.

PEACE THEORIES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Nothing was more common, a short time since, when travelling over a new line of railway, than to be accosted by your fellow-passenger with the inquiry—"What would our grandfathers think if they could come back and see how this country is changed?"

But may we not ask what would some of our old "red coats" and "blue jackets" say, could they hear the opinions which some of their countrymen expressed a few years since on naval and military matters?

The soldier was looked upon like a drone in the hive. His cost was counted, and his labour shown to be unproductive. He was kept for ornament, and not for use. Facts, figures, and theories, all proved it. "Let the defensive force of England be represented by any given number, say 14, and that of France by 12, then let them both be respectively reduced to 7 and 6, and the result relatively will be the same. Why not cut down our army and navy to the lowest point—say 1834? Other nations are waiting to do likewise: the difference saved will be profit gained. But why resort to physical force at all? Why not appeal to moral suasion at once? Let a Board of Arbitrators settle our national differences over 'a feast of reason and a flow of soul.' The world is one great country, and all mankind are brethren, and if England will only do unto other nations as England would have other nations do unto her, there can be no doubt whatever that other nations will be delighted to do unto England in the same manner, and we shall then have no more wars, our swords may be broken up and beaten into plough-shares," &c.

These subtleties were no doubt the conscientious convictions of their utterers, they were fully believed in, and were addressed not to soldiers and sailors, but to the peaceful, enlightened, and religious people of England.

Now, I have great respect for, and much catholic charity towards the religious convictions of any man, or of any set of men in England, especially when those convictions are based upon an intelligent search amongst, and a profound reverence for the records of Christian truth. "Not one jot or one tittle" of that truth I verily believe will pass away till all be fulfilled. But there are few minds not given to much contemplation that understand the relations of theology, philosophy, and history, or can tell the whereabouts of political economy in that circle. It is very certain that the great mass of well-intentioned and tolerably educated people never think of such things. They can see the horrors of war in their mental eye, and feel its cost in their pockets, and according to the associations by which they are surrounded they receive their opinions and pass them away again, merely because they are current, without stopping to ascertain their value. Those who do give themselves that trouble cannot fail to discern the fallacy of importing theological *abstractions* into political economy. Let me be fully understood. We hear a great deal about "ideas" in these days, but very few people have any clear conception of what is meant by "abstractions." The simplest illustration I have met with is to suppose the white colour, as it exists in this paper, in our shirt collars, and in the ceiling over our heads to be drawn off from the objects with which it is associated, and contemplated as "whiteness," and we have an idea of abstraction. In that ideal state we can easily picture it to our imaginations to be very much whiter and purer and better than we ever find it in our shirt collars or anywhere else. We all know it requires a high order of intellect to trace the relations of abstractions as they exist in number and form. These relations are nothing more or less than mathematical truths, which are true everywhere and at all times—up in the moon a thousand years ago, or down on the earth at this hour. But it is not so with political abstractions. Many of them are true up in the clouds, but they are not true on the face of the earth.

Our Quaker friends, their peace-at-any-price pupils, and a few of our modern legislators, want to be sent to school again to learn that very simple little lesson. Many of them would have us believe that because it is true the world is one great country, and all mankind are brethren, in the regions of theological abstraction, therefore it must be true politically down on man's earth. But is it so? Is not selfishness, more or less modified, the ruling motive of every man, and of every aggregate of men, nations, kindreds, tribes, and tongues on the habitable globe? What is the origin of all laws? Were they not to be the terror of evil doers as well as the praise or protection of them that do well? Hence, if all did well there would be no necessity for laws. If all men would do as they would be done by, and love their neighbours as themselves, and if the world were one great country, and all mankind brethren, not only could we do without armies and navies, but we could do without civil and judicial establishments, judges and juries, police and prisons, locks and keys, bolts and bars, and buttons to our breeches pockets. Then mankind would not only be a little below, but fully equal to the angels; but as at present we often find mankind very nearly allied to another kind of thing, it is the business of political economy to deal with men as we find them, and not as we would wish them to be.

Have you ever found a member of the Peace Society anxious to put down policemen? Surely what policemen are to municipalities, armies and navies are to nations. There is this difference between them—a strong nation will not, however guilty, consent to be collared and hauled up before a bench of magistrates. Might, we all know, is not right; but in the absence of moral suasion, what other ultimatum is there? It is the standard which the nations of the world have set up, and we must be measured by that standard long as we are in the present community of nations.

Do not imagine I am conjuring up a phantom for the pleasure of chasing it. These truths may appear very trite to military minds, but they are imperfectly understood by some of our countrymen; and many bits of "bright" things said on platforms and hustings are still supposed to be gold because they glitter. It would not be difficult to show that the sacrifice of long experience to abstract theories has found its way into our legislature, and that the deteriorated condition of our army and navy a few years since had its origin in that cause.

A large standing army, equalling the great military powers of Europe, may not be compatible with our constitution; but a large standing volunteer force must sooner or later become a permanent national institution. It will not be the work of a day, nor of a periodical epidemic; but it will require a good deal of thought, time, and organised labour, based upon general public sympathy, co-operation, and support, to convert a nation of so-called shopkeepers into a nation of soldiers, like our continental neighbours, who are said to imbibe the love of war with their mothers' milk.

It is a matter for the people of England to take up and discuss for themselves, and to ask of red tape and legislation to throw no impediments in the way.

I remain, sir, your obedient servant, J. M.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Trusting your paper will yet become the medium through which the wants of the Rifle Corps may become known, both to the Government and country, I am induced to bring forward in your columns a few of our requirements. Six months' experience in raising a company, not too well supported by a subscription list, and composed of men of poor means, certifies to me that unless the Government assist these companies to a certain extent, they must fail.

I wish not for pay to be given to the men, nor any large annual sum for the general fund to be found by the Government, but this I do wish—that the expense of keeping the arms in order, *i.e.*, clean, and a resident drill-sergeant be found by the country. The expense of a drill-sergeant of good character, and having a thorough knowledge of the new musketry drill, would be, with residence, at least sixty pounds a-year, and the keeping the arms clean and in good repair another forty—thus making a total of one hundred pounds per annum. Were this sum given by the Government to each company on receiving a certificate from the three officers attached, that the sergeant was there and fit for duty, and the arms in good order, I believe that the general efficiency of these Rifle Companies would be greater, and their permanence secured. At the risk of being tedious, and this letter being excluded, I will endeavour to point out a few of the difficulties attendant on raising a Rifle Company with an insufficient subscription list and small income, and hope to prove the impossibility of a company thus raised and situated being properly drilled, properly equipped, expending the requisite quantity of practice ammunition, and lastly the Government arms being kept clean and in proper repair.

Presuming it is the intention of the country to have good men, I will venture to say that by the present system of volunteers finding everything for themselves, in many instances, a good but poor man is excluded from being a rifleman; and that the entertainment of men unable to find everything for themselves, however expensive, is in districts where the subscriptions and support are little, either ruin to the man entering the company, or to the commanding officer entertaining such men, he being responsible.

My own company will serve for an instance as well as perhaps twenty others, and when I prove how much is expected, and how little chance there is of these expectations being realised, your readers will not think my request for Government pecuniary assistance at all unreasonable.

The arms are now found by Government—that is so much saved; but as the same Government requires that a properly secured building be furnished for these arms, that they are kept at police offices, thoroughly clean and in order, it necessitates some man understanding the repairing and cleaning of arms to be more or less always at the armoury; and for the loss of time in cleaning these arms, even in keeping them free from rust, this man must be paid. The volunteers drilling chiefly at night, and having but very few minutes to call their own during the daytime, are consequently unable to attend at these arm-stations, for the purpose of cleaning their own arms, hence that duty must be paid for, and one hundred stand of arms cannot be rightly attended to under forty pounds a year.

Accoutrements even of the commonest quality, such as cross and waistbelt, will cost each man one pound. Uniform consisting of loose cloth blouse, trowsers, cap, and knee-cap,

Digitized by Google

about 3*l.* Subscription annual, 10*s.* Total, at the least, 4*l.* 10*s.* Now, few men of the small tradesman class, however respectable, and anxious to serve their country, are able to pay this sum down on entering a Rifle Corps; hence they must either borrow the money, or endeavour to make arrangements for the payment of this amount by instalments, leaving probably the commanding officer responsible to the tailor providing the same. Let the man die or be a scamp and the loss must be made good.

The targets, erection of earth or brickwork for butts, and necessary ammunition, will perhaps use up all the small subscription, and leave nothing to provide for future expenses, such as rent and repairs.

Turn we now to a drill-sergeant—a man of good character, some standing in the army, general acquirements, knowing the Hythe system, to be present at all hours to drill recruits. Such a man can hardly obtained for sixty pounds a-year. Still he may, and all that is wanted would be an annual subscription to meet the expense; and how is this to be found in a company composed of poor men?

When a retired officer of the regular army finds that the command of a company thus poorly circumstanced makes sad inroads on his small means, he will be forced to resign. When each private finds the joys of a rifleman to consist chiefly in paying annual subscriptions, and the committee of finance find their work to be most hopeless, and that the payments of drill-sergeant, repairs and cleaning arms, hire of practice-ground, and miscellaneous expenses, rise beyond their income, all will resign; and a company raised in honour will soon exist only in name.

Yours, faithfully, R. D. G.

[As yet the Volunteer movement has not been much extended in the direction indicated by our correspondent.—Ed.]

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Among the many reforms needed in the organisation of the Army, as regards the officers, it is acknowledged that that relating to the abuses connected with the purchase system is not of the least importance. I say *connected* with the purchase system, because the system itself is not, under present circumstances, objectionable; but the abuse consists in the practice of demanding money, frequently 500*l.* or 600*l.*, beyond the regulation prices; and it would not appear difficult to put an end to it. It would simply be necessary for the Horse Guards to require a *written* certificate from every officer selling out, that he had not demanded, and would not demand, anything beyond the regulation price; and, in the event of this proving to be false, the permission to sell to be withheld. Two objections may be raised to this proposal; the first, that it might be easily evaded by a secret understanding between the officers concerned; and the second, that it would not be fair to deprive a man of the chance of getting back what he himself had given; but, in the first place, an officer would be prevented by his written certificate from *originating* the proposal to give more than regulation, and of course the officer about to purchase would not do so. To the second objection it might in reason be urged, that the fact of one person having done a voluntary and illegal act, was no reason for every one else in the same position being bound by it; and it moreover frequently happens that a captain who has obtained his company without purchase will ask some hundreds beyond regulation. The action of this system is hurtful to the utmost degree, many an officer being quite unable to give the extra money demanded, and open to the painful remarks of some more wealthy junior. This is a point that should not be left to the caprice of individuals. It should also be remembered, that the position of an officer in the Army is in these days far from a sinecure, and that something more than 5 per cent. would not be an excessive pay to an officer for his service and his money. I am afraid I have very feebly brought forward a few of the opinions generally entertained on this subject; but, if you, Sir, with your well-known ability, would thoroughly *ventilate* the question, in a few weeks we might expect a successful result.

I am, yours, very obediently,

Jan. 9, 1860. A Subaltern.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—At page 26 of the "Reply to Critics," appended to the fourth edition of Lieut.-General Shaw Kennedy's "Notes on the Defences of Great Britain and Ireland," there is an observation upon the forts which are recommended to be built round London, to which I beg particularly to call your attention, and which, if noticed in the Army and Navy Gazette, might elicit opinions of military engineers as to the best mode of construction. The General recommends that the "ditches should be *narrow*, but very deep, and defended by caponieres," &c. In the narrowness of the ditch appears to me to be the great fault in the construction of the proposed forts, having always understood that the attack upon the Malakoff work was most materially facilitated by the assailants pushing their ladders *over* the ditch instead of descending into it; thus converting their ladders into bridges, and rendering the caponieres and loop-holed galleries in the counterscarp (if any) quite useless. If this were the case at the Malakoff, surely this mode of construction of the ditch would not be the right one. G*.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Most firmly agreeing with you in your statement that the Militia ought not to be embodied except in cases of imminent danger, I hail with satisfaction the publication of a journal to advocate the just claims of that service. Either let us be Militia or make us home battalions of the Line; at present we are neither flesh nor fowl—called from our homes to be embodied on every slight occasion, and dismissed unceremoniously whenever it so pleases the powers above.

The regiments are deteriorated by this conduct, both as regards officers and men. The officers (field officers excepted) who have a large stake in the country, will not join because they do not choose to be taken away from their estates at the caprice of the War-Office; although if real necessity were to arise they would not for a moment hesitate, and would be found amongst the foremost to volunteer. In 1852, when the Militia was reformed, a large proportion were young rural labourers, who looked upon the 28 days' annual training as a recreation. Since that time many regiments have been twice embodied; what now constitutes them? Not the class who first flocked to us; but a very different and a much inferior sort—that from which the regulars are supplied. I mean the hangers-on of large towns, and those driven to join by want of employment; and here we enter into direct competition with the Line, with this advantage—the men are told that they cannot be sent out of England; we get, therefore, hundreds who would otherwise enter the army. I really believe nine out of ten would. Great alterations are to be made in the Militia force after the 1st of April next. Report says we are to be made more efficient. If the Government are in earnest, let the first step be to send all the present embodied regiments to their homes; let them be told they shall not again be embodied on slight occasions, and if they are, stations, where practicable, will be chosen for them in their own counties. Let this be done, and the long-talked-of amendments be made, and I fearlessly assert that the Militia of England will be a force to be depended on should the day of trial ever arise.

A Militia Officer.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir.—As the Army has so much to do with the Volunteer force; it attracts more scrutiny than before.

From the time of Cromwell there has been a rank denoting the third in command of a company, a regiment, and an army. Although the title remains the same, the commands themselves have experienced change. When, therefore, you propose to abolish the ranks of ensign and major (and I suppose major-general also) you only intend a re-adjustment of a system which has been infringed. You certainly cannot be charged with a desire for innovation. It would certainly seem that the commander of a battalion (lieut.-colonel) is more in want of adjutants than majors. Cannot the little that is done by majors which may not be done by adjutants be done by senior captains. It is a fair question, too, whether eight companies (larger than at present) should not be the maximum of a battalion. A sergeant-major for each company would be a good exchange for the ensign (frequently, as you say, absent), and would provide an appropriate chance of valued promotion to the non-commissioned officers.

Let your scheme be a complete one. You propose to have a captain and a lieutenant for each company of regulation complement—a colonel and lieutenant-colonels for a regiment. A lieut.-colonel commands a battalion. Who commands the brigade? Obviously a staff-colonel; because a brigade is not larger than a full regiment.

You do without the ensign and the majors. Now you come to the major-generals. You don't want them. The lieut.-generals command the divisions. The *corps d'armée* by a general. I am, your obedient servant,

A Subscriber.

VOLUNTEERS FOR IRELAND.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In last week's Gazette I took the liberty of addressing you on the inefficient state of defence under which neglect the loyal people of Ireland feel so deeply aggrieved, but I hope on the meeting of Parliament the evil will be remedied. I trust I am not trespassing too much on your space by a few observations which strike me as bearing on the Volunteer movement. In the first place, Sir, respecting the uniform, on a moment's reflection, it must be obvious to all that to clothe the Volunteers in a distinct colour, different from the Regulars, would be most injudicious, as in case of their taking the field in active service, it would be at once pointing them out to an enemy. The nearer the clothing is to that of the line the better, so as to deceive an enemy as to the number of regular troops opposed to them. Indeed, were some clothed in scarlet as *light infantry* it might be better.

Secondly, if all corps of 500 men or over had attached to it an Armstrong six-pounder, mounted on a light carriage, which could be drawn by the gunners, if necessary, to heights commanding an extensive range, it would form a new arm in the service of inestimable value, particularly if our Volunteers were attacked by Cavalry; it would give great confidence to skirmishers to know they were thus protected; twenty men in each regiment would be quite sufficient for this service. If, Sir, these few remarks should be thought useful, I shall be most happy at a future period to return to the subject. An Old Rifleman.

WHICH IS THE RIGHT DRILL-BOOK?

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I am a Volunteer, and anxious to be as perfect as possible in the necessary drill, for which purpose I am regular in attendance at drill, and have furnished myself with the small book on the subject published "under the authority of the Secretary of State for War;" Judge then of my surprise on being lately advised (together with the squad) by the sergeant to burn this Drill Manual forthwith, "for" said he "it is full of errors, and if you follow its directions you will get into bad habits from which you will never recover." And he went on to say, "Be sure of this, the War Office has nothing to do with drill, the Secretary knows no more about it than my father, and he never handled a rifle." The Adjutant-General's book (at 3*s.* 6*d.*) is, he said, the only safe guide. He then proceeded to show us by actual experiment some of the absurdities of the Manual, with the details of which I will not at present trouble you, reserving them for a future letter, should you think the subject of this worthy of notice.

How long is this double government to last—this old story of War Office *versus* Horse Guards? And is it to be endured that this absurd system of cross purposes and opposing schemes should pervade even the spontaneous movement now on foot for restoring to England that prestige which, it is too much to be feared, has been damaged by the evident want of administrative talent she has shown within the last few years. Do, Sir, come to the aid of every Volunteer.

January 7, 1860.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Whilst the philanthropist is daily shocked with recitals of the evil consequences in civil life of drunkenness—and the crimes and offences which it leads to—naval and military men have also ever found in this love for strong drink, with their crews and regiments, the greatest enemy to subordination, and the most fruitful source of crime. When my regiment was in Canada, we found constantly, at the ten o'clock guard mounting parade, some of the best of our soldiers even, *tremulous under arms*, and we traced it to their habit of dram-drinking on an empty stomach before breakfast. We adopted at once a remedy, which, as we found it effectual and most *comforting* to our men, in winter-time especially, I would suggest the adoption of generally in all our camps and quarters, as well as on board ship—and it was this:—Instead of keeping the men with empty stomachs, from the reveillé to breakfast-time, we served out a cup of hot coffee, with a biscuit, to each man at 6 A.M. in summer, and 7 A.M. in winter (the coffee made the day before). Moreover, two large barrack-rooms were fitted up and warmed as reading-rooms for them, and furnished with papers, periodicals, and cheap sterling works, suited to the soldiers' taste, where the men could resort at any time of the day from 6 A.M. till tattoo. I may add, likewise, that those poor and too-much-neglected drudges, the soldiers' wives, had their hot coffee and biscuits served out the same time as their husbands', and were thus fortified and fitted for their duties as mothers and washerwomen without having recourse to the stimulus of whiskey, *as they had done* till we instituted this wholesome reform, of which the resulting benefits were incontestably evident in the moral, educational, and physical improvement of the regiment, whilst the crime, hitherto so common, of "Drunk when for guard," became almost an exploded Defaulters'-Book entry. Moreover, as regards the reading-room plan, the men, by thus associating regimentally in sober mood, stimulate *inter se* an *esprit de corps* without losing their *esprit de compagnie* notwithstanding; and whilst the idler found at his regimental reading-room a snug trysting-place and escape from his barrack room, the literary lounger found there the wherewithal to amuse and instruct him; and a cup of hot tea or coffee with a biscuit, for one penny only, could be procured there all the day long. As our system of messing lads in camps and depôts exposes them now especially to the baneful influence and example of the sottish old soldier and canteen denizen, so would I hope by the adoption of this simple expedient to give the military recruit no excuse, or need, or craving for an *early-in-the-day drink of any sort*; whilst I would fain believe that the habitual tippler *matinal* may be thus weaned from that pernicious system. Prevention certes is better than cure; and drinking, like smoking, grows into a habit and necessity from early indulgence, and therefore my motto is ever—*principiis obsta*.

I am, sir, your subscriber and well-wisher,

January 9, 1860. Emeritus.

NAVAL ASSISTANT-ENGINEERS.

In a letter to the Editor of the *Devonport and Plymouth Telegraph*, an Assistant-Engineer states the grievances of which his class complain—now increased, he contends, by the circular of Dec. 10th, 1859. They are in effect—the position of the mess-room, the smallness of the pay, the want of half-pay, pensions to widows, and retirement.

In the next place, Assistant-Engineers in numerous instances are treated as if they were not officers, whilst it is expressly stated in the Admiralty Instructions that all Assistant-Engineers are to be treated as officers.

In the next place, the duties Assistant-Engineers have to perform entirely unconnected with the engine-room department. There are such things ordered to be done as polishing stanchions, priming wires for the guns, &c. (these are not defects), for the purpose of making a ship look fine; and many other things. The circular alluded to is the last thing the Assistant-Engineers ever expected would have been issued. It states that they are to perform work which cannot be done by the carpenter's crew, blacksmiths, and armourers. The writer says, "I hear a great deal of murmuring and discontent expressed because of this recent order; and its effect upon the Assistant-Engineers will soon be seen, by many of them quietly taking their discharge. It is to be hoped this obnoxious circular will be rescinded, and a new order issued, stating that Assistant-Engineers are never to be employed about work which does not belong to the engine-room department. Then there is the mustering of the stokers on deck for drilling sails, crossing top-gallant yards, &c., such as was never heard of before." In the next place, the Assistant-Engineers are only allowed one servant to cook for them, and keep the mess-room clean, and other work, such as going to magazine drill, where they are stationed, and frequently kept two hours of a forenoon. Next, slowness of promotion. Everyone has to serve three years before he is eligible for promotion, and may have served between four and five years before he has received a step. A young man who has been away four or five years on a foreign station comes home, his ship is paid off, but he is transferred to the Steam Reserve. It may be he is granted a month's leave, and, as soon as it expires, he returns to the Steam Reserve, and is doomed to the Floating Factory, instead of being able to remain with his friends at home to recruit his health before taking another appointment. The things suggested in order to make the navy more popular with engineers, are:

1st. A better place to live in, as, for instance, a portion of the gun-room partitioned off for their use. This it is believed would be preferable to placing them in the gun-room amongst the young gentlemen; for this reason, that all the Assistant-Engineers in the navy are men and not boys; such a place for instance as the bandmaster's cabin, would be a great service to the Assistant-Engineers as a store-room. It might be asked, is a bandmaster allowed a cabin? If he is not, it is nevertheless true that in most large ships a cabin is provided him, when the Assistant-Engineers cannot venture to ask for one.

2nd. Better pay to enable them to keep up their appearance both on board and on shore as officers. Many a young man is disgusted with the living he gets at sea, a piece of hard beef, two or more years old, and some hard biscuit.

Digitized by Google

This alone has made many of the Assistant-Engineers quit Her Majesty's navy.

3rd. The widows of Assistant-Engineers should be allowed an annuity, after serving so many years, the same as Assistant-Surgeons.

4th. The position of Engineers should be better defined. Now they rank *with* but *after* Second Masters. Let the *after* be removed, and let each class take precedence by the date of his commission.

5th. The duties the Assistant-Engineers have to perform ought to be strictly confined to *engineering*.

6th. They should be provided with a proper cook and proper servants to wait on them. Nothing is more detestable to any Assistant-Engineer than to be obliged to go into a dirty, uncomfortable place on coming up out of the engine-room.

And lastly, with regard to promotion, each Assistant-Engineer should serve proper stated periods; and then, after passing the required examination, be promoted to the next class.

The writer thinks these improvements would bring a much better class of young men into the Navy, which is almost a reflection on those who at present fill the posts of Assistant-Engineers.

THE NAVAL ARMAMENTS OF FRANCE.

Under the above heading the *Revue Indépendante*, published in London, gives a return of the sums expended recently on the French Navy. The writer unhesitatingly affirms that the outlay was made with the ulterior intention of an invasion of England.

On the 30th November, 1859, the budget of the French Navy was exceeded by 81,000,000 of francs, and as arrears accumulate and are summed up at the end of the year, it may be said without exaggeration that this increase of outlay will be 100,000,000 of francs at least for the year just ended. How were those 100,000,000 of francs employed, and for what purpose? Whatever denial may be made, the fact of these figures is correct.

The budget of the French Navy, which in 1854 was,

	110,554,301 francs ...	£4,420,172
was in 1855	117,181,001	
in 1856	122,976,542	
in 1857	123,868,744	
in 1858	132,939,117	
and in 1859	140,548,538 francs ...	£5,621,941

Add to this the increase of 100,000,000, and it will give a total of 240,000,000 of francs at least absorbed by the French Navy in 1859.

MILITARY PUNISHMENT AND MILITARY DISCIPLINE.

At the present time, when public opinion is expressing itself so strongly in favour of abolishing corporal punishment in the Army, we think that it may not be uninteresting to our readers to have brought before them the subject of military punishments in general; and we purpose therefore, in as short and concise a manner as the question will permit, to review the principal points connected with, and bearing upon those measures which are now adopted for the repression of crime in the Army. We shall commence with the consideration of Military Prisons, and the discipline therein enforced. These establishments are of comparatively very recent date; for prior to the year 1844 the soldier, when under the sentence of court-martial, was, as a general rule, incarcerated in the common jail of the neighbourhood in which he happened to be stationed at the time. From this system two great evils arose. In the first place the young soldier became contaminated whilst in prison, and the old soldier acquired rather a liking than a distaste for jail. To place this in a clearer light, we should premise that the crimes for which the young soldier is tried are commonly not the effects of vice. The offences for which he becomes subject to the sentence of a court-martial are generally those which in private life could hardly be construed as crime, such as sleeping when on sentry, or being absent without leave.

For these, and similar delinquencies, the simple-minded lad was formerly forced into a common jail, and brought here into close intimacy and association with pickpockets and thieves; and he who left his regiment comparatively pure, returned to it, as a general rule, with all principle destroyed, hardened and accomplished in crime. Not only this, but during the period of his confinement all military training ceased; his carriage and setting-up were lost, and forgetting nearly everything that he had learnt, his drill had upon rejoining to be commenced anew—such was the effect upon the young. With the old soldier it was totally different. Knowing right well the course before him, he, instead of mixing with the other prisoners, kept aloof, turned his whole attention towards the turnkeys and keeper of the jail, who requited him by taking advantage of his services, and conferring upon him some post or other, where, as deputy's deputy, he soon became in effect a sub-officer of the establishment, was perfectly comfortable and at home, well-fed and cared for, passing every night in bed. To such a pitch, indeed, had this state of things arrived, that the very pressure upon certain prisons in the vicinity of London, of large military depôts, from the number of soldiers committed to them, necessitated the institution of an inquiry as to what steps could be taken to remedy this inconvenience, and to obviate the evil influences which incarceration in civil jails was producing upon those subjected to it. A committee was therefore formed, composed of Earl Cathcart as president, Colonel Grant, of the Grenadier Guards, Colonel Gardiner of the 41st Regiment, Major Jebb, Surveyor-General of Prisons, and Mr. Nihil, Governor of Milbank Penitentiary, as members, and it is upon the principles recommended by this committee that the system of which we are now about to speak was founded.

After fully considering the question in all its bearings, Earl Cathcart's committee submitted for introduction into the service an organised system of military imprisonment, in which the discipline should be exemplary and deterring in its character, and the prisons themselves made places of real correction and punishment, where working under an associated system of discipline, with strict silence, the hard labour should yet not tend to degrade the individual in the same manner as working at the treadmill, or, convict-like, publicly exposed in gangs. They suggested further that the dietary should be such as that, whilst it would maintain the prisoner in perfect health, should still make him feel during the whole period of his confinement that his state and condition in prison was very different from what it was whilst doing duty with his regiment; and with this view they recommended that his food should be of a totally different character from that which, as a soldier, he was accustomed to. They advised, besides, classification, as a means of giving encouragement to good conduct, and they laid all their plans with the one grand object, viz., of inflicting such form of punishment as would tend to the repression of crime in the very shortest possible space of time, so that the good soldiers should not be called upon to perform for one single hour longer than was absolutely necessary the duty of the bad man, absent from his regiment in jail.

Such was the basis upon which the committee drew up their report. They published at the same time the following all-powerful remark, viz., "that they considered that *the encouragement of the well-conducted soldier was no less conducive to the good order of the service, than the punishment of the bad*," and we believe that there are few of our military readers who will not subscribe to this sentiment. They proposed that at first there should be only three of these establishments formed, and suggested Fort Clarence, Gosport, and Weedon, as the fitting localities in which military offenders should be confined. Their plan was tried, and found fully to succeed; speedily the number was increased until no fewer than twenty such prisons were established in various parts of the British possessions, and at the present time there are twenty in all,—ten in the United Kingdom and ten abroad. Those in England are situated at Aldershott, Chatham, Devonport, Portsmouth, and Weedon. In Ireland at Athlone, Cork, Dublin, and Limerick, and in Scotland at Greenhaw. Those abroad at Barbadoes, Bermuda, Gibraltar, Malta, Mauritius, Montreal, Quebec, and Vido, affording in the aggregate accommodation for 1500 prisoners, all under a uniform system of discipline, suitable to military offenders, and adapted to the habits and characters of soldiers. These are in addition to the garrison and barrack cells available for short periods of confinement.

The discipline to which the soldier is subjected whilst in these prisons is, in the first instance, in conformity with the sentence of his court-martial, but it is in the man's own power to lighten the severity of his sentence by good conduct, through the medium of classification, a system of gradation which consists in promotion from a lower to a higher class, its actual working being as follows. The prisoner of the first-class is altogether exempted from hard labour, and during the hours prescribed for its performance he is otherwise employed in work not of a penal character. He has his bed to sleep on every night, and in addition a meat dinner twice a week.

The second-class prisoner has to carry only a 24-pounder when at shot drill, whilst the third-class has to carry 32's.

The second-class also receive school instruction at night, from six to eight o'clock, whilst the third-class have to pick during the same period an allotted portion of oakum. The second-class get their beds for two nights in succession, whilst the third-class have their beds only upon every other night. These distinctions exercise a very great influence upon the comforts of the prisoners, and thus render promotion from a lower to a higher class, or degradation from a higher to a lower, to be correspondingly appreciated or felt.

The punishments, then, which await every soldier indiscriminately upon his first admission into a military prison, are these: 1st, loss of bed; 2ndly, hard labour; 3rdly, total silence; 4thly, restricted diet; whilst the exceptional penalty is solitary confinement. This latter is for the most part resorted to only in cases where, from some physical disability (such as hernia), the soldiers would be likely to be injuriously affected by shot drill, and therefore cannot be subjected to it.

For misconduct whilst in prison other additional penalties are enforced; these are temporary loss of food, by the stoppage of dinner or supper, additional loss of bed, confinement in a light or dark cell on bread and water for 72 hours, and, in inveterate cases, corporal punishment—the four former being in the power of the governor; the latter in that of the Visitors, or Board of Visitors only.

Taking, then, the several forms of punishment to which military offenders are now liable, we purpose to review them *seriatim*. We propose to discuss the advantages and disadvantages which may be considered to pertain to each, and thus endeavour to lay before our military readers in a concise and intelligible form (divested of all the tables and statistics of blue books, good and excellent as they are in their way), the practical results of an experience gained after many years of close observation of military prisons and their discipline.

(*To be continued.*)

NEWS FROM NEPAUL.

It will be perceived from the subjoining Service Messages just receeived by the *Overland Mail* that the Ghoorkas are performing their work against the rebels in gallant style:—

From Camp Dukeree, *vid* Gonda, 2nd December.

From Brigadier E. A. Holditch, to Mily. Secy. to Govt. of India, with the Governor General.

General Dher Shumsher, Commanding Goorkha Force in Terai, reports 30th November, that Colonel Pulwan Singh, Commanding in the Hills, attacked and killed Benee Madho and his brother in Dang valley. Also a Brigade in the Terai captured the late Nana's Magazine, fourteen boxes of ammunition and two elephants. Rebels fled into jungle, throwing down down their arms.

Agra, E. T. Dept., 3rd December.

From Camp Dukeree, 3rd December

Captain Hill just returned from Jung Bahadoor. Mummoo Khan in confinement. Bullee Singh captured. Ummer Singh, brother of Koer Singh, and about 200 followers surrendered yesterday.

Agra, E. T. Dept., 4th of Dec., 1859.

From Camp Dukeere, 5th Dec., 6 P.M. *vid* Gonda.

Devee Deen and Gunga Singh, leaders of the Nusseerabad Brigade, are prisoners in camp. The Nusseerabad Brigade surrendered to Jungh Bahadoor. Three hundred and fifty men delivered up by Nepaulese are coming into camp.

Agra, E. T. Dept., the 7th Dec.

From Camp Dukeree, 6th Dec., *vid* Gonda.

Eight hundred and fifty sepoys, chiefly Nusseerabad Brigade, brought into camp this morning.

Agra, E. T. Dept., 8th Dec.

It will thus be seen that the only band of rebels which was really embarrassing, if not formidable from its threatening position on the frontier of the richest districts in India, and on the range of the recently conquered province of Oude, has been most satisfactorily disposed. The elements of vitality and cohesion in the Nusseerabad Brigade are really so remarkable, that it would be well if the authorities could go back a little and see to what their extraordinary powers of marching and holding together were due. They have ever conducted themselves with what amounts to courage and conduct compared with that of other Sepoy brigades, and have presented themselves as a whole, after marching all over India. By the death of Bene Madho we have been freed from the determined and gallant hostility of this chief of the great Byswurra country. Mummoo Khan, less resolute than the Begum, whose favourite he was, has surrendered; and the Begum, who has displayed a courage, persistence, and ability, which we must say are worthy of a better cause, seems now the only rebel who refuses terms or accepts death. Pulwan Singh, the Goorkha colonel, was present with Lord Clyde's army before Lucknow, and commanded a brigade of Goorkhas at the fall of the place.

IMPROVEMENTS AT FORT PITT, CHATHAM.—The authorities connected with the medical department of the army having decided on increasing the medical establishment at Fort Pitt, Chatham, arrangements are in progress for making a considerable addition to the resources of that hospital, with the view of providing greater facilities for the medical officers of the army in studying the pathology of those diseases to which soldiers, and especially those serving in India and the colonies, are peculiarly liable. The proposed plan contemplates the enlargement of Fort Pitt, in order to provide for a still larger number of medical officers, who will be sent to that establishment immediately on joining the service, where they will continue their studies until sent on foreign service. In the centre of the quadrangle a large building is now in course of erection, which is to be used as a medical school, and to which will be attached operating-rooms, dissecting-rooms, and the other necessary apartments, together with suitable rooms for a professor, who is to be appointed to preside over the establishment. Considering the fact that every sick, wounded, and disabled soldier belonging to Her Majesty's Army, whether serving in Great Britain, the colonies, or elsewhere, is sent to Fort Pitt either to be cured or previously to his discharge from the service, it has long been a matter of surprise that means have not been taken to improve the resources of that establishment, and enlarge its staff of medical officers.

EXTENSION OF CHATHAM DOCKYARD.—The present Board of Admiralty, having decided on a considerable enlargement and extension of Chatham Dockyard, which is to be carried out during the present year, the several works connected with the proposed alterations are to be at once commenced, it being understood that a large sum will be applied for during the approaching session of Parliament to carry out the extensive alterations intended. The proposed works will consist of an enlargement of the yard on its eastern side, so as to include a large number of acres of marsh land, a considerable portion of which has been reclaimed from the water by the labours of the convicts, several hundred of whom have been employed for a lengthened period in embanking that portion of the Medway. The arm of the river, known as St. Mary's Creek, which now runs inland some distance, has hitherto been found to present so many insurmountable difficulties to any improvement to the dockyard in that direction, that the Lords of the Admiralty have decided on stopping it up, and notices have accordingly been served on the Mayor and Corporation of the city of Rochester, who claim jurisdiction over the Medway, together with the other public bodies interested in the river, in order to ascertain the amount of compensation that will be required when the requisite Act is obtained from Parliament. The proposed extension will include the construction of several additional docks, as well as a capacious steam-fitting basin, so as to dock vessels of the largest size, there being at present only one dock at Chatham capable of accommodating the largest vessels in the Navy. The convict labour now at Chatham will be turned to some account, as the excavations, and indeed all the heaviest portions of the works connected with the new undertaking will be performed by convicts, one thousand of whom are now attached to the convict establishment at Chatham. As soon as the docks are completed, one will be kept exclusively for the reception of the steam gun-boats, and the mortar vessels, the latter of which, from various causes, are rapidly going to decay. Several of the latter description of vessels are now at Chatham, and a recent examination has proved that the marine worm has nearly eaten away their timbers, rendering them quite unfit for service. The plans for the proposed extension of the dockyard have been prepared by Mr. Rivers, the chief clerk of the works, and on the last occasion of the visit of the Admiralty to Chatham were inspected by their lordships, who expressed their approval of the same.

The Hindoo community of Madras are about presenting the sergeants of the 1st Madras Europeans with a very beautiful silver vase, weighing 350 ounces. There are tigers on the handles and cover, and the base is composed of a rough ground work, from which spring palm and other tropical trees. On the base is a portrait equestrian figure of General Neill, and figures of a sergeant, corporal, and private of H.M. 1st Madras Fusiliers. On the shield is engraved the following inscription:—"Presented to the Sergeants' Mess of H.M. 1st Madras Fusiliers, by the Hindoo community of Madras, as a lasting proof of their regard and admiration. 1860." This testimonial has been executed by Messrs. Elkington and Mason, and will remain on view, at their establishment, 22, Regent Street.

Obituary.

We have to record the death of Captain James Robert Dalton, R.N., second son of the late John Dalton, Esq., of Slemingford Park, York, and of Fillingham Castle, Lincoln, which occurred at Montreuil-sur-Mer, France, a few days since, at an advanced age. The deceased entered the navy in June, 1800, on board the Stag, 32, and, after attending the expedition against Ferrol, was wrecked in Vigo Bay in the following September. He next served in the Mediterranean, in the Renown, 74, and Kent, 74; and afterwards cruised for eighteen months in the Ramillies, 74; and in August, 1806, was promoted from the Foudroyant, 80, at Newfoundland, to an acting lieutenancy in the Namur, 74, being confirmed the 26th of November following. He subsequently joined the Confiance, 18, off Cape Finisterre; and the Leonidas, 38, in which frigate he witnessed the capture of Cephalonia, in October, 1809. He was raised to the rank of commander in April, 1810, and retired with post rank in September, 1840.

The death of Lieutenant-Colonel William Martin Leake, F.R.S., &c, the Eastern geographer, happened a few days ago at Brighton, within a few weeks of the completion of his 83rd year. He was a member of an ancient and respectable Essex family, being a younger brother of Mr. John Martin Leake, of Thorpe Hall, near Colchester, a bencher of the Middle Temple, and one of the chairmen of the Essex Quarter Sessions. Colonel Leake served for some years in the Royal Artillery, but retired with the rank of lieutenant-colonel in 1823. He had travelled over every portion of Greece and Asia Minor, and gave to the world the results of his researches in several very learned and scholarlike publications, which were issued by John Murray between the years 1813 and 1830. He had only recently completed the supplement to his last work, "Numismata Hellenica," when the hand of death broke off his career of learned labour. His name will long be remembered as the author of "Travels in Asia Minor," "A Journey in Greece," "Athenian Topography," and "Travels in the Morea," besides some shorter pamphlets, in which he called the attention of the Home Government to the oppression to which the modern Greeks were subjected at the hands of their Turkish masters.

We are sorry to announce the death of Lieutenant Joseph Henry Cowan, of the 5th Lancers. He met with an accident in the hunting field some weeks since, from the effects of which he never recovered. Cornet Malcolmson obtains the vacant Lieutenancy without purchase.

At Anglesea Place, Clifton, on New Year's Day, Hugh Babb, Esq., Master, R.N., an old and respected officer. The deceased was one of the few survivors in H.M.'s ship, Scylla, when she lost Captain Russell and most of her officers by yellow fever, at Carthagena (South America), in 1825. The late gallant General Sir Henry Barnard was a visitor on board the Scylla at the time, and was also one of those who survived the fatal sickness.

The following deaths in H.M.'s Indian Army are refuted by the last mail. Bengal:—Lieut.-Colonel John Abercrombie, H.M.'s Bengal Horse Artillery, at 7, Vicarage Gardens, Kensington, aged 47, Jan. 4; Major James Grant, 22nd Bengal N.I., at Barrackpoor, Nov. 12; Midshipman R. Scamp, H.M.'s schooner, Charlotte, drowned at Calcutta, Nov. 19. Madras:—Captain C. J. M. T. Adams, 10th Madras N.I., at Poona, aged 29, Dec. 4. Bombay:—Captain George M. Duncan, Bombay Engineers, Nov. 27.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BARNES—Jan. 10, at 9, St. James's Street, the wife of Edward Barnes, Esq., late Captain 27th Inniskillings, of a daughter.
FORREST—Jan. 10, at Plymouth, the wife of Captain Forrest, Fifeshire Artillery, of a son.
GREY—Jan. 8, at Waterhouse, Bath, the Hon. Mrs. George Grey, of a son.
LOWNDES—Jan. 7, at the Hollies, Tunbridge Wells, the wife of Captain James Lowndes, of a son.
MALET—Jan. 6, at Fontmell Parva, Dorset, the wife of Lieutenant-Colonel C. S. Malet, of a daughter.
MCANDREW—Dec. 23, at Aberdeen, the wife of Captain J. D. McAndrew, 78th Highlanders, of a son.
MORESBY—Jan. 8, at the residence of her father, Philip Scott, Esq., J.P., Bellevue, Queenstown, the wife of Commander Moresby, R.N., of a daughter.
PALMER—Jan. 8, at No. 3, Balmoral Place, Plymouth, the wife of Assistant-Commissary-General Charles Palmer, of a daughter.
SMITH—Jan. 8, at Brighton, the wife of Captain Kincaid Smith, Royal Sussex Militia, of a son.
SMYTH—Jan. 10, at 15, Chepstow Villas West, Bayswater, the wife of J. Smyth, Esq., Lieutenant in H.M.'s 53rd Regiment, of a daughter.

MARRIAGES.

BARCLAY—MACY—Jan. 5, at Backwell, Somerset, the Rev. H. A. Barclay, M.A., to Lucinda Cowan, eldest daughter of H. J. Macy, Esq., of West Town, near Bristol.
CROMARTIE—JORDAN—Jan. 5, at St. John's, Cashel, by the Very Rev. the Dean of Cashel, Captain F. Cromartie, Royal Artillery, eldest son of F. M. Cromartie, Esq., H.M.'s Storekeeper, War Department, Island of Barbadoes, to Eliza, second daughter of Avary Jordan, Esq., of Racecourse House, Cashel.
DAUNCEY—MITCHELL—Sept. 8, at St. John's Church, Sydney, Celicia, daughter of the late Colonel Sir T. Livingstone Mitchell, Knight, D.C.L., to Philip S. Dauncey, Lieutenant H.M.'s 77th Regiment.
ELTON—RANSOM—Dec. 20, at Holt, by the Rev. M. Lawler, incumbent of Tonge, near Middleton, the Rev. Charles Allen Elton, Head Master of the Gresham Grammar School, and late Fellow of Sydney College, Cambridge, to Sarah Amelia, youngest daughter of the late J. Ransom, Esq., of the above place, and niece of the late Colonel Parlet Starling, of the 16th Bengal N.I.
GIRDLESTONE—LLOYD—Jan. 3, at the parish church, Weston-super-Mare, by the Rev. J. Morrall, of Whitchurch, Salop, the Rev. E. D. Girdlestone, to Catherine Anne, daughter of the late Rev. Robert Wynell-Mayow, and widow of the late Lieutenant-Colonel E. S. Lloyd, of the Bengal Army.
ROBINSON—SCRIVEN—Jan. 5, at West Moulsey, Surrey, the Rev. John Lovell Robinson, M.A., Vicar of Buttevant, county Cork, Ireland, and domestic chaplain to Viscount Doneraile, to Susanna Mary, daughter of Lieutenant-Colonel Scriven, D.L., J.P., of the Priory, West Moulsey, Commandant of the Royal South Middlesex Militia.
TARRATT—WADDINGTON—Jan. 10, at Trinity Church, Cheltenham, by the Rev. Henry Barne, vicar of Faringdon, assisted by the Rev. Walter Waddington Shirley, late Fellow of Wadham College, Oxford, Joseph Tarratt, jun., Esq., late of H.M.'s 16th Lancers, eldest son of Joseph Tarratt, Esq., of Ludford Park, Herefordshire, to Anne, second daughter of the late Major-General Charles Waddington, C.B., Bombay Engineers.
TICKELL—SAUNDERS—Jan. 12, at St. Luke's Church, Cheltenham, by the Rev. J. T. C. Saunders, father of the bride, assisted by her brother, the Rev. M. B. Saunders, Lieutenant Thomas Tickell, R.N., son of the late Lieutenant-General Tickell, C.B., Bengal Engineers, to Louisa Emily, eldest daughter of the Rev. J. T. C. Saunders, of Bath Villas, Cheltenham.
WATSON—DAVIS—Jan. 10, at Ilford Church, by the Hon. and Rev. H. Bertie, J. Watson, Esq., V.C., Commandant 4th Sikh Cavalry, son of W. G. Watson, Esq., of Chigwell Row, Essex, to Eliza Jessie, third daughter of John Davis, Esq., of Cranbrook Park, Ilford.

DEATHS.

ADAMS—Dec. 5, at Poona, Captain McTaggart Adams, 10th Regiment, Madras Army, aged 30.
ALLEN—Nov. 26, at Torpoint, near Devonport, Devon, aged 77, Mrs. Jane Hester Allen, widow of the late Admiral John Allen, daughter of the late Colonel Skinner, Royal Engineers, granddaughter of the late General Skinner, Royal Engineers, Chief Engineer of Great Britain, and niece of the late Sir Evan Napean, Bart.
ALLINSON—Dec. 3rd, of lock jaw, at Dharwar, Bombay, Edward Dawson Allinson, Esq., Staff Surgeon, son of J. H. Allinson, Esq., of Penrith, Cumberland, aged 33.
BAYLY—Dec. 31, at her brother's residence, in London, to the inexpressible grief of her sorrowing brother and sister, and regret of all who knew her, Mrs. Bayly, daughter of the late Captain Bourreau, of Elm Lodge, Richmond, co. Dublin, formerly of the Royal Tyrone Regiment of Militia.
BINGHAM—Jan. 9, at Great Gaddesden, Herts, Henry, son of the Rev. J. B. and Frances Bingham, Lieutenant in H.M.'s 90th Light Infantry, aged 23.
CLOWES—Dec. 5, at Ballary, in the Madras Presidency, Robert Langley Clowes, Ensign in the 74th Highlanders, and only son of the Rev. Robert Clowes, vicar of Knutsford, Cheshire.
CRISPIN—Jan. 7, at West Lulworth Dorset, of diphtheria, Albertine, the younger twin daughter of Captain Crispin, H.M.S. Hawke, aged 13.
HILL—At Funchal, Madeira, Captain William Price Hill, third son of the late Lieutenant-Colonel Hill, C. B.
HUNN—Jan. 8, at the Vicarage, Rolvenden, aged 72, Frances Emma, widow of the late Captain Hunn, R.N., and last surviving child of the late Admiral Pickmere, Governor of Newfoundland. Also, at Paris, Dec. 8, aged 44, Mary Ann Harriette Emma, widow of the late Signor G. D. Pessina, and eldest daughter of the above Frances Emma Hunn.
MASTER—Jan. 9, at Knole Park, Gloucestershire, Isabella Margaret, the wife of Colonel Master, aged 65.
SCAMP—Nov. 19, at Calcutta, accidentally drowned, Robert Scamp, aged 19, midshipman, Her Majesty's Indian Navy, younger son of William Scamp, Esq., of the Admiralty.
SIMONDS—Jan. 6, at the residence of his mother, Victoria Square, Reading, aged 18, Ensign Charles Simonds, of the Reading Rifle Corps, eldest son of the late Charles Simonds, Esq., banker.
SPRY—Nov. 16, at Sydney, N.S.W., Edmund Hume, second son of the late Lieutenant Edmund Trant Spry, H.E.I.C.S., Bengal, aged 27.
WATTS—Jan. 2, at Malvern, Vice-Admiral George E. Watts, C.B., in the 75th year of his age.

FIGHTING IN CENTRAL INDIA.

A letter received by the last mail says:—

"The operations of our columns against the rebels appear not to have been by any means ineffectual. About 150 up to this time have been accounted for, the majority of whom are sepoys. Colonel Oakes, of Her Majesty's 12th Lancers, who is commanding a division in the neighbourhood of Huttah, appears to have had his share of success, as well as Colonel Turner. On the 7th and 8th he detached a small party under Majors Blyth and Boyle, 3rd Sikhs, to Patowrie, where they had the good fortune to fall in with some forty or fifty rebels, fifteen of whom they killed. Capt. Hall alighted on the remnant of them the following day, killed four, and took two prisoners. Colonel Oakes, as it would appear, had received no intelligence of the enemy from any of the native authorities, and I believe he now thought it necessary to speak seriously to the thanadar. In what precise phrases the gallant colonel conveyed his reprimand is not accurately mentioned; whether he sat, or stood, or accompanied his oratory with appropriate gestures I have no means at present of ascertaining. But the thanadar appears to have been touched by the striking manner in which his duties were enforced, for he gave a vivid account of the interview to his three-quarter rebel superior, the Ranee of Chutterpoor; and Colonel Oakes, in explanation, represented to her Highness—'I got very angry with the head man of the village.' The experiment, however, succeeded; for intelligence was sent in the very next day of a party of sepoys skulking within six miles of the camp. This was on the 5th inst. Captain Glover, of Her Majesty's 43rd Regiment, and Lieutenant Morgan, of the Royal Artillery, were immediately despatched at eight a.m., with fifty-three infantry, thirty artillerymen, and a few cavalry, to look after them. They were guided to the spot faithfully enough, and found the nest warm, fires burning, cooking-pots abandoned, but the birds flown or in hiding. The troops were spread out in skirmishing order to scour the jungle, which was very thick, the officers leading the way, beating for the concealed enemy, who might be in ambush in every bush, and constantly separated, as in all cover-shooting, from their comrades, by the intervening thickets of dense prickly shrubs. At one of those moments Lieutenant Morgan suddenly found himself in the presence of nine or ten fully armed sepoys, who immediately attacked and fired upon him. Single-handed as he was at the time, he gallantly stood to bay, and answered their volley with his revolver and fired three shots, bringing down, I believe, two of his opponents. One of the musket balls had passed through his pith hat and through his hair—a hair-breadth escape, indeed. Succour, however, now arrived, and the sepoys found it best to retreat, receiving three more shots from Morgan as they decamped, and the whole of them, it is believed, were killed or wounded by our men, for the natives reported that twelve bodies were discovered on the ground.

By the Mail from India, we have received a statement to the effect, that urgent requisitions have been addressed by the three Presidencies to the Home Government, for such a naval force as may be adequate to provide for contingencies which should cause a combination of the powerful squadrons under the French and Russian flags in the Indian and Chinese waters. In the latter our force is large, but the Russians are strong about Japan, and there is a considerable body of French troops at Bourbon and Camboodia, not to mention those *en route* for the East. Is there any use in mentioning the force of *Europeans* at Aden? We think not. The authorities here must surely know what it is!

Lieut. F. W. M. Chalmers, Rifle Brigade, is acting provisionally as Aide-de-camp to Major-General Lawrence, C.B., commanding the Third Infantry Brigade at Aldershott, in the room of Brevet-Major Oldershaw, Royal Artillery.

Colonel Wulff has been appointed to the command of the Royal Engineers at the Colchester Camp.

Major-General Bell, it is understood, will be the new Colonel of the 66th Regiment, in succession to General Blunt, deceased.

A commission, the idaa of which was conceived some time back, though the labours of its members have only commenced within a very short period has been assembled with the view of inquiring into and reporting upon the best modes of facilitating the transport and concentration of troops by railway, and of establishing a complete telegraphic communication between the various ports and naval and military stations, dockyards, and government departments. The head of this Board or Commission is Colonel Hon. A. Gordon, C.B., Deputy-Quartermaster-General, and among its other members are Colonel McMurdo, C.B., Commandant Military Train, Colonel Lysons, C.B., Assistant-Adjutant-General, and others, making up eleven in all. They have visited the Euston-square station, where they were assisted in their inquiries by Mr. Bruyeres, one of the superintendents, The aim of the commission has been already stated, but it is believed they will be enabled to present from each of the working divisions into which they have been separated, a very satisfactory report on the rapid assemblage of troops and materiel, and that the system of telegraphic communication for Government purposes will receive large and important developments.

Captain R. B. Baker, 39th Regiment, has been appointed Fort-Adjutant at Bermuda, in succession to Captain Betts, 26th Regiment.

INDIAN OFFICERS ADJUTANTS OF MILITIA.—The following communication, dated India House, the 30th September last, was addressed to the Governor-General, by the Right Honourable the Secretary of State for India:—"My Lord,—Some time since the question as to the eligibility of officers of the East India Company's armies to hold the appointment of adjutant to a regiment of militia, was brought under the consideration of the Secretary of State for War; and it was stated in reply that on the first convenient occasion, care would be taken to provide for the admission of service in the East India Company's army as a qualification for this appointment. I have now the gratification of informing you that in an Act passed in the last session of Parliament, cap. 38, further amending the laws relating to the militia, a clause has been introduced assimilating the provisions of the laws of Great Britain and Ireland in regard to such appointments, and rendering service in the army of the East India Company, and in Her Majesty's Indian army, or in either of them, as equivalent to service in Her Majesty's regular army.—I have, &c., C. WOOD.

TESTIMONIAL TO LIEUTENANT-GENERAL SIR F. SMITH, M.P.—The *employés* in Chatham dockyard, in conjunction with the other civil servants of the Crown, and their friends at Chatham and the neighbourhood, having raised a subscription to present General Sir F. Smith, M.P. for Chatham, and Messrs. Martin and Kinglake, the members for Rochester, with a testimonial as an acknowledgement of their exertions in procuring the passing of the Civil Service Superannuation Bill, and its extension to the workmen and others employed in the royal dockyards, arrangements have been made by the Committee of Management for the public presentation of the testimonials in Chatham on Monday evening next. Each testimonial consists of a massive silver goblet, on which is engraved a suitable inscription, the whole standing on a block of polished oak formed out of one of the beams of the famous frigate, Shannon.

The correspondence which has lately taken place between the First Lord of the Admiralty and the Committee of Management of the School frigate Conway, at Liverpool, is worthy of attention. The Conway was obtained from the Government some time back by a number of Liverpool gentlemen, who associated themselves for the purpose of establishing a practical training-school for the merchant service. The principle upon which it is conducted is that of "giving afloat to boys of respectable parentage, desirous of adopting the sea as their profession, such an education as will particularly qualify them for and tend to elevate the mercantile marine of this country, and make them 'officers' and gentlemen." The committee lately applied to the Duke of Somerset for two naval cadetships annually for those of the pupils who might show themselves best qualified for the Royal Navy. The Duke declined, but he held out a hope that a system of competition for some naval cadetships was likely to come into existence, under which two pupils from the Conway would each year have an opportunity of presenting themselves as candidates.

During the last dozen years great and unquestionable changes for the better have taken place in this respect, but it scarcely requires to be proved that still further strides must be made before we ought to indulge in a complacent pause. The investigations into marine disasters conducted by the Board of Trade have become painfully frequent of late, and amid instances of coolness and heroism enough to confer honour on any service, we have sometimes to note examples of carelessness and inefficiency calling loudly for some measure of increased safety for the public. These investigations have been conducted with ability and judgment, and their results have doubtless had a wholesome effect, but we confess we do not look upon the suspension of a master's certificate as the most efficacious instrument of reform. Lessons taught in schools are preferable to those taught in penitentiaries, and penal measures can never effect the good that can be effected by sound and judicious early training. We therefore invite attention and support to the institution, which confers so much honour on Liverpool, and express our hope that we may see it imitated in the other great centres of maritime commerce throughout the United Kingdom. Why should not London, Southampton, Bristol, Hull, Glasgow, and Cork each have its *Conway?* We feel quite sure that a frigate adequate to the purpose would be given promptly and with pleasure by naval authorities, and we have no doubt the public would be speedily repaid with interest for its support.—*Globe.*

BRADBURY & EVANS, 11, Bouverie St., Fleet Street, E.C.

NEW FIRST-CLASS NEWSPAPER FOR THE COLONIES.

"THE ENGLISH MAIL," a Newspaper specially prepared for Circulation throughout Australia and New Zealand. Published in time for despatch by the Mails which leave England (*viâ* Marseilles) for Australia on the 16th of every month.

The want of a well-edited and first-class newspaper for the Australian colonies—one which shall give the news of the month, Domestic, Commercial, and Foreign, easily arranged in the order of its significance and occurrence, and clearly condensed for its ready perusal by colonists eager to know what is going on at home—has led to the starting of *The English Mail*.

To the Australian colonists *The English Mail* cannot fail to be of the greatest service. It claims to be their "reporter," as it were, to note and impartially record all events of public interest relating to Australia, occurring in this country. Special reports of Meetings of Banks, Mining and Insurance Companies, Postal Communication, Mail Service, &c., will find a place in its columns; and it enjoys the advantage of an exclusive connection with the "General Association for the Australian Colonies," established at the Australian and New Zealand Rooms, Jerusalem Coffee House, Cornhill.

Although *The English Mail* is specially intended for Australian circulation, yet owing to the general character and perfect arrangement of its Miscellaneous News, it has found readers elsewhere—in India, China, Canada, and the Cape of Good Hope, and even at home—and it may fairly be considered as *the Englishman's Newspaper Abroad.*

Arrangements have been made to ensure an ample distribution of the paper throughout the various townships in each of the Colonies, as well as at home; and with the assurance of an extensive circulation, it is confidently recommended as a most valuable medium for Advertisements, *Home* and *Colonial.* Price 8*d.* (Postage to Australia *viâ* Marseilles, 3*d.* extra).

SUBSCRIBERS' NAMES for copies of *The English Mail*, intended for transmission to Australia, must be sent not later than the day previous to publication; and must be accompanied by Postage Stamps for the full price of the paper (either with or without postage).

ADVERTISEMENTS will be received up to the evening of the 17th of each month. The charge for six lines is 3*s.* 6*d.*; 6*d.* a line after.

John Torr, Esq.

SECRETARY TO THE LONDON BOARD—John B. Johnston, Esq.
ACTUARY AND MANAGER TO THE COMPANY—Percy M. Dove, Esq.

The Royal Insurance Company is one of the largest Fire Offices in the kingdom.

At the annual meeting, held in August, the following highly satisfactory results were shown:—

FIRE DEPARTMENT.

The most gratifying proof of the expansion of the business is exhibited in the one following fact—that the increase alone of the last three years exceeds the entire business of some of the existing, and of many of the recently defunct Fire Insurance Companies of this kingdom.

The Premiums for the year 1855 being £130,080
While the Premiums for the year 1858 are .. 196,148
Showing an actual increase of 66,068

or upwards of 50 per cent. in three years.

The recent returns of duty made by Government for this latter year (1859), again show the Royal as more than maintaining the ratio of its increase as stated in former years. Only one among the London Insurance Offices exhibits an advance to the extent of one-half the increase of the Company, while all the others respectively fall far short of the moiety of its advance.

The above large increase of business has accrued from natural expansion, without the purchase of, or amalgamation with the business of any other office.

LIFE DEPARTMENT.

The amount of new life premiums received this year is by far the largest received in any similar period since the commencement of the business, and must far exceed the average of amount received by the most successful offices in the kingdom. The number of policies issued in the year was 832, the sum assured 387,752*l.* 6*s.* 8*d.*, and the premium 12,354*l.* 3*s.* 4*d.* These figures show a very rapid extension of business during the last 10 years. Thus:—

No. of Policies.	Sum Assured.	New Premiums.
1849 ..... 98	£48,764 17 0	£1,380 9 1
1850 ..... 190	95,050 9 11	2,827 4 7
1851 ..... 422	181,501 10 6	5,828 5 10
1854 ..... 408	161,848 13 4	4,691 16 0
1858 ..... 703	267,550 16 8	8,830 3 11
1859 ..... 832	387,752 6 8	12,354 3 4

The remarkable increase in the business of the last four years is mainly consequent upon the large bonus declared in 1855, which amounted to no less than 2*l.* per cent. per annum on the sums assured, and averaged 80 per cent. upon the premiums paid.

PERCY M. DOVE, Manager and Actuary.
JOHN B. JOHNSTON, Secretary to the London Board.

THE STANDARD LIFE ASSURANCE COMPANY. Constituted by Special Acts of Parliament. Established 1825.

GOVERNOR.

His Grace the Duke of BUCCLEUCH and QUEENSBERRY.

HEAD OFFICE—EDINBURGH, 3, George Street.
DUBLIN, 60, Upper Sackville Street.

ALLIANCE BRITISH AND FOREIGN LIFE AND FIRE ASSURANCE COMPANY. Bartholomew Lane, London, E.C. Established 1824. Branch Offices: Edinburgh, Ipswich, and Bury St. Edmunds. Capital, Five Millions sterling.

PRESIDENT.—Sir Moses Montefiore, Bart.

DIRECTORS.

Charles G. Barnett, Esq. | James Alexander, Esq.
George H. Barnett, Esq. | John Irving, Esq.
Charles Buxton, Esq., M.P. | Sampson Lucas, Esq.
Sir George Carroll. | Elliot Macnaghten, Esq.
Benjamin Cohen, Esq. | Thomas Masterman, Esq.
James Fletcher, Esq. | Jos. M. Montefiore, Esq.
Charles Gibbes, Esq. | Sir A. N. de Rothschild, Bart.
William Gladstone, Esq. | Lionel N. de Rothschild, Esq., M.P.
Samuel Gurney, Esq., M.P. | Oswald Smith, Esq.
James Helme, Esq. | Thomas Charles Smith, Esq.

Life Assurances are granted under an extensive variety of forms, with or without participation, and at moderate premiums; the rates for the Younger Ages being lower than those of many of the older and most respectable Offices.

Actual Service Risk within the United Kingdom in Volunteer Rifle and Artillery Corps, and in the Militia, is covered by the Company's Policies.

Fire Assurances both at home and abroad are accepted at very moderate premiums.

The Assured participate in the Fire Profits in respect of Policies in force for five complete years. The Return for the past Quinquennial period is in course of distribution. FRANCIS A. ENGELBACH, Actuary and Secretary.

PETER MORRISON, Managing Director.

10th January, 1860.

Parties desirous of Investing Money are requested to examine the plan of the BANK OF DEPOSIT.

Prospectuses and forms sent free on application.

ARMY AND NAVY PENSIONERS' EMPLOYMENT SOCIETY, 22, Parliament St., S.W.

PATRONS.

Her Majesty the QUEEN,
His Royal Highness the PRINCE CONSORT,
His Royal Highness General the DUKE OF CAMBRIDGE, K.G., Commanding-in-Chief.

Soon after the commencement of the late war with Russia, in order to alleviate the distress occasioned by the discharge of wounded soldiers and sailors, whose pensions were too small to enable them to live without employment of some kind, this Society was established.

Encouraged by success, it was determined to perpetuate and enlarge its sphere of utility, by keeping a registry office for the purpose of obtaining situations for pensioners from the army and navy who could be recommended by their officers.

More than 1,000 men have thus benefited during the last four years, at salaries varying from 30*l.* to 100*l.*, amounting in the aggregate to nearly 80,000*l* a year. In addition to this, by the Institution of the Commissionaires, a new mode of employment has been formed in London and the large towns in the kingdom, and a great number of the most helplessly wounded are thus enabled to procure for themselves a remunerative employment.

The original Committee (many of whom had not time to devote to the business of the Institution) have resigned their office into the hands of the present Council, who will act provisionally until next spring, when a General Meeting of the Subscribers will be held for the purpose of electing a Council and establishing the Society on a firm and permanent basis.

PROVISIONAL COUNCIL.

Colonel L. D. Williams, late 2nd Life Guards.
Colonel Wodehouse, C.B., Royal Artillery.
Captain Hon. F. Egerton, Royal Navy.
Lieut.-Colonel Hatton, late Grenadier Guards.
Lieut.-Colonel March, Royal Marines.
Captain Walter, late 8th Hussars.
Captain Hon. G. Wrottesley, Royal Engineers.
(To be completed to 12 by nomination of present Council.)

ROYAL NATIONAL LIFE-BOAT INSTITUTION.—The Committee of this Institution earnestly APPEAL to the Public for pecuniary ASSISTANCE, to aid them to meet the present heavy demands on the limited funds of the Society.

THOMAS BARING, Chairman.
THOMAS CHAPMAN, Deputy-Chairman.

No. 14, John Street, Adelphi, W.C.

Bankers—Messrs. Willis & Co., Coutts & Co., Herries & Co.

THOM'S ALMANAC AND OFFICIAL DIRECTORY OF THE UNITED KINGDOM, for 1860, is now ready, price 8*s.* 6*d.*, or with Dublin Post Office Directory, 15*s.* All the materials of which this publication is composed are collected from the most authentic sources expressly for this work, which contains a State and Civil Service Directory for Great Britain, Ireland, and the Colonies; Navy, Army, Militia, and Volunteer Directory.—Peerage, Baronetage, and Knightage.—Ecclesiastical Directory.—Medical Directory,—Law, Banking, and Postal Directories.—County and Borough Directory.—The Statistics of Great Britain and Ireland, &c., &c.

LONGMAN, GREEN, & Co., London; A. & C. BLACK, Edinburgh; ALEX. THOM & SONS, Dublin.

NEW LINE OF ROYAL MAIL STEAMERS FROM MILFORD HAVEN TO PORTUGAL AND THE BRAZILS.—The following first-class and powerful STEAM-SHIPS are appointed to perform a monthly service between MILFORD HAVEN and LISBON, Cape de Verds, Pernambuco, Bahia, and Rio de Janeiro:—

Ships.	Commanders.	Tons Register.	Effective Horse Power.
The Milford Haven	Capt. Champion	2,221	600
Portugal	Capt. Courtenay	2,261	600
Brazil	Capt. Eustace.	2,242	600

The next ship of this line, the Milford Haven, is intended to sail with goods and passengers on Jan. 24, leaving Lisbon Feb. 1, and Rio de Janeiro about the end of February on her return voyage. These splendid ships are fitted up with every consideration for the convenience and comfort of passengers. They will carry the mails from Portugal to the Brazils, and, sailing under the Portuguese flag offer important advantages in the saving of duties at Lisbon. Through rates will be established from and to all the principal towns in the kingdom, and return tickets granted on liberal terms. All further information as to rates of freight and passage, dates of sailing, &c., may be obtained on application to Messrs. FORD & JACKSON, managers, Milford Haven; at the booking office, 33, Regent Circus, Piccadilly; and to JOHN W. WILSON, Esq., general manager, 40, Cannon Street, London, E.C. Passengers may proceed by steamer from Rio de Janeiro to Montevideo and Buenos Ayres.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., via EGYPT. The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.—For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

CAPTAIN ARMINE WODEHOUSE, R.N., deceased. Pursuant to an Act of Parliament made and passed in the 22nd and 23rd years of the reign of Her present Majesty, intituled "An Act to further Amend the Law of Property and to Relieve Trustees," NOTICE IS HEREBY GIVEN, that the Creditors of Captain ARMINE WODEHOUSE, R.N., late of Her Majesty's Ship "Cormorant," and of No. 38, Bury Street, St. James's, in the County of Middlesex, who died on the 19th day of November, 1859, and whose will was proved in the Principal Registry of Her Majesty's Court of Probate by Marsham Elwin, Esq., of Lincoln's Inn, in the said County, Barrister-at-Law, the Sole Executor named in the said Will; and all other persons claiming Debts or Liabilities affecting the Estate of the said Captain Armine Wodehouse, deceased, are to send in to the said Executor, at his aforesaid residence, or to his Solicitors, Messrs Bircham, Dalrymple & Drake, of 46, Parliament Street, in the said County, their claims against the Estate of the said Testator, on or before the 1st day of MARCH, 1860, at the expiration of which time the said Executor will distribute the whole of the Assets of the Testator amongst the parties entitled thereto, having regard to the claims of which he shall then have notice. Dated this 7th day of January, 1860. BIRCHAM, DALRYMPLE, & DRAKE, 46, Parliament Street, London, S.W., Solicitors for the said Marsham Elwin, the Executor.

THE GORGET SHIRT, Jos. FRYER & Co., Patentees. 6 for 42*s.* Next door to the Haymarket Theatre, S.W.

Price Lists free on application.

Address—ANTHONY BROUGH, Wine and Spirit Importer, 29, Strand, London, W.C.

ELKINGTON & CO. desire respectfully to call the attention of Regimental Messes requiring PLATE to their Manufactures, which may be obtained in great variety from their establishments.

LONDON: 22, Regent St., W., and 45, Moorgate St., E.C.
DUBLIN: College Green.
LIVERPOOL: Church Street.

Manufactory and Show Rooms, Newhall Street, Birmingham.

Estimates, Drawings, and Prices sent free by post. Replating and Gilding as usual.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

22, ARGYLL STREET, REGENT STREET, LONDON, W.

S. RUBENSTEIN, Manufacturing Goldsmith and Jeweller, informs his numerous connection, Military and others, that he has removed from Dublin to London.

S. RUBENSTEIN, in acknowledging the patronage he has received during twenty-five years, respectfully intimates to those who may favour him with their commands, that they may depend upon the same strict integrity in business as hitherto.

22, Argyll Street, Regent Street, London, W.

THE NEW INDIAN MUTINY MEDALS.

MESSRS. E. & E. EMANUEL, Goldsmiths to the Queen, Portsea and Portsmouth, have the honour to announce that they are prepared to supply Miniature Copies of the above, with Bars and Brooch complete, registered and free by post; as also the New Miniature Medal for Persia, and the Miniatures to every British and Foreign Order and Medal.

Portsmouth, January 2, 1860.

PRIZE MEDAL FOR VOLUNTEER RIFLE CORPS.

T. R. PINCHES & CO., of 27, Oxenden Street, London, S.W., have just completed dies suitable for the above, an impression of which in white metal can be had (with prices for the same in Gold and Silver), and forwarded to any part of the United Kingdom post free, upon application to T. R. PINCHES & Co., with a remittance for 2*s.* 6*d.* in postage stamps or otherwise.

FOR CORRECT FAMILY ARMS, CREST, OR PEDIGREE, send name and county and 7*s.* 6*d.* to J. LOCK'S City Heraldic Office, 2, Old Jewry, London, E.C., and in a few days you will receive a neat drawing of your Arms, &c., in Heraldic Colours, to be engraved on Seal, Ring, or Family Plate. On y parle Français, Italien, Allemand, et Hollandais. Wedding orders executed. Stamped envelopes and paper. Embossing presses and dies.

CONSUMPTION AND ASTHMA CURED.—Dr. H. JAMES discovered, while in the East Indies, a Certain Cure for Consumption, Asthma, Bronchitis, Coughs, Colds, and General Debility. The remedy was discovered by him when his only child, a daughter, was given up to die. His child was cured, and is now alive and well. Desirous of benefiting his fellow creatures, he will send post free to those who wish it, the recipe, containing full directions for making and successfully using this remedy, on receipt of their names, with stamped envelope for return postage.—Address, O. P. BROWN, 14, Cecil Street, Strand, W.C.

TEETH REPLACED, DECAYED TEETH RESTORED.—Mr. A. ESKELL, Surgeon Dentist, supplies patented Incorrodible Teeth without extracting Teeth or stumps, on his never-failing and painless principle of Self-adhesion; rendering detection impossible. Articulation and mastication guaranteed. Decayed Teeth rendered insensible to pain, and stopped with his Osteoplastic Enamel—of the same colour as the Teeth, permanently useful, and lasting unchanged for years, (a most important discovery in Dental Science!) Loose Teeth fastened, &c. Hours, Ten to Six. Consultation free. Charges strictly moderate. 314, Regent Street (opposite the Polytechnic), W., and Bennett's Hill, Birmingham.

V. R.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.—HER MAJESTY'S GOVERNMENT having, with the sanction of Parliament, determined on establishing a Reserve Volunteer Force of Seamen trained to the Use of Arms:

THIS IS TO GIVE NOTICE,

That any Seaman possessing the following qualifications may be inrolled as a Royal Naval Volunteer in the Reserve Force, and will thereupon be entitled to the advantages and be subject to the obligations mentioned below:—

QUALIFICATIONS FOR THE RESERVE.

1. A Volunteer must be a British subject:
2. He must be free from infirmity:
3. He must not be over thirty-five years of age:
4. He must within the ten years previous to his joining the Reserve have been five years at sea, one year of that time as an A.B.

ADVANTAGES OF THE RESERVE.

1. A Volunteer will at once receive an annual payment or retainer of 6*l.*, payable quarterly:
2. He will, if he fulfils his obligations and is in the Reserve the requisite time, receive a pension of not less than 12*l.* a year whenever he becomes incapacitated from earning a livelihood, or at sixty years of age if not previously incapacitated:
3. He may elect either to take the whole pension himself, or to take a smaller pension for himself during his life, and to allow his wife a pension after his death, for the remainder of her life:
4. He will not, on account of belonging to the Reserve, forfeit any interest in any Friendly or Benefit Society:
5. His travelling expenses, to and from the place of drill will, when necessary, be provided:
6. He will, during drill, receive, in addition to the retaining fee, the same pay, victualling, and allowances as a seaman of the fleet, according to his rating:
7. He will, if called out on actual service, receive the same pay, allowances, and victuals, and have the same prospect of promotion and prize money, as a continuous service seaman of the fleet, according to his rating, and he will on joining receive the same clothing, bedding, and mess traps:
8. He will, if wounded or injured in actual service, receive the same pension as a seaman in the Navy of the same rating:
9. He will be eligible to the Coast Guard Service and Greenwich Hospital:
10. He may quit the Reserve, if not at the time called out for actual service, at the end of every five years; he may also quit it, when not called out, on paying back the retainers he has received; or, without payment, if he passes an examination as a Master or Mate, and obtains bonâ fide employment as Master or Mate.

OBLIGATIONS OF THE RESERVE.

1. A Volunteer must attend drill for twenty-eight days each year; he may do so, so far as the convenience of the public service will permit, at a time and place convenient to himself; but he cannot in any case take less than seven days' drill at any one time:
2. He must not, without special permission, proceed on a voyage that will occupy more than six months:
3. He must appear before some Shipping Master once in every six months, unless he has leave to be abroad longer, and he must report every change of residence, and employment:
4. In order to earn a Pension he must continue in the Reserve as long as he is physically competent to serve, and he must also have been in the force fifteen years if engaged above thirty, or twenty years if engaged under thirty. In reckoning this time actual service in the fleet will count double:
5. Volunteers may be called upon for actual service in the Navy by Royal Proclamation. It is intended to exercise this power only when an emergency requires a sudden increase in the Naval Force of the country:
6. A Volunteer may in the first instance be called out for three years. If there is then actual war, and he is then serving in one of Her Majesty's ships, he may be required to serve for two years longer; but for the additional two years he will receive 2*d.* a day additional pay:
7. Volunteers when on drill or actual service will be subject to Naval Discipline:
8. A Volunteer who fails to fulfil the obligations of the Reserve will forfeit his claim to Retainer and Pension, and if he fails to join when called out for actual service may be treated as a Straggler or Deserter from the Navy.

The Inrolment will commence on 1st January, 1860.

Full Information and detailed conditions may be obtained on application to the Shipping Master at any Port in the United Kingdom, or to the Officers of Customs in the Channel Islands and Isle of Man.

V. R.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.—LEAVE FOR LONG VOYAGES.—Special Leave for Voyages exceeding Six Months will be granted to ALL VOLUNTEERS on the following Conditions:—

1. The Leave is to be for one ship, and for one voyage only at a time, and to be renewed for each voyage. The ports or countries at which the ship is to touch must be all specified, or if any of these are not specified the voyage must be limited by the articles to twelve months.
2. The Volunteer must have completed his twenty-eight days' drill for the year before the Leave will be given.
3. On an emergency the Reserve may be called out for service at home or *abroad*. If the Volunteer is then abroad, he must, if summoned, join any of H. M. ships abroad; under the same penalties, in case of refusal, as in case of refusal to join in the United Kingdom.
4. The arrears of retainer due will be paid on the Volunteer's return in the ship for which Leave is given.
5. The Admiralty reserve power to withhold this Leave if at any time on an emergency the Volunteers are required for the defence of the country. They also reserve power to withhold the Leave at the end of each Volunteer's first five years of service, when he may, if he pleases, quit the force.
6. Subject to these reservations, it is the intention of the Admiralty to grant Leave upon the above conditions for the first five years of the service of each Volunteer who joins the Reserve under the present Regulations.

AGE OF ADMISSION. During the year 1860 the age of admission will be extended from 35 to 40.

*** *For further Information apply to a Shipping Master.*

Board of Trade,
Whitehall, S.W., 12th December, 1859.

SERGEANT-MAJOR.—The Committee of the SUNDERLAND VOLUNTEER CORPS are prepared to receive applications for the appointment of a SERGEANT-MAJOR to the Corps. The applicants to give references, full particulars of previous service, and to state the terms required.

ARTHUR W. DIXON, Secretary.

2, Sunniside, Sunderland.

V. R.

ARMY RESERVE FORCE.—Her Majesty's Government having, with the sanction of Parliament, determined on establishing an Army Reserve Force, THIS IS TO GIVE NOTICE, that any person possessing the following qualifications may, if he is not a pensioner, be ENROLLED in this force, and will thereupon be entitled to the advantages and be subject to the obligations after-mentioned:—

QUALIFICATIONS FOR THE RESERVE.

1. Every volunteer for this force must have completed the period for which he originally enlisted in the army, or if discharged previously, either by purchase or in any other way, he must have completed a service of at least five years.
2. He must have been discharged within five years preceding the date of his enrolment as a volunteer.
3. He must be resident within the limits of the pension district in which he is enrolled.
4. He must be free from any bodily infirmity likely to disqualify him for active service.
5. He must not have been discharged for misconduct.

ADVANTAGES OF THE RESERVE.

Every volunteer will receive—

1. The sum of 4*l.* annually, by equal quarterly payments, one of which may be at the training period.
2. The pay and allowances of his rank, according to the rates usual in infantry, during any period for which he may be called out, together with the good-conduct pay to which he was entitled when he left his regiment.
3. One penny per mile to cover his travelling expenses, by rail or otherwise, to and from the place of assembly.
4. A suit of clothing once in seven years, or oftener, if on any occasion he be kept up permanently.
5. If wounded or injured in actual service, the same rate of pension as for corresponding ranks in the Line.
6. If not pensioned for wounds or injuries, he may by service and good conduct attain a pension not exceeding 10*d.* a day for a private, 1*s.* for a corporal, and 1*s.* 3*d.* for a sergeant or other superior non-commissioned officer, by reckoning two years' service in the Reserve as one towards the completion of the period for which a service pension may be awarded by Her Majesty's Regulations.

OBLIGATIONS OF THE RESERVE FORCE.

1. Every volunteer for this Force must be attested to serve for such period as may be wanting to complete 21 years' service if he originally enlisted in Infantry; or 24 if he enlisted in Cavalry, Artillery, or Engineers, reckoning two years of such service as one towards the attainment of these periods.
2. He must attend drill for 12 days in each year with a regiment, depôt, or the pensioner force of the district, as may be directed.
3. He must not change his residence in the district without giving due notice.
4. He must appear once a quarter before the staff officer of pensioners of the district in which he is enrolled to receive his quarterly allowance.
5. If called out for permanent duty in case of war, he must join a regiment of the line or depôt as may be directed, and continue to serve in the United Kingdom while required.
6. Upon all such occasions, or when called out for exercise, he shall be liable to the Articles of War, and be under the command of the military authorities.
7. When his pension has been attained, he shall, up to the age of 55, be liable to serve with the enrolled pensioners, on the same conditions as are laid down in the Acts and Warrants for the regulation of that Force.
8. If he fail to fulfil these obligations, he shall be liable to forfeit all the advantages here enumerated, in addition to any other punishment which a Court-Martial may award.

CAMBRIDGE UNIVERSITY RIFLE VOLUNTEERS—HONORARY MEMBERS.—Any Member of the University of Cambridge (whether resident or not) may become an Honorary Member of the Corps and be permitted to wear the uniform by payment of an entrance subscription of 10*s.* 6*d.*, and an annual subscription of 1*l.* 1*s.*; or an Honorary Life Member by the payment of 5*l.* 5*s.*

JAMES BAKER, Major,
Commanding Cambridge University Rifle Volunteers.
Magdalen College, Cambridge. Jan. 10, 1860.

CAMBRIDGE UNIVERSITY RIFLE VOLUNTEERS.—WANTED, A Regimental SERGEANT-MAJOR, Salary, 50*l.* a-year and a House. The applicant *must* have held that appointment in the line. A Rifle or Light Infantry Regiment preferred. Apply by letter, giving references, and stating age, time of service, &c., to MAJOR BAKER, Cambridge University Volunteers, Magdalen College, Cambridge. Jan. 10, 1860.

WEST MIDDLESEX RIFLES. — Head Quarters, Lord's Cricket Ground.—Drill at Head Quarters every Tuesday, 7 P.M.; Wednesday, 5 P.M.; Friday, 7 P.M.; Saturday, 5 P.M. The Secretary will be in attendance to give every information to gentlemen wishing to join. Entrance fee, 10*s.*; Annual Subscription, 1*l.* 1*s.*; Honorary Member's Annual Subscription, 2*l.* 2*s.*; or Life Subscription, 10*l.* 10*s.* The ammunition is provided for the members from the funds of the corps, free of extra expense. The Book of Rules, price 4*d.*, can be obtained of the Secretary or the Drill Instructor at head quarters. Subscriptions and Donations received by the Bankers, Sir S. SCOTT, Bart., & Co., 1, Cavendish Square, W.; or the Secretary, Mr. G. MARRINER, 33, Welbeck Street, W.

SOUTH MIDDLESEX RIFLE VOLUNTEERS.—A VOLUNTEER BAND is forming for this important Battalion Regiment. Subscriptions and Donations are earnestly requested, and gentlemen desirous of joining or assisting are requested to address the Secretary of the Band Committee, Beaufort House, Walham Green, S.W. RANELAGH, Commandant.

VICTORIA RIFLES.—The REGIMENTAL BALL, under the patronage of his Grace the DUKE OF WELLINGTON, Lieutenant-Colonel-Commandant, will take place on THURSDAY, the 26th Instant, at St. James's Hall, Regent Street, W. Application for Tickets to be made to Members of the Corps, or to Lieutenant COLLINS, Honorary Secretary of the Ball Committee. Members of Volunteer Corps to attend in full dress uniform. Swords not to be worn.
Orderly Room, Kilburn, N.W. January 10, 1860.

THE LONDON RIFLE BRIGADE BAND of 21 performers is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new Rifle Bugle, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the contractor, at his manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail depôt, 21, Titchborne Street, Regent Street, W.

TO MEDICAL GENTLEMEN retiring from the Army or Navy (Single). A WIDOW LADY is seeking the above to occupy her Apartments, where there is a very good opening for a Practice. The Business is a Chemist's, established in 1806, and carried on many years by her late husband.—Apply, by letter only, to ALPHA, T. W. WOODS, Optician, Cheapside, E.C.

NAVAL CADETS.

ROYAL NAVAL ESTABLISHMENT.
EASTERN PARADE, SOUTHSEA.

Conducted by Mr. THOMAS EASTMAN, R.N.

Mr. EASTMAN offers advantages which cannot be obtained in Establishments for general education, since he receives Naval Pupils only, who are instructed in the course exactly required.

Pupils are taught Steam and Rigging, the former from a working model of a marine steam engine; the latter from a model of a line-of-battle-ship, 24 feet in length.

346 Gentlemen have passed as Naval Cadets, and nearly 250 as Marine Cadets, &c.

The following Gentlemen have passed as Naval Cadets from this Establishment during the past year:—

Mr. H. P. Wylly	Mr. E. S. Nuthall	Mr. A. W. Brabazon
„ R. T. Bruce	„ J. H. O'Brien	„ E. G. F. Law
„ J.H. Bainbridge	„ J. Bedingfeld	„ J. Hazel
„ W. E. Heathcote	„ F. G. Powell	„ J. Needham
„ F. W. Jenkins	„ W. H. Roberts	„ H. W. Gibson
„ J. Evans	„ C. G. Hunt	„ M. W. Abbot
„ N. Byng	„ H. E. Walters	„ J. L. Smith
„ J. S. Alexander	„ A. P. Pascoe	„ L. W. Hyman
„ G. A. Ellis	„ H. Pugh	„ H. M. Milman
„ K. Garnier	„ W. F. E. Freeland	„ C. G. St. J. Hough
„ T. L. Mallory	„ R. R. Jaffray	„ E. T. Dugdale
„ T. S. Hoghton	Lord Albert Clinton	„ F. Coddington
„ A. R. Boddam	Mr. S. J. Weld	„ C. E. Gissing
„ J. D. Maycock	„ R. G. Fairfax	„ G. L. Lindeman
„ H. G. Giffum	„ A. Hutchinson	„ A. E. Bancroft
„ M. C. Osborn	„ C. W. Atkinson	„ A. H. Campbell

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—The constant success of the Pupils of this Establishment at the Examinations for the Line, Sandhurst, &c., is a guarantee of the excellence of the studies there pursued. Every candidate sent to the Woolwich competitive examination has obtained admission at his first trial. The number of Officers of all ranks who come to read for the Staff continues to increase. Six of them entered the Staff College this year. Apply to Captain LENDY, Sunbury, S.W.

ST. JOHN'S COLLEGE, Charlton Grove. —Old Charlton (near Blackheath), Kent (late St. John's Hall, Kilburn).

Principal:—The REV. A. F. THOMSON, B.A., Oxon.

This Military, Naval, and Civil Engineering College will be ready for the pupils *on and after January* 10, 1860. There being *only three vacancies* at present, early application for Prospectuses, &c., must be made at the College, or to the Agents; PROFESSOR HEINE, 2, Duke Street, Adelphi, W.C.; and MESSRS. KIRKMAN, 8, Clement's Lane, City, E.C.

The College is close to the Charlton Station of the North Kent Railway.

NAVAL CADETS.

Reduction of Examination and Age. New Regulations for Entry into Her Majesty's Service.

MESSRS. GALT & CO., Portsmouth, will be glad to forward, on application, the New Admiralty Regulations and other information necessary for passing the R.N. College.

Outfitters by appointment to H.S.H. the Prince of Leiningen.

NAVAL CADETS.—Of the 50 successful Candidates who passed at the Royal Naval College, Portsmouth, on the 13th December, sixteen were from the Establishment at NORTH GROVE HOUSE, Southsea, viz., Messrs. Moysey, Dicken, Eyres, Mandeville, Clark, Gatakler, Steavenson, Lang, English, Tyler, Greenway, Ranking, Wood, Burt, Brereton, Wallace. 11 Cadets passed from the Establishment in September, and 11 others last June.

N.B. Twenty candidates out of seventy were rejected in December, 1859.

W. JOHNSON, Naval Instructor; W. BELL, Chaplain;
J. A. BURROW, Chaplain and Naval Instructor.

COMPETITIVE EXAMINATIONS for Royal Engineers, Royal Artillery, Royal Indian Engineers and Artillery, Staff Appointments, &c.—Mr. J. F. HEATHER, M.A.—who has been for the last twenty years Mathematical Master at the Royal Military Academy, Woolwich, having left that Institution on the 31st ult.—is forming an Establishment for the complete Preparation of Gentlemen for these Competitive Examinations, or for direct admission to appointments in the Line.

For further particulars apply to Mr. J. F. HEATHER, 1, Wellington Road, Charlton, S.E. Jan. 5th, 1860.

HANWELL COLLEGE, Middlesex, W., is still retaining its high character; it has long been known as one of the most successful Institutions in the kingdom. A Prospectus will be forwarded on application to the Rev. Dr. EMERTON, Principal.

"HANWELL COLLEGE, MIDDLESEX, is still retaining its high character."—*United Service Gazette.*

Prospectus will be forwarded on application to the Rev. Dr. EMERTON, Principal.

W. R. LOOKER & Co., ARMY, NAVY, EAST INDIA, AND COLONIAL AGENTS.

Full and Half Pay, Pensions, Dividends, &c., received and remitted.

Supplies of all kinds purchased, insured, and forwarded by overland or long sea routes to all parts of the world.

Life and other assurances effected free of charge for Agency.

Passages secured, free of charge, and baggage forwarded.

Letters, Newspapers, Parcels, &c., taken charge of and forwarded.

12, Pall Mall East, London, S.W.

HART & SON, ECCLESIASTICAL AND DOMESTIC METAL WORKERS.

CORONÆ, GAS STANDARDS, LAMPS, CANDELABRA, GATES, VANES, TOMB RAILING, MEMORIAL BRASSES, FONT COVERS, ALMSBOXES, &c., &c.

Plans and Estimates given for Lighting and Warming Churches, Schools, &c.

Works and Counting House, 53 to 58, Wych Street, Strand, W.C.; Show Rooms also 20, Cockspur Street, Pall Mall, S.W.

MILITARY DECORATIONS, WAR MEDALS, &c.

ORDER OF THE BATH, LEGION D'HONNEUR, and the MEDJIDIE, in all the different Classes and Sizes.

MINIATURE MEDALS, consisting of CRIMEAN, FRENCH, SARDINIAN, CAFFRE, and the whole Indian Series issued to the present time.

Clasps, Bars, Ribbons, &c., and Masonic Jewels of all kinds, manufactured and supplied by

PHILLIPS BROTHERS, Goldsmiths, &c., 22, Cockspur Street, London, S.W.

THE ARMY PRINTING OFFICE, 102 and 114, High Street, Portsmouth.—HENRY LEWIS. Company Ledgers, Pay Books, Order and Day Books, Defaulter Sheets, District and Garrison Forms.

FLORENCE NIGHTINGALE & THE LATE WAR.

MESSRS. THOMAS AGNEW & SONS, Publishers, Exchange Street, Manchester, and Exchange, Liverpool, beg to announce that they are now preparing for publication the exquisite engraving, by S. BELLIN, Esq., of "FLORENCE NIGHTINGALE RECEIVING THE SICK AND WOUNDED AT SCUTARI," representing one of the most interesting episodes of the late War.

"HER MAJESTY'S FIRST VISIT TO THE WOUNDED SOLDIERS ON THEIR RETURN FROM THE CRIMEA." The few remaining Copies of this important Engraving, by T. O. BARLOW, Esq., may now be had on application to the publishers.

THOMAS AGNEW & SONS, Publishers and General Dealers in Works of Art, Exchange Street, Manchester, and Exchange, Liverpool.

THE ALLIED GENERALS BEFORE SEBASTOPOL.—The subscribers to this Engraving are informed that the prints are now ready for delivery, and that a great variety of frames made purposely for it may be seen at Messrs. LLOYD BROS. & Co., 96, Gracechurch Street, City, E.C.

EASTWARD HO! is at Messrs. COOKE & SONS, Warwick.

STEREOSCOPIC SLIDES FROM LIFE, from Three Shillings each. Descriptive Catalogues sent on receipt of two stamps. Address DELPLAUGUE & Co., Photographers, Kentish Town, London, N.W.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, With Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c.

20, Charing Cross, S.W.

CHINESE GONGS.—Just received from our special buyer at Canton, 100 powerful and richtoned GONGS, suitable for dinner and alarm bells, price from 40*s.* to 8*l.* each; also lanterns, screens, chessmen, counters, Chyloong's finest preserved ginger and oranges, &c. At HEWETT'S large Chinese Warehouse, 18, Fenchurch Street, E.C., and Baker Street Bazaar, W.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLF & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Old Bond Street, W., one door from Piccadilly.

COLT'S PATENT REPEATING FIREARMS.

RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

*** "COLT'S Pistol is the best repeating arm that we have."—CHARLES LANCASTER, before Government Small Arms Committee.

CAUTION.—Notice is hereby given, that certain FOREIGN FABRICANTS of REVOLVERS, attending more to cheapness of manufacture than to quality, and the rage of under-selling each other, have thereby deteriorated the article; the importation and sale of all such made rifles, carbines, revolvers, &c., bearing the patentee's trade marks and others, stamped "Colt Breveté," "Colt's Patent," &c., is illegal and forbidden. Beware of mongrel imitations and patent infringements. The genuine Pistols are stamped on the barrel, "Address, Col. Colt, London," and bear the British proof mark on the barrel and cylinder between each nipple; and can be had, in any quantity, on favourable terms, of the patentee and manufacturer,

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.

Apply to B. DELACOUR, 327, High Street, Chatham.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especiallly for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. CARR, Chemist, 171, High Holborn, London, W.C., in bottles, 1*s.* each.

THE GUINEA COAL COMPANY'S WALLSEND COALS, One Guinea per ton "All the Year Round."—Address, HORATIO MORGAN, 17, Wellington Street North, Strand, W.C. (next door to the Office of this Paper).

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street North, Strand, in the county of Middlesex.—SATURDAY, January 14, 1860.

THE position of the Indian army is one of the most painful in which any body of men can be placed. It is the cause of Imperial embarrassment as well as of local disturbance and anxiety. Nor can we help regretting that the transfer of the actual government of India to the Crown was not accompanied by some measure which would have obviated the inconveniences which arise from the present state of the question. The mutiny of 1857 originated a difficulty which has continued to distract us from the calm contemplation of our Indian relations up to 1860. But we are informed that after much leverage and diverse action, from various quarters, the Government has at last come to a solution, which we can scarcely hope to see received by all those concerned, with an equal or unanimous satisfaction. Let us trust, however, that whatever the measure may be, it will deal largely and liberally with the vested interests — ay, with the *futures*—of a gallant and devoted body of English gentlemen. Certain are we, that no Royal officer, notwithstanding past slights and small jealousies or professional disputes, will grudge the Indian officer, by whose side he has served, such just—if not generous—treatment and consideration as shall in some measure reconcile him to the blow which has fallen upon the fair fabric of his hopes, and dashed it to pieces; or that in event of amalgamation he will envy him the fulfilment of the implied promises of the State when he entered into its service in India.

The question should be considered without reference to patronage at home or abroad. The Indian army has produced great men in every department in India, and it may without disparagement to the Royal army be doubted whether, in case of the delocalisation of the former force, officers who have not been taught to look forward to our Oriental Empire as the scene of all their labours, and the source of all their honours and rewards, will display the same administrative ability and produce the same class of politicians and statesmen—even of Indian *soldiers*—as the organisation, the sharp and shattered atoms of which we are now trying to re-adjust, or to fit into the unwilling nooks of a foreign body. It may be said that the proper duty of an army is to fight, and that it ought not to be considered as a nursery for diplomatists or politicians; but in India it was formerly necessary—it is less so, but in some degree necessary now—that every soldier at the head of a station or of a column, should possess some of the tact and knowledge and sagacity of a political ruler; and it would be hard to prove that in developing these qualities the Indian army lost sight of pure military education. We may admit that the Sepoy regiments were not what they ought to have been—we may even go so far as to accept the assertions of Royal officers, that the European regiments in the Company's service were not under such absolute control and nice steadiness of discipline as the Queen's; but the first admission would be true of any regiments so composed and officered by any Europeans whatever; as to the second, it is believed that a Queen's regiment is by no means better, as a general rule, for a term of service in the East. Without discussing these or kindred questions fully, it is at all events incontestable that we have no right to turn round on those officers and lay the blame of the mutiny at their doors. Least of all can those in high places do so, who raised the cry during the last war of—"It's the system—It's the system does it all!" Our attention in reference to this subject has been directed to an able pamphlet entitled, "The Amalgamation of the Indian Army with that of Great Britain.—A Letter to Sir George Wetherall, K. C. B., &c.," because it is understood that the views it enunciates have received not only the approbation of that veteran officer, whose Indian experience is not valueless, though it may be somewhat prejudiced, but the adhesion of personages of higher station and larger authority. The writer, in order to render his propositions palatable, offers to the Indian army accelerated promotion and improved position—to the Royal army a new field (for which they may not be prodigiously anxious or thankful), and increased patronage (for which they will assuredly feel proper gratitude); and he purposes to effect this by an amalgamation, of which, for the purposes of examination and discussion in these columns, we shall now proceed to give our readers the heads. We may premise that as a chemical process amalgamation usually destroys the characteristics of the bodies in which it is practised. Copper and zinc it is true become brass, but mercury and gold present a very unattractive, lustreless, inactive combination. The author does not concur in the opinion generally expressed in favour of a native army of regulars, but he yields to it on the condition that the next levies be not permitted to exceed in strength the old standard of 74 regiments of infantry, 83,000 strong. He well puts the situation before us:

"To-day (1859) the officers of the first army, and the Sepoys of the second serve together, without apparently belonging to the same service; for whilst the former are borne upon the rolls of regiments which have no existence, the latter are separately returned with the levy or corps to which they may belong. Disunion, indifference, and doubt, are the natural results of a system of which military experience offers no parallel, and whatever we may admit the errors of our military system to have been in 1857, we find them aggravated rather than diminished at the close of 1859."

Having got his 74 regiments, he proposes to transfer the officers of the late Bengal army bodily and by regiments to their new corps; to the 4 Sikh infantry, 5 Sikh battalions, 25 regiments Punjab infantry, 3 regiments Goorkhas, 1 Khelat-i-Gilzie. These 38 battalions, with the addition of 32 regiments formed out of the police levies, and 4 already officered and standing fast, would absorb the officers of 70 defunct regiments, and give them at once position and standing, a certain number of local regiments being retained, such as the Guides, Assam Light Infantry, to be officered as before, whilst the 27,000 irregulars disappear from the muster-rolls. Adopting the irrefragable conclusion that native artillery is an impossibility, it is next proposed to transfer the European batteries and troops to the regiment of artillery, the officers standing according to date of commission, with a large brevet to balance the different rates of promotion. The engineers are to be treated in the same way. The medical service in somewhat a similar fashion. For the cavalry, Captain Osborn proposes the draughting back the officers of the *late* European Cavalry to their old regiments, and then putting them by regiments to 10 regiments of irregular horse, 5000 strong. But the boldest of his propositions is to amalgamate the forces of the three presidencies, to break India into three military divisions, with a general officer to each, under the supreme command of an assistant-commander-in-chief, the north division being held by 25,000 British infantry, 30,000 native infantry, 30,000 military police (armed with swords), 2000 British cavalry, 5000 irregulars, 3 brigades horse artillery, 6 battalions foot artillery. The central division by 10,000 British, 10,000 native infantry, 15,000 military police, 1000 British cavalry, 3000 irregulars, 2 brigades horse artillery, 2 battalions foot artillery. South division, the same force as above, only that the military police are reduced to 10,000, and the irregulars to 2000 strong. This is, Captain Osborn admits, "brute force," and he says he knows no other words to apply to it. The increase of 13,000 or 14,000 men to the strength of our usual establishment of British soldiers is not so great as that contemplated by General Mansfield and others, who considered that not less than 80,000 or 85,000 would be necessary, and it is attended by a reduction of nearly 100,000 native bayonets. We are glad to find that, concurrently with these bold strokes, the author points out the propriety of a free use of the Pension List, and he then recommends that all officers of the Company's Army before the proclamation of 1858, shall have the option of retiring upon the half or full pay of their rank, permitting each to count an extra year's service for every 5 years' actual service in India. When this is done, an army is formed with freedom of exchange from line or cavalry into Indian infantry or irregulars, promotion to go by purchase, a colonial allowance raising the pay to nearly the old rates under the Company; the Military and Orphan Funds to be formed into the nucleus of one for the whole army, guaranteeing present payment, refunding all subscriptions to married men since their marriage, and abolishing charities. With many of the minor details of the plan we have not time or space to present our readers now, but we will discuss them next week; and, meantime, seeing some grave objections, we confess that if the principle be adopted, the way in which it is carried out is by no means unworthy of consideration. With one important sentence we conclude. "It is of the last importance, if the Service is to be worth anything, that Her Majesty's regiments in India be not permitted to become the *pis aller* and convenience of the Army at large." We wish the writer had shown us more clearly how this is *not* to be. Of course the European regiments are to be draughted into the Line, and the glories of Madras, Bombay, and Bengal Fusiliers to be absorbed by the Royal regiments to which they shall be appropriated.

ADMIRAL BOWLES AND THE ADMIRALTY.

A great portion of the correspondence between the Board of Admiralty and Admiral Bowles, Commander-in Chief at Portsmouth, arising out of the *emeute* on board the Princess Royal, has already appeared in print.

It is known that the gallant admiral's resignation was accepted, and the following letter terminated the correspondence:—

"Victory, Portsmouth Harbour, Dec. 31, 1859.

"Sir,—I have received without any surprise or regret your letter of yesterday's date.

"I was fully aware that I exposed myself to a considerable risk in publishing the papers in question; but the outcry against me continued to increase to such an extent, and the unfavourable impression was becoming so fixed and indelible, that (in the absence of the slightest expression of their Lordships' approbation, which appeared to be studiously withheld) I yielded to the urgent solicitations of my friends, and published the narrative in question.

"The effect it has produced exceeds my most sanguine expectations; and preferring my honour and character far beyond all other considerations, I relinquish my command without reluctance, in the earnest hope that my last act—the decisive suppression of one of the mutinous outbreaks which have, unhappily, become too frequent of late in the fleet—may be attended with those beneficial effects it ought to produce.

"I am much obliged to their Lordships for their wish to consult, as far as possible, my convenience with respect to the time of my supercession.

"I beg that no personal consideration may be allowed to interfere with the public service, but otherwise, as at this season of the year my removal from this house cannot be very speedily carried on, and as I shall have completed my twelvemonth here on the 1st of March, I should propose that day for the termination of my command. I have, &c.,

"WILLIAM BOWLES, Admiral.

"The Secretary of the Admiralty."

THE ORDER OF THE BATH.

On Thursday Her Majesty invested the following with the insignia of the Most Hon. Order of the Bath at Windsor:—

Colonel David Edward Wood, of the Royal Artillery, was invested by the Queen with the insignia of a Knight Commander of the order.

The following received from Her Majesty the insignia of their dignity in the third class of the order, viz.:—

Colonel Julius Augustus Robert Raines, 95th Regiment.
Colonel William Parke, 72nd Regiment.
Colonel Henry Errington Longden, 10th Regiment.
Colonel John Liddell, 3rd Bombay European Regiment.
Lieut.-Colonel William Adam Orr, Madras Artillery.
Lieut.-Colonel John Simpson, 34th Regiment.
Lieut.-Colonel Thomas Smith, 90th Regiment.
Deputy Inspector-General of Hospitals, Dr. Francis William Innes.
Deputy Inspector-General of Hospitals, Dr. John Fraser.
Surgeon, Dr. Charles Alexander Gordon, 10th Regiment.
Surgeon Joseph Lee, 78th Regiment.
Colonel Thomas Lemon, Royal Marines.
Lieut.-Colonel Henry Wylie Norman, 31st Regiment, Bengal Native Infantry.

Digitized by Google

THE ARMY.

4th Dragoon Guards. The officers of this regiment gave a brilliant ball at Brighton, on Thursday evening. It was numerously attended, and passed off most successfully. Lieut.-General Sir James Chatterton and Lady Chatterton were unavoidably prevented from being present. The gallant general commanded the Royal Irish Dragoon Guards for many years, and is warmly remembered in the corps.

7th Dragoon Guards. Captain Dowbiggen is about to retire from the Service. Lieutenant Barton and Cornet Erskine respectively obtain a step of rank.

2nd Dragoons (Scots Greys), held in readiness to move from Newbridge to Kilkenny, where the head-quarters will be stationed, troops being detached to Carlow, Carrick-on-Suir, and New Ross.

5th Lancers held in readiness to move from Newbridge to Dublin, to embark for Liverpool, *en route* to Aldershott.

14th Light Dragoons are to come home *viâ* Egypt; and the Himalaya, now on her passage out with a part of the China expedition, will await the arrival of the 14th at Alexandria, and convey them to Kingstown. The regiment comes home 23 officers and 564 men. It will be quartered at Newbridge.

Royal Artillery.—The following officers, non-commissioned officers, and privates, composing the staff, and Nos. 1 and 2 batteries 4th Brigade Field Artillery for China, left Woolwich on Saturday morning, and embarked on board Her Majesty's steam-ship Himalaya, Captain John Seccombe, at Purfleet, namely:—Lieut.-Col. and Brevet-Col. E. W. Crofton, in chief command; Capt. R. J. Hay, belonging to the 2nd Brigade, Garrison Artillery; Capt L. B. Brabazon, as Deputy-Assist.-Quartermaster-Gen.; Lieut. H. J. Hickes, as Adjutant; Capt. and Lieut.-Col. W. L. Barry, in command of No. 1 battery; Second-Capt. R. H. R. Rowley; Lieuts. H. M. Hozier, H. P. Phillpotts, and Briscoe; Capt. T. W. Milward, in command of No. 2 battery; Second-Capt., Harrison; Lieuts., W. G. Brancker, L. Gye, and Harvey; Assist.-Surgs., Prescott, W. T. Morgan, M.D., and H. Harrison; Veterinary Surgeon, G. Longman; 22 sergeants, 12 corporals, 18 bombardiers, 200 gunners, 150 drivers, 2 farriers, 12 shoeing smiths, 6 collar makers, 4 wheelers, and four trumpeters—forming a total of 447 officers and men of all ranks. The troops sailed on Sunday for their destination. Under the Royal finance regulations of the 1st of November, 1850, the wives and children belonging to the married men were well cared for by the authorities, having been furnished with ample means of returning to their respective homes, by rail or steam vessel as may be least expensive, and were also provided with the necessary certificates which will entitle each woman to receive 6*d.* a-day allowed by the Indian Fund, and 2*d.* for each child, independently of the arrangements entered into for the receipt of a liberal portion of their husbands' pay. 100 gunners belonging to the Depôt Brigade of Royal Artillery also left head-quarters, Woolwich, on Saturday, to reinforce the 2nd Brigade of Garrison Artillery at Dover.

The non-commissioned officers and men of the 7th battery, 2nd brigade of Royal Artillery, commanded by Major Clifford, have removed to Shoeburyness for the purpose of being attached to the school of gunnery, for practice with the Armstrong gun. The 6th battery of the same brigade has joined its head-quarter station at Dover, after a similar course of instruction.

Major Newton's battery Royal Horse Artillery, from Longford, arrived in Athlone on Wednesday, and has taken up its quarters in the Artillery Barracks, now nearly six months occupied by a company of the 59th Regiment, moved to Galway. Colonel Goodenough, C.B., has received intimation of the intended removal of the depôt battalion to Mullingar, preparatory to the establishment of head-quarters of Artillery, for which arm of the Service, Athlone is to become a great central depôt.

Captain Lawson, 5th Brigade, has exchanged with Brevet-Major Henry, 14th Brigade, and proceeds to India. Lieut. Smith, 14th Brigade, has passed in Hindostanee.

On Saturday an inquest was held at the Gun Tavern, Woolwich, before Mr. Carttar, coroner for West Kent, on a corporal of the Coast Brigade, Royal Artillery, who committed suicide by cutting his throat with a razor at the Royal Artillery Hospital, where he was under treatment for consumption. The deceased, who was twenty-seven years of age, had been in a desponding state, which was attributed to the nature of the disease, and the fact that he had a wife and child depending upon him for support. The jury returned a verdict of "Temporary insanity."

Royal Engineers.—Captain Beaumont is acting temporarily as Adjutant of the Royal Engineers in Bengal, until the arrival of an officer from home, to undertake the office permanently.

The 1st and 17th companies of Royal Engineers, both of which are now at Malta, have attained the highest figures of merit in rifle instruction of the whole of the British army who practised during the last year. The 2nd and 24th, both at Gibraltar, have obtaided the second figure of merit.

It is stated at head-quarters that Captain C. S. Akers, Royal Engineers, will succeed Captain H. T. Siborne in the command of the Royal Engineer Train on the 1st of April next. Captain Akers has recently returned from the Cape of Good Hope, and is now at Brighton.

The Government having granted permission for the erection of the memorial to the officers, non-commissioned officers, and men of the Royal Engineers who fell in the Crimea during the Russian war, at the entrance to Brompton Barracks, Chatham, the head-quarters of the Royal Engineers, the necessary works for raising the monument have been commenced. The site of the memorial will be on the piece of ground at the eastern entrance to the barracks, and the memorial itself is intended to be one of the finest erections of the kind raised in this country, several thousand pounds having been subscribed for a monument which shall be no less an honour to the brave men to whose memory it will be raised than worthy of the corps to which they belonged. The designs which have been prepared are very costly and elaborate, and include a lofty centre arch with smaller openings at the side, the whole surmounted by a large vase. The names of every officer, non-commissioned officer, and man of the Royal Engineers who fell in the Crimea will be inscribed on the memorial. The contractors for the erection of the monument are busily engaged in felling the trees which cover the proposed site.

1st Royal Regiment, 100 men, have left the depôt of the 2nd battalion at Birr, to join the depôt of the 1st battalion at Colchester.

3rd Depôt Battalion, Chatham. The office of paymaster of this battalion, vacant by the death of Captain M. G. Taylor, late of the 53rd Regiment, has been conferred on Captain F. L. Bennett, Paymaster of the 59th Regiment, at the Cape.

6th Regiment. Lieutenant Saunders has qualified in Hindostanee.

9th, 1st battalion, under orders for the Ionian Islands, to relieve the 1st battalion, 14th Regiment, under orders for Jamaica.

10th Regiment, 1st battalion. Sergeant Edward Connors was, on Saturday last, presented by the officers of his regiment with a very handsome silver watch and chain, with the following inscription:—"Presented to Sergeant Edward Connors, 1st battalion of the 10th Foot, by the officers of the regiment, as a mark of their esteem of his good and gallant conduct during a period of 22 years in the regiment." The sergeant served throughout the Sutlej and Punjab campaigns and Indian mutiny, and was twice severely wounded.

10th., 2nd Battalion. The head-quarters, under Colonel Fenwick, embarked at Cork on board H.M.S. Urgent, for the Cape, and sailed on the 12th inst.. The division numbered 20 officers and 420 men. The depôt, consisting of 2 officers and 125 men, proceeds to join the Plymouth depôt battalion.

14th, 1st battalion, at Corfu, relieves the 41st at Jamaica.

21st, 1st battalion, proceeds from Malta to Barbadoes, relieving 49th Regiment.

22nd, 1st battalion, from Dublin to Malta, relieving 21st Fusiliers.

23rd Fusiliers. Captain the Hon. N. Fiennes retires from the Service, Lieutenant Williamson purchasing the company. Captain O'Connor has leave to England.

33rd Regiment. Lieutenant Roberts is on leave to England.

34th Regiment. Assistant-Surgeon Masterson is on leave to England.

41st returns home from Jamaica.

43rd Light Infantry. Lieutenant A. E. Morley has leave to England. Ensign J. E. K. Morley has been appointed to a cornetcy in the 15th Hussars.

48th Regiment. Captain Lovett has leave to England for eighteen months.

49th returns home from Barbadoes.

Royal Marines.—Admiralty orders have been received at Chatham, directing the bounty now paid to recruits in the Royal Marine Light Infantry to be reduced from 5*l.* to 4*l.*, with a free kit as before. This has been decided upon in consequence of the several divisions being up to their full strength. Recruiting, however, is still to be proceeded with.

52nd Light Infantry. Assistant-Surgeon Gogarty is on his way home from India in medical charge of invalids. Captain the Hon. E. G. Curzon has arrived in England.

53rd Regiment. Lieutenant Acton is about exchanging with Lieutenant Porter of the 82nd.

57th Regiment. Lieutenant Mills has been granted leave to England.

66th Regiment. As announced by anticipation in our impression of last week, Major-General Bell, commanding the troops in Jamaica, was on Tuesday gazetted to the colonelcy of this regiment in succession to the late General Blunt.

67th Regiment. Ensign Price has leave to England.

68th Light Infantry. Lieutenant Seymour and Wilkinson are coming home in charge of invalids.

72nd Regiment. Ensign Baillie is about to retire from the service. Lieutenant Stewart has leave to England.

73rd Regiment. The colonelcy of this regiment is vacant by the death of Lieutenant-General Falconar.

75th Regiment. Captain Justice is on his passage from India to England in charge of invalids. Lieutenant Streets is coming home on leave. Lieutenant Brocas exchanges with Lieutenant M'Namara, 93rd Highlanders.

77th Regiment. Ensign Bate is coming home on leave.

79th Regiment. The death of Captain Newport is reported by the last Indian Mail, by which event Lieutenant Machesey and Ensign M'Causland obtain promotion without purchase. Assistant-Surgeon Kilgown has qualified in Hindostanee.

81st Regiment. Lieutenants Swift and Jackson, and Assistant-Surgeon Mullan, have qualified in Hindostanee.

82nd Regiment. Lieutenant Porter exchanges with Lieutenant Acton, 53rd Regiment.

83rd Regiment. Captain Pigott has leave to England.

84th Regiment. Captain Sparke, who has just exchanged into this Regiment from the 68th, is on his way home to join his regiment at Sheffield.

89th Regiment. Lieutenant Dowdeswell's leave is prolonged to the end of the year.

90th Regiment. Assistant-Surgeon Lumsden has qualified in Hindostanee.

92nd Regiment. Lieutenant Emmett has leave home.

93rd Highlanders. Colonel Leith Hay has arrived home from India on leave. Lieutenant M'Namara exchanges into the 75th Regiment.

95th Regiment. Major the Hon. E. S. Plunkett has obtained leave home from India.

98th Regiment. Lieutenant Griffin, who had been acting as Adjutant of an Eurasian corps, has resigned that appointment. Ensign Heathcote has been named to perform the duties of regimental instructor of musketry, vice Lieutenant Haywood, invalided, until arrival of a gazetted instructor.

99th Regiment. Lieutenant E. C. Johnson is about to retire from the service.

Rifle Brigade.—The officers of the 4th battalion were to perform in the Theatre Royal, Malta, on the 13th. The pieces selected are *The Camp at Chobham*, and *Number One Round the Corner*. The proceeds of the performance to be given to the Seamen's Institute.

Army Chaplains.—We understand that a very suitable uniform has been determined upon for Chaplains to the Forces. During the war in the Crimea and the mutiny in India the Chaplains suffered much for want of a distinguishing dress. Mr. Egan was on one occasion marched a prisoner into the French Camp, and Mr. Crozier more than once detained on suspicion that he was a spy. In the field a uniform is absolutely necessary, and at home it is only right that the chaplain, holding Her Majesty's commission, should be known by a dress indicating his department and rank.

Canterbury.—The health of the depôts stationed in Canterbury has been benefitted greatly during the past year by close attention to the cleanliness of the barracks. A large outlay, we believe, is soon to be made for improving the drainage, which at present is very deficient. It is currently reported that the troops will be encamped during the summer, in order that the drainage works may be vigorously carried on without endangering the health of the men. A goodly number of recruits have come in lately, the light cavalry corps being the favourites. Among other improvements, not the least worthy of notice is that of the Military cemetery. The ground has been turfed, the graves repaired, trees and shrubs planted, and a substantial handsome fence erected in the place of a high dilapidated wall. A fine view is now seen from the military road, and a healthy opening made in a part of the city requiring, with its dense population, the best possible supply of good air. No one values a well-ordered cemetery more highly than the soldier.

Major-General Sir Richard Dacres, Commandant of Woolwich garrison, having been absent on leave since Christmas, has returned to Woolwich and resumed his official duties.

It is stated that the Government propose to erect a cavalry barrack at Colchester, and that the site will be the parade-ground on the military road. The force in camp is now about 2600 men.

A French soldier, dressed in the uniform of the 1st Regiment of the Line, wearing a Crimean medal, with his knapsack on his back, lately entered the Chatham Barracks, and enlisted in the 31st Regiment. He was in full uniform, and is a very good-looking man of about twenty-eight years of age. He has enlisted under the truly Britannic name of Smith, an *alias* once before adopted by a much more illustrious French exile.

SHORNCLIFF CAMP.

The out-quarters of the 9th regiment, comprising four companies 360 strong, under the command of Major Hawes, marched on the camp on Thursday from Woolwich to join head-quarters, preparatory to the regiment leaving Shorncliff next week for Portsmouth, *en route* to Corfu. The following officers marched with the division—the Hon. Captain Trench, Lieutenants Burland and Thomson, and Ensigns Kane and Baily. The regiment goes out under the command of Colonel Bethune. The left wing of the 47th, now in the camp, were under orders to relieve the 9th at Woolwich, but the orders were countermanded.

The weather, on Thursday last, prevented the usual march out of the troops from the camp, on that day week there was a march out, through Folkestone, and round the range of hills at the back of the camp; the roads being very muddy gave a good opportunity to test the new gaiters issued to the troops, and great dissatisfaction is expressed by all who are obliged to wear them, the peculiar cut of the gaiter, fitting tight to the ankle, causes it, when in use, to ride up above the half-boot worn by the infantry soldier, leaving an unseemly gap between gaiter and boot, a front piece allowing it to fall upon the instep would be a great improvement.

A limber of one of Armstrong's guns is now at Shorncliff on trial, the professed object of which is to run the limber a considerable number of miles, loaded with the Armstrong shell and shot, for the purpose of testing what amount of friction it will bear when moved rapidly over the rough roads in this neighbourhood; the limber is run on an average about 30 miles a day.

WAR-OFFICE, PALL-MALL, Jan. 17.

66th Regiment of Foot—Major-General Edward Wells Bell, to be Colonel, vice General Richard Blunt, deceased.

COMMISSARIAT DEPARTMENT.

Commissariat Clerk Richard Stephenson Price to be Deputy-Assistant-Commissary-General.

20th Regiment. Lieutenant J. C. Cox has embarked for Calcutta, to join the head-quarters of his regiment, to which he has been appointed Instructor in Musketry.

Royal Marine Light Infantry. The volunteers from the Royal Marine Light Infantry for the Marine Artillery, to the number of 31 men, under the command of Lieutenant A. H. F. Barnes, left head-quarters this morning, and proceeded to Portsmouth to join that division.

A numerous detachment of Royal Marines are ordered to proceed to China, on board the Khersonese screw steam-vessel, now receiving war-stores at the Royal Arsenal.

THE VICTORIA CROSS.

War Office, Jan 20.

The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross on the undermentioned officers and soldiers of Her Majesty's army, whose claims for the same have been submitted for her Majesty's approval, on account of acts of bravery performed by them in India, as recorded against their several names; viz.:—

60th Rifles—Lieutenant Alfred Spencer Heathcote. For highly gallant and daring conduct at Delhi throughout the siege, from June to September, 1857, during which he was wounded. He volunteered for services of extreme danger, especially during the six days of severe fighting in the streets after the assault. Elected by the officers of his regiment.

8th Hussars—Troop Sergeant-Major James Champion—For distinguished bravery at Beejapore on the 8th of September, 1858, when both the officers attached to the troop were disabled, and himself severely wounded at the commencement of the action by a ball through his body, in having continued at his duty forward, throughout the pursuit, and disabled several of the enemy with his pistol. Also recommended for distinguished conduct at Gwalior.

60th Rifles (1st Battalion)—Colour Sergeant George Waller—For conspicuous bravery at Delhi on the 14th of September, 1857, in charging and capturing the enemy's

Digitized by Google

guns near the Cabul Gate; and again on the 18th of September, 1857, in the repulse of a sudden attack made by the enemy on a gun near the Chaudney Chouk. Elected by the non-commissioned officers of the regiment.

60th Rifles (1st Battalion)—Colour-Sergeant Stephen Garvin—For daring and gallant conduct before Delhi on the 23rd of June, 1857, in volunteering to lead a small party of men, under a heavy fire, to the "Sammy House," for the purpose of dislodging a number of the enemy in position there, who kept up a destructive fire on the advanced battery of heavy guns, in which, after a sharp contest, he succeeded. Also recommended for gallant conduct throughout the operations before Delhi.

60th Rifles (1st Battalion)—Bugler William Sutton—For gallant conduct at Delhi on the 13th of September, 1857, the night previous to the assault, in volunteering to reconnoitre the breach. This soldier's conduct was conspicuous throughout the operations, especially on the 2d of August, 1857, on which occasion, during an attack by the enemy in force, he rushed forward over the trenches, and killed one of the enemy's buglers, who was in the act of sounding. Elected by the privates of the regiment.

60th Rifles (1st Battalion)—Private John Divane—For distinguished gallantry in heading a successful charge made by the Beloochee and Seikh troops on one of the enemy's trenches before Delhi, on the 10th of September, 1857. He leaped out of our trenches, closely followed by the native troops, and was shot down from the top of the enemy's breastworks. Elected by the privates of the regiment.

60th Rifles (1st Battalion)—Private James Thompson—For gallant conduct in saving the life of his captain (Captain Wilton), on the 9th of July, 1857, by dashing forward to his relief, when that officer was surrounded by a party of Ghazees, who made a sudden rush on him from a Serai—and killing two of them before further assistance could reach. Also recommended for conspicuous conduct throughout the siege. Wounded. Elected by the privates of the regiment.

60th Rifles (1st Battalion)—Private Samuel Turner—For having, at Delhi, on the night of the 19th of June, 1857, during a severe conflict with the enemy, who attacked the rear of the camp, carried off on his shoulders, under a heavy fire, a mortally wounded officer, Lieutenant Humphreys, of the Indian Service. During this service Private Turner was wounded by a sabre-cut in the right arm. His gallant conduct saved the above-named officer from the fate of others, whose mangled remains were not recovered until the following day.

10th Regiment—Private John Kirk—For daring gallantry at Benares, on the 4th of June, 1857, on the outbreak of the mutiny of the native troops at that station, in having volunteered to proceed with two non-commissioned officers to rescue Captain Brown, Pension Paymaster, and his family, who were surrounded by rebels in the compound of their house; and having, at the risk of his own life, succeeded in saving them.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The amalgamation of the Home and Indian Services is now so hacknied a question, that I would not trouble you on the subject, were it not that in the first edition of your paper (a paper that I trust and believe will be the means of rectifying many existing abuses), you appear to advocate the measure, and, in advocating it, seem to have lost sight of one very important consideration—the effect that it will have on the officers of the Indian Service as regards promotion. It is an allowed fact, that more Europeans are required for service in India; and the question is, whether they are to be local troops, or belong to the home army. If the latter, ten or twelve additional 2nd battalions will be added, and so increase the supersession under which officers of the Indian army are already groaning. The increase, if made to the local troops, would promote some, at any rate, of the many hundreds who now feel, that strive how they may, for them there is no hope of reward, no hope of promotion. I defy any competent and impartial man, who has seen regiments of the two Services together, to state that the Europeans of the Indian army are one jot inferior to their brethren of the sister Service: that they cost the State less, has been already proved. If, then, troops are to be raised on the ground that an additional number are required for India, I ask on what grounds of justice the whole advantages arising from this should fall to our brethren of the home army? Have we in the late troubles been backward in doing our duty? Have we been miserly of our blood? Have we been proved incompetent? Should the answer be "Yes" to any of these questions? Then, in Heaven's name, let a clean sweep be made of the whole of us, as dastards unfit to serve our Queen. But if, on the other hand, we have done our duty loyally, and have proved to the country that we have not been unworthy of the trust reposed in us, then let us not be excluded from some of the loaves and fishes that the Horse Guards so liberally bestow upon their own. You will perhaps say, that I have wandered from the point; amalgamation was what I started with, and here I am running into a tirade about our grievances. But I think it is all pertinent to the matter in hand: almagamation means (looked at from one point of view) the throwing into the hands of the home authorities upwards of thirty commissions for field officers, besides some hundred or so companies, and takes the same number away from the old and superseded officers of H. M. Indian forces. I am no grievance-monger; but I, in common with others in my position, deeply feel the indifference with which, in so many cases, we are regarded by those who rule our destinies. If this be denied, I ask what reward has been meted out to the officers of the Indian army who served throughout the defence of Lucknow with General Inglis? What has been done to reward the two sole survivors of the Cawnpoor tragedy, Thompson and Delafosse? Was not the former a fit subject for Her Majesty's brevet as as Field-officer; and would the Volunteer corps despise the brevet of the latter, who, during that awful siege, exposed his own life to the most imminent risk in order to prevent the ammunition being blown up? But, enough of this. I write in the hope of inducing you to guard the legitimate interests of the Indian service, and am, your obedient servant,

A HOPELESS INDIAN SUB.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In 1858, H.R.H. the Commander in Chief gave several commissions without purchase to the candidates for the Line who passed a good examination, and occupied the head of the list. In so doing, H.R.H. redeemed the pledge which the Horse Guards made of recommending to his notice any candidate who should pass very creditably. May I inquire why this has been discontinued in 1859?

As we have only four examinations a-year, the sacrifice was trifling, and it was a powerful stimulus for candidates to "study hard." Since 1859, candidates merely attempt to pass, and I, for one, do not see what I should study so hard for.

If the Government are really anxious to promote learning in the Army, as these new examinations seem to imply, why should this most energetic stimulus—a free commission to the first on the list—be denied to us? I am your obedient servant,

A CANDIDATE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—From the great interest you take in all military matters, I am induced to ask you, why the 76th Regiment do not carry Corunna on their colours. They were in the same brigade as the 51st and 2nd battalion 59th Regiment, which latter corps suffered severely. The officers on service have the medal as also a clasp for Nivelle; but these badges do not appear in the Army List. Nor do Allyghur, Agra, Delhi, and Laswarree, in all of which actions they were engaged, and which are embroidered on the regimental colours.

At Lugo, Sir John Moore made one of the privates of the 76th a sergeant on the spot for distinguished gallantry.

I remain yours, &c. AN OLD HINDOOSTAN.

Portsmouth, Jan. 17, 1860.

[We are unaware why the distinction has not been granted. We know that officers serving in the 76th on the occasion in question have received a clasp for Corunna.—ED.]

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your remarks on General Cox's claims are well-timed. Besides his services, he labours under another disadvantage, that of being a General "to have the rank of Major-General," not having served the "indispensable six years as a Field Officer"—the late Lord Hardinge's and Mr. S. Herbert's extremely liberal limitation and test of professional merit. The subject has been repeatedly brought forward in Parliament; last year it came to a division; and the House voted for the economical proposition of refusing them the pay and emoluments invidiously granted to others; because, as Mr. S. Herbert argued, "they have done no service for the last thirty years," and did not serve the useless limit of six. The late accomplished scholar and officer, General Michell, who had served in the Peninsular war, exerted his pen and abilities in the columns of the *United Service Gazette* in behalf of himself and the other victims of Mr. S. Herbert's illiberal estimate of what in his opinion is due to merit. Six years, "the indispensable' number, had not been filled up. Wounds, health impaired on actual service, weighed nought against this gentleman's fiat. Now, Sir, General Michell was a man of the finest feeling and transcendent ability; in an army of purchase and expensive habits, he changed H.P. for pecuniary reasons, like many others, repeatedly offered his services, but could not pay, and therefore could not, on attaining the rank, have the pay necessary to keep up its dignity. And to show how things are, Major-General Buckley, of the Unattached, has been raised to the rank and pay of 25*s.* per diem. Why and wherefore, in strict justice to others, this exceptional act of grace was given is as intelligible as conferring a regiment on General Ashburnham. However, a work is in the press to show the indispensable necessity of a committee of the House of Commons to inquire into the radical organisation of the British army, for which the author will appeal to your powerful aid to second the propositions—if worthy of being so supported. General Evans, seconded by Mr. Horsman, last session moved for a mixed commission, but was talked over by Messrs. Palmerston and Herbert. They can afford to pay 100,000 men deserters from the Militia, making up at 6*l.* bounty a dead loss of 600,000*l.* to the country (vide Lord Grey's speech), and strain at a paltry sum to do justice to real merit by way of correcting the evil. Desertion is now made both venal and venial by the late commission of militia. In the course of a few weeks I hope I shall be successful in laying before the country the true state of the case—in stern facts and figures. Yours faithfully,

ONE OF THOSE GENERAL OFFICERS.

[We are inclined to think our gallant correspondent must be in error respecting General Cox, whose name appears on the list of active generals qualified for commands of regiments by the prescribed term of service as a Field Officer.—ED.]

THE FIRST PARALLEL.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the article on attack of fortresses in the Aide Mémoire to the Military Sciences, it is stated that the best distance for the first parallel from the main works of the place attacked is about 600 yards, "because beyond the effect of much injury from grape-shot or musketry," and "because it is about the extreme distance for steady howitzer practice."

This was written in 1845: since then rifles sighted to 1000 yards have been substituted for Brown Bess, and the old two-groove rifle sighted to about 400 yards, and it is probable that the eight-inch shell gun, or even a superior gun, will take the place of the howitzer of ancient days.

I should like to hear the opinions of officers as to what is the best distance for the first parallel under the altered circumstances. I am, Sir, yours obediently,

SIXTY.

"WHICH IS THE RIGHT BOOK?"

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Though it is to be hoped that there are not many Drill Instructors foolish and ignorant enough to recommend their Volunteer pupils to put the Government Manual "behind the fire," I will (with your permission) state, for the information of those it may concern, the very few and unimportant points in which that Manual is at variance with the "Field Exercise" authorised for the Line and Militia.

1. To obviate the necessity of the rear-rank stepping back in the formation of fours, the distance between the ranks is fixed at one pace and a half, instead of the regulation one pace.

2. In the formation of "fours-about" the squad is directed to form four-deep before, instead of after, facing about.

3. Manual and platoon. In the *manual* exercise, the "secure arms" is omitted; and the order in which the words of command are given (which *ought*, of course, to be wholly immaterial) is slightly changed: in the *platoon* exercise by numbers, a few unnecessary pauses between the motions of "load," "home," and "cap" are omitted. The actual instructions given for the movements of both the manual and platoon are identical with those in the "field exercise," only better and more simply expressed.

Add to the above, that the officers are directed to take post as with a Company acting (as Volunteers would act) as Light Infantry, and you have the sum total of Colonel Lysons' delinquencies.

The Company movements—with the trifling exception that "Company square" is formed on the first instead of on the second section—so far as they are given in the authorised Volunteer's Manual, and the entire system of Light Infantry drill are in exact accordance with the "field exercise," and indeed are illustrated by the same diagrams.

The really important feature in the book is, that Sir Charles Napier's famous advice to Volunteers as to the "seven things; more than which," he says, "do not let anybody persuade you learn," has been not only quoted but acted upon.

Most military men of practical experience will be disposed to acquiesce in the wisdom of Sir Charles Napier's suggestions, and to uphold Colonel Lysons for taking them as his guide in framing the very useful work about which this (perhaps not wholly useless) controversy has raised.

I am, sir, your obedient servant,

January 16. HAUD INEXPERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A letter in your last impression signed "R. D. G.," appears to me to require an immediate answer, as the statements therein, if left uncontradicted, must go far to stop the Volunteer movement altogether. R. D. G. appears to think that every volunteer corps will need "a resident drill sergeant of good character, and having a thorough knowledge of the new musketry drill," as a *fixture* on the establishment of the corps, and costing not less than 60*l.* per annum. This I think can easily be shown to be unnecessary, as any corps which, after three months' steady drill, cannot provide efficient sergeants in its own ranks, must be composed of men of very different calibre to those, who I hope and believe compose the bulk of the Volunteer corps.

Again, I cannot conceive that it will be necessary to appoint a man at a salary of 40*l.* per annum to look after the arms. Government requires that a safe place of custody be provided; but it does not follow that a new building is necessary for that purpose, nor must the custodian be a man provided for the purpose. All that Government requires is, security for the safe keeping of the arms; every man ought to be made to keep his own rifle clean and fit for service. In the corps which I have the honour to command, every man is answerable for the state of his weapon, and no gentleman's guns are kept by his keeper in a better or more efficient state. Moreover, one part of the musketry instruction drill is the cleaning of arms, which must be learnt before target practice is allowed.

Instruction in musketry is clearly looked upon by Government as the province of the officers of each corps; or else, why these frequent Volunteer classes at Hythe? No sergeant, therefore, ought to be required for that purpose.

The argument that men who have taken the trouble to volunteer are likely to swindle their officers out of their uniform, does not, I think, require notice at all.

Targets, butts, &c., must of course be provided in the first instance, but this is not an annual expense, and the cost of ammunition per man ought not to be large, considering the allowance made by Government.

Trusting that you will insert this letter, or, better still, publish some remarks of your own to neutralise the (possibly) mischievous effect of R. D. G.'s letter,

I am, sir, your obedient servant,

AN OFFICER.

The Correspondent of the *Times* with the French Army in Italy has this week given two more letters upon military organisation, in which he advocates a reduction of the height of the British soldier, advocates "speed and agility against weight," denounces our "foolish idolatry of size," says that the Armstrong gun necessarily abolishes heavy artillery, and that "heavy cavalry is an absurdity." He also criticises severely our tendency to "soldier-like smartness," which means buttoning up and stiffening the soldier, instead of clothing him with loose and easy garments, as in the foreign armies.

In a second edition, published yesterday, the *Morning Chronicle* announces that the basis of the commercial treaty likely to be concluded between France and England will be—on the side of France, suppression of prohibitions, and diminution of the duties on coal and iron; on the part of England, reduction of the duty on wines, spirits, *articles de Paris*, and silks.

On Wednesday a statue to the memory of the first Lord Clive, the founder of the Indian empire, was inaugurated at Shrewsbury.

About 80 men out of 400 discharged from the Indian Army were enlisted on their arrival home at Liverpool last week.

A lecture on the History of the Horse, and his comparative value for Military and other purposes, is to be delivered at the United Service Institution on Friday next, by J. Craufurd, Esq., F.R.G.S.

Among the deaths announced this week are those of Viscount Arbuthnott, the Dowager Lady Cowley, and Sir H. Mainwaring.

THE NAVY.

ADMIRALTY, NOV. 14, APPOINTMENTS.—Lieutenants Jocelyne J. W. Jervis (1850) from the Mars to the Hawke, 60, screw coast-guard-vessel on the coast of Ireland; William C. S. Sulivan (1851) to be *additional to the* Hawke.

Staff-Surgeon Lenox T. Cunningham, M.D. (1840) from the Algiers to the Formidable, 84, guard-ship at Sheerness.

Surgeons Samuel Donnelly (1842) to the Cumberland, 70, at Sheerness; Charles Smith (1843) to the Hawke; John S. Davidson (1846) to the Algiers, 91, screw, Channel Squadron, vice Cunningham, appointed staff-surgeon of Formidable.

Assistant-Surgeons William H. Lloyd, M.D. (1856) from the Formidable to the Nile, 90, at Devonport, fitting for the North American and West Indian station; Robert Murphy (1854), from the Imaum, to be additional to the Formidable.

Second Masters George H. Downing (1854) to the Nile; Guido Harris to be additional to the Impregnable, 104, flag ship at Devonport, vice Downing.

Master's Assistant G. W. Burnett to be additional of the Chesapeake, 51, flag-ship in the East Indies.

Acting Third-class Assistant-Engineer Ashley Richard Moxham to the Asia, 84, at Portsmouth, as supernumerary.

PROMOTIONS.—Commander John S. W. Grandy (1850) to be Captain. This officer entered the navy April 26, 1823, passed his examination in 1831; was promoted to lieutenant on Jan. 1, 1842; made a commander Jan. 1, 1850; and has held the command of the Argus, coast-guard tender, since March, 1852.

Lieutenant Joseph Ray (1823) to be Commander on the reserved half-pay list. This officer entered the Navy Feb. 13, 1809, and was promoted to Lieutenant Oct. 22, 1823. He was wounded while employed in the Adriatic, Feb. 21, 1812, in a most gallant conflict of two hours and a half, and was wrecked in November, 1813, off the island of Barbuda, in a violent hurricane. He has been officiating as Admiralty agent on board contract mail steam-vessels since March, 1846.

Lieutenant Marcus Lowther (1844) to be Commander. This officer entered the Navy in 1830, passed his examination in 1838, and was promoted to Lieutenant, August, 9, 1844. He had charge of a gun-boat at the destruction of the piratical settlement of Malloodoo in 1845, and in 1846, on the occasion of an expedition against the Sultan of Borneo, he commanded the third company of small-arm men, and assisted at the capture and destruction of the enemy's forts and batteries up the river Brune. He has held command of the Sealark, 8, sloop, at Portsmouth, since July, 1854.

JAN. 16.—APPOINTMENTS.—Commanders J. S. Rundle (1856) to be Inspecting Commander of Coast Guard, vice Commander Woodley, superseded at his own request; J. Palmer (1855) and G. H. Gardner (1848) appointed for the service of the Royal Naval Reserve.

Paymaster W. J. Stevens (1857) to the Hydra, 6, paddle-wheel steam-sloop, at Devonport.

JAN. 17.—APPOINTMENTS.—Lieutenant B. S. de R. Hall (1854) to be flag-lieutenant to Rear-Admiral Sir A. Milne, commander-in-chief on the North America and West India station; C. J. Carey (1857) to the Queen, 86, screw steam-ship, at Sheerness; H. F. Nicholson (1857) to the Cambridge, gunnery ship, at Devonport; J. H. Hatchard (1854) to the Impregnable; E. J. Jermain (1859) to the Excellent gunnery-ship, at Pottsmouth; J. Short (1859) to the Melpomene, 50, screw steam-frigate, with the Channel squadron; R. Willcox (1842) to the Hawke; and R. Sterne (1854) to the Argus, 6, paddle-wheel steam-sloop, Mediterranean station.

Master A. Thomas (1854) to be additional to the Cumberland.

Third-class Assistant-Engineer G. H. Newbury to the Fisgard, 42, at Woolwich, for service in the Firefly, 4, paddle-wheel steam-vessel, at Woolwich.

Acting Third-class Assistant-Engineer R. Spiers to the Industry, 2, crew steam storeship, for particular service.

Midshipmen R. S. Crompton and N. S. F. Digby to the Emerald, 51, screw steam-frigate, with the Channel squadron.

Naval Cadet A. J. O'Rorke to the Cadmus, 21, screw steam-corvette, Mediterranean station.

JAN 18.—APPOINTMENTS.—Lieutenant G. Poole (1855) to the Chesapeake, 51, screw steam-frigate, East India and China station.

Assistant-Surgeon R. L. B. Head (1857) to the Impregnable, for service in the Nautilus, 6, brig, at Deptford.

JAN. 19.—PROMOTIONS.—The following engineers have been promoted to second-class assistant-engineers in the undermentioned ships: A. Watt to the Niger, 13, screw steam-ship, Australian station; J. C. Williams to the Princess Royal, 91, screw steam-ship, Mediterranean station, as supernumerary; G. F. Williams to the Centurion, 80, screw steam-ship, Mediterranean station; D. P. Steddy to the Doris, 32, screw steam-frigate, Mediteranean station; and H. W. Tregilgas to the Cockchafer, gunboat.

Promoted to acting and second-class engineers: J. W. E. Baron to the Buzzard, 6, paddle-wheel steam-sloop, south-west coast of America station; E. Taylor and R. W. Jones to the Chesapeake.

APPOINTMENTS.—Lieutenant C. H. Murphy (1858) to the Ajax, 60, screw steam-ship, on Coast-Guard service at Kingstown.

Paymaster C. W. M'Dermott (1859) to be additional to the Asia, 84, guard-ship of ordinary at Portsmouth.

First-class Assistant-Engineer W. Cockshott to the Edinburgh, 60, screw steam-ship, on Coast-Guard service at Leith.

Second-class Assistant-Engineer J. Watson to the Edinburgh, for service in the Erne, gunboat.

Assistant-Paymaster J. Bright (1859) to the Nile, 90, screw steam flag-ship, at Devonport.

Acting Assistant-Surgeon Dr. T. A. O'Flaherty to the Brunswick, 80, screw steam-ship, Mediterranean station.

Alban, 3, steam-vessel, and Volcano, 3, steam-vessel, are also to be docked for repairs.

Arcona, 26, screw (Prussian frigate), Commodore Sundewald, is expected to sail from Spithead for Southampton to-day for the purpose of being docked, the whole of the docks in Her Majesty's dockyard at Portsmouth being engaged. On Thursday evening Commodore Sundewald, with the officers of the Prussian squadron and the principal inhabitants of the town and neighbourhood, were entertained at a ball given in honour of the approaching departure of the squadron for Japan, at the residence of the Vice-Consul, M. Van Den Berg, Beresford House, Southsea.

Ariadne, 32, screw frigate, Captain E. W. Vansittart, came into Portsmouth harbour on Saturday, and was placed under the shears to ship another screw for trial.

Avon, 3, Second Master G. Davey, from Pembroke, arrived at Plymouth on Saturday. She touched at Penzance to enter men for the Royal Navy.

Basilisk, steam-sloop, Commander Phayre, which arrived a fortnight since from the North American and West Indian station, where she had been in commission about four years, was paid off at Woolwich on Wednesday, and the crew granted the usual term of absence. The continuous service men will be attached to the flag-ship at this port, and most of those who received their discharge will re-enter the Service.

Brilliant, 20, one of the vessels selected by the Admiralty as a training-ship for the Naval Coast Volunteers, has been commissioned at Chatham by Capt. A. H. Gardner (1856). She is intended to be stationed in the City Canal, London.

Castor, 36, the second vessel selected for a training-ship for the naval Volunteers, has been commissioned at Chatham, but no captain has yet joined. The Castor will be stationed off Greenhithe.

Collingwood, 80, is to be taken to Chatham, and converted into a screw, for which purpose she is to be lengthened 15 feet, and to have a new stern; her armament is to consist of 91 guns.

Conqueror, 101, screw, was undocked at Devonport on Friday, and masted.

Dee, steam store-ship, Master Commander Pullen, from Portsmouth, has been taken into basin at Woolwich to recommence shipping a cargo of steam-boilers and machinery for her return voyage.

Emerald, in Plymouth Sound, has hoisted the flag of Admiral Milne, and will sail to the West Indies as temporary flagship, on the 12th of February. She is being fitted out, and on her return will bring Sir H. Stewart to England.

Euryalus, 51, having Prince Alfred on board, left Malta on the 2nd inst. for England, and very probably will take a month on her voyage, as she touches at many intermediate ports.

Firefly, in basin at Woolwich, under orders to relieve the Tartarus, Commander Mansell, at Malta. Mr. Taylor, commanding this ship, has received a despatch from the French Government requesting him to present the Imperial bounty of 16 guineas, in equal proportions, to the eight men of his ship who so courageously put off in the ship's cutter, and succeeded in rescuing the lives of the crew belonging to the French schooner La Blanche Marie, wrecked in the fearful gale on the night of the 25th of October, 1859, in the Guernsey Roads.

Gladiator. Lieutenant Coddington has taken passage at Southampton in the next packet, to join this ship in the West Indies.

Greyhound, 17, Commander Sullivan, received her powder in Hamoaze, Plymouth, on Wednesday.

Industry, iron steam-vessel, Commander Hodges, having received stores at Woolwich, was yesterday removed from the basin, and will complete her cargo at Deptford, before leaving for Rio de Janeiro and Ascension.

Liffey arrived at Malta, from Athens, on the 9th inst.

Mersey, 40, screw, Capt. H. Caldwell, C.B., is expected to test her machinery and speed at the measured mile to-day.

Nelson, now undergoing process of conversion at Portsmouth, will be removed on the 27th instant, and on the following Monday placed in the steam-basin to receive her engines.

Nile, 90, Captain E. K. Barnard, at Devonport, was placed in No. 3 dock, Keyham, on Monday. She will be out the hands of the shipwrights about the 9th of March. Rear-Admiral Milne is daily expected to join her.

Perseverance, 2, iron screw troop-vessel, Commander Edward R. Power, has arrived at Spithead, having completed her duties in the exchanging of troops at the Channel Islands, and will shortly proceed to the Mediterranean.

Pigmy, 3, paddle, Master Commander William Johnston, has sailed from Portsmouth to Devonport with supernumeraries, &c. At Keyham steam-yard she took in a shaft for the Firebrand at Portsmouth.

Princess Royal, 91, will be removed from the steam-basin at Portsmouth, and placed in dock for repairs.

Queen, 86, screw, Captain Charles F. Hillyar, at Portsmouth, has bent sails and will shortly proceed to Spithead. A fearful accident happened on board this ship, on Thursday, to the captain of the foretop. While engaged aloft he missed his footing, and fell with a fearful crash on the upper deck. He was conveyed to the hospital at Haslar, with but little hopes of his recovery.

Racer was at Greytown at the departure of the last West India Mail. Mr. Roberts, her engineer, had died from the effects of a fall from the hammock nettings.

Rattlesnake, 26, one of the old class of frigates, has been entirely broken up at Chatham dockyard by the shipwrights hired for that purpose. This is the fourth vessel that has been taken to pieces at this establishment within one year.

Revenge, 90, the topsail yards are crossed, and the lower yards are athwart, the nettings ready for sending aloft.

Rhadamanthus, Master Commander Sturdee, has shipped boilers and steam gear at Woolwich for the 50-gun ship Sutlej, at Portsmouth, and will also convey 120 naval recruits, ordered to be removed from the receiving ship Fisgard to Portsmouth.

Rodney, 90, line-of-battle screw steamer, now lying off Chatham Dockyard, has commenced shipping her machinery on board, a large number of men being employed by the contractors in fitting it. The engines are to be of 400 horse power.

Royal Albert, 121, Rear-Admiral Sir C. Fremantle, K.C.B., hoisted his flag in Plymouth Sound on Monday.

Sanspareil, 72, Capt. Wilmot, was hauled out of the basin in the Devonport dockyard, on Friday, and placed alongside the hulk Vigo, in Hamoaze, to complete her fitment.

Scourge returned to Malta from Girgenti, to which place she went to offer assistance to the English ship Julius Cæsar, the captain and mate having died, and the second mate refusing to take the command. The assistance offered by Prince Hohenlohe was not accepted. The Scourge experienced bad weather, and received some damage.

Severn, 50, which has been undergoing the process of conversion from a sailing ship to a screw steamer, is now very nearly completed, and will shortly be undocked.

Stromboli, steam-sloop, Bulldog, 6, steam-sloop, and Medea, 6, paddle-wheel-sloop, are to be removed from the docks about the 27th instant, and placed in the steam-basin, to be brought forward for commission.

Styx, by the latest accounts, had left Barbadoes for Demerara, with General Sir A. Cloetè on board, on his tour of inspection.

Supply, 2, is bound to the Mediterranean.

Wanderer, 4, screw dispatch gun-vessel, Commander Mark R. Pechell, has arrived at Woolwich to be paid off.

Weser, 6, iron steam-vessel, Commander Raby, which left Woolwich a few weeks since for service in the river Plate, but was subsequently found to be in a very leaky condition and unfit for the voyage, arrived back on Wednesday, and it is expected that her crew will be transferred to the Hecate, sloop, which is now ready for commission.

The following ships are at Plymouth, viz., ships in Hamoaze:—The Impregnable, Royal Adelaide, Sylph, Avon, Nautilus, Wellington, Cambridge, Conqueror, Centurion, Nile, Sanspareil, Porcupine, Shamrock, Magpie, Raoboynich (Russian), and the Diligence. In the Sound:—The Royal Albert and Emerald. Captain H. D. Roger, C.B., has joined the Centurion, as the successor of Captain Patey. Nothing has as yet been heard as to the carrying out the sentence of the court-martial by which John Dillon was sentenced to be hanged.

In the steam-basin at Portsmouth are the Victoria, 121, screw, and Duncan, 101, screw, receiving their machinery. The Princess Royal, 91, screw; Hornet, 17, screw; Ariel, 9, screw; with the Bee steam-tender and a gunboat under repairs, and preparing for service. The Firebrand, 6, paddle, Commander Bruce, repairing damages. The Excellent (late Queen Charlotte), fitting out as gunnery ship at the port, and the Bacchante, 51, screw, fitting out by the riggers for the steam reserve. In the two docks connected with the basin are the Immortalité, 51, screw, and the Megæra, screw, troop-ship.

The screw line-of-battle ships in Portland Harbour are the Edgar, 91, flag-ship of Rear-Admiral Erskine, second in command of the Channel Fleet; Donegal 101; Hero, 91; Algiers, 91; Trafalgar, 91; Aboukir, 91; and the Mars, 80. The screw frigate Diadem, 32; the screw corvette Mutine, 18; and the gunboats Flying Fish, 6; and the Partridge, 2. The paddlewheel steam-frigate Prometheus, 6, and the coast-guard-ship Blenheim are also at anchor. The Royal Albert, 121, is daily expected.

Considerable progress has been made in those vessels which the Admiralty ordered some time since to be completed with the utmost dispatch, at Chatham, and all are being rapidly pushed forward. The two line-of-battle screw steamers—Atlas, 91, and Bulwark, 91—have an unusually large number of hands employed on them from an early hour until late. The improved screw frigate Undaunted, 51, which is intended to be one of the best of that class of vessels afloat, is making astonishing progress, and will be fit for launching during the present year. The screw corvettes Orpheus, 21, and Rattlesnake, 21, have each a large number of shipwrights employed on them, and it is expected that both vessels will be completed this summer. Admiralty orders have been received directing an entry of ten additional apprentices at Chatham Dockyard.

Notice is given in the *Gazette* that preparations are now being made for the intended distribution of proceeds received, and tonnage bounty awarded, for the Governor Parris, captured on the 2nd July, 1858, by Her Majesty's ship Heron. Also for the ship, name unknown, supposed Mary Elizabeth, captured on the 11th July, 1858, by Her Majesty's ship Heron. Also for the St. Andrew, captured on the 20th June, 1858, by Her Majesty's ship Viper.

Admiralty instructions have been received by Commodore the Hon. James Drummond, Superintendent of Woolwich Dockyard, requiring the whole of the 1st and 2nd class naval recruits, at present on board the receiving ship Fisgard, to be transmitted to Portsmouth for distribution in various ships belonging to the fleet.

An Admiralty order was received on Tuesday for the following persons employed in Chatham dockyard to be superannuated on the undermentioned pensions:—James Ridgway, second-class leading-man at the metal mills, 78*l.* 5*s.* per annum; George Glasspole, workman in the metal mills, 46*l.* 19*s.*; James Wood, store-house labourer, 31*l.* 6*s.*; Richard Patrick, leading-man of labourers, 36*l.* 10*s.* 4*d.*; William Driver and Edward Adams, leading-men of joiners, 50*l.* 8*s.* 6*d.* each; William Best, engine-keeper, 41*l.* 14*s.* 8*d.*; John Bride, pavior, 41*l.* 14*s.* 8*d.*; Stephen Cardwell, stationed shipwright, 50*l.* 4*s.* 2*d.*; Thomas Elsy and Thomas Nicholls, caulkers, 46*l.* 19*s.* each; William Hurley, sawyer, 41*l.* 14*s.* 8*d.*; and Thomas Fox, leading-man of sailmakers, 50*l.* 8*s.* 6*d.* The above pensions have been granted on the new scale adopted under the provisions of the Civil Service Superannuation Act, 1859.

The Board of Admiralty has decided on taking the examinations of candidates for apprenticeship in Chatham dockyard entirely out of the hands of the dockyard officers, and placing them under the control of the Civil Service Commissioners, who are directed to attend at Chatham dockyard on the occasion of the next examination. The Lords of the Admiralty have fixed the examination of the candidates for this year's entry to take place on the 23rd and 24th inst., on which days the candidates for apprenticeship in Sheerness dockyard will assemble at Chatham, in order that the whole number may be examined at the same time. The lads will all be required to undergo a physical test, and must conform to the rules laid down by the Director-General of the Medical Department of the Navy. This arrangement has given great satisfaction, as it will put an end to that system of favouritism by the local officers which has been complained of, not only at Chatham, but at the other dockyards.

The Board of Ordnance is removing from Eastern King Battery, Plymouth, all the old guns, with a view, it is supposed, to replacing them with those constructed on the Armstrong principle.

Mr. R. S. Frazer, who superintended the operations of the floating factory, the Chasseur, in the Crimea, who has been subsequently engaged in the machinery department of Woolwich Arsenal, and whose services in the first-named establishment obtained the approval of the highest authorities at the War Department, was yesterday promoted to the post of Manager of the Royal Gun Factories at Woolwich, under the direction of Mr. John Anderson.

Mr. R. Chaplin, accountant, at Portsmouth dockyard, has been appointed by the Lords of the Admiralty to be accountant at Woolwich, vice Penfold, superannuated on a pension of 600*l.* per annum. Mr. R. Sallenger, late master of the Fly, Admiralty lighter, has been appointed Admiralty pilot for duty at Chatham, vice Stuart resigned.

A new Yacht Club has been got up at Queenstown, and on Thursday the warrant from the Lords of the Admiralty, creating Sir John Arnott Commodore was received; the Club still wants a Vice-Commodore. The flags to be plain red ensigns with union-jack in the corner; the burgee to be red, with a lion rampant, and holding a bunch of shamrocks in his right paw.

Rear-Admiral the Hon. George Grey has returned to Portsmouth from leave of absence and re-hoisted his flag.

Rear-Admiral Sir Alexander Milne, K.C.B., arrived on Monday at Devonport. On Tuesday morning the Admiral hoisted his flag temporarily on board the screw steam-frigate Emerald, 51, Captain Arthur Cuming. The usual salutes were given. During the day, accompanied by Captain Barnard, he inspected his flag-ship, the Nile, 90, repairing in Keyham steamyard. It is understood that in about 10 days Admiral Milne will leave Plymouth in the Emerald for the West Indies, and that he will in her make a complete survey of the station, preparatory to the arrival of the Nile with his family two months after.

A number of continuous service men, recently paid off from the Princess Royal and Conqueror, arrived at the dockyard this day, and were transferred to the Fisgard flag-ship, to be drafted to vessels now fitting out.

Mr. G. Lane has been appointed as assistant to the master-attendant at the Deptford victualling-yard.

His Netherlands Majesty's screw steam-frigate, Admiral Van Wassenaar, Captain B. Van Voss, from Cherbourg for Lisbon, arrived on Tuesday in Plymouth Sound, and was received by the customary salutes from the citadel and the flag-ship Impregnable, 104, Captain Stewart.

Life-boat Services.—During the year which has just closed, the life-boats of the National Life-boat Institution have been instrumental in saving 218 lives from the following wrecked vessels on our coast:—schooner Betsy, of Sunderland, 4; schooner Clifton, of Gloucestor, 2; schooner E. D., of Salcombe, 5; schooner Viscaya, of Spain, helped into port; brigantine Gonsalve, of Nantes, 7; helped the schooner Scotia, of Carnarvon, into port; schooner Caroline, of Fowey, 6; schooner Frederick William, of Ipswich, 5; Cullercoats fishing-boat, 4; brig Velocity, of Sunderland, 8; sloop Liberal, of Wisbeach, 1; bark Alecto, of Frederickstadt, 9; brigantine Opreisingen, of Arundel, 3; brig Eagle, of Sunderland, 6; brig Lucinde, of Memel, 11; smack Endeavour, of Portmadoc, 4; sloop George and Mary, of Hull, 3; schooner Majestic, of Dundee, 5; schooner Oriental, of Lancaster, 6; schooner Lord Douglas, of Dundee, 5; schooner Silva, of Glasgow, 4; steamer Shamrock, of Dublin, 14; smack Bruce, of Milford, 3; brig North Eske, of Sunderland, 6; schooner Anton, of Denmark, 6; steamer Enchantress, of Hull, 14; brig New Astley, of Aberdeen, 6; bark Ohio, of Stettin, 4; brig Cuba, of Whitby, 1; brig Henry Morton, of Sunderland, 8; ship Somnauth, of Liverpool, 4; sloop Sibyl, of Goole, 3; brigantine Robert and Henry, of Dundalk, 6; schooner Olive Branch of Colchester, 7; brigantine Hannah Jane, of London, 7; ship Britannia, of Bath, United States, 14; brig Fortuna, of Memel, 11; coble Isabella, of Hartlepool, 2; and the schooner Ferona, of Exeter, 5; making a total of 218 lives saved by the Institution's life-boats from 39 shipwrecks during the past year. On 28 occasions it also happened that when the life-boats had put off, in reply to signals of distress, the vessels had either got out of danger or their crews been rescued by other means. Life-boats' crews also assembled several times to give assistance, but were not required to put off to sea. On these occasions, and on those of quarterly exercise, the life-boats were manned probably by no less than 4000 persons. Nearly all the services took place in stormy weather and heavy seas, and often in the dark hours of the night. During the same period the expenses incurred by the Institution on additional stations, replacement of old boats, transporting carriages and boathouses in various localities on our coasts, have amounted to a total of 10,940*l.* Moreover, grants and rewards to the extent of 1108*l.* 15*s.* 3*d.*, besides one gold and 20 silver medals, for rescuing 498 persons from vessels wrecked during the last 12 months, have been made. In carrying out its humane objects, however, the Society, we learn, has incurred liabilities to the amount of 3834*l.* Such practical proofs as these of the great value of the Royal National Life-boat Institution, in a maritime country like ours, cannot possibly be overrated. It has now 96 life-boat stations under its management. On an average each station requires 30*l.* a-year to maintain it in efficiency. This can only be done by permanent endowments and the continued support of the public to the National Life-boat Institution.

Royal Naval Coast Volunteers.—As much interest has been manifested with respect to the success of the Government scheme for the enrolment of Naval Coast Volunteers, we may state, says the *Norfolk Chronicle*, that, so far as Yarmouth is concerned, not a single man has presented himself as a volunteer at the Custom House, and we believe that the other seaports on the eastern coast have been almost equally backward in furnishing men. The prejudice against the Navy, however much it is to be regretted, is very strong on the part of the beachmen, fishermen, and seafaring class generally, and we have recently heard many fine fellows declare, notwithstanding the inducements that have been held out, that they will not willingly enter a service where they may be subjected to such treatment as was recently experienced by the crew of the Princess Royal.

MANNING THE NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—It is to be feared that the absence of any allusion to progress of the enrolment of the Naval Volunteer Reserve Force can only be due to the want of success. The avidity with which the accounts of the progress of the Rifle Volunteer movement are published and read, is pretty conclusive that the Government would be well pleased to have similar success to recount in the case of the Naval Volunteers, and that, if they had, we should not be left in ignorance of the fact.

I confess I am one who was never very sanguine of success, from the first promulgation of the conditions of enrolment. I know the instinctive distrust of the merchant sailor to H.M. pennant. Even the comparatively liberal conditions of the recent proclamations on the subject, when supplemented by the still more liberal offers of mercantile employers, have failed to remove the lurking suspicion in the mind of Jack, that the whole thing is an artful device to entrap him. With his experience of crimps and his consciousness of habitual national neglect, the 100 short rules published for his instruction, and the kind invitation to hear the expositions of the local shipping masters, only appear to him as varying the bait. They certainly savour much of departmental red tape.

Well, it may and will be asked, if this will not do, what will? If we cannot get sailors this way for the Service of the country, how are we to get them? Sailors we must have if we would maintain our maritime supremacy, and our position as a first-class nation; what, then, is the most feasible, and at the same time the most equitable mode of getting them?

It is very evident that public opinion is totally opposed to a return to the press-gang; that mode is therefore out of the question. Indeed, its manifest inequality, not to speak of its intolerable hardship, makes every feeling of fair-play rise against it. No doubt it is very patriotic and reasonable to maintain that in time of national danger it is the duty of every citizen to take up arms, and fight in the nation's defence. There can be no doubt whatever of this; but it is a very different matter to throw the whole brunt of that defence upon one class, whether that class will or no. But this kind of compulsory service is obviously out of the question. What, then, is to be done, as Jack will obstinately persist in hugging his prejudices against the acceptance of the tempting offers to enter Her Majesty's Service?

I would suggest the following plan for the consideration of the public authorities, whose duty it is to look seriously into this important national question. It is very certain that although public opinion and national morality are now against compulsory service in the Navy as much as in the Army, the same objections cannot be urged against any system which admits of perfect freedom of choice. It is evident that the merchant service must necessarily be the nursery for the Royal Navy, and therefore irrespective of the poramount importance of fostering that service for commercial considerations, it is of at least equal importance to foster it as the right arm of the nation's strength. Without our sailors, the freedom of our country would soon become a matter of the history of the past. With our extending commerce, and the maintenance of the acknowledged pre-eminence of our seafaring population, we may, under Providence, dwell in comparative security. My plan would be to return to the apprenticeship system. Make it compulsory for every vessel to have a certain number of apprentices, according to tonnage. Make the conditions of apprenticeship, that during the four years of service, whenever the vessels come into port, the boys shall be sent into a training-ship, and the master or owner, for this time of training, be relieved from all expense of their keep, which should be defrayed by the Government. It is well known that there are two classes of apprentices in the merchant service: one composed of boys whose parents from their position in life, very properly look forward to their sons getting on in their profession, the other composed of lads who go to sea for a living. There is no reason why this classification should not be continued; but there is no hardship in making it obligatory, at the expiration of the four years' apprenticeship, for every boy to serve in the Navy two years, which, in the case of second-class apprentices, might in time of war be extended, by Royal Proclamation, to four years.

The two years' service in the Navy for first-class boys, before passing their examinations at the Board of Trade, would make them better sailors and better officers. Then, as an inducement for properly qualified officers belonging to the merchant service, to enter Her Majesty's Service, the competitive system under proper regulations should be opened. It is beyond all question, that there are in the merchant service officers as highly qualified in point of professional knowledge and general intelligence as the vast majority of those in the Royal Navy. Why, then, should not the country have the benefit of the service of such, if, upon a stringent examination, they are found duly qualified? The opening of such a field for spirited young officers in the merchant service would act as a stimulus to all ambitious lads to qualify themselves for the higher grades of their profession, and go far to break down the strong prejudice now existing amongst merchant sailors against Her Majesty's Service.

It may be said, that all this is only providing for the remote future; but I say all this can be done to meet the exigences of the future, without, in the slightest degree, impeding any steps it may be thought desirable to take for the present.

As I may possibly return to this important subject on some future occasion, I shall not at present further occupy your valuable space. I am, Sir, your obedient servant,

Southampton, Jan. 19, 1860. J. R. Engledue.

Admiral Talbot, the Admiral commanding at Cork, has expressed his regret that the name of the Cove of Cork was ever changed into Queenstown.

Mr. Sturges, third-class clerk to the storekeeper's office, Devonport Dockyard, has been transferred to Deptford. Mr. W. G. Gilbert, of Malta yard, has been appointed to Devonport Dockyard,

THE MILITIA.

The City of Dublin Artillery Militia have received notice to be in readiness to move from the Colchester Camp to Woolwich on Saturday next. Their present strength is 12 officers, 330 men. They are under the command of Major Brettingham, Lieut.-Colonel the Hon. R. Handcock being at present on leave of absence. The men of the Dublin City Militia are a fine body, and generally superior in position and education to the ordinary class in the ranks of Line regiments.

East Kent Regiment of Militia.—Thomas Dennis, Gent. to be Ensign, vice Tanner, promoted.

Kent Militia Regiment of Artillery.—The Hon. Robert Marsham to be Second Lieutenant, vice Strother, promoted.

5th or Royal Elthorne Light Infantry Regiment of Middlesex Militia—Ensign D'Oyley William Battley to be Lieutenant, vice Truman, resigned. Memorandum—The Queen has been graciously pleased to accept the resignation of the Commission held in this regiment by Captain Archibald Cockrane Foster; Jan. 14.

2nd or Edmonton Royal Rifle Regiment of Middlesex Militia—Memorandum—The Queen has been graciously pleased to accept the resignation of the Commission held in this regiment by Captain Henry William Marriott, and in consideration of his long services, to permit him to retain his rank. Resignation accepted Jan. 14.

4th or Royal South Middlesex Regiment of Militia—Memorandum—The Queen has been graciously pleased to accept the resignation of the Commission held in this regiment by Lieutenant Charles Ferdinand Rutherford; Jan. 10.

Edinburgh City Artillery Militia—Henry Rolland, Esq., a Lieut.-Colonel of the Bombay Retired List, to be Major-Commandant, vice Lieut.-Col. William Geddes, C.B., resigned; Jan. 16.

Light Infantry Battalion of the Royal Sussex Militia—Ensign Joseph Bonham Clay to be Lieutenant, vice Arthur Burton, resigned; Augustus Goring Bridger, Gent., to be Ensign, vice Clay, promoted; Jan. 9.

5th Regiment of West York Militia—Major William de Cardonnell Elmsall, late Royal Dragoons, to be Major.

Her Majesty has been pleased to accept the resignation of the commission held by Lieutenant Henry Broomhead in this regiment.

[The following appointment is substituted for that which appeared in the Gazette of the 6th Dec., 1859.]

2nd Regiment of the Duke of Lancaster's Own Militia—Charles Blundell, Esq., to be Captain, vice Edmund Molyneux Seel, resigned; Nov. 26.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In your last number a correspondent is desirous to obtain the opinions of competent authorities as to the arms best fitted for Volunteer Cavalry. I conclude, by "competent authorities" he means those who have had practical experience. My own impression is that all cavalry would be better without any other fire-arms than a revolving pistol. Cavalry skirmishing generally amounts to a useless expenditure of cartridges, frequently carried on for many hours with scarcely a casualty on one side or the other. As to the Volunteers being looked upon only as infantry on horseback, the idea is an absurdity. A good cavalry soldier should *never* quit his horse, and there is no reason in the world why an English Volunteer cavalry soldier, for the duties required of him, should not be a *very* good one.

As to a sword, the best he can have is that with which he can hit the hardest blow, *and with the edge*, a matter of some difficulty to an unpractised hand. The blow, or cut, comes more readily to an Englishman's hands than the point; the national characteristic is to strike, not to thrust, and that which a man can do best, he is most likely to do on a sudden impulse.

Notwithstanding the recommendations that the pistol should be carried about the person, it will be found far preferable to carry it in the holster. With the pouch-belt, haversack, canteen, and, perhaps a field-glass a Volunteer would find he had quite enough about his body without the addition of a pistol to impede the free action of his right arm. If his horse should fall with him he might receive injury from his own pistol, and it would be a very rare occurrence for a horse to fall in such manner as to render it difficult to withdraw a pistol from the holster.

Of the lance I say nothing, because it requires more time to become a master of the weapon than a soldier of the regular cavalry could devote to the purpose. The best authorities to consult are the old cavalry soldiers themselves who have used the carbine in action; they are the most competent judges. Your obedient servant,

Jan. 19, 1860. A. Bacon, Gen. Port. Serv.

[With great respect for our gallant correspondent we must say that it is in our opinion better to drop the telescope and carry the pistol. We know instances in which dismounted troopers and officers have saved their lives by being able to get at their revolvers when unhorsed, and in a position as would have prevented their getting at the pistol if it were in a holster.—Ed.]

United Service Institution.—An interesting lecture was delivered yesterday, by J. Bird, Esq., M.D., F.R.C.P., on "The Military and Sanitary Institutions of the Roman Armies, and the Causes of the Decay of the Legions."

Royal Geographical Society.—An evening meeting will be held on Monday the 23rd inst. at 8·30, P.M., at which the following papers will be read: 1. "Proposed Railway Route across the Andes from Caldera to Rosario *vid* Cordova," by William Wheelwright, Esq., F.R.G.S. 2. "On the Curia Muria Islands," by Dr. George Buist, Cor. F.R.G.S.

The case of the Hon. Hugh Rowley and his late wife, which recently was so prominently before the public in the proceedings in the Divorce Court, and also at the Westminster Police Court, is understand, definitively settled.

Christopher de Gernon, Esq., inspector of constabulary at the Curragh Camp, met with a serious accident the other day, while hunting near Newbridge, by which his collar bone and some ribs were broken. From the last accounts received Mr. de Gernon is progressing favourably.

VOLUNTEERS.

METROPOLITAN.

HER MAJESTY'S CUSTOMS' VOLUNTEER RIFLE CORPS.—A meeting of the effective members of this corps, for the nomination of gentlemen for recommendation to the Lord-Lieutenant as officers, was held in the Long Room of the Customs on Friday evening, at half-past 4, Mr. J. F. Hamel in the chair. The following gentlemen were elected to officer the three companies:—Messrs. R. W. Grey, F. G. Hamel, and W. Wybrow to be captains; Messrs. Ogilvie, Dobell, and Bernard, lieutenants; Messrs. C. Pickford, Maclean, and Cobham, to be sub-lieutenants. A fourth company is in course of formation.

INNS OF COURT RIFLE CORPS.—The enrolled members of this corps, who now number 600 rank and file, have just elected Captain W. B. Brewster, late of the Rifle Brigade, and son of the Right Hon. Abraham Brewster, of the Irish bar, to be major-commandant of their regiment. They have also elected Captain Wood, late of the Indian army, who has also seen service in the Crimea, to be their adjutant. The companies of the corps drill regularly from eight to ten, A.M., and from four to six P.M., each day, at Lincoln's Inn, the Temple, and Gray's Inn.

VOLUNTEER GUARDS.—It has been for some time contemplated by several gentlemen to form a corps of volunteers measuring not less than six feet in height. A preliminary meeting was held on Monday in St. James's Hall. The chair was taken by the Hon. T. C. Bruce, who, in his opening remarks, explained that the object of the formation of the corps was to accommodate those who, though anxious to become volunteers, found that their height was beyond the average of other corps, in which they must feel themselves out of place, while they might form an efficient body if enrolled with men of nearly uniform stature. The first resolution was then moved, that it be expedient to form a six-foot corps; a second, adopting the rules and regulations which should govern those to be enrolled; a third, naming the officers who should forward an application to the Lord-Lieutenant, tendering the services of the corps to Her Majesty, more than the number requisite for a first company being already secured; and a fourth resolution appointing a committee to arrange the various details connected with the embodiment of the regiment. The resolutions were passed unanimously, and the utmost cordiality seemed to prevail. The officers of the Ist company who were elected are—the Hon. T. C. Bruce. Mr. James Thomson, and Mr. E. F. D. Walshe. It was particularly mentioned that, while it was the strong desire of all to render this corps in every sense of the word a "crack" one, it would be formed upon as inexpensive a basis as possible consistent with due efficiency.

WESTMINSTER.—The following officers have been elected—Mr. Corscaden, captain; Mr. Lewin, lieutenant; and Mr. Lawrence, ensign, whose names will be submitted to the Lord-Lieutenant for the approval of Her Majesty.

ST. PANCRAS AND NORTH MIDDLESEX.—On Saturday evening a public meeting was held at the Guildford Arms, Guildford Street, Russell Square, under the auspices of the committee of the St. Pancras Rifle Corps, for the purpose of organising a local committee for No. 8 Ward. The chair was occupied by Mr. Baker. Mr. Turner moved and Dr. Williams seconded a resolution to the effect that it was desirable and necessary that there should be a general arming of the people for the defence of the country against foreign invasion, and that the parish of St. Pancras ought, under such circumstances, to raise a volunteer corps worthy of her 200,000 inhabitants. The Chairman was about to put this resolution to the meeting, when Mr. Collett rose, and in a long speech, in which he took a very disparaging view of the political career of Lord Palmerston, attributing to him all manner of tergiversation, if not high treason, moved an amendment to the effect that a general arming of the people, without a corresponding reduction of the standing army, was a menace to foreign powers, from none of which, except France, could there be any dread of invasion, and England was at present allied with that country both in diplomacy and arms. The real danger to the liberties of the country did not arise from the hostile intentions of that or any other country, but from the acts of diplomacy and from the ministers usurping the functions of the sovereign. Mr. H. M. Bradley seconded this amendment, which was on a show of hands defeated by an overwhelming majority, and the original resolution agreed to. A committee was appointed.

PADDINGTON.—The total amount of subscriptions and donations up to the present time is upwards of 1100*l.*, and a second company of effectives are already in course of completion.

THE LONDON SCOTTISH.—On Wednesday evening a meeting of this corps was held in the large room of the Scottish Hospital, Crane Court, Fleet Street, for the purpose of arranging a misunderstanding which had arisen respecting the wearing of the kilt by that portion of the corps called the Highland Company. Lord Elcho presided on the occasion, and explained that the misunderstanding had arisen in consequence of his lordship having made objections to the use of the kilt by the corps whilst on duty, conceiving that it was not the most convenient attire for riflemen in the field. He objected to it then, but, for the sake of unanimity, proposed a resolution sanctioning the wearing of the kilt by the Highland Company. Lord Elcho then proceeded to name the officers, saying that for himself, if the selection had depended upon him alone as an individual, he confessed he should have felt much in the difficulty of the Duke of Brunswick, who was so much pleased with the conduct of the Hussars whom he commanded at Quatre Bras, that he took the star from his breast, and "shied" it among them, saying he did not know which of them to give it to, since all of them had deserved it. His lordship added that the corps, in the first instance, would be formed into six companies, and then read the names of the members of the corps for whom the greatest number of votes had been given by the committee, adding that Mr. George Mackenzie had already been gazetted a captain, and would serve in that capacity in the Highland Company. The names were as follows: Captains, the Marquis of Abercorn, Mr. Septimus Carlisle, Mr. Conway, and the Hon. Arthur Gordon. Lieutenants, Mr. Forrest, Mr. M'Kissock, Mr. Duke Hill, Mr. Scott, and Mr. Lumsden, of Pitcaple, late a captain in the Aberdeenshire Militia. Ensigns, Mr. R. Fisher, Mr. C. Shepherd, Mr. Sutherland, of Croydon, Mr. Notman, and Mr. Belfrage. Of the company formed from members of the corps connected with the Oriental Bank, Mr. John Riach had been selected as Captain; Mr. J. S. Pender, late Captain of the Perth Rifles, as Lieutenant; and Mr. John Macnab, as Ensign.

TOWER HAMLETS.—On Wednesday evening a numerously attended meeting was held at the Town Hall, Poplar, in order to promote the formation of a company for that district, Mr. R. Hanbury, M.P., in the chair. The proceedings were unanimous; resolutions were cordially passed, and several subscriptions of from 5 to 25 guineas were announced.

CENTRAL LONDON.—A preliminary meeting, very numerously attended, of those willing to assist in the formation of the above was held on Monday in Gray's-inn Hall, Mr. Walters in the chair. It was agreed—"That the corps to be formed shall consist of residents in the Inns of Court and Chancery and the adjacent districts, and shall be named the "Central London Volunteer Rifle Corps."

SPOTTISWOODE RIFLE VOLUNTEERS.—A corps of about 90 effectives, and the same number of honorary members, in the employment of the Queen's printers, Messrs. Eyre & Spottiswoode, and Messrs. Spottiswoode & Co., of New Street Square, has been formed, and meet for two hours' drill in the courtyard of Bridewell Hospital, New Bridge Street, twice a-week. They have adopted the Government rules and colour of uniform, with green facings. Several friends of the principals, and gentlemen connected in business with them, have become subscribers and donors.

WORKING-MAN'S COMPANY.—A meeting has been held at the Hope and Anchor Tavern, Gloucester Place, Camden Town, for the purpose of taking steps for the formation of a company or companies, composed of the industrious and operative classes, to form part of the St. Pancras and North Middlesex Volunteer Rifle Brigade.

ABERDEENSHIRE.

PETERHEAD.—More than 100 riflemen in this town have enrolled their names, and the service of the artillery corps, which numbers about the same, has been accepted by Government.

BERKSHIRE.

NEWBURY.—The rifle movement has been taken up with great spirit in this district of Berkshire. About 50 persons have enrolled themselves, and it is expected that in a short time the corps will be as numerically strong as any other in a town district of the same population as this. The commanding officer is Mr. H. R. Eyre, of Shaw House, Donnington, near Newbury, and a magistrate for Berks.

CAMBRIDGESHIRE.

WISBEACH.—This company has now 72 effective members.

DERBYSHIRE.

BELPER.—An excellent start in drill was made by the Belper corps on Thursday evening last, when 43 out of 46 volunteers were present. Drilling will be carried on three evenings in the week. There is every prospect of several companies being very shortly formed in Belper.

DEVONSHIRE.

DEVONSHIRE 1ST [OR, EXETER AND SOUTH DEVON] VOLUNTEER RIFLE BATTALION.—Date of formation: 26th March, 1852. Names of officers: Major-Commandant, Sir Edmund Saunderson Prideaux, Bart.; Captains, W. Denis Moore, Henry Barron Rodway, Arthur Charles Chichester, William Henry Peters; Lieutenants, William Henry Hitson, Lewis Trelawney Clark, Frederick Cook, Robert Herrick Vallance; Ensigns, William Henry Rodway, Henry William Clarke; Surgeon, John William Harris, John Macdonald (Acting Adjutant). Effectives: 375, in 4 Companies, and 4 other companies about to be enrolled; about 270 men. Amount of subscription, 10*s.* per annum. Number of honorary members, about 150. State of drill and rifle practice: battalion, company, flanking, and recruit drill, at Hythe system. Uniform: dark rifle green, black facings and belts, frock coat, single-breasted, and trowsers. General remarks: two members have passed the Hythe volunteer course. Quartermaster John Macdonald, 1st Devon Regiment of Militia, has given his services to the corps since last July, and has just passed 190 men fit for duty, and fit to act with any line regiment.

HALDON.—Mr. L. V. Palk, M.P., convened meetings of his tenantry, residing in several parishes near Haldon, last week to take steps for forming a rifle corps. There was a good attendance of farmers, and a most gratifying spirit of patriotism prevailed. It was resolved to establish a corps, and preliminary measures were taken for the purpose.

EDINBURGH.

At a meeting of the county of Edinburgh, on Tuesday, Sir James G. Baird, Major-Commanding the Mid-Lothian Coast Volunteer Artillery, called the attention of the county to the duty of supporting the volunteer movement in general, and, in particular, to the claim which the regiment he commanded had to the support of the county proprietors. He stated that that corps consisted of seven companies, of the *minimum* strength of 50 men each, five of which had been formed in and around Edinburgh, one at Portobello, and one at Musselburgh. The members had in almost every case paid all their individual expenses of clothing and arming, but for the general expenses of the regiment he thought they had a claim to contributions from the county, either in the way of donation or annual subscription. In the course of the proceedings, Lord Melville (General-Commanding in North Britain) said, the Volunteers were a loose and useless kind of force, and never would be efficient. The Militia were not as efficient as they might be, but if placed on a proper footing they might be made efficient. As to the Volunteer force, it was perfectly useless, and no general officer would command it. Mr. Charles Cowan said, he was quite aware that the Volunteer force could not expect to cope with the Line, but it appeared to him that the spirit that had been lately evoked throughout the country was such as they ought to be proud of; and he thought it would be a great advantage if the youth of the land, in any system of national education that might be adopted, received that physical training and development of body which would improve their efficiency when they came to be called out for the defence of their country. Lord Melville's opinion was combated by several speakers, Mr. G. Wauchope saying the Volunteers should not be condemned till they were tried. He thought the movement a most glorious one, but, perhaps, his noble friend would have more approved of it if it had had a little more red tape about it. A committee was eventually appointed to consider in what way the county could most advantageously give its support to the volunteer movement.

A letter-press artillery corps has been formed in Edinburgh, consisting of 130 enrolled members, and it is to be associated with the City of Edinburgh Volunteer Artillery. Mr. Robert Clark has been chosen captain, and Mr. Robert Brydon first lieutenant.

ESSEX.

VICTORIA (LONDON) DOCKS.—The services of this corps, which has been designated the "Sixth Essex Volunteer Rifles," have been officially accepted. The regiment will be complete in itself, and have a major-commandant, four captains, four lieutenants, four ensigns, an adjutant, and a surgeon. About 400 volunteers have been enrolled.

COLCHESTER.—Subscriptions have been made here to assist in the equipment of a second company in course of formation in the town. The Mayor has forwarded a donation of 10*l.*; Mr. G. H. Errington, 20*l.*; Mr. H. Wolton, 10*l.* 10*s.*; and Mr. J. W. Egerton Green, 10*l.* 10*s.* Several other gentlemen have also contributed smaller sums, and about 20 volunteers have been enrolled for the company. The first company has obtained its full complement.

An influential meeting has been held at Halstead to promote the organisation of a company in that district. The meeting passed off satisfactorily, and the subscription entered into reached a total of 170*l.* At Dunmow it is expected that a full company will shortly be formed, about 50 effective members having been already obtained. Drill has been commenced, and a practice ground, with a range of 600 yards, has been provided at a short distance from the town. The officers have not yet been elected.

FORFARSHIRE.

3RD FORFARSHIRE RIFLES.—Formed 25th June, 1859. Officers: Captain, James Anderson Dickson; Lieutenant, David Salmond; Ensign, Charles Webster Corsar; Effectives, 65; Honorary, 15; well forward in drill. Uniform: dark grey tunic and trousers, with black braid; black patent leather belts, with bronzed ornaments; device, portcullis, with motto, "Pro aris et focis." Arms, short Enfield, with sword bayonet.

HAMPSHIRE.

PORTSMOUTH VOLUNTEERS.—This corps is composed of two companies of 70 men each, in a very forward state of drill, and a third company is in course of formation. The donations are very numerous, the Bank of England alone having given 26*l.* There seems to be some misunderstanding respecting the uniform, the corps objecting to grey and red facings, on the ground that it is too like the dress of the invalids at the hospital, the uniform of the Medical Staff Corps, and the dress of the convicts. We can understand that in a garrison town like Portsmouth, a feeling of this sort might prevail, particularly when the comparison of colour is too obvious to escape comparison.

KENT.

WOOLWICH ARSENAL.—The formation of an artillery and rifle corps, composed of the officers and workmen employed in the various departments, is being carried out with unexampled success, and on Friday last a meeting was held in the schoolroom at the Royal Carriage Department, for the election of officers for the first completed companies. Mr. C. Ellis occupied the chair, and the members enrolled proceeded to elect by ballot the following officers:—1st company of Artillery, Mr. C. Ellis, captain; Mr. Kellow (master carpenter), lieutenant; Mr. Lamerton (inspector of machinery), second lieutenant. 1st company of Rifles, Mr. Thoms, captain; Mr. W. Butler, first lieutenant; Mr. J. Bell, second lieutenant. Meetings are to be held for the election of officers for other completed companies, and the total force will amount to at least 1500 officers and men, the majority being artillery companies. At an aggregate meeting, presided over by Colonel Tulloh, Superintendent of the Royal Carriage Department, and commandant of the whole forces, the chairman, in an excellent address, observed he was delighted to act for this patriotic object with those thousands of men with whom he had laboured for years, and with nearly all of whom he was personally acquainted. The force to be raised might at some time be called upon for the defence of that splendid Arsenal, unequalled in the world. He had received intelligence—though not official—that the Secretary of State for War, though approving of the formation of rifle corps, was very strongly in favour of artillery companies being established for the defence of the Arsenal.

CHATHAM.—The artillery corps formed at Brompton numbers about fifty members, and the necessary steps have been taken for its enrolment. Nearly 200*l.* has been received in subscriptions.

DARTFORD.—A list of 70 effective members and 34 hon. members has been presented to the Lord-Lieutenant. Since then the names of 30 other persons have been received as effective members, and subscriptions promised to the amount to about 400*l.*

KIRKALDY.

A meeting for the purpose of enrolling volunteers for the rifles and artillery was held on Saturday evening, Mr. J. N. M'Leod presiding. At the meeting 65 names were received for the artillery and 43 for the rifles. This is exclusive of those who have joined in the villages immediately adjoining the town.

LANCASHIRE.

LIVERPOOL.—A notification has been received by Mr. Charles Mac Iver from the Lord Lieutenant of the county,

Digitized by Google

that the Government has accepted the services of the Volunteer Artillery Corps formed by the British and North American Royal Mail Packet Steam Company out of the persons employed by them at this port. The corps is numbered as the 11th in the county of Lancashire, and its full establishment will consist of one lieutenant-colonel, one major, five captains, five first lieutenants, one adjutant, one surgeon, five second lieutenants, and 400 men of all ranks, divided into five companies.

MANCHESTER.—The 1st Regiment of Manchester Rifle Volunteers assembled on Saturday at 2 o'clock, and formed in front of the Royal Infirmary, to very nearly their full strength of 1200 men. From thence they marched in the direction of Bury. They are a very fine body of men, and appear to have made wonderful progress in point of discipline. The 2nd Regiment also mustered in great strength, and marched to Belle Vue to drill. The 3rd regiment is not yet complete, but is making satisfactory progress. The fourth company of this regiment is called the Press Company, being mostly composed of compositors from the printing-offices.

HAWKSHEAD.—A company, numbering between 70 and 80 members, has just been formed, in connection with the North Lonsdale Volunteer Rifle Corps, at Hawkshead, in the Lake district. Upwards of 200*l.* has been already subscribed, and the greatest enthusiasm is manifested.

LINCOLNSHIRE.

HOLBEACH.—The provisional committee of the South Holland Corps having obtained the requisite number of effective Volunteers to form a sub-division of a company at Holbeach, they are now in communication with the Lord Lieutenant of the county on the subject of its speedy enrolment. More than 200*l.* has been subscribed.

GRIMSBY.—The town council have granted the use of rooms in the Town-hall in which to deposit the arms and ammunition. Donations of 25*l.* have been received from Sir J. Sutton, 10*l.* from Major-General Angerstein, and 10*l.* from Mr. G. H. Haigh, of Grimsby Hall.

LINLITHGOWSHIRE.

A rifle corps is being formed in this county, having companies of about 100 men each, in Linlithgow, Bathgate, and Bo'ness; and at the last-named place (on the Firth of Forth) an artillery corps is also in course of formation. A general subscription is being raised in the county, in addition to local subscriptions for the different companies.

MONMOUTHSHIRE.

NEWPORT.—The Lord-Lieutenant of the county of Monmouth has given his sanction to the establishment of two corps of volunteers, the first originated being called the "Newport Volunteer Rifle Corps," and the second the "Borough Volunteer Rifle Corps." Both bodies are active in drill, and the latter is already 100 strong. The following officers have been elected:—captain, R. J. Cathcart; lieutenant, J. Philpotts; ensign, J. H. Willmett; surgeon, W. W. Morgan; assistant-surgeon, B. Davies.

NORFOLK.

YARMOUTH.—The rifle corps under J. H. Orde, Esq., comprises now more than the required number of men, and it has been determined, in consequence, to form another company, the nucleus of which will emanate from the present corps. The officers of the new company will, it is said, consist of the following gentlemen:—captain, E. P. Youell, Esq., lieutenant of the present corps; lieutenant, R. H. Harmer, Esq., sergeant-major of the present corps; ensign, E. S. Preston, Esq.

NORTHAMPTONSHIRE.

PETERBOROUGH.—The Hon. G. W. Fitzwilliam has accepted the command of this company, which now includes 60 members. A practice ground has been selected and approved, and drill is to be at once commenced.

NORTHUMBERLAND.

HEXHAM.—The Hexham Volunteer Rifle Corps promises to be equal to any established in Northumberland. The county gentry are supporting the movement in a most liberal manner; 157*l.* has already been subscribed. The Duke of Northumberland has contributed 20*l.*; Mr. W. B. Beaumont, M.P., 20*l.* (his first subscription); Sir Edward Blackett, 10*l.*; Mr. Somerset Beaumont, 10*l.*; Mr. Jasper Gibson, 10*l.*; Mr. Richard Gibson, 10*l.*

NOTTINGHAMSHIRE.

NOTTINGHAM.—A special meeting of the members of this corps was held on Saturday evening, in the Exchange Hall, for the purpose of appointing the commanding officers. Dr. Ransome was in the chair, and there was a full attendance, about 600 Volunteers being present. After some discussion Lieutenant-Colonel Crawford, late of the 60th Rifles, who commanded the Italian Legion in the Crimean war, was appointed Colonel; Mr. Patchitt (mayor of the borough) was chosen for the Lieut.-Colonel; and Sergeant-Major White (late of the Queen's Royals) to be the Adjutant of the battalion.

OTTERY ST. MARY.—A numerous and influential public meeting was held a few days ago in this town for the purpose of establishing a rifle corps. A committee was appointed to organise the movement, and liberal subscriptions were announced, Sir J. Coleridge and Sir J. Kennaway each contributing 30*l.*

RADNORSHIRE.

PRESTEIGNE.—An adjourned meeting was held on Tuesday last, at the Radnorshire Arms Hotel, to promote the formation of a volunteer rifle corps. It was resolved unanimously to establish a rifle corps for the town and neighbourhood of Presteigne. Upwards of sixty volunteers have already sent in their names.

SOMERSETSHIRE.

BURNHAM VOLUNTEER RIFLE CORPS.—The officers are Benjamin Tuthill Allen, Esq., Captain; Joseph Allen, Esq., Lieutenant; Charles James Brody Mais, Esq., Ensign. The effectives number 64. Uniform: the county uniform, grey, with black facings. Drill is just commencing.

STAFFORDSHIRE.

There are thirty-two towns in Staffordshire in which companies have been or are being formed, and nine of these companies have been formally accepted by Government. The aggregate total of effective members is between 1800 and 1900, and in round numbers the effective strength of the Volunteers of Staffordshire will, when the whole of the companies are completely organised, exceed 2000 men. To meet the expenses incident upon the formation and equipment of this force upwards of 12,000*l.* has been promised as donations, and annual subscriptions, to the amount of about 1800*l.*

4TH STAFFORD RIFLE VOLUNTEERS.—Date of Formation: 12th Nov., 1859. Names of Officers: Captain, Charles Frederick Darwall; Lieutenant, John Woodward Newman; Ensign, Frederick Fulrman Clarke. Effectives: 70. Donations: 380*l.*; Subscriptions: 110*l.* State of drill and rifle practice: squad drill, manual and platoon exercise. Uniform: grey tunic and trowsers, with black braid. General remarks: arms, long Enfield.

SUFFOLK.

The members of the Woodbridge company, now 64 strong, continue to meet for drill three times weekly, and several fresh donations have been received to meet the expenses of the movement. Upwards of 60 volunteers have been sworn in at Exe as members of the company formed in that district. At Stadbroke, 20 effective volunteers have been obtained. A meeting is to be held at Needham Market on Wednesday to make arrangements for a company for the hundreds of Bosmere and Claydon, and a similar gathering will also be convened at Ipswich in a few days for the hundred of Samford.

TREDEGAR.—The Tredegar company now numbers 110 men, who are regularly drilled night and morning by sergeants from the Monmouthshire Militia.

SURREY.

SOUTHWARK AND LAMBETH, OR 7TH SURREY.—The attendance at drill at the Lambeth Baths continues to increase every week, and during the past one the services of two more companies, of 60 men each, have been tendered to Her Majesty by the Lord-Lieutenant, making with those previously enrolled nearly 200 volunteers who have joined this corps, and it is expected that battalions will be formed in the course of a few days. The commanding officer, Captain Beresford, has recommended Lieutenant Robert Crowe, an experienced officer of the Line, for the command of the first of the above companies. Pay and Colour-Sergeant Wallis has been appointed Sergeant-major to the corps.

CROYDON.—On Wednesday evening, last week, an agreeable episode occurred in the proceedings of the Croydon Riflemen, in the presentation of a testimonial to Sergeant Creagh—who has left the Croydon Barracks through promotion. The gift in question was a silver pint drinking cup, richly chased, and valued ten guineas, manufactured by Mr. Thomas Weller, of Croydon. The successor to Sergeant Creagh is Sergeant Titman, who is well qualified for his office, and will doubtless prove as popular as his predecessor. Within the last week a considerable augmentation has been made to the corps from Mitcham, where a corporal from the Croydon corps attends now weekly for preliminary drill. The 2nd company is now forming, and by the spring, there is little doubt that two full and efficient companies will be ready to take the field for the new long range.

KINGSTON.—A numerous and enthusiastic public meeting was held in the Town-hall on Thursday last, in support of the volunteer rifle movement in Kingston; Lord St. Leonards in the chair. His lordship proceeded to observe, regarding the previous unsuccessful attempt to form a corps in Kingston, when some were for having a rifle club and others a volunteer rifle corps, and the one was as eager as the other for their pet scheme, that he was not sorry for the delay, as it had afforded an opportunity for mature consideration; and seed well sown came well up. It had been said by some in very high places that there had been a panic in England; now, a panic meant a sudden fright without any cause. He would tell those who made such an assertion that it was an unmitigated falsehood. If any one thing struck him more than another, it was the people of England rising with might and majesty to aid, by the best of patriotism, in the protection of their altars and their homes. (Loud cheers.) There was nothing like brigandage; but the calm, cool, quiet determination of freedom's sons, by united efforts, to resist any aggression, emanate from where it would. When Bonaparte threatened an invasion he (Lord St. Leonards) was in his younger days, and he would tell them that he was one of the volunteers of those days,—and they did not play at soldiers, but drilled four hours per day; and the thoughts of what had been done enabled him to call upon the young men of the present time to do as their forefathers had done. He believed the reason Bonaparte did not come to England was that he discovered the country was all in arms. (Cheers.) The meeting pledged itself to give the best support and assistance to the Kingston Volunteer Rifle Corps.

SUSSEX.

At Brighton the drill is proceeding satisfactorily, and the enrolment rapidly. At Chichester there was a meeting on Friday, at the Council-chamber of the committee of the Chichester Rifle Corps. Mr. A. Hall Hall announced that the West Sussex Volunteer Rifles, just formed, and already consisting of 40 men, were willing to join the Chichester Corps. The second Sussex Rifle Corps is progressing satisfactorily. The Arundel and Littlehampton corps is commanded by the Duke of Norfolk, who has granted a convenient spot in Arundel Park as the rifle practice ground. The corps at present numbers 50.

WARWICKSHIRE.

STRATFORD-UPON-AVON.—A Rifle Corps, consisting of 65 effectives and 26 honorary members, has been formed in this town, and on Monday last Henry Perrott, Esq., late Lieutenant of the 59th Foot, was unanimously elected Captain. The effectives are drilled three times a-day under the able direction of Colour-Sergeant William Roe, of the 1st Warwickshire Militia, and Sergeant Middleton.

BIRMINGHAM.—The Rifle Corps Association of this town had an interview with Lord Leigh, as Lord-Lieutenant of the county, last week, the purpose being to impress upon his lordship the desirability of establishing a Birmingham brigade, distinct from the Warwickshire corps. His lordship expressed his willingness to sanction a Birmingham battalion of the Warwickshire corps, with a commandant distinct, provided that 500 men could be raised. Mr. J. D. Goodman announced on the part of the gun trade, that the gunmakers had already subscribed 1000*l.* towards the equipment of their own men. Mr. A. Ryland mentioned that it was in contemplation to raise a body of men from the ranks of the attorneys of the town, and their clerks.

WORCESTERSHIRE.

The volunteer movement in this county is now in a condition to pronounce the results. At Pershore 88 volunteers have been enrolled. Captain Scobell was on Friday elected captain of the corps. At Kingswinford 50 men have been enrolled, and Mr. B. St. John Matthews is appointed captain. At Malvern the full corps of 60 is nearly made up, and Sir H. Lambert is appointed captain. At Eveshain 52 volunteers are enrolled, and 300*l.* is subscribed. At Wolverley and Kidderminster, the first corps enrolled in the county, the drills go on with success. The second company has been finally accepted at Kidderminster. At Stourport also there are daily drills. The Droitwich corps have incorporated themselves with their neighbours of Hanbury, and Mr. H. P. Vernon, of Hanbury Hall, has been elected captain.

YORKSHIRE.

BRADFORD.—Her Majesty has been pleased to accept the services of a sub-division, to be attached to the 5th Company of West Riding Rifle Volunteers (Bradford 1st Company), as well as to appoint Lieutenant A. B. Foster, of the 6th Company, to be Lieutenant of the 5th Company; Ensign H. S. Hirst to be Lieutenant, 6th Company; and Mr. John Foster, jun., to be Ensign of the same company, *vice* Hirst, promoted; Mr. George Bankart to be Ensign, 5th Company, Mr. Salt, M.P. for Bradford, Mr. W. Walker, of Bolling Hall, West Riding, magistrate, and about a dozen other gentlemen have enrolled themselves honorary members of the Bradford Volunteer Corps.

WEST RIDING RIFLE VOLUNTEERS.—On the 5th of September, 1859, the services of this corps were accepted. The officers are:—George Briggs, magistrate, King's Dragoon Guards, Captain; Edward Lloyd, Lieutenant; Herbert Severm, Ensign and Musketry Instructor; Temple C. Paley, late West York Light Infantry Militia, Hon. Surgeon; H. Crawford, late 3rd Buffs, Sergeant-Major. Effectives: there are one hundred subscribing 10*s.* a year each. The supernumeraries are to be formed eventually into a second company. Amount of subscription, 400*l.* Honorary members number sixty at 1*l.* 1*s.* a-year. The corps is well advanced in drill. Musketry instruction conducted regularly. Uniform: medium grey, with black piping, brown leather belts, and dead-silver devices.

3rd Worcestershire Rifle Volunteers—Alfred Talbot, Esq., to be Captain; James Dixon, Esq., to be Lieutenant; Alfred Brinton, Esq., to be Ensign.

4th Company of Derbyshire Volunteer Rifles—Walter Boden, Gent., to be Lieutenant; Samuel Lewis, jun., to be Ensign.

4th Division of Lancashire Artillery Volunteers—James Bourne, Esq., late Major in the Royal Lancashire Militia Artillery Regiment, to be Lieutenant-Colonel Commandant; James Walter, Esq., to be Major; George Melly, Esq., to be Captain; Barton Wrigley, Esq., to be Captain; Thomas Arthur Bushby, Esq., to be Captain; Henry Hugh Hornby, Esq., to be Captain; Charles Backhouse Robinson, Esq., to be Captan; Samuel Hayward Turner, Esq., to be Captain; James Pitcairn Campbell, Esq., to be Captain; Charles Langton, Esq., to be Captain; Eustace Greg, late Lieutenant in Her Majesty's 3rd Buffs, to be First Lieutenant; Joseph Corbett Lowe, Gent., to be First Lieutenant; Thomas Gardner, Gent., to be First Lieutenant; Peter Bourne Drinkwater, Gent., to be First Lieutenant; Alexander Sparrow, Gent., to be First Lieutenant; William Radcliffe, Gent., to be First Lieutenant; James Poole, Gent., to be First Lieutenant; George Holt, jun., Gent., to be Second Lieutenant; George Sinclair Robinson, Gent., to be Second Lieutenant; Robert Burke Honan, Gent., to be Second Lieutenant; Caleb Charles Rotheram, Gent., to be Second Lieutenant.

1st Company of Lancashire Rifle Volunteers—John Lord Howard, Gent., to be Ensign, vice Robertson, promoted.

25th Company of Lancashire Rifle Volunteers—Alexander M'Neile, Esq., Captain on half-pay in Her Majesty's Madras Army, to be Captain; Charles Lee Campbell, Gent., to be Lieutenant; Robert Horsfall, Gent., to be Ensign.

6th Division of Lancashire Rifle Volunteers—Horatio Simon Samuel, Esq., to be Captain; Francis Philip Rickards, Esq., to be Captain; William Spencer Sawyer, Esq., to be Captain; James Knowles, Esq., to be Captain; David Bleackley, Esq., to be Captain; John Pearce, Esq., to be Captain; Samuel Henry Hinde, Esq., to be Captain; Robert Bridgford, Gent., to be Lieutenant; John Bagshaw, Gent., to be Lieutenant; Hugh Fleming, Gent., to be Lieutenant; George Hartley Goldsmith, Gent., to be Lieutenant; Richard Pape Ford, Gent., to be Lieutenant; Francis Henry Glover, jun., Gent., to be Lieutenant; Herbert Philips, Gent., to be Lieutenant; Andrew Stirling, Gent., to be Ensign; Robert May, Gent., to be Ensign; Thomas Walker Nelson, Gent., to be Ensign; William Borlase Willock, Gent., to be Ensign; Robert Bellhouse, Gent., to be Ensign; John Howarth Ashton, Gent., to be Ensign; Albert Lungley Dickins, Gent., to be Ensign; Anthony Beaufort Brabazon, Esq., M.D., to be Surgeon; Robert Manners Mann, Gent., to be Assistant-Surgeon.

10th Company of Lancashire Rifle Volunteers—Peter Allen, Esq., M.D., to be Honorary Surgeon.

15th Division of Lancashire Rifle Volunteers—Robert Gordon Hamilton, Esq., to be Captain; Richmond Higinbotham Tucker, Esq., to be Captain; Francis James Eaton,

Digitized by Google

Esq., to be Captain; Richard Rankin Heap, Gent., to be Lieutenant; Thomas Stanley Rogerson, Gent., to be Lieutenant; Alfred Middleton, Gent., to be Lieutenant; Allan Stanley Clare, Gent., to be Ensign; Thomas Alexander Bentley, Gent., to be Ensign.

16th Company of Lancashire Rifle Volunteers—Alfred King, jun., Gent., to be Lieutenant; George Butler Henshall, Gent., to be Ensign.

5th Division of Lancashire Artillery Volunteers—Alfred Crosby Pope, Gent., to be Honorary Surgeon.

6th Division of Lancashire Artillery Volunteers—David Barbour M'Culloch, Gent., to be First Lieutenant; Isham Henry Edward Gill, Gent., to be Second Lieutenant.

1st Company of Northumberland Rifle Volunteers—Ensign Fawcus to be Lieutenant, vice Fenwick, resigned; Mr. Edward Shotton to be Ensign, vice Fawcus, promoted.

2nd Company of Northumberland Rifle Volunteers—John Fenwick, Esq., to be Captain; Mr. Alexander Shannon Stephenson to be Lieutenant; Mr. John Twizell to be Ensign.

2nd Company of Northumberland Artillery Volunteers—Emanuel Young, Esq., to be Captain.

2nd Company of Berks Rifle Volunteers—Lieutenant the Hon. Alexander Leslie Melville Hore Ruthven to be Captain; Ensign Samuel Thomas George Evans to be Lieutenant, vice Ruthven, promoted; Ramsay Hamilton Couper to be Ensign, vice Evans, promoted.

Cambridge University Rifle Volunteers—Charles James Newberry, Esq., M.A., to be Captain; Charles Twemlow Royds, Esq., to be Lieutenant; Oswald Smith, Esq., to be Ensign; Frederick Whitmore Holland, Esq., B.A., to be Captain; Edmund Boulnois, Esq., to be Lieutenant; John Bagot Scriven, Esq., to be Ensign; Henry Salusbury Hughes, Esq., to be Captain; John Armine Willis, Esq., to be Lieutenant; Robert Augustus Bayford, Esq., to be Ensign.

Cornwall Volunteer Corps—2nd Company Artillery—William Thomas Alexander Pattison to be Surgeon. 5th Company Rifles: John Kempthorne to be Captain; William Gostwych Gard to be Lieutenant; John Peter, jun., to be Ensign. 1st Company Artillery: Henry Marley to be Surgeon.

East York Rifle Volunteers—3rd Company—Philip Saltmarshe, Esq., to be Captain; Eric William Clark, Esq., to be Lieutenant; Thomas Carter, Esq., to be Ensign.

WHITEHALL, JAN. 20.

The Queen has been pleased to appoint Lieutenant George Brinewood Potts to be Adjutant, with the rank of Captain, of the Artillery Company of London, vice Snell, promoted.

The Queen has also been pleased to appoint Peter Matthews, Gent., to be Assistant-Quartermaster of the Artillery Company of London.

Glamorganshire Rifle Volunteers — 10th Company—Richard Bassett, Esq., to be Captain; Frederick Ridge Greenhill, Esq., to be Lieutenant; Charles Henry Williams, Esq., to be Ensign; Jan. 13.

1st Lincolnshire Artillery Volunteers—Francis Thirkill White, Esq., to be Captain; William Wilkinson, Gent., to be First Lieutenant; John Field Smyth, Gent., to be Second Lieutenant; Jan. 12.

1st Sub-division of Lincolnshire Rifle Volunteers—George Charles Uppleby, Esq., to be Lieutenant; John Stephenson, Gent., to be Ensign; Jan. 12.

Norfolk Rifle Volunteers—5th Company—John Lowe, Esq., M.D., F.R.S., to be Honorary Surgeon; Jan. 16.

Gloucestershire Rifle Volunteers—2nd Company—John Pleydell Wilton, Gent., to be Honorary Surgeon; Jan. 18.

16th Middlesex Rifle Volunteers—Charles Edward Murray, Esq., to be Captain; Robert Lawes, Gent., to be Lieutenant; Jan 6.

21st Middlesex Rifle Volunteers—Nicholas Herbert Harrington, Esq., to be Captain; Jan. 10. John Lowther Du Plat Taylor, Esq., to be Captain; Jan. 11.

6th Company of Cornwall Volunteer Rifles — Edward Baring Gould, Esq., to be Captain; William Day Hanson, Esq., to be Lieutenant; Jan. 10.

5th Company of Derbyshire Volunteer Rifles—William Henry Cox, Esq., to be Captain; Alexander James Henley, Gent., to be Lieutenant; Alexander Buchanan, Gent., to be Ensign; Jan. 18.

11th Company of Staffordshire Rifle Volunteers—William Barrows, jun., Esq., to be Captain; Jan. 11.

Bath, or 1st Somerset Volunteer Rifle Corps—Henry Batchelor to be Ensign; Edward Francis Elliott, Major, retired, to be Lieutenant; Dec. 30.

Burnham or 4th Somerset Volunteer Rifle Corps.—Benjamin Tuthill Allen, Esq., to be Captain; Joseph Allen, Gent., to be Lieutenant; Charles James Brody Mais, Gent., to be Ensign; Jan. 12.

Bridgewater and Polden Hill, or 5th Somerset Volunteer Rifle Corps—Gabriel Stone Poole, Esq., to be Captain; Charles Robert Bate, Gent., to be Lieutenant; William John Ford, Gent., to be Ensign; Jan. 14.

11th Aberdeenshire Rifle Volunteers.—William Esplin, Esq., to be Captain; Irvine Kempt, Esq., to be Lieutenant; James Haddon Bower, Esq., to be Ensign; Jan. 13.

1st Company of Kincardineshire Artillery Volunteers—Alexander Innes, Esq., to be Captain; Charles Gordon Robertson, Esq., to be First Lieutenant; James Tindal, jun., Esq., to be Second Lieutenant; Jan. 10.

1st Company of Kincardineshire Rifle Volunteers—Thomas Frazer Duff to be Captain; James Black to be Lieutenant; John Milne to be Ensign; Jan. 10.

Ayrshire Rifle Volunteers—1st Company—James Hunter Picken, Gent., to be Captain; Robert Railton, Gent., to be Lieutenant; James Bishop Andrews, Gent., to be Ensign; Jan. 14.

5th Company of Lancashire Rifle Volunteers—Captain Adam Steuart Gladstone to be Captain Commandant; Ensign Charles Edward Crosbie to be Lieutenant, vice Robert John Tinley, promoted; Jan. 10.

[The following appointment is substituted for that of Wm. Reade Brenden, which appeared in the Gazette of the 10th instant.:]—

7th Company of Surrey Rifle Volunteers—William Reade Brander, Gent., to be Lieutenant, Jan. 7.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street (North), Strand, London, W.C.
[Late "Household Words" Office.]

MR. ALBERT SMITH with his CHINA REPAIRED and MONT BLANC REVISITED, 1859. Every Night (but Saturday) at 8, and TUESDAY and SATURDAY Afternoons at 3 o'clock. Stalls 3*s.*, which can be taken at the Box Office, Egyptian Hall, daily, from 11 till 5; Area 2*s.*, Gallery 1*s.*

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov. 12.*

Price 21*s.* ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.
2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone *in* the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

THE ALLIED GENERALS BEFORE SEBASTOPOL.—The Subscribers to this Engraving are informed that the prints are now ready for delivery, and that a great variety of frames made purposely for it may be seen at Messrs. LLOYD BROS. & Co., 96, Gracechurch Street, City, E.C.

EASTWARD HO! is at Mr. JAS. RYMAN'S, Oxford.

ARMY AND NAVY GAZETTE.

Officers of both Services, the Nobility, Gentry, and Public, that they punctually supply THE ARMY AND NAVY GAZETTE, Edited by W. H. RUSSELL, Esq., LL.D., immediately on publication. Orders addressed to either of the following Establishments will ensure attention:—

CLAYTON & SON ..... 265, STRAND, W.C.
Ditto ..... 223, PICCADILLY, W.
Ditto ..... DUBLIN.
CLAYTON & CO. ..... CHATHAM.

THE ARMY AND NAVY GAZETTE will be kept on Sale all the following week, at each Establishment. Morning Newspapers supplied by the first trains on every line out of London. Country Agents supplied on the lowest terms.

265, STRAND, LONDON, W.C.

NOTICES TO CORRESPONDENTS.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not authenticated by the name of the writer, given in confidence to the EDITOR.

The EDITOR begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, JANUARY 21, 1860.

If the proposed augmentation of the Army be made an answer to any demands from the Volunteers for the assistance of Government, we think an unjust estimate is formed of the spirit of the movement, or of the manner in which the State should regard the uses and relations of Volunteers to the safety of the empire. Whilst we are disposed to take the view that undrilled Volunteers would be no very reliable source of security in time of danger, we hold that the spirit which animates them is one which ought to be encouraged and developed by every legitimate means in the power of the Government; among which we reckon due attention to their requests, and such aid in money as may be demanded by the unanimous voice of the body for their requirements, in paying staff-officers and providing proper places of exercise, drill, and practice. The Volunteers must not be unreasonable: as yet they show no disposition to be so: and in times past they certainly displayed a nobleness of devotion and a completeness of patriotism which secured for them the admiration and gratitude of their countrymen. If they will spend money in handsome dresses and in brass bands, of course there will be a disinclination on the part of the Parliament to accede to requests for money for purposes of greater utility; but there is really no good ground for objecting to such additions, if they stimulate the spirit of the various corps, and do not absorb subscriptions which might be better employed. In times of peace the value of the Volunteer Movement is best tested by its voluntary character. As yet the movement is not so large and wide-spread as we hoped it would become; and it seems as if the country was waiting for the meeting of Parliament, to ascertain what the Government intended to do. There are less than 100,000 Volunteers in England, Scotland, and Wales. There are none in Ireland, where the Volunteers of 1782 left an unpleasant impression on the minds of the authorities. When we say that there are not 80,000 Volunteers enrolled or in training, we do not make a mis-statement. They are scattered all over England, here and there, in hamlets and towns; all over Scotland and Wales in the same way. It would be exceedingly difficult, as the Volunteers are at present constituted, to get 10,000 of them together at one spot, and little companies here and there would be inappreciable obstacles in the way of an invading force.

There were, before the American war, 45,000 Volunteers in the little State of Massachusetts; more than half of the strength of our present Volunteer force in the United Kingdom. Now, whilst we are fully persuaded of the necessity of drill—and, above all things, of practice—we must deprecate constant fagging, which disgusts men who find that drilling, goose-stepping, wheeling, and counter-marching lose their charms after a time, and become in reality rather monotonous exercises, particularly when all the evolutions are spoiled by one stupid rank and file, and the inexorable sergeant "as-you-were's" his squad into pristine indignation. Let not our captains of companies hurry to be perfect. Let the exercises be light, and not too frequent; there is plenty of time, we think, for improvement. Above all, let nothing ridiculous in uniform, or accidents, or pretension, deter one's neighbours from joining the movement, which is, in its essence, thoroughly wholesome. But, again, we repeat, it wants some impetus. The spread is not as wide, or as deep—or as high even—as we could desire. If Parliament should, in its wisdom, think fit to throw the whole weight of the Volunteers on the people, with the exception of such aid as they have already received and as they are to get under certain conditions, we confess we do not see how we can make it so completely successful as its friends desire. Volunteers cannot be *too numerous*. In their numbers is the real strength of the Volunteers—in their numbers is the full significance of the demonstration; —and if they fail in that essential, they not only fail in all, but they incur the risk of calling the attention of those on whom we intended to impose by an appearance of strength, to our supposed weakness. If any step were taken to make use of that deceptive conclusion, no doubt the Volunteers would be as ready as they were in the old war—but it would then be too late perhaps; for it must be remembered that England was at war with France for years ere the old Volunteers obtained their full development and power, and that the battalions which were then ready to resist an enemy, had long experience, and were as well drilled generally as regulars, fencibles, or militia. And here we would point out, by the way, a fallacy which lies in the remark that "young soldiers" have generally won great battles. The men may be young, we admit; nay, more, they may never have been in or under fire before the action, but it is morally certain that such young soldiers as have gained grand victories, or victories at all, have been well drilled and accustomed to act together, at least regimentally. If not, the experience of history goes for nothing, our knowledge of human nature is useless. The Volunteers, if they are ever to be looked to with confidence as an element in the power and resources of the State, must be a permanent body. They must not become the mere mushrooms of panics, dying with the false growth from which they spring. As we have said before, we think if it could be proved to demonstration that there is not a chance or probability of a Volunteer ever pulling a trigger against an enemy, the movement has great ends and purposes and effects in the life of this nation, for which it deserves encouragement from any English statesman who desires to keep the blood fresh in our veins, our eyes undimmed by years, and our muscles strong and full of conscious energy. Well, then, what will the Government do? A few nights more will probably decide how far the Volunteers have to rely on their own rescources, or on the assistance of the state. *Aide toi et Dieu t'aidera* is a good motto for an individual—it may be, an Empire; but in giving help to the Volunteers the State assuredly would be helping itself, and we doubt not that the assistance of Heaven would be granted to an effort which would secure—if not the liberties of England—at least the maintenance of the spirit and courage of the Englishman, who possesses in his nature great antipathies to your dry-rot of states and nations, but who, nevertheless, might at last buy off his barbarians with a bag of gold, if he were not reminded of his former glories, and renovated in the use of the means by which he gained them.

In our last number we explained the cause of the promotion of Colonel Airey over the heads of eleven

Digitized by Google

other lieutenant-colonels of the Guards. Nevertheless a correspondence has taken place during the week in the columns of our leading contemporary, in which "A Guardsman's Ghost," and some more substantial writers have dwelt upon the matter with various degrees of inaccura . The "Guardsman's Ghost" would make it appear that Colonel Airey was promoted because he was brother of the quartermaster-general; a second writer, both because he had seen much war service in India and the Crimea, and was of longer service than the other Guardsmen; and a third, who came to correct the other two, said it was because he had served a certain qualifying term as lieutenant-colonel, which those above him on the list had not done. It has not occurred to any of those volunteer public instructors to state the true cause, which was the exception made by the Royal Commissioners in favour of the unrestricted army promotion of officers who possessed the rank of field-officer before the 20th of June, 1854, thus paying respect to what was considered a vested interest possessed by this class of officers. For the very same reason Lord Westmoreland will next week jump over the eleven Guardsmen; and Lieut.-Colonel Maitland of the Grenadier Guards will also go over their heads on the next vacancy.

We notice this correspondence less because of any practical advantage likely to arise from it, than because it furnishes an illustration of the prevailing tendency to place the Guards and the Line in a position of antagonism, which neither the one nor the other at all desire. Colonel Airey was one of four Line officers selected for good service for promotion into the Guards, to complete the augmentation of 1854; and because he had previously served in the Line, this Guardsman's Ghost (whom we believe never to have been a Guardsman in substance) rushes forward with his damaging advocacy of the Brigade of Guards. He maintains that the officers passed over had a vested interest which should have been respected by the warrant of 1858. But everyone of these officers obtained their promotion in June and July, 1854, without purchase, and the only vested interest they could be supposed to have was that based upon their standing as regimental subalterns. Every officer in the Guards who had a company (with army rank of lieut.-colonel) before the 20th of June, 1854, has been promoted to the rank of colonel in his proper seniority by the warrant of 1858; and we think a very fair and sufficient restitution was made thereby to officers who had purchased commissions, under the impression that they would lead to certain prospective advancement, but whose belief was dissipated by the warrant of 1854. But, certainly, we cannot think that those who obtained their promotion in June and July, 1854, without purchase, and generally speaking without active service, have any right to complain because they are not borne on by the tide of prosperity to the desired haven of a full colonelcy. Guardsmen, under existing regulations, are perhaps somewhat slower than Linesmen in reaching high army rank; but the advantages of their Service ought to be quite sufficient to console them. They have very great privileges among themselves, which the officers of the Line do not envy, so long as these privileges are not made the means of displacing them from the army rank they so richly earn.

Several recent occurrences on board our ships lead to the belief that discipline is not in a very healthy state, or that the class of men who now enter our service are not as orderly as British sailors have been for some time past. When we see any of the noble body, which has been so long characterised by its gallantry in action, and its discipline in time of peace, joining in violence and insubordination of the most unpardonable kind, we would be sorry indeed to think that there are more than those actual criminals to be found among the Marines. At all risks the discipline of the Navy must be maintained, or ships and guns—army and volunteers—are of small avail for England. It is sometimes asserted by naval officers, that the influence of the Press, which is directed to bring into public odium commanders on board whose ships flogging prevails, tends to increase the frequency of such punishment; and we have heard the argument used, that a captain who would be inclined to let a man off, if he were quite free from bias, sometimes brings him up for punishment to satisfy his own conscience that he is not deterred from doing his duty by any fear of the censures of the Press. If so, the captain is surely unfit to command; and the argument would only prove, that a man can be made the victim of an infirm will and a purposeless conscience. But there are many matters in which naval officers have reason on their side, when complaining of the present system of the Home Service. Short leaves and frequent payments to ships' crews are sources of certain mischief. A sailor draws his pay, and gets 24 or 48 hours' leave. He at once makes for the scene of some orgie, as certainly as a young gentleman from the country does *not* go to the Royal Institution the first night he is in town: he falls among thieves or worse; he is robbed —perhaps parts with his clothing; comes on board in ill temper, with a headache and empty pockets; is insolent, and when punished is inclined to vent his rage and his sickness on the officer, whose duty it is to maintain the rules of the Service, instead of on himself, and on the people who have lived on his folly. It has been observed, that the merchant sailors who have been tempted to enter the Service by the high bounty, are not cleanly in their habits or dress, and that they are apt to be impertinent to their officers. No doubt it is hard work to drill these men; but we must man our fleet, and make the best of the materials we have. Instead of such short leaves, it has been thought by many experienced naval officers that it would be far better to adopt the French system, or to send, for example, the ships of the Channel Fleet to the harbours where they were fitted out, and to let one-half of the crew have long leave at a time, for so many months before Christmas, and the rest long leave after Christmas. Sailors' clothing, &c., should either be served out to them as Government stores, in which case the thieves and rogues around them dared not steal or buy them; or an Act should be passed to make it felony to possess the clothing and necessaries of sailors, punishable in the same way as the illegal possession of soldiers' necessaries is.

The reports which have been received by us relative to the condition of the French fleet at Algesiras and at Gibraltar recently, are to the effect that both ships and crews are perfect in cleanliness, order, and discipline, and that the men are capital at the gun exercise. No doubt their system of dockyard barracks is better than ours; but we cannot turn an English sailor into a French matelot, cunning as our cookery may be. If we could, there is every reason why our sailors should do the work of our dockyards as the French do at Cherbourg and other ports, where they are told off in divisions, each of which is employed one day in the dockyard, and another day at drill and exercise, and so on for the time they are on shore. Would that we could do the same! Would, too, that we could do what the French did lately. A telegram came to Toulon, directing five liners and three frigates to sail at a time when half the crew of each were away on leave. The port admiral at once completed the crews from five liners and three frigates extra in the harbour and barracks, marched them on board, and the ships were off in twelve hours!

We must give our officers every support in maintaining discipline without severity, and must put down all extra "smartness" as detrimental to the Service. The evils of the port are the great enemies to sailors and officers alike, and our fleet would be perfect if it never saw land for six months at a time.

We believe we may state with tolerable certainty that the increase to the Army will be made, not in the shape of additional battalions, but by the augmentation of every regiment serving at home and in the Colonies, exclusive of India, to 1200 rank and file. There will thus be no augmentation of officers, except in the Artillery, to which new brigades will be added. The aggregate number of men added to the line will be about 15,000, and to the Artillery about 7000; but, inasmuch as the militia now embodied, and shortly to be disembodied, amount to something like this number, very little addition to the estimates will be needed in consequence.

Although the Government has not yet finally settled the great question of the future organisation of the Indian Army, we believe it has been determined to lower considerably the establishment of Queen's regiments serving in India. Accordingly, twelve regiments of the line may be expected home late in the present year or early in 1861. It is understood that the establishment of cavalry regiments will be left at ten, as it will be on the return of the 14th Light Dragoons.

The uniform recommended by the War Office Committee for Volunteer corps is a brownish grey tunic, and the facings—green, black, red, or the county colour, as well as the nether clothing—are left to the taste of the different corps. We understand that grey was adopted instead of scarlet by a majority of one.

We are glad to hear it is extremely probable that the Mail Packet Service Administration is about to be transferred from the Admiralty, either to the Board of Trade or the Post Office. The Admiralty department is quite sufficiently weighted with the discharge of its own legitimate functions, and the proposed transfer is a wholesome indication that, henceforward, it will be allowed to devote itself to purely naval matters.

The following regiments of Militia will be immediately disembodied. The Antrim Rifles, North Cork, City of Dublin, County of Limerick, 5th Middlesex (Elthorne), Oxfordshire, 2nd Stafford, and 3rd West York. By the 1st of April—the commencement of the financial year—it is expected the whole of the Militia will be disembodied.

We hear as rumours, which however we are unable to confirm, that the offices of Adjutant and Quartermaster-General are not unlikely to be amalgamated under the title of "Chief of the Staff," that General Knollys succeeds Sir Charles Yorke as Military Secretary, and that Sir Richard Airey instead of Sir James Scarlett will have the principal command at Aldershott, and that Lord Rokeby will take the Portsmouth district. It is really not creditable to the country that a larger allowance should not be given to the officer holding the Portsmouth command, which necessarily involves the exercise of an amount of hospitality, costing much more than the emoluments.

We find the following in the *Morning Post* of Thursday:—

"A statement appeared in the ARMY AND NAVY GAZETTE, to the effect that the carriages manufactured at the Royal Arsenal for the Armstrong guns, on being hoisted on board the Himalaya steam-ship, were found to be rotten, &c. This assertion is (we are informed on good authority) entirely incorrect. The carriages in question were constructed from timber most carefully selected, and as regards materials and workmanship, they were considered by practical men in the carriage department to be perfect specimens."

[If the "good authority" were present on the occasion of hoisting the guns on board we would request hm to favour us with an interview, for the purpose of discussing a matter of fact. As he could not have been on board, or his contradiction would not have assumed such a positive form as "entirely incorrect," we beg to reiterate our statement on better authority than his own, and to repeat, on that authority, it was found, on hoisting some carriages of the Armstrong guns on board, that portions of the woodwork were unsound, *i.e.* "*rotten.*"—ED.]

Colonel Horsford, C.B., Rifle Brigade, has arrived from India, where he saw much service with his battalion, and also in command of corps and expeditionary columns in the guidance of which he gained the confidence of his men and the praise of the military authorities. He had many affairs with the enemy in Oude, and was left to guard the Gorge of the Raptee when Lord Clyde drove the rebels into Nepaul. Here the gallant officer got a severe attack of Terai fever, which quite prostrated him, so that he was carried on board ship in a very feeble state, but his friends are glad to learn his health is now restored.

By the death of Lieut.-General Falconar, Major-General Knollys becomes a Lieut.-General, Colonel Drought a Major-General, Lieut.-Colonel the Earl of Westmoreland, Coldstream Guards, a Colonel, and Major Mauleverer, Staff Officer of Pensioners, a Lieut.-Colonel in the Army.

The death of Major-General Robinson will bring Major-General Sir Thomas Franks, K.C.B., from the supernumerary list of Generals promoted for distinguished service to the fixed establishment. By the last Royal warrant an officer so brought in takes his seniority from the date of his promotion for good service, and accordingly Sir T. Franks will take rank next after Major-General Moncrieff.

Colonel Bloomfield, now commanding the troops at Colchester Camp, has been appointed to succeed Major-General Cunynghame in command of the Second Brigade at Dublin with the rank of Major-General.

It is reported that Colonel Charles Franklyn, C.B., now Inspecting Field Officer at York, is not unlikely to succeed Major-General Rumley in the command of a brigade at Gibraltar. Rumour also states that Colonel Narcott, C.B., formerly of the Rifle Brigade, who has just retired from the command of the Rifle Depôt Battalion at Winchester, will succeed Colonel Bloomfield in the Colchester command.

The colonelcy of the 73rd Regiment remains vacant by the death of Lieut.-General Falconar. The Inspecting Field Officership at Glasgow is vacant by the promotion of Major-General Van Notten Pole, and the same post at Cork will in a few days be vacated by Colonel Drought's promotion to the rank of major-general.

The following changes in the Coast-Guard have just been made.—Inspecting Commander: Commander Joseph S. Rundle to Carlisle Division, vice Woodley, superseded at own request. Chief Officer: Lieutenant William C. S. Sullivan, to command Kilmore Station. Commander George T. S. Winthrop to command the Argus, tender, vice Grandy, promoted. Inspecting Lieutenant: Lieutenant Robert Willcox, from Westport to Knightstown, vice Lyons, promoted. Lieutenant John J. C. H. Tracy, from the Active to the Mermaid, tender, vice Winthrop, promoted to Argus. Mr. George R. Morrison, master, from Argus, to command the Active, tender, vice Tracy. The name of Commander Winthrop has been removed from the reserved to the active list of Commanders.

CEYLON.*

The appearance of the third edition of a work within three months must be as gratifying to the author as it is startling to the reader. It is a success which could only be achieved by merit of no ordinary kind, and shows how highly solid information is really prized by a large portion of the reading public. Three out of four works of this class are only redeemed from the charge of utter insipidity by a liberal sprinkling of anecdote and adventure, which very few readers care anything about; and the little useful information they contain, is usually scattered through them in such a way as to unfit them for reference.

Sir James's "Ceylon" is a production of a very different kind, and is not only one of the best works of the kind, but perhaps the best on the subject. The climate and geology, the fauna and flora, the history and antiquities, of this beautiful island are discussed in a style we can scarcely praise too highly. For the most part, writers from the higher ranks, secure of a certain amount of success and *eclât*, and indifferent to the consequences of failure, which weigh so heavily on the author by profession, neglect the only means of success—labour and patience; qualities so apparent in the work before us, that we would gladly analyse it at further length did our limits allow of doing so.

The chapter on the physical geography of Ceylon is most carefully written. Sir James is opposed to the popular view that Ceylon was torn from the main land by a convulsion; the only possible way of accounting for an island in the opinion of many persons. It has evidently been a labour of love, and he dwells with enthusiasm on "its lofty mountains covered by luxuriant forests," and its shores "bright with the foliage of perpetual spring." It is, however, an honest enthusiasm, and the paradise to which the fathers of the human race are fabled to have retired after their expulsion from the first Eden, with its huge, fantastic, primary rocks; its many-hued forests, lighted by a tropical sun, and resounding with the beautiful notes of the Oriole and the Dayal bird; and its silver streams flowing away to the sea of the pearl divers, is well worthy of it.

No subject of the slightest moment, falling fairly within the province of such a work, has been neglected, and the ample index to each volume enables the reader to obtain at once information on every point, from the method of finding gems in the Nellan to a geological survey of the coast, the mysteries of Buddhist architecture, or the Mahawanse dynasty. The chapters on zoology and botany are furnished with carefully classed catalogues, and that on zoology will scarcely fail to gratify the most indifferent reader; especially that part devoted to the account of the elephant. Sir James is opposed, we see, to the opinions that the male elephant fights with his tusks, as is commonly believed. They are not calculated for warding off the attack of the rhinoceros or tiger, and the author clearly considers that he has no business to fight with animals which are not in any way disposed to molest him. It would appear that the elephant is not quite so clear about this point as he might be, and, to settle it, occasionally pulls off the tusk of his foe without any ceremony. His most formidable point is his weight, by which he simply crushes anything smaller than himself, or softer than a tortoise, into a mummy; pitching it to and fro between his fore and hind feet, and alternately striving to throw his whole weight upon the pair resting on the devoted animal,—most certainly a very effectual method. Sir James confirms the accounts given of the sagacity of this noble creature. One of them actually laid down the burden it was carrying, to make way for him and his horse. The high-caste elephant, with his tail touching the ground, his *small* face, and each foot furnished with five nails, is an animal as superior in his way as a full-blooded racer.

We are afraid this brief notice will give the readers but an imperfect idea of the value of the work, which we most heartily recommend them to read on the earliest opportunity.

NARRATIVE OF THE EARL OF ELGIN'S MISSION TO CHINA AND JAPAN.†

Few of those who went to China and Japan during our last difficulty with the Celestial Empire enjoyed better opportunities of acquiring information at the fountain-head than Lord Elgin's private secretary, and we are glad to find that he has given to the world a carefully detailed account of his experience.

But for the necessity of not giving vent to unchristian feelings, and having tea to drink, we should most devoutly rejoice to hear that China, with its dirty grotesque mandarins, joss houses, dragons, and kites, had gone to the bottom of the ocean. Nothing short of that process, which was proposed as an effectual quietus for Ireland; or calling down fire from heaven, as was mildly suggested by one author; could ever cleanse away the awful pollution, moral and physical, of a people sunk to the lowest depths of poverty and crime. The description of Tientsin, with the banks of the river swarming with men diving in search of dead cats, garbage, and offal to eat, and the corpses flung out on dung-heaps, is perfectly appalling. And this is the land of the Citizen of the World—the ideal monarchy of Voltaire and Goldsmith.

From the contemplation of such horrible misery, it is quite delightful to turn, and linger upon the interesting pictures of the Japanese. Subsequent intercourse with this extraordinary people may reveal vices and foibles as yet unknown, but all as yet told shows that, as regards arts, policy, home comforts, and cleanliness, the Japanese are not only the foremost people of the East, but in many respects a-head of the boasted civilisation of the West. The construction of such an immense city as the capital of Japan, without violating decency and comfort; the taste and skill displayed in their exquisite gardens and cottages, their tea-houses, mossy grottoes, charming villages, and quaintly cut trees; may perhaps lead us to inquire if we could not take a lesson from them.

The work is accompanied by some very interesting engravings, and we think our readers will like it.

LIFE OF THE DUKE OF WELLINGTON.*

We should almost as soon have expected to read an impartial biography of Wellington in French as to have met with an unprejudiced account of Luther by the Pope, or to have discovered that his late Majesty the King of Naples was in the habit of employing his leisure hours in doing justice to the memories of Danton and Mirabeau. Yet here we have something like fair play for the great captain, and his translator (himself no inadequate judge or unknown author) gives M. Brialmont credit for the most frank acknowledgment of the high moral and intellectual character of his hero.

And with great justice too. There has been far too much disparagement of Wellington, and envy has only too frequently found an excellent safety-valve by comparing him, of course to his disadvantage, with Napoleon. This was only to be looked for at the hands of continental writers, who are always ready to prove, from irrefragable sources, that he never did defeat, and never could have defeated, the Corsican general; the battle of Waterloo, especially, being a mistake altogether, and a matter of which English writers know nothing at all.

We are glad to find that Mr. Gleig has the courage to vindicate thoroughly the character of the great Duke of Wellington; one of the brightest and noblest that history has preserved, whether we regard him as a soldier or subject. No general ever committed so few blunders; and if he had had the same opportunities as Napoleon he would have gained as many (more?) victories; while he would never have stained his name with the massacre of the sandhills and the horrors of the Beresina.

To those who wish to study Wellington throughout his illustrious career, we recommend the work of Mr. Yonge.† The author has had access to many sources of information which previous biographers could not command, and it is not one of the least noble features in the Duke's character that he preferred leaving his own biography incomplete to wounding the the feelings of a single individual.

Mr. Yonge's work contains some excellent plans, showing the relative position, of the armies, the lines of Torres Vedras, &c.

THE ARTILLERIST'S MANUAL.‡

At a time when English military literature is at best only struggling into existence, it is gratifying to meet with a useful work on artillery, which, if its author cannot be claimed as our countryman, is at least written in our own language.

Without laying claim to the depth and originality of Paixhans or Howard Douglas, Lieutenant Gibbon has treated his subject in that thoroughly practical manner which must secure not only the attention of his professional brethren, but also a certain degree of general interest.

If we have a fault to find it is that, by endeavouring to compress within a single volume too great a variety of subjects, he is at times unable to be sufficiently explicit and full. Thus, in his treatment of gunpowder, he does not notice that important revolution which aims at obtaining a slower and weaker, rather than a rapid and almost instantaneous projectile; and, while appearing to discuss the merits of gun-cotton, he is silent as to its great defects, its facility of absorbing moisture, its destructive influence on ordnance, and the danger of its spontaneous combustion.

In estimating the advantages of the Armstrong gun, he has followed the path, and consequently has fallen into the errors, of Dr. Scoffern, whose remarks on the subject are most crude and incorrect.

It is, however, not so much in the high philosophy of his science as in minute detail that Mr. Gibbon excels. As a book of reference his work is of especial value; and, as such, we recommend it not only to the artillerist by profession, but to all who feel an interest in the progress of military science.

The January number of the "Journal of the United Service Institution" contains some admirable papers, and none which are not interesting. Colonel M'Dougall's lecture on the character of the great Duke of Marlborough is restricted to the military "*psyche*" of the famous general, of whom he says, in conclusion, "in twenty campaigns, ten of which were successive, he passed all the rivers and lines he attempted, took every town he invested, won all the battles he fought, and was never surprised by the enemy"—*finis coronat opus*. Another paper, entitled "The Screw Fleets of England and France" should really be read by everyone who wishes for an able analysis of the relative powers of the two navies. We do not much like the word "exhaustive," but it is fairly applicable to Mr. Pickering's lecture, the results of which are very reassuring to us. Of gunboats he says: "It cannot be denied, however, that on the only occasion in which they were tried *en masse*, as at Sweaborg, their fire was a comparative failure. Numbers of officers, English and French, are unanimous in asserting that the good old-fashioned vertical fire from the mortars was alone efficient; and Sir Charles Napier draws attention to the fact, that had the contractor's mortars not been shamefully deficient, or their number too small, the whole of the defences, and even the island, might have been destroyed, and a passage opened into the harbour. It is certain that even now no very successful and definite model has been produced of a steam gunboat, either here or in France. Their limited speed, compared to all larger than themselves; vulnerability to shot (for their safety will altogether depend upon the frustration of the aim of the enemy); the frequency of their incurring damage in their engines, almost constantly out of repair, in any sustained operation; their fore-and-aft rigging, so little adapted to a war-vessel, cramping up the quarters; and their uneasy motion at sea, rendering both shot and gun almost uncontrollable in even moderate weather; all these concomitant disadvantages will much circumscribe the services of these vessels, if we judge of them as men-of-war, destined to perform the numberless duties that devolved on all the smaller craft in blockading service in the late war, and not consider them as packets, performing the remarkable feat for vessels of only two inches keel of going round the Cape." In a lecture by Major-General Portlock, on the advantages of knowing a little of the physical sciences, there is appended this note:—"I have pointed out one remarkable instance in which the perusal of Polybius in the original Greek afforded solace to one Crimean hero, my respected friend Major-General Cameron, C.B., which he would not have obtained from simply reading a translation. The language itself was a source of enjoyment to the scholar, in addition to that derived from the historical details. I ought to have added a Crimean proof that other officers found an equally powerful cordial in their pursuits of natural science, under what may indeed be called difficulties. My friend Mr. W. Baily, F.G.S., has described with much ability the fossils collected in the Crimea and placed in his hands by Captain C. F. Cockburn, R.A., besides whom, I observe noticed in the list as having shared in the labour, and let me say the pleasure, of collecting them, Major Cooke, R.E.; Major Hudson, 39th Regiment; Dr. Sutherland, Sanitary Commission; Mr. Oliver, Army Works Corps; Lieut.-Colonel Munro; Dr. M'Pherson; Major Anderson, R.A.; Lieut.-Colonel Lygon Cocks, Grenadier Guards. Had the number of collectors and observers been greater, the amount of happiness would have been greater also, and that without inducing any diminution of the military zeal or efficiency of the officers themselves." If we had room we would gladly reproduce the whole of this very well digested and satisfactory lecture. The other papers are valuable and instructive.

"The Volunteer Movement; its Progress, and its Wants" (Macmillan: Cambridge), by Mr. R. Dudley Baxter, in 36 pages, contains much useful information in reference to the actual condition of the volunteer forces, and proves that they languish in the counties for want of proper support. Of the cities, nearly all have joined; of the towns one half of the large and a third of the small have joined; of the counties, not one-twentieth have participated, and "we are obliged to conclude that more than 10,000,000 of our population are taking no appreciable part in the Volunteer Movement." The writer, with fair reason, attributes this remarkable fact to the expenses, which fall heavily on the poorer classes, and suggests that Government should find the range, the butt, and pay the staff. If we recollect aright the annual vote for Volunteers was 4,000,000*l.* in 1804. The Government could not perhaps do much to diminish the strength of the Volunteers already enrolled, but they can certainly, by withholding from them any Parliamentary assistance, restrict the number to its present force, which is rather short of 80,000 in England, Wales, and Scotland. The introduction of prizes and regular courses of practice, the union of corps into battalions for temporary purposes, the employment of Rifle Instructors, &c., are urged clearly and well by the writer, and finally it is argued that the Government must come to the aid of the Volunteers, as it is not possible for the corps to pay their way; a trifle less than 65*l.* a year from Government for a company of 80 men would be sufficient to put the finances on a sound basis. For a force of 100,000 men, of which 10,000 are artillery, the annual grant would be about 77,000*l.*, a very cheap defence of the nation if the work were done well. The Yeomanry Cavalry for 1859-60 costs 88,000*l.* Their strength is 14,000. We notice the pamphlet in the hope that attention will be paid to its facts and arguments in the proper quarter.

Captain Blakely has published a pamphlet in the form of a letter to the Secretary of State for War, "claiming the original invention of an indispensable feature of the Armstrong Gun, &c." In the preface he says, "in 1854 Sir W. Armstrong and myself, independently of each other, discovered a method of making a much stronger cannon from the same quantity of metal than was possible by the ordinary plan," and he proceeds—in justice to that gentleman as well as to himself—to make known the exact truth. The quotations from the patent specifications look like each other, but one must regret that Captain Blakely did not carry out his intention of trying the question by action against the Elswick Iron Company, as he might have found that the "quibbles" of "a legal tribunal," which he dreaded, are not more formidable than those of a "department," even if he had grounds for twisting the very practical business-like letter of the solicitor of the War Office (whom Captain Blakely mistakes for General Peel) into the form in which he has put it. Captain A. T. Blakely "thanks his God" that he has been enabled to invent an indispensable portion of the Armstrong gun, and calls on Mr. Sidney

Herbert to decide what the country shall do for him. Perhaps he will only receive his reward in Heaven.

"The Volunteer Army List," published by O'Byrne Brothers, 7, Adelphi Terrace, is an exceedingly well-compiled companion for volunteers. It is not only what its name indicates, but it contains a great deal of information useful to all who are anxious to know anything about the movement, even in its minutest details.

A pamphlet, "Barrack Canteens, as They Were, as They Are, and as They Ought to be," by Common Sense, printed for private circulation, states facts, very decisively and authoritatively, which sustain his assertion, that the change of system introduced in 1855, from the desire to benefit the soldier, has not produced any benefit to him; whilst the large annual income formerly derivable by the state from canteens, now goes into the pockets of the canteen tenants, so that some of them are now making from 5000*l.* to 8000*l.* a-year. The writer, who seems to understand the system and subject thoroughly, recommends that canteens should be erected by Government as an essential part of barracks, and rendered comfortable and attractive by means of good lighting, large rooms, coffee and reading saloons—the sale of spirits and good liquor under proper supervision by a regimental committee of officers, with large powers, and he believes that there would be thus created "a canteen fund" for amusements and recreations, and even for granting allowances to widows and children of soldiers. The evils of the present system at all events are undeniable.

IRON-SIDED SHIPS OF WAR.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It has been said that steam is an iron Englishman, inasmuch as crank and spindle, boiler and piston, paddle and screw, are the results of the scientific throbbings of English brains. It is, however, also believed on the Continent, and to some extent in England, that in creating this motor, we have modified, if not overthrown, the present tactics of war upon the ocean.

We are, indeed, now familiar with the "screw," and the great changes effected by it, in handing over to the engineer those delicate manœuvres which were once due to atmospheric influences alone. Our iron Englishman is now about to introduce great changes, particularly in steam-rams, iron-sided ships, and other terrible engines of war.

I am, however, not like our Continental friends disposed to jump to conclusions too rapidly; for, recollecting the mistakes that happened to the Great Eastern, built under the guiding genius of Brunel; and also bearing in mind how slowly the inventive spirits of the scientific age groped their way through all sorts of difficulties from paddle to screw; I am disposed to be somewhat sceptical about the successful *debut* of the great iron ship, Warrior, which by a very uneasy sort of metaphor has been styled "The Rhinoceros of the Deep."

Sir, these pachyderms may be "steeled" against the ordinary impressions of 32, or even 68, pounders, but in making them invulnerable will they be efficient ships of war? I cannot imagine that the monster now building in the Thames, with a hull weighing 9000 tons, having all her heavy weights above the line of flotation, can ever be a handy craft under canvas, or ever venture far from our shores. Should her machinery ever prove "whimsical," or her screw foul, or any accident happen to her mechanical power, she would be in about as helpless a plight, opposed to a heavy armed frigate in the Atlantic, as a rhinoceros would be under similar circumstances.

The utility of coating ships of war, passed through the various phases of doubt, suspense, and belief, during the experimental trials at Portsmouth against India-rubber, scrap and puddled iron, and it should be borne in mind that these trials had reference to the future coatings of rams and iron-sided frigates; and these experiments demonstrated in the clearest manner that no iron or steel plates yet made could withstand a solid shot of 68 lbs. from a 95 cwt. gun at short range. At from 600 to 800 yards iron-coated ships are perhaps safe from a desultory fire; but the effects of concentrated broadsides have yet to be ascertained on an iron-sided ship.

The experiments alluded to proved that if the broken plates are ever driven in by concentrated firing from such a heavy-armed frigate as the Mersey, for instance, that an iron-cased ship must sink there and then with her armour on her back. No plug, not even the famous "umbrella plug," so effective in our wooden ships for stopping shot-holes and keeping out water, will be of the least use in filling up a gap from 16 to 18 feet long by 4 feet broad. Even if we suppose that the first concentrated dose, when "taken," would only cause an iron-sided ship "to be well shaken," a second would be promptly administered, and even a third could be delivered within five minutes of the first attack; so that it is presumed that even an iron constitution would soon be reduced to a "sinking" condition under such rapid and vigorous treatment.

But great results are expected from the iron frigate, Warrior; for, although she differs from a steam-ram proper, yet, from her fine lines and enormous speed (sixteen knots—anticipated) she is to be "driven straight over a whole fleet of three-deckers without a chance of her being injured by their broadsides in closing." Far be it from me, sir, to dispute the power of the iron Warrior that is to be, or to deny that she will not be able to crumple up a fleet of three-deckers; but I wish to ask her advocates if they ever saw a "salt-water duck-hunt"—that is to say, a four-oared galley, manned with the best boatmen matched against a little tub of a punt, with a single man in her. The law of the game is that the swift galley shall run down the slow punt and catch her. The tactics of the punt are those of a hare pursued—rapid doubling. Now, the whole essence of the game is evasive manœuvring, and there is a reasonable affinity between the great game of smashing up three-deckers by iron-beaked frigates, and running down a punt by a galley at a regatta. Our lines of battle will not wait patiently for their iron antagonist, but will take a lesson in the art of "dodging" to avoid a collision.

But, perhaps, the worst feature in the iron-sided ship Warrior is, that although she is to be shot-proof and fire-proof, as well as the largest, swiftest, and strongest man-of-war in the world, there is a "probability of her rolling so much as to render her incapable of using her guns in anything of a sea-way. Everything seems to presage that she will be a tremendous roller, especially now the Admiralty have *determined* to place her engines so high in her as to increase the weight of her top-hamper, and endanger her safety in a heavy sea."

As I believe this observation to be the soundest conjecture of any yet put forth respecting an experiment that will cost the country 500,000*l.*, and fancying that the question of iron-plated ships of war requires nautical ventilation, I have ventured to hazard a few notions as to their utility for publication in your widely spread journal. Yours obediently,

Portsmouth, January 18th. BLUE JACKET.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In reading the leading article of the first Number of the ARMY AND NAVY GAZETTE, to which is appended the initials W. H. R., there are sentiments which must meet with the approbation not only of the military and naval Services, but of all classes of society. Abroad your powerful pen gave an insight to civilians, not only of the gallant conduct and daring of our regimental officers and men, but through your means the public has been made aware of the high state of education that now exists in the ranks of the British army. The introduction of arms of precision must alter and even obliterate a very large proportion of our manœuvres and formations in the field. When I entered the British army, all the infantry, with the exception of the 43rd and 52nd Regiments (who had double sights to their muskets), were armed with the now exploded Brown Bess; and General Mackenzie at Hythe and Shorncliffe attempted and introduced the system with these double-sighted muskets, which is now practised by Major-General Hay at these two places. At that time punishment parades, with severe floggings, were almost of daily occurrence in every British regiment; and Joseph Hume was considered by all the military authorities as a revolutionist and encourager of mutiny, because he attempted to abolish flogging. The system continued after this for forty-six years, and flogging has only lately been abolished by the Commander-in-Chief. Many of the Generals of that day looked upon the powder for the heads of the soldiers being as necessary as the powder in their cartouche boxes; and by a report in the last *Examiner* it appears that a home General made most severe remarks upon one of the most distinguished regiments just returned from India, because "*they did not carry their butts far enough back.*" Up to the year 1815 very few soldiers could read or write, with the exception of the Scotch, who were considered troublesome, always speaking about "*haeing ma richts.*" But now the letters published in the newspapers prove that our non-commissioned officers and soldiers are not only well educated but a thinking and reflecting class, and though silent and obedient, like the Scotchmen of old, they know their rights and when they are treated with injustice. On 25th July, 1833, I commanded a Brigade, on the death of General Cotter, when Marshal Bourmont at the head of the Miguelist army, attacked the lines of Oporto. A party of young Scotch, under a sergeant, who had been a sergeant-major in the 54th British Regiment, retreated, before I thought it necessary, and I saw them take shelter under a wall. Angry I went to them and abused them as cowards, and said to the sergeant:—"I can pardon these young fellows, but for you, an old soldier, to be such a coward, I am ashamed of you." He replied—"I am no coward, and no one knows that better than yourself, as I got this shot in the arm when at your side. I was sent to hospital, I was plundered of everything, they would never give me a farthing of money, and I will take —— good care not to expose myself to be taken a second time to hospital. I am as well entitled as any officer to be paid for my wounds." I tried to get the men to advance, but *no*, all saying—"Na, na, ye want to tak us to a Slachter Huis." I was in great difficulty, and not a moment to lose. I felt the justice of what the sergeant said to me, and I told him so, and I then said to the men, "I never thought of that before, but if you will come with me and drive these fellows back, I pledge you my word I shall go to Marshal Saldanha and tell him I won't ask to go again into action unless I get a certificate from him that all men *wounded in action* will get their pay in hospital, be cured gratis, and get the same allowance for wounds as officers." On this they cheered: the segreant springing before me, they followed us: "Hourah for twa months, Hourah for sax months and a year's pay." The gallant sergeant was shot through the body (he died that night), but we drove the enemy back. Seeing in Marshal Saldanha's dispatch the affair mentioned in a most complimentary manner, I went up to Oporto and saw the Marshal. I told him of the promise I had made to the men. He instantly said, "Impossible! who ever heard of men in hospital getting pay. No such thing is done in the British service." I replied, "Then the more shame." I then gave the details of the promise. Marshal Saldanha saw what I claimed for the men was just, and I got his order that men wounded in action should receive pay, be cured gratis, and get wound money. The Portuguese Minister of War ignored this order of Marshal Saldanha, as it would alter their whole system of accounts. On my return some years afterwards from Spain, as we had embarked for Portugal in 1831, with the sanction of Earl Grey and his Government (though contrary to the Foreign Enlistment Bill), I thought I might do a service to the British soldier, never doubting but Lord Howick, the then Secretary at War, would think more of justice to the soldier than the trouble it would give to the clerks in the War Office in making up the hospital accounts. But so it was. The answer of the Secretary at War in London was the same as that of the Secretary at War in Lisbon, both protecting the clerks of the War Office at the expense of the soldier wounded in action or on duty. I appealed to the Press for justice to the wounded soldier, from whom the War Office deducts 10*d.* per day out of the shilling to cure him of wounds received in the service of his country. My first letter on the subject will be seen in the *Naval and Military Gazette* of December 1837 or 1838. In that letter I gave the petition of the mutineers at the Nore for redress of grievances, one of which was, their pay being stopped to cure them of wounds received in battle or on duty. The Government of the day hung Parker and a few others, but from that day, marines and sailors were cured gratis, and were presented with a Greenwich (money) ticket in proportion to the severity of wounds. For twenty-two years have I continued to send letters to the *Times* and other papers to get this justice to the British soldier. But no. If a drunken old woman is run over by a cab, the whole population is in excitement, magistrates assemble, coroners summon juries; but if British soldiers are killed by the ignorance, stupidity, or thoughtlessness of commanding officers not a word is heard. Officers are often most unfairly blamed. If a naval officer loses his ship, he and his officers are sent by the Admiralty for trial, and are thus allowed an opportunity of justifying themselves. But this is not allowed in the Army. The Press have asserted that Lord Cardigan left his brigade in the field to sleep on board his yacht in Balaklava Harbour. If such be the case, he made himself liable to be tried by a court-martial. But the War Office have afforded his lordship no opportunity of justifying himself, so from their want of power to do this they have justified him in all his acts by conferring on him the colonelcy of a regiment. If it be true that General Ashburnham left the troops in China without leave, that is a crime according to military law. If a private soldier leaves his regiment he is tried and marked with the letter D. If Admiral Seymour had left his fleet without leave, the Admiralty have the power to bring him to a court-martial, but it appears that the War Office has no such power. Your leading article says "that without any detriment to the public service, every military and naval question can be argued in the columns of a newspaper with advantage to the profession, every theory can be discussed, every proposition ventilated," therefore I trust you will ventilate the question of "*Soldiers Wounded in Action.*" Suppose a fire takes place at Woolwich, the sailors, the marines, the metropolitan police, the Line, the Guards are called out on duty. Some of each corps are hurt. The former are cured gratis, but the wounded of the Line and Guards who are sent to hospitals have 10*d.* per day out of their shilling deducted for hospital expenses. How is this? The hospitals are built at the expense of the public, the medicines are supplied and the medical men paid by the public: so what becomes of the tenpence of the wounded soldiers of the Line and Guards? And why should there be a difference between soldiers, marines, and sailors? I regret I have taken up so much of your valuable space, attempting to call for equal justice to the men as to the officers exemplified by the cases of naval officers leaving their ships, and Lord Cardigan and General Ashburnham, and of the difference of wounded marines, sailors, and soldiers of the Line. Your leading article says, "We aspire to be the organ of the Services. It begins now to be understood that such great questions as the government and the administration of Army and Navy are of vital national importance."

Jan. 15, 1860. CHARLES SHAW.

THE INDIAN NAVY.

(COMMUNICATED.)

Rumour has it that Her Majesty's Indian Navy is not to exist much longer; in fact, that it is presently to be abolished, option being given to the officers to join the Royal Navy, taking their places according to the dates of their commissions, or to accept the pension which will be offered them. If the duties now performed by the Indian Navy can be better or more economically done by the Royal Navy, or if it be more desirable for the public good that all naval affairs in the East, the guardianship of the Indian seas, the surveys of those seas, the transport of troops across them, together with the management of the naval dockyards and arsenals, should be placed under the direct control of the Admiralty, then the mere convenience or inconvenience of a small body of individuals must not be permitted to obstruct a measure of general benefit. Still such a measure should be carried out with a minimum of inconvenience to the sufferers, and should any radical change be made in naval matters at present administered by the Secretary of State for India, it will greatly depend upon the terms offered to the officers of the Indian Navy, and more especially upon the manner in which the scale of proposed pension is regulated, whether justice as far as is compatible with the contemplated change is attained.

To the officers of the Royal Navy the new arrangement would be a considerable advantage; the absorption of 68 Lieutenants into a body of 3400, other grades in proportion, would in no way be felt; while, on the other hand, there would be more ships to be commissioned, more appointments to be made, and thus an enlarged field opened for enterprise and distinction.

Not so with the Indian Navy officer; he has served, say 15 or 20 years in the East, and has acquired an intimate knowledge of the coasts of the Indian empire, and the intricate navigation of the Persian Gulf and the Red Sea; his service has extended to the Chinese waters; he is acquainted with the languages, and more particularly with the customs and peculiarities of the various nations and tribes to be met with from Singapore to Suez; in short, he is a man of some value in the East, but he is unknown in the West. In India, he has grown up under the very eye of the Government; but he has scarcely been heard of at the Admiralty. Moreover, in India the number of naval officers is so small that the Government is only too glad to keep them fully employed; but at the Admiralty the number is so great that two-thirds are kept on continuous half-pay. And on the half-pay list will the Indian Navy officer, who accepts the alternative of joining the Royal Navy, be shelved and die.

But this fifteen or twenty years' servitude in the East has been passed in the drudgery of the Service, and this change catches him, and blights all his prospects just as he is about to reap some fruit of his labour, or to receive some rather more adequate compensation than the mere pittance upon which he has hitherto been existing. Is it fair at this period of his service to give him the half-pay, which the joining the Royal Navy would certainly involve, or is it just to dismiss him with a small pension, to which he would have little or no opportunity of adding by his own exertions? For, though an experienced naval officer may be a valuable man in his own sphere, he is of but very little value in any other.

Pensions in the Indian Service are regulated by length of service in India, a certain period of residence in a tropical clime, entirely exclusive of any time spent in Europe, being exacted before pension is granted; but no officer is called upon to accept his pension as soon as it is due, or to

Digitized by Google

relinquish the more lucrative appointments to which his long standing may entitle him. But in the extraordinary case of a pension being forced upon an officer still able and willing to do good service, it can no longer be equitable that the rate of pension should be decided by the term of residence in India; for then, any one who, in accordance with the regulations, may have been allowed a furlough to Europe, would incur a serious loss from having accepted that to which the very conditions of the Service gives him a perfect right; and in the same way, any one who, through certified ill-health, may have been obliged to seek relief in England, would undergo a heavy and enduring penalty for having succumbed to the climate in which it was his misfortune to serve.

If, then, the officers of the Indian Navy *are* to be pensioned, the scale of the pension to be offered must be regulated by the period which may have elapsed since their first joining the Service, and its rate should be some remuneration, not only for their length of service, but for their utter loss of prospects; and, in this regard, it should certainly be considered in a liberal spirit.

NAVAL COURTS-MARTIAL.

[From a Correspondent.]

Public attention has been recently directed by some interesting and important trials to the very anomalous state of our naval jurisprudence, not only from the increasing number of offences remitted for the decision of these tribunals, but from a gradual deepening conviction that, of all erring human institutions, a naval assize is (next to the recently extinct Palace Court) the most fallible.

It is fortunate for us that our naval officers are compelled to confine their practice to the crown side, and that they are not called upon to cloud their intellects with occasional digressions into *nisi prius*. They now step upon the judgment-seat with minds totally devoid of prejudice, and with a simplicity of easy confidence that is almost invariably displayed in the result.

How such a description of tribunal struck root in the Service, grew, and has since flourished, is mainly owing to the fierce and sanguinary punishments that characterised not only the naval but the civil code of this country during the last century; when men were hanged at Newgate every Monday morning, it would have been absurd to have made an exception in favour of a section of the community, and accordingly we "went and did likewise."

There may be some still left who remember the good old days when the Provost Marshal and the Chaplain so often headed a melancholy procession from the quarterdeck to the forecastle, when the penitent prisoner drank his inevitable glass of the Captain's best sherry, and afterwards sang an edifying hymn until an explosion from the bow gun shrouded his apotheosis in a puff of white smoke. The pages of the Naval Chronicle are filled with similar descriptions, and the only consolation we can find in them is, that nautical criminals received so much petting in their last hours, that they could well afford to spare a thought of commiseration for their fellow-culprits at the Old Bailey, who were hanged in such numbers and in such a rude fashion, that even Jack Ketch (*vère*) declared it made him feel quite uncomfortable to see the poor fellows so crowded.

Since that epoch, Mackintosh and Brougham have taught us better; and we now know that (except in rare cases) the worst use we can make of a man is to hang him. It is now high time for some eminent law reformer to throw his weight into the nautical scales, and insist upon a revision of the Articles of War—a law written in letters of blood, and as inapplicable to the present time as the laws of Draco.

The whole system of trial by Court-Martial in the Navy is rotten "*ab initio*." The orders under which the Court act, and the rules by which they are guided,—or more correctly speaking, ought to be,—are vague and unsatisfactory, and in too many cases admit of a double interpretation; nor is it fair to officers to leave them striking out at random amongst the shoals and sands of legal and technical difficulties. There should be a complete revision and codification of Naval Criminal Law, laying down the forms with which the Court is to be constituted, explaining the powers it can exercise, the evidence it is entitled to receive or to care for, and the sentence it can legally award; and, more than all, let us have a highly talented barrister attached to Whitehall, whose duty it shall be to report upon all sentences before they are carried into effect.

It must, however, be stated, in common fairness to the system, that its constitution has been severely tested by the ingratitude of its members. The shattered old fabric might have survived yet a while, had not naval officers probed its inmost failings with a judgment and pertinacity beyond all praise,—certainly, they have left it without a prospect of recovery.

In what manner they have contrived to deal it such deadly blows we shall proceed to show,—*ex gr.*:

On one occasion the commander-in-chief on a foreign station directed a Court-Martial to assemble, and, in distinct contravention of the orders which he should have been the first to enforce, sat as President. The sentence was of course annulled:

On a second, the prosecutor sat as a member of the Court that tried the prisoner. On another, a member of a Court-Martial sat and voted before his commission had been signed by the proper authorities. What should we think if the Chief-Justice delivered judgment before he had received his patent?

A murderer escapes a well-merited death, because, belonging to the Mediterranean fleet, he was tried for the offence outside the limits of the station: surely some little geographical knowledge would have averted such a blunder.

A midshipman is sentenced to ten years' imprisonment in Exeter jail, and as his term of incarceration was directed to commence from the date of his arrival in England, the law was invoked on his behalf, and as no indefinite period of punishment is admitted, the sentence was annulled. Hundreds of similar instances might be adduced if necessary, to show how members of a Court-Martial over-ride their powers. They are extremely fond of examining prisoners on their oaths, and placing them in the witness-box, in order as they say to elicit the truth; but this appears a very questionable process, and is scarcely calculated to attain the object desired if the victim be not most outrageously conscientious.

Let us revise the rules that govern such extraordinary performances; let us have an intelligible code which men as well as officers can understand; and when the highest tribunals can set an example in their own sphere of dispensing justice that should not be perpetually over-ruled, let us hope that no degrading punishment may be inflicted upon any one in Her Majesty's Navy without the authority of a minor Court, sanctioned by the Commanding Officer.

PORTSMOUTH AND ITS DEFENCES.

The island of Portsea is of an irregular oval figure, of about sixteen miles in circumference, averaging more than four miles in length, and about two in breadth. It is separated from the mainland by the creek between Hilsea and Cosham, uniting the harbours of Portsmouth and Langton, and is bounded on the west by Portsmouth Harbour, with its dockyard, gun-wharf, and victualling yard, &c., and on the south by Spithead and St. Helen's. The only entrance to the island on the land side is by the turnpike road over Port's Bridge, crossing the creek already referred to between Hilsea and Cosham. A short distance in the rear of this bridge the new line of works intended for the defence of this portion of the island crosses the road, extending about two miles from the "Great Salterns" in Langston Harbour to Tipner Lake in Portsmouth harbour. The main line of works consists of three huge bastions, with flanking batteries of 10 guns each, in casemates, on the top of one of which we are standing. At the east and west ends of the works, on the shores of each harbour, are two demi-bastions, also with casemated batteries. The whole of the casemated works on the flank of each bastion are of brickwork, of immense extent and solidity. All parts of the brickwork that come in contact with earth are faced with glazed bricks, laid with cement. The top of the brickwork is covered in the usual manner with concrete, Seyssel asphalt, and earth, the latter to a depth in some parts of 10 feet. A rampart of earth will also face the brickwork of these casemates to a depth of 25 feet. The faces of the bastions are of earth. The base of the whole of the line will be 116 feet by 30 feet in height. In front of this main line will run a moat 150 feet wide, with means of closing each end at high water. In advance of the main line of works will be constructed three triangular-shaped outworks of enormous strength and extent, probably the largest of their kind in the world. They will be connected with the main defences by draw-bridges, covert-ways, &c., and strengthened by every means known to modern engineering science. Through the eastern work will pass the line of railway to the town, and through the western one the public turnpike road, which for this purpose will be diverted to the westward of its present course, passing through Tile Barn Farm, and again joining the old road near Cosham. In passing over the works the turnpike road crosses three extensive moats, in addition to the creek separating the island from the mainland. This creek, considerably deepened, and increased in width to 200 feet, runs along in front of the whole position, and will enable a fleet of gunboats to pass to and fro between the harbours of Portsmouth and Langston, and act in conjunction with the line of works on either flank, in the event of an attack by hostile troops, who, after effecting a landing to the eastward or westward of the port, must advance along the Fareham or Chichester roads, and can only attack the front of the position. Portsdown Hill is evidently the key of the whole position, and whichever troops held it in possession could with impunity destroy or protect the dockyard and shipping in Portsmouth Harbour at their pleasure. It has been urged that with the "Hill" so near the garrison of Portsmouth, should a war break out at any time with a powerful neighbour which might render invasion possible, a few thousand troops from the garrison could in a few days render it quite impregnable, and for that reason the erection of works at the present time would be a waste of public money. Returning to the easternmost point of the new line of defence, we find that the guns from its demi-bastion cross their fire with those of Cumberland Fort, at the entrance of Langston Harbour, a regularly fortified work, mounted with 46 pieces of heavy ordnance, and now occupied by the Royal Marine Artillery. Within short range is a new fort to mount 17 guns, in course of erection on the site of the old "Lumps" fort; and at an equal distance further to the westward stands Southsea Castle, with its auxiliary earthworks, and defending with its numerous 8-inch guns the entrance to the harbour channel by the "Spit" buoy. The sea face of Portsmouth lines, with their 8-inch and long 32-pounders, and Blockhouse Fort, with its 56 guns of the same calibre, raking the harbour channel, complete the cordon of defence of the island of Portsea so far, but, with the new works in progress on the opposite side of the harbour, and the intended sea forts, do not in reality comprise one-half its defences. The boring operations in connection with the foundations of the two sea forts on the "Noman" and "Dean" shoals are being carried on under the superintendence of Sir Charles Fox. Each fort will mount 100 guns, and will command the narrowest part of the entrance at the east end of the Isle of Wight to Spithead from the sea. At the western or Needles entrance are the works of Hurst Castle, 68 guns; Fort Victoria, 52 guns; and Cliff End Fort, 40 guns. All these guns are of the heaviest calibre. Recommencing our description from Blockhouse Fort at the entrance of Portsmouth Harbour, on the opposite point of the peninsula stands Fort Monckton, at the eastern end of Stokes Bay; and, with its 47 heavy guns, together with those of its eastern auxiliary batteries, forms a strong point on which leans the extreme eastern point of the new line of defensive works being erected on the western side of the Harbour of Portsmouth, and extending by Fort Gomer to Fort Elson—a distance of upwards of four miles—and may be said almost to represent two sides of a square. On the sea face, from Fort Monckton, a plateau rises abruptly from the low ground beneath to a height averaging about 18 feet, and extending to Lord Ashburton's marine residence at the end of this portion of the line near Fort Gomer. On this plateau will be concentrated the main strength of this part of the position. Commencing from the eastern end, there will be there formed a strong battery of 11 guns, firing over all, and sweeping the ground in front, the line of railway, and the rear of the auxiliary batteries on the right flank of Fort Monckton. In the rear of this latter work is a quantity of swamp through which a wide trench has been dug, and in connection with this trench along the low ground at the foot of the plateau on which the chief forts will be erected runs a wide deep trench and rampart at an obtuse angle, the apex inclined inward towards the centre of Anglesea-terrace, and the western arm extending to opposite Alver Cliff. In the centre, or gorge of this work, runs out an immense work; this will be joined to the main line by drawbridges, &c., and the intended Stokes Bay Railway will pass over its eastern parapet. On the main line, in the rear and centre of this work, will be erected a smaller work, with guns sweeping its interior and the line of moats in all directions. At Alver Cliff, moat and rampart form a sharp angle for sufficient distance to mount a battery of guns to sweep the continuance of the moat and the ground in front, while in the rear of this will be erected one of the heavy forts (mounting about 30 guns), which will form the really defensive works of the position. The line continues its course to Alver-bank, and thence to its extreme western point, opposite Fort Gomer, where it will end in a strong casemated square work, surrounded by ditch and morass, and under the guns of Fort Gomer. The works at Alver-bank will be of a most extensive character, including an entrance to the country inside the works by a public roadway from the new road to be formed outside the line of works; rolling wooden drawbridges over the moats, and a culvert for the admission and retention of water, &c. In the rear of this, on the elevated ground or plateau, will be erected another of the large forts, and at the extreme rear of the line a battery, mounting 11 guns, similar to the one at the eastern extremity. In advance of, and on the right of, the whole line are the two auxiliary batteries of 21 8-inch guns (the Brown Down batteries). The line of defences from this point form a right angle from Fort Gomer, with its 32 pieces of the heaviest calibre, to Fort Elson, at Prater Lake, on the western side of Portsmouth Harbour, and comprising five detached forts, hereafter to be connected by ditch and parapet, Forts Gomer, Grange, Rowner, Brockhurst, and Elson; the first and last named completed, and the other three in course of construction. Standing on the parapet at Fort Elson we see on the opposite or eastern side of Portsmouth Harbour the works at Hilsea, the point whence we started, and have visited the entire cordon of defensive fortifications already in existence, and those now in course of construction at an enormous expense, for the protection of Portsmouth Harbour, its shipping, dockyard, and arsenal. Extensive as they are, and will be when completed, we are still told by military men that the plan must remain incomplete, and Portsmouth Harbour still vulnerable to the attacks of a powerful and enterprising enemy, until the two sea forts on the Noman and Dean shoals are built and armed, and Portsdown Hill regularly fortified.—*The Times.*

DECORATIONS FOR CIVILIANS.

When Gros' famous picture—'The Battle of Eylau'—was shown to the first Napoleon, he looked at it for some time, and then detaching from his breast the Star of the Legion of Honour, he presented it to Gros, at the same time naming him a Baron of the Empire.*

A similar spirit of recognition of artistic merit is shown by the present Emperor in the honours conferred on Brager, Gudin, Vernet, Wild, and many others; and the first time Louis Napoleon was under fire in the last Italian campaign, he was in company with an artist who was sketching at the time. The French send out artists with all their naval and military or scientific expeditions, and thus secure on the spot pictorial records of the highest historical and national value. The English Government entirely neglects this. We sent out no artist or scientific men with Lord Elgin's expedition; and thus, to a considerable extent, a very important opportunity, and one which may not soon again present itself, for acquiring much valuable information that might have been of commercial importance to this country, was lost; for it often happens, as in this instance, that a newly-opened country like Japan, can only be explored by scientific men, and artists, when under important official protection; and, by making no provision of this kind, our Government neglects both our national honour in time of war, and our commercial interests in our first official communications with new and important countries—like Japan—in time of peace. In the entire absence of any Government provision on behalf of this country to record the events of the war, Mr. Brierly voluntarily supplied to our fleet what the French Government had provided for theirs, and was warmly welcomed in the fleet generally when he joined it at the first outbreak of the war, and where his being the guest of Captain Keppel, on board the St. Jean d'Acre, placed him precisely in the same position as Sir William Eden with Captain Martin in the Carysfort during the operations in Syria and Acre; while his profession and exertions as an artist rendered his presence a matter of interest, not only to everyone in the fleet, but also to the public at home, who, from time to time, received his published sketches during the progress of the war.

The application for the medals for Mr. Brierly never originated with himself, but was solely the result of the suggestion and recommendation of various distinguished officers who were engaged in the war; and it can hardly be doubted that, if an artist had volunteered, and been accepted by Nelson to sketch from his quarter-deck the events of Copenhagen, Nile, or Trafalgar, during those engagements, he would have richly merited any medals which might have been awarded for such occasions.

The application was made in the first instance upon the ground that this case was altogether peculiar and exceptional, and not upon the presumption of any precedent; but, for all purposes of precedent, it happens that the case of Sir William Eden is parallel. Each was strictly a civilian, and equally unconnected with the Service; each was the guest of an officer in command, and present during a war for which two naval medals were awarded; each applied, and were seconded,—Sir William Eden by his friend, Captain

* "The approbation of the Emperor was now shown in a manner equally remarkable. After looking at the picture for some time, he detached from his own breast the Star of the Legion of Honour, and presented it to Gros, naming him at the same time a Baron of the Empire."—*Recollections of Louis David: his School and Time.* By E. J. Delécluze. Published about two years since.

Martin, and Mr. Brierly by many officers and the general feeling of the Service. Sir William Eden, Baronet, and a member of the same family with Lord Auckland, receives the medals at once. Mr. Brierly, being only an artist, receives a curt refusal; and Admiral Keppel's subsequent letters on his behalf, furnishing the precedent required, meet with as little consideration.

During the late Russian war Mr. Brierly was present in the Crimea and Baltic for nearly two years, on board H.M.'s ship St. Jean d'Acre, Captain the Hon. Henry Keppel, and other of H.M.'s ships, and in the trenches, with the Naval Brigade, constantly engaged in making sketches of the operations, and being frequently under fire while so employed; his services on these occasions were highly appreciated in the fleets, where his presence as a volunteer for the purpose of securing, on the spot, sketches of historical interest and value, exposed him to equal risk with those engaged in the operations, and was a source of immediate interest to the Service, being also most approvingly recognised by the admirals in both fleets.

When the medals were awarded, after the close of the war, Mr. Brierly, at the suggestion of distinguished officers who were in command, applied for them, forwarding most flattering testimonials in support of the application, which was, however, refused by the Admiralty. Admiral Sir Henry Keppel then wrote to their lordships, stating that Mr. Brierly had been repeatedly under fire, both afloat and in the trenches, and that the awarding the medals to him would be gratifying to the Service generally.

To this application the Admiralty replied that there appeared to be no precedent for compliance with such a request, and that they could not therefore entertain it.

Subsequently, however, it has been ascertained, that both the medals granted to the Navy, at the close of the Syria and Acre War in 1840, had been awarded to Sir William Eden, who was at that time on board the Carysfort frigate as the friend and guest of Captain Martin, but who was a civilian, not upon the ship's books, nor belonging to the Service in any way.

Upon this precedent being found, Sir Henry Keppel renewed his application to the Admiralty on Mr. Brierly's behalf, drawing attention to the fact that this case supplied the precedent, the want of which was the *only reason* given by their lordships as the ground of their refusal; and also pointing out that the French marine painter, M. Durand Brager, who was similarly engaged in the French fleet, had received the Cross of the Legion of Honour, and the most flattering notice of the Emperor, together with letters of high commendation from their Minister of Marine.

With this application their lordships also refused to comply, after a mature consideration of five months, but without questioning in any way the precedent which had been given.

6, St. George's Place, Hyde Park, May 24, 1858.

Sir,—Having learnt from Mr. Brierly, that the medals both for the Black Sea and the Baltic have been refused to him, I have to request that you will be pleased to state to the Lords Commissioners of the Admiralty, that I conceive the refusal may have arisen from some omission on my part which I am anxious to rectify.

Mr. Brierly was with me in the St. Jean d'Acre, and also at the Naval Brigade, and was repeatedly under fire, both afloat and in the trenches, and displayed great coolness on all occasions; and it would be gratifying to the Service generally, if, upon reconsidering his case, their Lordships would receive my testimony in his favour, and permit him to share in the distribution.

I beg leave to enclose a copy of Mr. Brierly's former application. I have the honour to be, &c.,

Henry Keppel, Rear-Admiral.

The Right Hon. Henry T. Lowry Corry, M.P., &c.

Admiralty, 26 June, 1858.

Sir,—In reply to your letter of the 24th ult., recommending that Mr. Brierly should be allowed to share in the distribution of the medals for the Black Sea and Baltic, I am commanded by my Lords Commissioners of the Admiralty to aquaint you that there appears to be no precedent for compliance with such an application, and that my Lords cannot therefore entertain it. I am, &c.

H. Corry.

Rear-Admiral Hon. Sir H. Keppel, K.C.B.,
6, St. George's Place, Hyde Park.

United Service Club, Aug. 1, 1859.

My Lord,—Adverting to my letter of the 24th May, last year, in which I requested permission to rectify any omission on my part in not having applied to request that the Black Sea and Baltic medals might be awarded to Mr. Brierly, as having been with me in the St. Jean d'Acre, and bearing testimony, in common with many other captains serving in the fleets, to his remarkable coolness on all occasions under fire, while zealously employed on board H.M.'s ships, and with the Naval Brigade, in making sketches for his valuable historical illustrations of the events of the war; and with reference also to the reply of the 26th June, 1858, from the Lords Commissioners of the Admiralty, stating that there appears to be no precedent for compliance with such a request, and that "therefore" their Lordships could not entertain it.

I have now to request that you will be pleased to move their Lordships to allow me respectfully to renew my application, upon the ground that a civilian, Sir William Eden, has been allowed the war medals for Syria and Acre, whilst on board the Carysfort, and with the hope that their Lordships may reconsider the decision in Mr. Brierly's case, should the above precedent have been inadvertently overlooked.

I would also mention that the circumstance of Mr. Brierly being in the fleets, and ready at any time to take sketches—as he did—under fire, was a matter of interest, not only to the officers, but also to the men generally; and, that in addition to his meritorious services in the Baltic and Black Sea, he has devoted the greater part of his life to the illustration of events in the Royal Navy. He was for two years in H.M.S. Rattlesnake, on the coasts of Australia and New Guinea, and afterwards in H.M.S. Mæander in the Pacific; and for various periods in other of H.M.'s ships in different parts of the world; and at the last Naval Review, he had the honour of being on board the Royal Yacht, by express command, for the purpose of taking sketches for Her Majesty.

I would submit that in every way the circumstances of Mr. Brierly's case are so peculiar and exceptional, that the awarding the medals to him could scarcely be drawn into precedent.

In conclusion, I may mention that M. Durand Brager, the French marine painter, who was similarly engaged on board the French men-of-war, and in the trenches during the co-operation of the fleets, has been awarded the Cross of the Legion of Honour, together with the most flattering notice of the Emperor, and letters of high commendation from the Minister of Marine. I am, &c.

Henry Keppel, R. Admiral.

Admiral the Right Honourable
Lord Clarence Paget, M.P., C.B., &c.

Admiralty, November 21, 1859.

Sir,—My Lords Commissioners of the Admiralty, having had under their consideration your further letter of the 1st of August last, relative to the presumed claim of Mr. Brierly the artist, to the Crimean and Baltic medals, I am commanded by my Lords to inform you that their lordships see no reason to alter their former decision in the matter.

I am, &c.

W. G. Romaine.

Rear-Admiral the Honourable Sir Henry Keppel, K.C.B.,
United Service Club.

STRENGTH AND RESOURCES OF RUSSIA.

The *Almanach de Gotha* states that the superficial extent of the Russian Empire in Europe is 96,411 geographical miles, population, 63,932,081; in Asia, 239,556 miles, population, 7,300,812; in America, 17,500 miles, population, 10,723; making a gross total superficies of 353,467 geographical square miles, containing a population of 71,243,616 souls. St. Petersburg contains some 494,656 inhabitants; Odessa, 107,370; and Moscow, 368,765. The total number of Dissenters or schismatics in Russia is 9,344,000, including 2,750,000 Romanists, 14,000 Armenians, 380,000 "United Greeks," 2,000,000 Lutherans, 2,750,000 Mahomedans, 1,250,000 Jews, and 200,000 Buddhists. The revenues of the empire in 1852 (according to Baron de Redea) amounted to 275,472,000 silver roubles, and the expenditure to 275,835,000 roubles. The total debt, terminable and perpetual, amounted in 1859 to 515,988,012 roubles, besides the unfunded debt, amounting to 644,448,790 roubles' worth of notes of credit in circulation. The receipts of the Crown domain in 1856 were 45,412,886 roubles, and the population proper of these domains (men and women) was 18,436,829. There are the "domain peasantry," but there are also 376,786 foreign colonists, 52,504 Jewish farmers, and 572,522 "permanent population" (merchants, *bourgeois*, widows, *enfans de troupe*, &c.). The imports in 1857 were valued at 151,686,799 roubles, and the exports at 169,688,134 roubles. The mercantile marine of 1858 included 286 long-voyage ships of 23,000 tons, and 813 coasters of 29,279 tons, making a total of 1416 ships, navigated by 172,605 seamen. The total force of the regular army of Russia (cavalry, infantry, and artillery) consisted of 577,859 men, and there are also the irregular troops of Cossacks. The infantry includes 31 divisions, 67 brigades, 112 regiments, and 456 active battalions; the cavalry, 11 divisions, 31 regiments, and 66 brigades. The Cossacks consist of 136 cavalry regiments, 813 mounted "Ssotnies," and 31 battalions. The fleet consisted in 1857 of 85 sailing ships and 73 steamers, the former including 12 liners, 7 frigates, 7 corvettes, 7 brigs and 11 schooners; the latter, 7 screw vessels, 11 screw frigates, and 12 screw corvettes. The *personnel* includes 16 admirals, 30 vice-admirals, 39 rear-admirals, 111 captains of the first rank, 95 of the second rank, 257 lieutenant-captains, 607 common lieutenants, and 396 midshipmen. This is exclusive of the corps of artillery, pilots, and engineers of the fleet. Since 1857, however, according to the *Almanach de Gotha*, the fleet has been very considerably "developed." Thus, the Baltic fleet alone includes, besides its numerous gun-shallops, 27 equipages, each including one liner of 60 to 120 guns and one frigate or a steam corvette; and the Amoor squadron has been recently reinforced by 10 vessels, newly built (in August, 1859).

FRENCH NAVY.

The squadron of Vice-Admiral Romain Desfosses, consisting of the Bretagne, Eylau, Saint Louis, and Alexandre, anchored in Toulon Roads, 15th January.

Donawerth, carrying the flag of Rear-Admiral Jehenne, with the frigate La Foudre, and the corvettes, Tisiphone and La Monette, is at Algesiras.

Gloire is receiving her engines on board rapidly.

The affair in the bay of Tourane has closed the route of Hue to the Annamites. The French admit "sensible loss." A major of artillery killed, the captain of the Nemesis wounded in the head, a midshipman named Fitzjames and a naval cadet wounded, &c.

As great public interest has been expressed respecting the continuation of Lord Macaulay's "History of England," and some mis-statements have gone forth, we (*Times*) feel it desirable to announce, on the best authority, that some progress had been made by Lord Macaulay towards the completion of another volume, and that a portion of the MS. is fully prepared for publication. Circumstances, however, will probably delay for some time the appearance of any further portion of the history.

Regiments on foreign service are beginning to receive clothes according to climate, instead, as of old, according to inexorable pattern.

The case of General Beatson *v.* Skene was finished last Saturday evening. Our readers will recollect that it was an action brought by the general against a consul for imputing to him a design to excite a mutiny among the Bashi-Bazouks whom he commanded in the East, on learning that he was superseded by General Shirley, formerly of the 7th Hussars. The verdict was for the defendant, on the ground that the libel was a "privileged communication;" but General Beatson's counsel is to move for a new trial to-day.

By order of the Metropolitan Board of Works, several alterations have lately been made in the names of streets within a radius of twelve miles from St. Paul's Cathedral.

The 1st battalions of the 9th and 22nd Regiments are ordered to Corfu and Malta respectively, in place of the 1st battalions of the 14th and 21st Regiments, who go, the former to Jamaica, relieving the 41st, and the latter to Barbadoes, relieving the 49th, both of which regiments return home.

Obituary.

We regret to have to announce the demise of Lieutenant-General C. Grant Falconar, Colonel of the 73rd Regiment, who died a few days since at his seat in Scotland. The gallant deceased had been upwards of 64 years in the army, having entered the service in September, 1795. He joined the 61st Regiment at the Cape early in the year 1801, and accompanied that regiment to Egypt, and joined General Sir David Baird's army at Cosier, crossing the desert with the troops, and remained with the army in Egypt until 1803. In 1804 and 1805 he served in the campaign in Italy under General Sir James Craig, and in 1806 he served with the 78th Highlanders during the campaign in Italy, under General Sir John Stuart; and was at the battle of Maida, where he had a horse shot under him when acting as aide-de-camp to General Acland; the siege of Scylla, capture of Catrone, &c. He again repaired to Egypt in 1807, and during that campaign was present at the attack on the fortified heights and forts of Alexandria, the first affair at Lake Elcho and Elhamet, the investment and siege of Rosetta, actions at Rosetta and Elhamet of 21st April. Served also in the campaigns of 1814 and 1815 in Holland and Flanders. He commanded the light infantry, 78th, at both actions at Merxem, attack of French at Brescat, and bombardment of Antwerp. For some years he was the lieutenant-colonel commanding the 22nd Regiment, and was also up to gaining the rank of major-general and inspecting field-officer of the recruiting staff. In 1837, shortly before the death of William IV., he was nominated a Knight of the Royal Hanoverian Guelphic Order. On the removal of General Macpherson to the 88th Regiment, in 1857, he was appointed colonel of the 73rd Foot. The deceased general's commissions were dated as follows:—ensign, Sept. 1, 1795; lieutenant, Nov. 1, 1799; captain, Dec. 26, 1805; major, Aug. 12, 1819; lieutenant-colonel, Oct. 22, 1825; colonel, June 28, 1838; major-general, Nov. 11, 1851; and lieutenant-general, July 20, 1858.

We are sorry to announce the death, on the 5th ult., at Dum Dum, near Calcutta, after fourteen days' illness of a severe attack of dysentery, of Captain Simon George Newport, 79th Highlanders, eldest son of Captain Newport, of Waterford. Captain Newport was in the 36th year of his age, was eighteen years in the service, and was wounded by grape-shot when carrying the colours of his regiment (the 39th) at the battle of Maharajpore, when under command of General Lord Gough. Subsequently he served in the Crimea, and actively engaged in the trenches at the siege of Sebastopol. His remains were conveyed to the cemetery at Dum Dum with military honours, all the officers of the garrison attending. He had the bronze star for the battle of Maharajpore, the Turkish medal, and the Crimean medal, presented to him by Her Majesty. Captain Thackwell, son of the late General Sir Joseph Thackwell, never left him during his illness, and states that for some days after the attack he was progressing favourably, but a relapse took place, when he said, "I feel I cannot get over this, and I trust in my Saviour." He then gradually sank into a state of unconsciousness, and died as if asleep. Captain Thackwell has kindly given directions that a monument be placed over his grave, as a tribute to the memory of his late valued friend.

Lord Londesborough, who formerly as Lord Albert Conyngham served in the Blues, died on Sunday last. His lordship was born on the day of the battle of Trafalgar, and leaves, in addition to the present lord, a younger son, the Hon. Albert Denison, a lieutenant in the Royal Navy.

We are sorry to read of the death, on the 15th inst., in his 30th year, of Captain Henry Heywood Lonsdale, formerly of the 3rd Dragoon Guards. Captain Lonsdale had fallen from his hack in riding to cover, and sustained injuries in the head which terminated in his death, after several days of unconsciousness.

The death of Major-General Henry Edward Robinson took place on the 14th instant at his residence in Upper Berkeley Street. The gallant veteran entered the army in 1806, and served with the 48th in the Peninsula from June, 1809, to October, 1813, and was present in the battles of Talavera and Busaco, Lines at Torres Vedras, pursuit of Massena, action of Campo Mayor, siege of Ciudad Rodrigo, siege and storming of Badajoz, when he was shot through the left arm; battle of Salamanca, capture of Madrid; battles of Vittoria, Roncesvalles, and the Pyrenees, where he was severely wounded, and had his left leg fractured; besides which he took part in various minor engagements and skirmishes. As Lieut.-Colonel he commanded the 30th Regiment for ten years, when he retired in 1843 on half-pay, and during that period commanded the troops at Bermuda for two years. He had received the war medal with seven clasps and a pension for his distinguished military services. His commissions bore date as follow:—Ensign, the 28th of May, 1806; Lieutenant, the 9th of February, 1808; Captain, the 26th of July, 1822; Major, the 20th of September, 1827; Lieut.-Colonel, the 1st of January, 1834; Colonel, the 9th of November, 1846; and Major-General, the 20th of June, 1854.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

Higman—Jan. 15, at 5, Blenheim Place, St John's Wood, the wife of Lieutenant Albert D. Higman, Royal Marines (Light Infantry), of a son.

Lowndes—Jan. 7, at "The Hollies," Tunbridge Wells, the wife of Captain James Lowndes, of a son.

McKillop—Jan. 11, at Clifden, county Galway, Ireland, the wife of Captain H. F. McKillop, Royal Navy, of a daughter.

Money—Nov. 23, at the Rookery, Simla, the wife of Lieutenant Gerard Noel Money, 1st E.B. Fusileers, of a son.

Sankey—Nov. 22, at Moulmein, Burmah, the wife of Major Richard H. Sankey, Madras Engineers, of a son.

Scott—Jan. 12, at Glengall Grove, Old Kent Road, the wife of J. Scott, Esq., of the Admiralty, Somerset House, of a daughter.

Digitized by Google

MARRIAGES.

BAUME—GOLDIE—Jan. 12, at Kingston-on-Thames, by the Rev. H. P. Measor, Paul Baume, Esq., Royal Military College, Sandhurst, to Magdalene, second daughter of James Goldie, Esq.

BOWLING—GIBBS—Oct. 19, at Waluku, New Zealand, by the Rev. G. H. Johnstone, John Reed, son of J. Bowling, Esq., late Scots Fusilier Guards, to Bessie Johnson, only daughter of the late Rev. Robert Waoven Gibbs, of Derry, Ireland.

BRAXTON—GODFREY—Jan. 10, at the parish church of St. Giles, Camberwell, Surrey, by the Rev. M. S. Edgell, curate, Henry Braxton, Esq., Paymaster, Royal Navy, to Susannah, third daughter of Mr. David Owen Godfrey, of Peckham, Surrey.

BRIGGS—LAMONT—Jan. 7, at Knockdow, Argyleshire, Captain John Patrick Briggs, H.M.'s Bengal Army, and Deputy-Commissioner of the province of Tavoy, to Jane, only daughter of Alexander Lamont, Esq., of Knockdow.

COLEMAN—MARTIN—Nov. 12, at Valparaiso, by the Rev.—Dennet, English resident clergyman, Henry Wm. Alex. Coleman, M.D., to Charlotte Sophia, eldest surviving daughter of Colonel Martin, of the 16th Lancers, Preston, Lancashire.

CLEPHANE—UNDERWOOD—Nov. 24, at St. George's Cathedral, Madras, by the Acting Archdeacon, Andrew R. Clephane, Esq., 24th Regiment, H.M.N.I., to Mary Fanny, fourth daughter of William Elphinstone Underwood, Esq., C.S.

ELLIS—ROOPER—Jan. 17, at Otham Church, Kent, by the Rev. Conyngham Ellis, M.A., perpetual Curate of Cranborne, Berks. assisted by the Rev. Charles Shaw, Frederick Ellis, Esq., Captain 9th Royal Lancers, youngest son of the late Thomas Ellis, of Abbotstown, in the county of Dublin, Esq., M.P., to Elizabeth, daughter of the late John Bonfoy Rooper, of Ripton Hall, Huntingdonshire, Esq.

FITTOCK—WHITE—Jan. 7, at All Saints' Church, Rotherhithe, by the Rev. R. Jones, M.A., Edwin, second son of Captain J. R. Fittock, R.N., to Lavinia Rivers, youngest daughter of the late Lieutenant Peter White, R.N.

GEARY—NICHOLSON—Jan. 16, at Christ Church, Blackfriars, London, by the Rev. T. H. Hooper, Captain Geary, Royal Navy, to Sophia Isabella, widow of the late John Nicholson, Esq., of Brigg, Lincolnshire.

HASLOPE—MELVILL—Jan. 19, at St. Peter's, Eaton Square, by the Rev. Henry Melvill, B.D., Canon Residentiary of St. Paul's, and Chaplain in Ordinary to the Queen, assisted by the Rev. Wm. Wales, M.A., Chancellor of Peterborough, and rector of Uppingham, Lancelot Llewellyn Haslope, Esq., of Chesterton Hall, Staffordshire, to Emily, eldest daughter of Philip Melvill, Esq., late Secretary in the Military Department to the East India Company.

HILL—MUMM—Jan. 17, at St. John's, Paddington, by the Rev. Edward Cookson, incumbent of Trinity Church, Leeds, Charles Edward Hill, Lieutenant H.M.'s 25th Regiment (the King's Own Borderers), third son of the late John Hepworth Hill, Esq., of Leeds, barrister-at-law, to Anna Elizabeth, daughter of Julius Mumm, Esq., of 2, Hyde Park Street, Hyde Park, London, and Cologne-on-the-Rhine.

PIGOTT—UNDERWOOD—Nov. 24, at St. George's Cathedral, Madras, by the Acting Archdeacon, Edward P. Pigott, Esq., Lieutenant and Adjutant H.M.'s 44th Regiment, and eldest son of George P. Pigott, Esq., Slevoy Castle, county Wexford, to Eliza Anne, third daughter of William Elphinstone Underwood, Esq., Madras Civil Service.

SCONCE—FLETCHER—Dec. 8th, at St. Thomas's Cathedral, Bombay, by the Rev. W. K. Fletcher, Herbert Sconce, Esq., Bengal Army, third son of the late Robert Clement Sconce, Esq., to Elizabeth, eldest daughter of the Rev. W. K. Fletcher, and granddaughter of the late Right Rev. Dr. Carr, formerly Bishop of Bombay.

THOMSON—MONEY—Nov. 26, at Calcutta, Captain Mowbray Thomson, of the Bengal Army, to Mary Ironside, daughter of the Rev. William Money.

DEATHS.

BLURTON—Oct. 31, at Dandenong, near Melbourne, Australia, Eliza, relict of the late Commander George Blurton, R.N., of Station Peak, near Geelong, aged 59.

CHAPLIN—Jan. 18, at 2, Hyde Park Gardens, aged 27, Edwin Charles Chaplin, Lieutenant, R.N., son of the late W. J. Chaplin, Esq.

COOPER—Oct. 2, at Ablington, near Christchurch, New Zealand, George Blakley Cooper, Lieutenant, R.N., eldest son of the late Rev. G. Fort Cooper, of Yetminster, Dorsetshire.

COULTHRED—Jan. 12, at his residence, No. 4, Mornington Crescent, James Coulthred, Esq., Surgeon, R.N., aged 73, greatly respected and deeply lamented.

EDMAN—Dec. 10, at Colon, near Santa Martha, British Colombia, of yellow fever, aged 42, George Allatt Edman, Esq., M.R.C.S., L.A.C., Assistant-Surgeon in the Essex Rifles, and Medical Officer in the M.R.S.P. Company's ship Solent.

ELLIS—Jan. 14, at Brighton, Catherine Ellis, widow of the late Lieutenant-Colonel J. Tait, C.B., and eldest daughter of the late Lieutenant-Colonel F. Hickes, Bombay Army, aged 40.

FALCONAR—Jan. 10, at his seat, Hazelbank, near Edinburgh, Lieut.-General Chesborough Grant Falconar, K.H., Colonel of the 73rd Foot.

FORLONG—Dec. 15, suddenly, at Toronto, Upper Canada, Lieutenant-General Forlong, late of the 43rd Light Infantry.

HARDIE—Jan. 9, at Dublin, of scarlatina, James, eldest son of W. Hardie, Quartermaster, county Dublin Militia, aged 11.

HAWORTH—Jan. 14, at the residence of her son-in-law, General Coryton, Woolwich, Mary, the widow of the late William Rose Haworth, Esq., aged 92.

HUTCHESSON—Jan. 9, at Dover, Mary, widow of the late Lieutenant-General Hutchesson, Royal Artillery.

Robert Strachan, Secretary.

LIFE ASSURANCE.

The principles on which this Company conducts its business combine the system of Mutual Assurance with the safety of a large Protecting Capital.

DIVISION OF PROFITS.—The Profits are divided every seven years, *and Nine-tenths (or 90 per cent.) of the Profits are allocated to participating Policies.*

At the last investigation in December, 1858, the Profit which was then allocated, as having accrued during the preceding seven years, amounted to upwards of 136,000*l.*

Bonuses may be added to the sum Assured, or surrendered for a cash payment, or applied to the reduction of the future Premiums.

At last Balance a Prospective Bonus of 1*l.* per cent per annum was declared in favour of such of the the existing Policies as may become Claims within the next seven years. By this arrangement the advantage of an Annual Division is obtained, without its disadvantages. The same privilege was extended to a new Policies which may become Claims after payment of five annual premiums.

SPECIAL NOTICE.—For the convenience of parties Tables have been framed on the following new principles

1. Half Premium System.
2. Assurance and Annuity System.
3. Double Assurance System.

Prospectuses, fully detailing these and the other principles of the office, may be had on application to the head office or any of its agents.

RIFLE CORPS.—Policies are not affected by the Assured joining Rifle or Artillery Corps.

FIRE INSURANCE.

The Company INSURES against FIRE Silk, Cotton Woollen, and Flax Mills, Buildings of all descriptions Furniture, Stock in Trade, Merchandise, Agricultural Stock, Implements of Husbandry, and effects of every kind, at the lowest rates of Premium corresponding to the risk.

Farming Stock is Insured without the Average Clause, and loss and damage by Lightning made good.

No Charge for Transfers from other Offices.

64, Princes Street, DAVID SMITH, Manager.
Edinburgh, Jan. 1860. JOHN OGILVIE, Secretary.

PERSONS PROCEEDING TO INDIA, or any of the British Colonies, can effect assurances on favourable terms with the COLONIAL LIFE ASSURANCE COMPANY.

Loans given to civil or military officers proceeding to India on Her Majesty's service.

Agents at Calcutta, Madras, and Bombay, and in all the British Colonies, where premiums can be paid and claims settled.

The Colonial was established in 1846, and its present income is upwards of 100,000*l.* per annum.

Subscribed capital, 1,000,000*l.* sterling.

DIVISIONS OF PROFIT have taken place on two occasions—in 1854 and 1859.

A POLICY for 1000*l.* opened in 1847 has been increased by the application of the Bonus to 1235*l.*

Constituted by Act of Parliament.

THE WORKS OF SHAKESPEARE. The Text revised by the Rev. ALEXANDER DYCE.

*** In this Edition the Notes are placed at the end of each play.

"A minute examination has satisfied us that this is the best text of Shakespeare which has yet been given to the world. . . . . This at least is beyond doubt, that we have never possessed so admirable a text of Shakespeare before; and we would suggest to the thousands of people who are always inquiring for something interesting to read, that they should read again the works of the monarch of literature, and read him in the edition of Mr. Dyce."—*Quarterly Review, January*, 1859.

NEW FIRST-CLASS NEWSPAPER FOR THE COLONIES.

"THE ENGLISH MAIL," a Newspaper specially prepared for Circulation throughout Australia and New Zealand. Published in time for despatch by the Mails which leave England (*via* Marseilles) for Australia on the 18th of every month.

The want of a well-edited and first-class newspaper for the Australian colonies—one which shall give the news of the month, Domestic, Commercial, and Foreign, easily arranged in the order of its significance and occurrence, and clearly condensed for its ready perusal by colonists eager to know what is going on at home—has led to the starting of *The English Mail*.

To the Australian colonists *The English Mail* cannot fail to be of the greatest service. It claims to be their "reporter," as it were, to note and impartially record all events of public interest relating to Australia, occurring in this country. Special reports of Meetings of Banks, Mining and Insurance Companies, Postal Communication, Mail Service, &c., will find a place in its columns; and it enjoys the advantage of an exclusive connection with the "General Association for the Australian Colonies," established at the Australian and New Zealand Rooms, Jerusalem Coffee House, Cornhill.

Although *The English Mail* is specially intended for Australian circulation, yet owing to the general character and perfect arrangement of its Miscellaneous News, it has found readers elsewhere—in India, China, Canada, and the Cape of Good Hope, and even at home—and it may fairly be considered as *the Englishman's Newspaper Abroad*.

Arrangements have been made to ensure an ample distribution of the paper throughout the various townships in each of the Colonies, as well as at home; and with the assurance of an extensive circulation, it is confidently recommended as a most valuable medium for Advertisements, *Home* and *Colonial*. Price *8d.* (Postage to Australia *viâ* Marseilles, *3d.* extra).

SUBSCRIBERS' NAMES for copies of *The English Mail*, intended for transmission to Australia, must be sent not later than the day previous to publication; and must be accompanied by Postage Stamps for the full price of the paper (either with or without postage).

ADVERTISEMENTS will be received up to the evening of the 17th of each month. The charge for six lines is *3s. 6d.*; *6d.* a line after.

Office for Advertisements and Subscriptions, No. 1, St. Bride's Avenue, Fleet Street, E.C.

V. R.

ARMY RESERVE FORCE.—Her Majesty's Government having, with the sanction of Parliament, determined on establishing an Army Reserve Force, THIS IS TO GIVE NOTICE, that any person possessing the following qualifications may, if he is not a pensioner, be ENROLLED in this force, and will thereupon be entitled to the advantages and be subject to the obligations after-mentioned:—

QUALIFICATIONS FOR THE RESERVE.

1. Every volunteer for this force must have completed the period for which he originally enlisted in the army, or if discharged previously, either by purchase or in any other way, he must have completed a service of at least five years.
2. He must have been discharged within five years preceding the date of his enrolment as a volunteer.
3. He must be resident within the limits of the pension district in which he is enrolled.
4. He must be free from any bodily infirmity likely to disqualify him for active service.
5. He must not have been discharged for misconduct.

ADVANTAGES OF THE RESERVE.

Every volunteer will receive—
1. The sum of 4*l.* annually, by equal quarterly payments, one of which may be at the training period.
2. The pay and allowances of his rank, according to the rates usual in infantry, during any period for which he may be called out, together with the good-conduct pay to which he was entitled when he left his regiment.
3. One penny per mile to cover his travelling expenses, by rail or otherwise, to and from the place of assembly.
4. A suit of clothing once in seven years, or oftener, if on any occasion he be kept up permanently.
5. If wounded or injured in actual service, the same rate of pension as for corresponding ranks in the Line.
6. If not pensioned for wounds or injuries, he may by service and good conduct attain a pension not exceeding 10*d.* a day for a private, 1*s.* for a corporal, and 1*s.* 3*d.* for a sergeant or other superior non-commissioned officer, by reckoning two years' service in the Reserve as one towards the completion of the period for which a service pension may be awarded by Her Majesty's Regulations.

OBLIGATIONS OF THE RESERVE FORCE.

1. Every volunteer for this Force must be attested to serve for such period as may be wanting to complete 21 years' service if he originally enlisted in Infantry; or 24 if he enlisted in Cavalry, Artillery, or Engineers, reckoning two years of such service as one towards the attainment of these periods.
2. He must attend drill for 12 days in each year with a regiment, depôt, or the pensioner force of the district, as may be directed.
3. He must not change his residence in the district without giving due notice.
4. He must appear once a quarter before the staff officer of pensioners of the district in which he is enrolled to receive his quarterly allowance.
5. If called out for permanent duty in case of war, he must join a regiment of the line or depôt as may be directed, and continue to serve in the United Kingdom while required.
6. Upon all such occasions, or when called out for exercise, he shall be liable to the Articles of War, and be under the command of the military authorities.
7. When his pension has been attained, he shall, up to the age of 55, be liable to serve with the enrolled pensioners, on the same conditions as are laid down in the Acts and Warrants for the regulation of that Force.
8. If he fail to fulfil these obligations, he shall be liable to forfeit all the advantages here enumerated, in addition to any other punishment which a Court-Martial may award.

VICTORIA RIFLES.—The REGIMENTAL BALL, under the patronage of his Grace the DUKE OF WELLINGTON, Lieutenant-Colonel-Commandant, will take place on THURSDAY, the 26th Instant, at St. James's Hall, Regent Street, W. Application for Tickets to be made to Members of the Corps, or to Lieutenant COLLINS, Honorary Secretary of the Ball Committee. Members of Volunteer Corps to attend in full dress uniform. Swords not to be worn.
Orderly Room, Kilburn, N.W. January 10, 1860.

CAMBRIDGE UNIVERSITY VOLUNTEERS.—Application having been made for further information concerning HONORARY MEMBERS of the Corps, it is to be understood that any gentleman who has ever belonged to the University may become an Honorary Member upon payment of the subscriptions already advertised. Subscriptions may be paid to Messrs. MORTLOCK & Co., Bankers, Cambridge, giving address. JAMES BAKER, Major,
Commanding Cambridge University Volunteers.
Magdalene Coll., Jan. 18, 1860.

NAVAL CADETS.

ROYAL NAVAL ESTABLISHMENT.
EASTERN PARADE, SOUTHSEA.
Conducted by Mr. THOMAS EASTMAN, R.N.

Mr. EASTMAN offers advantages which cannot be obtained in Establishments for general education, since he receives Naval Pupils only, who are instructed in the course exactly required.

Pupils are taught Steam and Rigging, the former from a working model of a marine steam engine; the latter from a model of a line-of-battle-ship, 24 feet in length.

346 Gentlemen have passed as Naval Cadets, and nearly 250 as Marine Cadets, &c.

The following Gentlemen have passed as Naval Cadets from this Establishment during the past year:—

Mr. H. P. Wylly	Mr. E. S. Nuthall	Mr. A. W. Brabazon
„ R. T. Bruce	„ J. H. O'Brien	„ E. G. F. Law
„ J. H. Bainbridge	„ J. Bedingfeld	„ J. Hazel
„ W. E. Heathcote	„ F. G. Powell	„ J. Needham
	„ W. H. Roberts	„ H. W. Gibson
„ F. W. Jenkins	„ C. G. Hunt	„ M. W. Abbot
„ J. Evans	„ H. E. Walters	„ J. L. Smith
„ N. Byng	„ A. P. Pascoe	„ L. W. Hyman
„ J. S. Alexander	„ H. Pugh	„ H. M. Milman
„ G. A. Ellis	„ W. F. E. Freeland	„ C. G. St. J. Hough
„ K. Garnier	„ R. R. Jaffray	„ E. T. Dugdale
„ T. L. Mallory	Lord Albert Clinton	„ F. Coddington
„ T. S. Hoghton	Mr. S. J. Weld	„ C. E. Gissing
„ A. R. Boddam	„ R. G. Fairfax	„ G. L. Lindeman
„ J. D. Maycock	„ A. Hutchinson	„ A. E. Bancroft
„ H. G. Gillum	„ C. W. Atkinson	„ A. H. Campbell
„ M. C. Osborn		

NAVAL CADETS.—Of the 50 successful Candidates who passed at the Royal Naval College, Portsmouth, on the 13th December, sixteen were from the Establishment at NORTH GROVE HOUSE, Southsea, viz., Messrs. Moysey, Dicken, Eyres, Mandeville, Clark, Gataker, Steavenson, Lang, English, Tyler, Greenway, Ranking, Wood, Burt, Brereton, Wallace. 11 Cadets passed from the Establishment in September, and 11 others last June.

N.B. Twenty candidates out of seventy were rejected in December, 1859.

W. JOHNSON, Naval Instructor; W. BELL, Chaplain;
J. A. BURROW, Chaplain and Naval Instructor.

NAVAL CADETS.

Reduction of Examination and Age. New Regulations for Entry into Her Majesty's Service.

MESSRS. GALT & CO., Portsmouth, will be glad to forward, on application, the New Admiralty Regulations and other information necessary for passing the R.N. College.
Outfitters by appointment to H.S.H. the Prince of Leiningen.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—The constant success of the Pupils of this Establishment at the Examinations for the Line, Sandhurst, &c., is a guarantee of the excellence of the studies there pursued. Every candidate sent to the Woolwich competitive examination has obtained admission at his first trial. The number of Officers of all ranks who come to read for the Staff continues to increase. Six of them entered the Staff College this year. Apply to Captain LENDY, Sunbury, S.W.

ST. JOHN'S COLLEGE, Charlton Grove.—Old Charlton (near Blackheath), Kent (late St. John's Hall, Kilburn).

Principal:—The REV. A. F. THOMSON, B.A., Oxon.

This Military, Naval, and Civil Engineering College will be ready for the pupils *on and after January* 10, 1860. There being *only three vacancies* at present, early application for Prospectuses, &c., must be made at the College, or to the Agents; PROFESSOR HEINE, 2, Duke Street, Adelphi, W.C.; and MESSRS. KIRKMAN, 8, Clement's Lane, City, E.C.

The College is close to the Charlton Station of the North Kent Railway.

W. R. LOOKER & Co., ARMY, NAVY, EAST INDIA, AND COLONIAL AGENTS.

Full and Half Pay, Pensions, Dividends, &c., received and remitted.

Supplies of all kinds purchased, insured, and forwarded by overland or long sea routes to all parts of the world.

Life and other assurances effected free of charge for Agency.

Passages secured, free of charge, and baggage forwarded.

Letters, Newspapers, Parcels, &c., taken charge of and forwarded.

12, Pall Mall East, London, S.W.

NEW LINE OF ROYAL MAIL STEAMERS FROM MILFORD HAVEN TO PORTUGAL AND THE BRAZILS.—The following first-class and powerful STEAM-SHIPS are appointed to perform a monthly service between MILFORD HAVEN and LISBON, Cape de Verds, Pernambuco, Bahia, and Rio de Janeiro:—

Ships.	Commanders.	Tons Register.	Effective Horse Power.
The Milford Haven	Capt. Champion	2,221	600
Portugal	Capt. Courtenay	2,261	600
Brazil	Capt. Eustace.	2,242	600

The next ship of this line, the Milford Haven, is intended to sail with goods and passengers on Jan. 24, leaving Lisbon Feb. 1, and Rio de Janeiro about the end of February on her return voyage. These splendid ships are fitted up with every consideration for the convenience and comfort of passengers. They will carry the mails from Portugal to the Brazils, and, sailing under the Portuguese flag offer important advantages in the saving of duties at Lisbon. Through rates will be established from and to all the principal towns in the kingdom, and return tickets granted on liberal terms. All further information as to rates of freight and passage, dates of sailing, &c., may be obtained on application to Messrs. FORD & JACKSON, managers, Milford Haven; at the booking office, 33, Regent Circus, Piccadilly; and to JOHN W. WILSON, Esq., general manager, 40, Cannon Street, London, E.C. Passengers may proceed by steamer from Rio de Janeiro to Montevideo and Buenos Ayres.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., viâ EGYPT. The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.—For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

CAPTAIN ARMINE WODEHOUSE, R.N., deceased. Pursuant to an Act of Parliament made and passed in the 22nd and 23rd years of the reign of Her present Majesty, intituled "An Act to further Amend the Law of Property and to Relieve Trustees," NOTICE IS HEREBY GIVEN, that the Creditors of Captain ARMINE WODEHOUSE, R.N., late of Her Majesty's Ship "Cormorant," and of No. 38, Bury Street, St. James's, in the County of Middlesex, who died on the 19th day of November, 1859, and whose will was proved in the Principal Registry of Her Majesty's Court of Probate by Marsham Elwin, Esq., of Lincoln's Inn, in the said County, Barrister-at-Law, the Sole Executor named in the said Will; and all other persons claiming Debts or Liabilities affecting the Estate of the said Captain Armine Wodehouse, deceased, are to send in to the said Executor, at his aforesaid residence, or to his Solicitors, Messrs Bircham, Dalrymple & Drake, of 46, Parliament Street, in the said County, their claims against the Estate of the said Testator, on or before the 1st day of MARCH, 1860, at the expiration of which time the said Executor will distribute the whole of the Assets of the Testator amongst the parties entitled thereto, having regard to the claims of which he shall then have notice. Dated this 7th day of January, 1860. BIRCHAM, DALRYMPLE, & DRAKE, 46, Parliament Street, London, S.W., Solicitors for the said Marsham Elwin, the Executor.

COLT'S PATENT REPEATING FIREARMS.

RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

*** "COLT'S Pistol is the best repeating arm that we have."—CHARLES LANCASTER, before Government Small Arms Committee.

CAUTION.—Notice is hereby given, that certain FOREIGN FABRICANTS of REVOLVERS, attending more to cheapness of manufacture than to quality, and the rage of under-selling each other, have thereby deteriorated the article; the importation and sale of all such made rifles, carbines, revolvers, &c., bearing the patentee's trade marks and others, stamped "Colt Breveté," "Colt's Patent," &c., is illegal and forbidden. Beware of mongrel imitations and patent infringements. The genuine Pistols are stamped on the barrel, "Address, Col. Colt, London," and bear the British proof mark on the barrel and cylinder between each nipple; and can be had, in any quantity, on favourable terms, of the patentee and manufacturer,

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved Enfield-pattern Rifle, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of GEORGE H. DAW, Gun-maker and Contractor, 57, Threadneedle Street, London, E.C. Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

CAPTAIN NORTON'S recently-invented GOSSAMER CARTRIDGES are found superior to anything previously in use for either muzzle or breech-loading shot guns, also for the Enfield Rifle. The charge is composed of coarse grain powder, and is most efficient. They are now manufactured by Messrs. ELEY, BROTHERS, and may be had to order of any gunmaker in London or country.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.
Apply to B. DE LA COUR, 327, High Street, Chatham.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.
11, Strand, opposite Trafalgar Square, W.C.

PRIZE MEDAL FOR VOLUNTEER RIFLE CORPS

T. R. PINCHES & CO., of 27, Oxenden Street, London, S.W., have just completed dies suitable for the above, an impression of which in white metal can be had (with prices for the same in Gold and Silver), and forwarded to any part of the United Kingdom post free, upon application to T. R. PINCHES & Co., with a remittance for 2*s.* 6*d.* in postage stamps or otherwise.

MILITARY DECORATIONS, WAR MEDALS, &c.

ORDER OF THE BATH, LEGION D'HONNEUR, and the MEDJIDIE, in all the different Classes and Sizes.

MINIATURE MEDALS, consisting of CRIMEAN, FRENCH, SARDINIAN, CAFFRE, and the whole Indian Series issued to the present time.

HUGHES' "RIFLEMAN'S" Thrice Shrunk, Coloured FLANNEL SHIRTS; also their ANGLO-PARISIAN A 1 SHIRTS, 27*s.*, 33*s.*, 39*s.*, 45*s.*, per half-dozen; and FASHIONABLE COLLARS, 8*s.* 6*d.*, 9*s.* 6*d.*, 12*s.* 6*d.*, per dozen, are unrivalled. Samples with infallible measuring instructions forwarded. Army, Navy, and General Outfitters, at SHIPPING PRICES, for India, China, Australia, &c. 203, Regent Street, W.

ELKINGTON & CO. desire respectfully to call the attention of Regimental Messes requiring PLATE to their Manufactures, which may be obtained in great variety from their establishments.
LONDON: 22, Regent St., W., and 45, Moorgate St., E.C.
DUBLIN: College Green.
LIVERPOOL: Church Street.
Manufactory and Show Rooms, Newhall Street, Birmingham.
Estimates, Drawings, and Prices sent free by post. Replating and Gilding as usual.

TO OFFICERS IN HER MAJESTY'S ARMY AND NAVY.

MATTHEW WILDSMITH having been favoured with the patronage of many Gentlemen in Her Majesty's Forces has paid special attention to the production of a BOOT that should combine strength with ease and comfort. He is now happy to announce that he has succeeded in obtaining a leather specially prepared which he can with confidence recommend for military use, being light in weight, pliable, and very durable. Indian and Foreign Orders executed with despatch.—1, Sherard Street, Regent Street, W., rear of County Fire Office.

CHAMBERLAIN'S ROYAL PORCELAIN WORKS.—Admission of Visitors to the Works to be had on application at the Show Rooms, from 9 A.M. to 6 P.M. each day, except Saturday from 9 A.M. to 2 P.M.—W. H. KERR & Co., "Proprietors," Worcester, successors to Messrs. Flight, Barr, & Co., and Messrs. Chamberlain & Co.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

AMUSEMEMENT FOR WINTER EVENINGS is abundantly afforded to all purchasers of one of MECHI and BAZIN'S famous mahogany FOLDING BAGATELLE TABLES. Prices:—Complete with balls, bridge, cues, and mace, and directions for playing, 6 feet long, 3*l.* 15*s.*; 7 feet long, 4*l.* 15*s.*; 8 feet long, 5*l.* 15*s.*; 8 feet 6 inches long, 8*l.* 10*s.*; 9 feet long, 11*l.* 10*s.*; 10 feet long, 12*l.* 10*s.*: stands for ditto, with adjusting screw legs, 45*s.* to 70*s.* The stand is not absolutely necessary for playing the game, although its use facilitates (by ensuring an exact level) the interest of the play.—112, Regent Street, W., and 4, Leadenhall Street, E.C.

THE ST. JAMES'S RESTAURANT, 69, REGENT QUADRANT, and 25, Piccadilly.—The most brilliant suite of Dining Saloons in London. Fashionably and centrally located for Families and Gentlemen.

Ladies' and Private Rooms overlooking the Quadrant for large or small parties.

A lofty and splendidly-appointed Smoking-room.

Dinner as per Carte 2*s.* and upwards.

The St. James's Dinner, consisting of Soups, Fish, Entrées, Joints, Sweets, &c., 3*s.* 6*d.* each person.

The Stock of Wines, selected with the utmost care, are of the most recherché quality.
WILLIAM DONALD, Proprietor.

THE LONDON.—To the ARMY and NAVY.—The attention of Officers is especially drawn to the advantages offered in these elegant and spacious saloons, which fulfil all the requirements of a west-end club of the most aristocratic and exclusive character.

L'on trouve dans la Salle de Lecture, non seulement les meilleurs Journeaux Anglais, mais aussi Allemand, Français, et Belge.

F. SAWYER, Fleet Street, E.C.

ALLSOPP'S PALE ALE, recommended by BARON LIEBIG and all the Faculty, may now be had in the Finest Condition direct from the New Brewery at Burton-on-Trent, of MESSRS. HARRINGTON PARKER, & Co., who have REDUCED the PRICE of this highly esteemed beverage to 4*s.* 6*d.* per dozen Imperial pint; and 2*s.* 9*d.* per dozen Imperial half-pints.

MESSRS. HARRINGTON PARKER, & Co., also supply ALLSOPP'S ALES in Casks of 18 Gallons and upwards. 5½ Pall Mall, S.W., 31 Dec. 1859.

GLYCERINE SOAP, unscented, natural colour, in 1*s.* packets, the pleasantest and best soap for the skin. Price's non-guttering bed-room candles, in boxes 1*s.* and 3*s.* Candlesticks, 1*s.* and 2*s.* 6*d.*
PRICE'S Patent Candle Company (Limited), London.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especiallly for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.
Prepared by J. CARE, Chemist, 171, High Holborn, London, W.C., in bottles, 1*s.* each.

TEETH REPLACED, DECAYED TEETH RESTORED.—Mr. A. ESKELL, Surgeon Dentist, supplies patented Incorrodible Teeth without extracting Teeth or stumps, on his never-failing and painless principle of Self-adhesion; rendering detection impossible. Articulation and mastication guaranteed. Decayed Teeth rendered insensible to pain, and stopped with his Osteoplastic Enamel—of the same colour as the Teeth, permanently useful, and lasting unchanged for years, (a most important discovery in Dental Science!) Loose Teeth fastened, &c. Hours, Ten to Six. Consultation free. Charges strictly moderate. 314, Regent Street (opposite the Polytechnic), W., and Bennett's Hill, Birmingham.

CONSUMPTION AND ASTHMA CURED.—Dr. H. JAMES discovered, while in the East Indies, a Certain Cure for Consumption, Asthma, Bronchitis, Coughs, Colds, and General Debility. The remedy was discovered by him when his only child, a daughter, was given up to die. His child was cured, and is now alive and well. Desirous of benefiting his fellow creatures, he will send post free to those who wish it, the recipe, containing full directions for making and successfully using this remedy, on receipt of their names, with stamped envelope for return postage.—Address, O. P. BROWN, 14, Cecil Street, Strand, W.C.

THERE is a peace as profound as ever has been known in our Indian Empire since we crossed the Mahratta ditch. How long peace may last in the East—or in the West—no one can say; but if we look on India as an aggregate of nations, and compare it with Europe in the same sense, it will not appear so unnatural that, whilst the government of one presidency is congratulating itself on the close of a long and profitless campaign against its own troops, the administration of another presidency is organising expeditions against marauders, rebels, and plunderers of uncouth names and races unknown to most ethnologists.

There is, however, a very great drawback to our satisfaction when we consider the probability, or, rather, the possibility of another outbreak in the East, and when we come to investigate the nature of our security against its recurrence. The intelligence which we have received by the last mail in reference to the present temper and disposition of the people is not re-assurring; and we are informed, on very high authority, that at the very moment when the last spark of the mutiny of 1857 seemed to have been smothered in blood in the valleys of Nepaul, the beginning of 1860 might have witnessed that strange fierce flame rekindled and leaping along the congenial plains of our recently reconquered provinces. The rebels were quite persuaded that Jung Bahadoor's troops were coming to assist them. Nay, the very Goorkhas were of the same opinion, and could not believe that they were going to attack their brother Hindoos. We might not care much for these delusions; nay, we might rather be disposed to thank our good fortune that Jung Bahadoor and Pulwan Sing could lead their men so craftily, that they were brought into contact with the rebels ere they were aware of it; were fired upon by those desperate men, as they came upon them suddenly, suffered loss in killed and wounded, and were then so exasperated that they fought with energy, and never desisted till they destroyed or captured the mass of the band. But—*surgit amari aliquid!*—The Ranee of Lahore, one of those extraordinary women who in India usurp the military, political, and administrative functions of men—one of whose restless energy and animosity we have had more than one proof—is believed to have negotiated with the Sikhs, who were numerously posted all along the frontier of Oude, as garrison in border forts, and also as peaceable possessors of the lands given to reward their chiefs. The story crept about that the Sikhs were hatching mutiny; one in which they would have received the assistance of the Nepaulese, who, with the remnants of the Sepoy army, would descend into Oude, Azimghur, and Goruckpore, and aid their new friends by a powerful diversion. An indefatigable officer named Ross, and the gallant leader of one of the finest cavalry regiments in the world, Hughes, examined some of the Goorkhas whom we employed, and discovered that part at least of Hodson's Horse were implicated in the conspiracy. The adjutant of the 2nd Regiment of that famous corps, on making inquiry, learned to his dismay, that a large proportion of his men were ready to go over to the Goorkhas, if the latter came down to aid the Sepoys. Their opportunity never came—the inquiry was suspended, and the matter was hushed up. But so it cannot end. We must place our power in India on such a basis that it shall not totter at the blast of any rumour. We must stand so firm that it shall not be in the power of Sikh or Goorkha to affright us by the prospect of a new rebellion. Assuredly that position will never be attained till we show the races of India that there cannot be the remotest chance of anything but instant punishment for any assault upon our rule.

It was the influence of Jung Bahadoor, founded on his knowledge of our power, which alone drove the Nepaulese Durbar to act against the rebels, who would long have been an element of insecurity and disturbance had they been permitted to remain in the valleys upon our frontiers. The wisdom of Lord Clyde's admirable system of warfare is shown by the result. It was peculiarly applicable to the state of things with which he had to deal.

Amid much vituperation, of a nature quite unknown in this country, in the face of misrepresentation and violent popular outcry, the Commander-in-Chief, in less than one year, succeeded in driving into Nepaul every rebel in arms north of the Ganges, and in securing the country so completely that they never were able to do more than make a few hurried raids on the border of the Terai till they met their fate.

Had he yielded to the suggestions of the civilians, and adopted the small column system, he would have found himself at this moment as far off as ever from the termination of his labours. For years to come India will require a sleepless eye, a tender, yet resolute, hand. For years we shall be disturbed by reports—false or well-founded—of conspiracy and rebellion; but, at all events, we have shown that there were leaders among us who were equal to the grandest crises—that we had a military chief who, gloriously supported by his officers and men, vindicated our supremacy in every field; and a statesman in the cabinet who, ~~tempering~~ justice with mercy, saved the reputation of our race from the terrible excesses of angry and frightened men, and who, aided by the wise, and good, and great men of India, preserved an empire, not only from the assaults of internal enemies, but from the disgrace which history attaches to states that have been cruel and sanguinary in the hour of their triumph.

VOLUNTEER CAVALRY.

The following sensible useful paper has been drawn up and printed by the gallant officer whose name is appended to it, and who is known as one of our best cavalry officers:—

The present volunteer movement throughout the kingdom, bidding fair to make the rifle as familiar to the rising generation as was the bow to our ancestors, makes me feel, as an old cavalry officer, that the time is arrived for introducing into the system of our Yeomanry troops some modifications, which are called for by the great improvement in fire-arms.

I am therefore induced to lay before you some suggestions upon the formation of a body of volunteer mounted riflemen.

The proportion of regular cavalry to an army in the field varies, according to the theatre of war, from 1-5th on the plains of Russia, to 1-10th in an enclosed country like England.

The Yeomanry of England and Scotland, added to our cavalry of the line, would be out of all proportion; and my plan is to convert a large portion of it into irregular regiments of mounted riflemen, which I feel confident would be able, in the event of an invasion, to render essential service.

I have seen much of Chasseurs d'Afrique, Cossacks, Spahis, and Hungarian Hussars, and having paid great attention to their organisation, armament, and equipment; and I do not hesitate in proposing the first as a groundwork to our system.

I have not had the advantage of serving with the native Indian irregulars, from whom, of course, much might be learned.

The military qualities of the Hungarians do no require my praise, but they have too much the character of regular cavalry for our object.

This object is the creation of a mounted force which, in spite of the enclosures among which it must necessarily act, can hang upon the flanks and rear of an enemy's army, while it is also the *eyes* of our own. Its superiority over the foreign troops above mentioned would consist in the men and horses being able to go *across country*, and in their fire-arms carrying with accuracy over 900 yards.

With the assistance of such a force, and by giving to the Yeomanry a part of his escorts, and out post-duty, an English general could (perhaps for the first time) be always prepared to oppose a portion of his regulars, with horses *quite fresh*, to the cuirassiers and heavy dragoons, who in all continental armies are *reserved* for *decisive shocks*.

The Yeomanry as at present constituted, know all the drill that would be required of mounted riflemen when acting in bodies; the latter, therefore, must devote their attention to rifle shooting—steadying their horses under fire, and teaching them to leap, and lead over fences—lastly, to the practice of mounting and dismounting with rapidity.

In the presence of an enemy, these troops will move in skirmishing order with supports.

When engaged they will keep their opponents just within convenient range of the rifle, and deliver their fire, whenever possible, *dismounted*, the right arm passed through the bridle rein. However good a shot he may be, the fire of a mounted man cannot be depended on, as there is not one horse in 1000 that will stand motionless, and not disturb his aim.

Our riflemen will, whenever practicable, keep a fence between himself and the enemy, the speed of his horse will enable him to keep his own distance from infantry, and no foreign cavalry can follow him across country.

With regard to the horse, the more he possesses of the hunter's qualities the better; but it is indispensable that he be thoroughly broken to standing the fire of his rider, whether in or out of the saddle. The horses measuring low is far from a disadvantage, as he is mounted and dismounted all the more quickly.

We will now proceed to the arms, equipment, and dress.

1st. A long rifle breech-loading carbine, made as light as is consistent with durability, and to be worn *en bandoulière*, *i. e.*, slung over the left shoulder.

I see three advantages in so wearing it, the carbine slings and unslings in a moment—the soldier is not separated from his firearm when his horse is killed, as happens when it is strapped to the saddle—a great protection is afforded against sword cuts to the back of the head and neck.

The carbine at present in use by almost all nations is next to useless. I was present at a reconnoissance in the Crimea, where some 2000 French and Russian cavalry, skirmished in two parallel lines for nearly an hour, with not more than half a dozen casualties in all.

2nd. A short cut-and-thrust sword, in a leathern scabbard, suspended from a frog, like those of the Indian irregular cavalry, so as to be well clear of the ground when the man is on foot: the noise and blunting caused by the metal scabbard is thus avoided, and our rifleman has not to hook up a weapon, most cumbersome when acting on foot, every time he dismounts to fire. The guard of the hilt has only one bar, so that it may sit flat to the thigh.

3rd. The carbine must be continually passed backwards and forwards over the head, it is therefore essential, with a view to its being most effectively manœuvred, that the head-dress should be low. The Busby copied by many Yeomanry corps from the Hussars would be most unsuitable: and I recommend either a felt helmet much resembling a hunting cap, or light shako—peak quite straight, and plumes for occasions of parade only. The rest of the present dress will do, but I should like to see all mounted men in loose pantaloons thrust into Napoleon boots.

4th. Instead of the cloak a great coat to reach just below the calf of the leg (with a small *waterproof* cape), and fitting the figure sufficiently to allow of the belts and arms being worn outside.

5th. Every time he throws his right leg over the saddle, a cavalry soldier is reminded of the impediment offered by the valise to rapid mounting and dismounting. In a force to which this quality is so essential, not only must the valise be abolished, but the cantle of the regulation saddle must be lowered. The kit will then be carried in a pair of small saddle bags, and the sheepskin so shaped as to cover and keep them steady.

This I look upon as the amount of necessary changes in the present Yeomanry employment.

I have seen proposals to create a force mounted on hunters, who are to ride down an enemy's tirailleurs, when posted among our English inclosures; one simple manœuvre on the part of the infantry man must show the impracticability of such an idea, viz., throwing himself either into the ditch, or under the hedge behind which he is ensconsced. The impetus of the horse, in clearing the fence, must carry him so far into the next field as to present the back of his rider for the contents of the tirailleur's rifle.

In conclusion: to form the mounted rifleman, as here proposed, two kinds of drill are required, and they are two to which I feel assured few British yeomen will object, viz., hunting and rifle practice.

Oppose some few thousands of these troops, in an inclosed country like England, to an invading army, especially after it had been roughly handled by the regular force destined to meet it in the field, and I feel convinced that no Cossacks will ever have been so destructive.

A dashing officer in command of such a force, composed as it would be of good shots, well mounted, and carrying the perfection of fire arms, would not want for opportunities of distinction, and of rendering valuable service to his Queen and country.

JAMES CONOLLY.
Lieut.-Col. Asst.-Adjutant-General.

Portsmouth, Jan. 13, 1860.

His Royal Highness the Duke of Cambridge will remove from his apartments in St. James's Palace to Gloucester House during the present month, the improvements and interior decorations having been completed for his Royal Highness's reception.

THE ARMY.

7th Dragoon Guards. Lieutenant-Colonel Forrest has arrived in India, to join his regiment at Sealkote. The death of Lieutenant Caldwell promotes Cornet Erskine to a Lieutenancy. Lieutenant Caldwell was the son of an old officer, and had formerly been in a West India Regiment. He was transferred from the Military Train to this regiment on its augmentation for service in India in 1857, and died of consumption at Sealkote on the 11th of December, much regretted by his brother officers.

12th Lancers. This regiment is ordered home from India.

14th Light Dragoons. Colonel Ainslie and Captain Wyatt will be placed on half-pay on the return of this regiment from India next month.

ROYAL ARTILLERY.—Veterinary Surgeon, J. R. Hall, of the Royal Artillery, arrived at Southampton, from India, on Saturday, the 21st instant in P. and O. steamer Indus, on sick certificate.

5th Fusiliers. Captain Moore, 5th Fusiliers, is still suffering from the effects of his Indian service, and has obtained an extension of sick leave at the recommendation of a medical board.

7th Fusiliers. Quarter-Master T. Murphy, arrived in England, on medical certificate, on the 15th January, in the Mary Anne, from Bombay. She left on 5th Sept., 1859.

9th Regiment, 1st battalion. The head-quarters of the 9th Regiment, and 7 companies, numbering 553 men, under the command of Colonel Bethune, left Shorncliffe Camp on Friday (yesterday) morning, *en route* for Portsmouth, for embarkation on board the troop-ship Perseverance for Corfu, there to relieve the 2nd battalion. Of the 14th, under orders for Jamaica, the following officers marched with the 1st division: Colonel Bethune; Captains Richards, Douglas, Vibart, and Peel; Lieutenants Thompson, Taylor, Burland, Massey, Hacket, Chadwick, Aplin, Coole, and Eccles; Ensigns Fenton, Arams, Jocelyn, and Bailey; Quartermaster Banbury, Lieutenant and Adjutant Broughton, Surgeon Carroll, and Assistant-Surgeon Johnstone. The 2nd division, consisting of 3 companies, remain at Shorncliffe Camp for some time longer, for the purpose of forming a guard for the conveyance of convicts from Portsmouth to Gibraltar. A party of the 9th, consisting of 3 sergeants and 40 rank and file, marched from Shorncliffe *viâ* the South Eeastern Railway, under the command of Ensign Kane, *en route* to Portsmouth, on Wednesday last, to take up the baggage of the regiment on its arrival at Portsmouth.

20th Regiment. Upwards of 100 recruits arrived at Chatham during the last week to join the depôt.

22nd Regiment. Assistant-Surgeon Pollard, 22nd Regiment, arrived in medical charge of detachment from India last week.

25th Regiment.—We have to record the death, at Gibraltar, of Captain Nicholas Appleby Spoor, of this regiment. Captain Spoor entered the service in April, 1848, and served with the 6th Regiment during the Kaffir war of 1851-2-3. By his death, Lieutenant Terry obtains a company without purchase.

35th Regiment. On Lord Canning's progress to Meerut, a fire was discovered raging in Lady Canning's tent, which destroyed many official records, besides a considerable amount of property belonging to her ladyship. Much greater damage would have been done, but for the assistance rendered by the 35th Regiment, and the next day Lord Canning issued an order, expressing his warm acknowledgments to Colonel Walter and the regiment.

ROYAL MARINES.—In accordance with orders received from the Lords of the Admiralty, the whole of the companies belonging to the Chatham battalion of Royal Marine Light Infantry were drawn up in the barrack square on Tuesday morning, for the purpose of witnessing the presentation of a silver medal and a gratuity of 15*l.* each to Colour-Sergeant Edwin Harris and Colour-Sergeant W. Cole, for long service and meritorious conduct. Sergeant Harris has been nearly thirty years in the corps of Royal Marines, and is decorated with the Syrian and Turkish medals. Colour-Sergeant Cole has been twenty years in the corps, and wears the China medal. During the whole of their period of service both non-commissioned officers have borne most exemplary characters.

The Woolwich division of Royal Marine Light Infantry was on Wednesday paraded in the Barrack-square for the purpose of witnessing the presentation of gratuities and medals for good conduct and meritorious services to Sergeant Lock, Colour-Sergeant Maw, and Private Corp, who have served faithfully in the corps upwards of twenty-one years.

53rd Regiment returns to England in the course of a few months.

86th Regiment.—Colonel Lowth, C.B., has retired on full-pay, after 40 years' service.

Medical Staff. Surgeon-Major F. Foakes has arrived in England from Malta on medical certificate; Surgeon-Major J. Davies, P.M.O. at Great Yarmouth, is the first on the rolls for foreign service.

Mr. Secretary Herbert stated in the House of Commons on Thursday evening that the new Guards' barracks, in lieu of those in Portman Street, would be completed in about two years.

From Bombay we learn that the 3rd and 5th regiments of Native Infantry are under orders for China.

The Governor-General has decided that services in India performed from and after the 18th November, 1859, will give no claim to the medal for the suppression of the mutiny, and from that date all claims will cease.

FURLOUGHS TO NON-COMMISSIONED OFFICERS FROM INDIA.—The following paragraphs of a military letter from the Secretary of State for India, are published. "In a few cases, however, to be separately and especially considered, the grant of furlough to non-commissioned officers of standing in the service, of irreproachable character, and whose health requires a change of climate, will not be objected to." "The non-commissioned officers who may obtain this indulgence will invariably be posted to do duty with invalids or time-expired men on passage to Europe. On arrival they will report themselves at the India House, and will be allowed a short leave to visit their friends in England, after which they will be available to return to India with drafts. It will be clearly explained to them that such are the conditions on which they obtain furlough."

COMING HOME.—Lieutenant Hoskins, of the Bombay Artillery; Lieutenant Chilton, of the Bengal Artillery; Cornet A. Farrer, Madras Cavalry; Ensign Westropp, Her Majesty's 66th Foot, Lieutenant Seacome, of the 2nd Grenadier Regiment Native Infantry; Assistant-Surgeon W. Ramsbotnam, of Her Majesty's Service, and about three hundred and fifty-three time-expired men; and a number of families of Her Majesty's British and Indian forces, proceeded on the 15th Dec., under the command of Captain W. De Vitre, of the Horse Artillery, to England, *viâ* the Cape, per ship Ramillies, C. Hodder, Commander.

The following detail of time-expired men of Her Majesty's British regiments embarked at Bombay, on board the ship Mounteagle, on the 10th December for England, under the command of Captain Madden, 1st battalion, 4th, or the King's Own Regiment:—3rd Dragoon Guards, 3 men; 6th Inniskilling Dragoons, 3 men; 7th Dragoon Guards, 1 man; 17th Lancers, 1 man; Royal Artillery, 2 men; 4th Foot, Captain Madden and Lieutenant Boyce, 7 men, 3 women, and 1 child; 28th Foot, 8 men; 31st Foot, Lieutenant Rycroft, 34 men, 1 woman, and 1 child; 33rd Foot, 8 men; 46th Foot, 1 man; 56th Foot, 11 men; 57th Foot, Lieutenant Russell, and 25 men; 64th Foot, 32 men, 1 woman, and 2 children; 72nd Foot, Lieutenant Kildahl and 61 men; 79th Foot, 18 men; 83rd Foot, Captain Meurant, and Lieutenant Onslow, 119 men, 3 women, and 4 children; 95th Foot, 4 men, 1 woman, and 1 child; and Staff-surgeons Mc Gregor and Knox. Total, 9 officers, 338 men, 9 women, and 9 children.

MILITARY OPERATIONS AT CHATHAM GARRISON.—In order to make the troops at Chatham thoroughly efficient in military tactics, the general commanding the district has issued orders to the several officers in command of the various corps at that garrison, directing that the whole of the officers and men shall, on periodical occasions, be formed into a brigade, in order that they may be instructed in the various operations incidental to the advance of an army on a fortified town, so as to prevent the enemy marching out or passing in. With the view of carrying out the proposed operations, the whole force of the garrison, including the 1st, 2nd, and 3rd battalions of Infantry, the Royal and Indian Engineers, the battalion of Royal Marine Light Infantry, and the Royal Engineer Train, numbering several thousand men, are to be marched into the country, when the brigade will be formed into sections, and all the roads leading into the garrison occupied by strong bodies of troops, the elevated spots overlooking the garrison being also occupied by a numerous force. After the troops have taken up their positions, and the line of communication formed, the whole force will march on the garrison by various routes, in order that they may not interfere with the movements of each other. General Eyre has decided that these manœuvres shall be carried out by the troops of the garrison as frequently as opportunities will allow.

FORT PITT MEDICAL SCHOOL.—The first portion of the new medical staff it is proposed to form at Fort Pitt Hospital, Chatham, arrived at that establishment on Thursday last, when twenty-seven medical candidates for commissions in the various branches of the service joined head-quarters, to go through the usual curriculum of instruction previously to receiving commissions in the army. The name of the professor who is to be appointed to preside over the establishment has not yet been announced. The various improvements at Fort Pitt Hospital, together with the additional buildings ordered by the Government to be erected for the accommodation of the increased number of medical officers who are to be attached to the staff at that establishment, have been completed by the contractor, Mr. Stump, from the plans authorized by the Government, the whole of the works having been finished within two months from the date of the order being issued from the War Office. The additional buildings include a commodious army medical lecture theatre, together with dissecting and operating rooms, class-rooms, and other offices, with separate rooms for the use of the professor who is to preside over the establishment. The whole of the works have been completed to the satisfaction of the officers appointed to report on the same, and last week the new buildings were handed over to the Government by the contractor. The site of the new establishments is the open square in front of the principal fort. The following medical officers, being the first portion of the additional staff ordered to be attached to the hospital, have arrived at that establishment previously to being appointed to regiments:—J. L. Power, W. L. Robinson, J. R. Gausson, J. B. Hamilton, W. Cherry, S. E. Maunsell, P. W. Stafford, M. J. E. Fagan, M. J. Burke, R. Waters, E. J. Boulton, T. W. White, B. Austen, F. Fergusson, W. H. Hill, G. E. Will, F. Falwassar, J. J. Chappell, O. Owen, T. Quinlan, J. Stephenson, E. D. Tomlinson, W. Trail, N. Advern, and F. Ashley.

In consequence of the spirited manner in which recruiting has been carried on for some weeks past, and the large number of recruits who have joined the several East India depôts at Chatham garrison, the three battalions of infantry are now very strong, and number considerably more than 4000 men of all ranks, most of them being well-disciplined troops. It is the intention of the authorities not to despatch any more troops to India until the commencement of the summer, by which period the garrison will be able to furnish upwards of 3000 men.

In addition to several improvements which have recently been carried out at Chatham for the comfort of the troops of the Line quartered at that garrison, the Major-General commanding has had the whole of the married non-commissioned officers and soldiers, who, with their wives, formerly occupied the barrack-rooms with the young unmarried soldiers, removed to quarters in the barracks by themselves. This arrangement has given very great satisfaction to the married troops, who can now occupy their several quarters with some regard to decency.

A Board of the Commissioners of Chelsea Hospital assembled yesterday at Chatham, for the inspection of those non-commissioned officers and men of the various cavalry and infantry regiments who have recently arrived, wounded and disabled, at the invalid establishment from India and the colonies.

The authorities at the War-Office have directed the whole of the Government establishments at Chatham and Rochester to be surveyed by a competent surveyor, and their annual value ascertained, in order that an equitable arrangement may be entered into with the parish officers and other public bodies respecting their assessment to the poor and other parochial rates.

MILITARY THEATRICALS AT CHATHAM.—The theatre which we stated a short time since was in course of erection at the Royal Marine Barracks, Chatham, for amateur performances by the officers and men of that division, having been completed, the opening performance took place on Thursday evening last, on which occasion the building was crowded to excess; the pit being reseved for the non-commissioned officers and privates, and the gallery converted into "stalls" for the officers. The building was formerly used as a ball-alley for the officers and men, but Colonel Rea, the present commandant, deeming that it would contribute to the amusement and happiness of the men under his command, if it could be fitted up as a theatre in which amateur performances and interesting exhibitions might be held, obtained the necessary permission of the Admiralty, and the interior has accordingly been metamorphosed into a theatre capable of accommodating upwards of 400 persons. The stage is an exceedingly commodious one, and is fitted up with the necessary scenery, and other theatrical appliances, with foot-lights, and the usual accessories, together with two dressing-rooms. There is also an orchestra in front of the stage in which the band of the division will perform. The opening performance was attended by Colonel Rea, the commandant, Colonel Hunt, second commandant, and a number of the officers of the division, with several ladies. After the National Anthem had been performed, a well-written prologue was spoken by Quartermaster-Sergeant Bolton, in an exceedingly creditable manner. The pieces selected for performance were *Lend me Five Shillings*, and *Done on Both Sides*, the characters in which were sustained by Captain Farmar and several of the non-commissioned officers and privates. Considering that the whole of the actors were amateurs, many of whom had perhaps scarcely seen the footlights before, the performances were exceedingly creditable to all who took part in them, the audience testifying their approval by frequent and vehement applause. Colonel Rea, who has taken the most active interest in the proceedings, has made arrangements for a series of entertainments during the remainder of the winter; and as he is ably seconded by the officers of the division, the attempt to provide harmless and elevating amusement for the men will doubtless prove eminently satisfactory.

The whole of the troops of the Line and Militia in garrison at Portsmouth are undergoing a course of instruction at great-gun drill in the different batteries of the fortifications. Each regiment receives its course of instruction by companies, each company being drilled for six consecutive days by non-commissioned officers of the Royal Artillery. The object sought to be attained is not to render the men practically acquainted with artillery, but to give them a sufficient knowledge of the mode of working guns of position to render them a valuable aid to the regular artillery on any sudden emergency.

The following general order, relative to the Army Reserve has been issued from the Horse Guards by command of the Duke of Cambridge:—"With reference to the Royal warrant, dated War Office, 9th of December, relative to the enrolment of any number of men, not exceeding 20,000, as a reserve force, his Royal Highness the General Commanding-in-Chief desires that commanding officers will be particularly careful, when soldiers, who have the service required by the warrant, express, on being discharged, an intention of entering the reserve force, to insert a note to that effect on their parchment certificates, which will be an authority for the staff officer of pensioners to take the necessary steps for having them attested for that force. A corresponding note is, of course, to be made on the discharge documents."

Mr. W. Williams has given notice that on an early day he will call the attention of the House of Commons to the subject of flogging in the Army and Navy, and that he will move for returns connected therewith.

ROYAL ARSENAL, WOOLWICH.—The old bridge across the canal connecting the arsenal with the practice range in the Plumstead Marshes has been removed, and a strong bridge, with lock-gates on hydraulic principles, has been commenced. The pipes are now being laid down for connecting the apparatus with the hydraulic engine-house, which supplies every department of the arsenal. A new powder magazine on a large scale is now being erected by the contractors, Messrs. Higgs, near the river side, in the marshes; and Messrs. Piper have taken the contract for rebuilding the river wall below the new jetty, the wall having become much injured by the action of the tides.

AN ARMY VETERAN.—Serjeant-Major George Russell, of the Bristol Recruiting District, has just been discharged, after a service of upwards of 41 years. He was through the battles in the Peninsula with the Royals, and has a medal and clasps. He has two regimental medals for forlorn hopes at Badajos and St. Sebastian. He has been wounded in the side, in the head, and right arm at Salamanca and St. Sebastian, and twice wounded at Bayonne, where he was taken prisoner. He was also wounded at Waterloo in the neck and face.

SHORNCLIFF CAMP.

Orders have been received in the Camp for the disembodiment of the "Stirlingshire Militia, or Highland Borderers," in compliance with the orders recently given, in about three weeks from the present time. The "Royal Cheshire," also, are awaiting orders of the like kind. During the time these two regiments have been in the Camp, their uniform good conduct has given satisfaction to the authorities at the Camp, and regret is everywhere expressed that two such regiments, who, on field-days or at drill, have proved themselves the rivals of the best disciplined regiments of the Line, should be broken up. The non-commissioned officers of the Stirlingshire gave a grand ball and supper to the other non-commissioned officers of the regiments in the camp, in the officers' mess of the regiment, in the D Range last week, which was carried out with great *eclât*. The boisterous weather prevailing during the past week prevented the usual march out of the troops on Tuesday last. The enlargement of the camp at Shorncliffe is one of the most interesting topics at present agitating the military

Digitized by Google

here, additional quarters for 10,000 men is spoken of, extending on the north to near the line of the South Eastern Railway, it is also in contemplation to erect a new station at Coolinge for the exclusive use of the military. Contracts for three new reading rooms for the use of the troops in camp are out, and will be commenced forthwith. It is also rumoured that a large number of the horses of the Royal Artillery will in March next be placed under canvas at Romney, while the new works are in progress at Shorncliffe; this we give as an *on dit*, without vouching for the correctness of the statement.

WAR-OFFICE, PALL-MALL, JAN. 24.

2nd Regiment of Dragoon Guards—Cornet Rowland Veitch Betty to be Lieutenant, by purchase, vice Wright, who retires.

5th Dragoon Guards—Charles Ford, Gent., to be Cornet, by purchase, vice Colvin, promoted.

6th Dragoon Guards—Lieutenant Arthur Lautour, from the 3rd Light Dragoons, to be Lieutenant, vice Turner, who exchanges.

3rd Light Dragoons—Lieutenant Thomas Macnaghten Turner, from the 6th Dragoon Guards, to be Lieutenant, vice Lautour, who exchanges.

Military Train—The commission of Lieutenant Isaac Cummin as Adjutant to be antedated to the 25th Oct.

3rd Regiment of Foot—Lieutenant William Henry, to be Captain, by purchase, vice Aplin, who retires; Ensign Dudley George Cary Elwes, to be Lieutenant, by purchase, vice Henry; Ensign William Henry Irving to be Lieutenant, by purchase, vice Leatham, who retires.

15th Foot—Captain William Cairnes Armstrong to be Major, by purchase, vice Brevet-Lieutenant-Colonel Hume, who retires; Lieutenant John Oliphant Kemmis to be Captain, by purchase, vice Armstrong; Ensign George William Hayne to be Lieutenant, by purchase, vice Kemmis.

24th Foot—Lieutenant Richard Archibald Farquharson has been permitted to resign his commission.

43rd Foot—Ensign Arthur Brett Onslow, from the 98th Foot, to be Ensign, vice Morley, appointed to the 15th Light Dragoons.

46th Foot—Lieutenant Edward Hawker Helyar to be Captain, by purchase, vice Hamond, whose promotion, by purchase, as stated in the *Gazette* of the 23rd August, has been cancelled.

84th Foot—William Brodnax Knight, Gent., to be Ensign, by purchase, vice Arkwright, promoted.

85th Foot—Ensign William Henry Urquhart to be Lieutenant, by purchase, vice Fitzgerald, who retires.

87th Foot—Ernest Augustus Dundas Widdrington, Gent., to be Ensign, by purchase, vice Poynter, promoted.

94th Foot—Lieutenant George James Teevan to be Instructor of Musketry, vice Sydenham Malthus, appointed Adjutant.

95th Foot—John French Jordan, Gent., to be Ensign, by purchase, vice Cubitt, promoted.

3rd West India Regiment—The commission of Lieutenant John Moore, as Adjutant, to be antedated to the 11th Jan.

GARRISONS.

Major-General Henry Viscount Melville, K.C.B., to be Governor of Edinburgh Castle.

UNATTACHED.

Lieutenant Francis Williams, from the 55th Foot, to be Captain without purchase.

BREVET.

Brevet-Colonel Randal Rumley, Lieut-Colonel on half-pay Unattached, to have the temporary rank of Major-General, while acting as Vice-President to the Council of Military Education, vice Major-General Cameron, C.B., who resigns that appointment.

Brevet-Colonel Robert Henry Lowth, C.B., retired full-pay 86th Foot, to be Major-General, the rank being honorary only.

Captain Frederick George Pym, of the Royal Marines, to be Major in the Army.

The under-mentioned promotions to take place consequent on the death of Lieutenant-General Chesborough Grant Falconar, Colonel of the 73rd Regiment, on the 10th Jan.:—

Major-General William Thomas Knollys, Colonel of the 62nd Regiment, to be Lieutenant-General.

Brevet-Colonel Thomas Armstrong Drought, Inspecting Field Officer of a Recruiting District, to be Major-General.

Captain and Lieutenant-Colonel Francis William Henry, Earl of Westmorland, C.B., Coldstream Guards, to be Colonel.

Brevet-Major William Mauleverer, Captain, half-pay, 68th Foot, Staff-Officer of Pensioners, to be Lieutenant-Colonel.

Captain Robert Henry Price, 35th Foot, to be Major.

THE WAR OFFICE.

The following circular memorandum has been issued by Sir Benjamin Hawes from the War Office, dated the 18th inst.:—

"With the view to expedite the transit of papers in this office from branch to branch, and from room to room in the same branch, or to the higher authorities, for decision, the Secretary of State has decided that from the 1st of February all papers be passed by hand direct to whomsoever they may be marked, without the intervention of the registry.

"The duty of the registry will, therefore, in this respect, be limited to registering the papers in the first instance to the branch or division which has charge of the business to which they relate.

"If the correspondence, or any other, necessary to be annexed to the newly registered papers, is in possession of the registry, it will be the duty of that division to annex them as now; but if the former papers are in circulation, the registrar will indicate on the newly-registered paper the branch or division to which the previous paper was first sent.

"It will then rest with the branch or division requiring the former papers to take the necessary steps for obtaining them, by application direct to the branch or division to whom the previous paper was first registered, and thence to any other branch to which it may have been subsequently sent, as the registry will no longer have any record of the transit of the papers after their first registry.

"It will be necessary, therefore, that an accurate record book be kept in each division or branch, showing in one column the papers daily received, whether on the first registry or by transit, and, in an adjoining column, the time and manner in which they have been disposed of.

"The boxes hitherto used for the purpose of sending papers from the registry to branches and divisions, and from them back to the registry, will still be continued, but they will only contain the newly-registered papers to the branches, and those returned from the latter to the registry as finally disposed of, to be marked off and put away."

RE-ORGANISATION OF THE INDIAN ARMY.

The following paragraphs of a military letter, from the Secretary of State for India, are published in general orders:

1. I have now to communicate to your lordship that, in reference to the probability that some change in the constitution of the Indian army would result from the report of the Royal Commission appointed to inquire into its organisation, it was decided in December last by Her Majesty's Government that all future appointments of cadets should be made subject to any alteration that may be decided upon.

2. A copy of the form adopted for this purpose is forwarded for your information.

3. A distinction should now be made in the disposal in India of the young officers so appointed, and of those who received their appointments on the same terms as cadets of the late East India Company's service.

4. A nominal roll of the cadets appointed under the new condition is forwarded for your information. You are desired to place these officers on separate general lists of cavalry and infantry, and should any of them have been already posted to regiments or even promoted to the rank of lieutenant, their posting is to be cancelled, and they are to be transferred with their present rank to the general lists on which they will stand according to the dates of their respective commissions.

5. The promotion of these young officers will be for the present regulated as follows:—For every vacancy in the rank of lieutenant in a regiment of cavalry or infantry, where there is no cornet or ensign who was appointed on the old conditions, the senior cornet or ensign of the general lists will be promoted to the rank of lieutenant, provided that he shall have served in India not less than one year.

6. These officers may be attached to regimental duty to any of the effective corps of the local army or to line regiments at the discretion of the Commander-in-Chief.

7. The young officers of artillery and engineers who may have been appointed to Addiscombe under the same conditions will not be, on their arrival in India, placed on separate lists, but will have a distinguishing mark entered against their names on the regimental lists.

8. Instructions similar to the above will be communicated to the governments of Madras and Bombay.

THE STAFF COLLEGE.

We insert the following order lately issued:

"Horse Guards, S.W., Jan. 12.

"The under-mentioned officers have passed the examination for admission to the Senior Division of the Staff College; for a residence of one year only, under paragraph 13 of the Staff College regulations, dated Dec. 17, 1857, viz.:—1. Captain the Hon. W. Fielding, Coldstream Guards, 1416 marks; 2. Brevet-Major W. Hartman, half-pay, 1327 marks; 3. Captain N. Goddard, 17th Foot, 1206 marks.

"By order of his Royal Highness the General Commanding-in-Chief,

"G. A. WETHERALL, Adjutant-General."

"Horse Guards, S.W., Jan. 13.

"The subjoined supplementary list of officers who were successful at the examination for admission to the Staff College for the full period of two years, is published with reference to the General Order, dated November 29, 1859, their examination papers not having been received from India in time to admit of their names being included in the list published on that date, viz:—

"2. Captain R. A. Leggett, 69th Regiment, 1879 marks, passed in place of Captain Lake, 100th Regiment, who has withdrawn; 11. Lieutenant W. R. Lluellyn, Royal Artillery, 1595 marks, qualified, but there is no vacancy for a 4th officer of the Ordnance Corps.

"By order of his Royal Highness the General Commanding-in-Chief,

"G. A. WETHERALL, Adjutant-General."

"Horse Guards, S.W., Jan. 14.

"His Royal Highness the General Commanding-in-Chief has much satisfaction in publishing to the army the subjoined list of officers who passed the final examination at the Staff College, in December, 1859, viz.:—1. Captain W. Congreve, 4th Foot, 3730 marks; 2. Captain A. Gammell, 16th Foot, 3165 marks; 3. Captain E. M. Jones, 20th Foot, 2949 marks; 4. Captain H. B. Coathupe, 72nd Foot, 2707 marks; 5. Captain W. Palliser, 18th Hussars, 2595 marks; 6. Captain A. C. Bruce, 91st Regiment, 2555 marks; 7. Captain P. A. A. Twynam, 15th Regiment, 2523 marks; 8. Captain W. Heywood, 14th Regiment, 2458 marks; 9. Captain P. W. Jebb, 67th Regiment, 2289 marks; 10. Captain J. C. Weir, 2nd Regiment, 2191 marks.

"By order of his Royal Highness the General Commanding-in-Chief,

"G. A. WETHERALL, Adjutant-General."

SUBALTERNS' PAY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Would you kindly permit me, through the medium of your valuable paper, to say a word or two in behalf of myself and brother subalterns. An ensign receives as pay 5*s.* 3*d.* per diem, amounting to the sum of 95*l.* 16*s.* 3*d.* 5*s.* 3*d.* per diem, amounting to the sum of 95*l.* 16*s.* 3*d.* annually. Out of this he is obliged to pay about 40*l.* for his dinner alone; and, allowing 1*s.* 6*d.* per diem for other meals, there remains about 24*l.* From this again, deduct washing, mess, and band subscription, and certain other regimental contributions and subscriptions which, though voluntary, are so much considered a matter of course, as to leave little option to the officer as to the payment, there remains about 10*l.* to clothe himself with. Why should the pay of a third-class clerk in the War Office exceed that of a major in the infantry of the line? Why should a purveyor's clerk receive 10*s.* 6*d.* a day, and an ensign only half that sum? Is it right that an officer should serve his country, and perhaps shed his blood in its behalf for the miserable sum of 5*s.* 3*d.* a day, while a third-class clerk sits securely at his desk in the War Office, and earns three times as much? Moreover, the clerk is not subjected to the expensive mode of living necessarily adopted in the British army. Mr. Fox Maule, in moving the army estimates in the House of Commons in 1850-51, said, "His experience had always been that the British officers were the *worst paid and the hardest working* class of public servants that he knew of." Is not this true? We have to deny ourselves the comforts to obtain the necessaries of life, and to clothe ourselves as gentlemen.

The authorities might lighten our expenses by providing an iron bedstead and a chest of drawers in every officer's barrack-room.

Trusting that this will not be a trespass on your space, I remain your obedient servant, A POOR SUB.

PRACTICE WITH RIFLE-BOLTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Lord Ranelagh this day fired one of my rifle-bolts from a Lancaster military rifle into a plank of wood, having a sheet of white paper placed over it, in order to prove by the circular perforation in it that the bolt, although in length three diameters of the bore of the rifle, struck the object point or front foremost. This bolt was cast in a mould made of a section of the barrel. The wooden or paste-board jacket being first wedged into its proper position, the molten lead is then poured in, forming the front part and protecting disc at the base of the bolt. The wooden or pasteboard jacket alone rests on the interior of the barrel, so that leading—that "plague-spot" in rifle-shooting—is altogether prevented. My principal object is to prove that iron or steel bolts, covered in the centre with such jackets, may be used from large cannon rifled on the Lancaster principle, and that they would pierce plates of iron four inches and a half thick. For I am of opinion that the failure of Lancaster's cannon did not result from any defect in the rifling, but solely from the malformation of his shot and shell. When I use iron or steel bolts I have a small open chamber in front. This chamber is blocked by a plug cut out of the plank fired into, thus proving that the bolt struck point foremost.

I am your obedient servant, J. NORTON.

THE COMING OPERATIONS IN CHINA.—The following is an extract of a letter dated Hong Kong, November 30: "Reports from the north, and rumours from the south, tell us the Chinese are obtaining guns from various sources, which are conveyed to their destination in junks and Siamese vessels, and that they are preparing to the utmost of their means for a vigorous struggle. Contributions of money, some of which are very considerable, are being made to the government by all the nobility and gentry throughout the empire. The governors of the southern provinces are collecting and forwarding to the capital all the rice and grain that can be spared. They know and feel that our next campaign must be a decisive one; that in addition to taking vengeance for the loss of so many of our 'braves' at the mouth of the Pehio last summer, the commercial relations of all civilised nations with the Celestial Empire must be arranged on a far more liberal basis than has existed hitherto, and their representatives placed in a position giving them the power to maintain them."

Late accounts from the Punjaub say that Captain Mecham's murder is to be avenged on the Wuzerees, as the chief will not give up the murderers. At present an "expeditionary" force, mainly composed of Guides and Beloochies, under Brigadier Chamberlain, C.B., is all that is to operate. A party of sappers were to proceed on the 7th December, under Captain Pollard, and two 9-pounders accompany the force, with elephants, &c. Kohat and the adjacent country will be the scene of exploration, with a view to a larger force taking the field in April if the present movement prove insufficient.

General Sir De Lacy Evans has given notice, for an early day, of his intention to move an address to the Queen, for the abolition of the system of sale and purchase of commissions, due regard being had to existing interests.

The last Bombay mail acquaints us with some of the concluding incidents of the great mutiny. It appears that Jung Bahadoor was determined not to encounter a body of robust and well-accoutred men, as the rebels were when they first entered the Nepaulese jungles; he waited until starvation and disease had reduced them numerically and physically, and then he had no very arduous task to perform. Jung headed his Goorkhas, which consisted of four brigades of four regiments of 550 men each, and swept the jungles from east to west, capturing, killing, and sending into the British camp, at Dhukheree, hundreds of the sepoys. On the 5th inst., a party of the 9th Punjaub Infantry escorted into the English camp 342 of the rebels, who are described as being in a most wretched condition, covered with sores, and many of them suffering from fever, but, strange to say, with a vast amount of money. On the 7th, 750 more rebels were escorted to the camp, and on the 8th, 300 more, the most of whom are wretched-looking villains. Besides these a number of the leaders have surrendered, among whom is Ummer Sing, the brother of Kooer Sing of Arrah; Mummo Khan, who is always called the Begum's paramour; and Khan Bahadoor Khan, who are prisoners in Lucknow; the second in command to Nana Sahib, commonly known as Lord Sahib; Boondoo Sing, late subadar of the 7th Bengal Native Infantry; besides several others of more or less distinction. Among the killed are Beni Madho and his brother. It is rumoured that Sir Jung Bahadoor is imposing terms to the British authorities, by offering to give up the Begum herself, if they would guarantee the payment of 10,000 rupees per month for her maintenance.

THE NAVY.

ADMIRALTY, JAN. 21.—PROMOTIONS.—Lieutenants G. T. S. Winthrop (1846), F. W. Thomas (1841), and W. Lyons (1825), promoted to the rank of commanders.

JAN. 23.—APPOINTMENTS.—Acting Third-Class Assistant-Engineer W. A. Stewart to the Asia, 84, guard-ship of ordinary, at Portsmouth, as supernumerary.

APPOINTMENTS.—Acting Third-Class Assistant-Engineers J. Symonds, to the Wellington, 72, guard-ship of ordinary, at Devonport, for service in the Sheldrake, gun-boat; and W. Green, to the Rhadamanthus, 4, paddle-wheel steam-vessel, at Woolwich, as supernumerary.

JAN. 24.—PROMOTION.—Engineer F. T. Pendleton is promoted to Second-Class Engineer in the Greyhound, 17, screw steam-sloop, at Devonport.

APPOINTMENTS.—Lieutenants R. H. M. Molyneux (1859) to the St. Jean d'Acre, 101, screw steam-ship, Mediterranean station; C. J. Rowley (1852) to the Nile, 90, screw steam flag-ship, at Devonport; C. Jenkins (1859) and A. Markham to the Emerald, 51, screw steam-frigate, with the Channel squadron.

Assistant-Surgeon W. J. Lewis (1854) to the Nile.

Assistant-Paymaster H. M. D. Wilson (1859) to the Nile.

Master's Assistant J. F. Barnes to the Promethus, 5, paddle-wheel steam-sloop, at Woolwich.

Assistant-Clerk H. J. Gardner to be additional to the Nile.

JAN. 25.—APPOINTMENTS.—Commanders G. H. Parkin (1859) to the Hannibal, 91, screw steam flag-ship, Mediterranean station; C. W. Buckley (1856) to the Forte, 51, screw steam-frigate, at Sheerness; and V. Baker (1849) to the Orion, 91, screw steam-ship, Mediterranean station.

Lieutenant H. T. Gammell (1852) to the Wellington, 72, guard-ship of ordinary, at Devonport.

Master H. T. Ellis (1848) to the Cæsar, 90, screw steam-ship, Mediterranean station.

Second Masters W. F. Rowe to the Banshee, 2, paddle-wheel steam-vessel, Mediterranean station; and E. Hinvest to the Perseverance, 2, screw steam troop-ship, for particular service.

Paymaster G. Shambler (1851) to be additional to the Castor, 36, at Chatham.

Midshipman F. R. H. Yorke to the Emerald.

JAN. 26.—APPOINTMENTS.—Captain E. W. Turnour (1857) to the Forte, commissioned.

Lieutenants E. J. Squire (1855) and E. H. Wilkinson (1856) to the Forte.

Master F. H. Mory (1844) to the Forte.

Chief-Engineer T. T. Murray (1852) to the Cumberland, 70, at Sheerness, for charge of the machinery of the Rodney, 90, screw steam-ship, at Chatham.

Surgeon J. J. Crawford, M.D. (1843), to the Forte.

Assistant-Surgeon P. W. Wallace, M.D. (1854) to be additional to the Ganges, 84, flag-ship, Pacific station.

Acting Assistant-Surgeon J. P. Courtenay to the Satellite, 21, screw steam-corvette, Pacific station.

Naval Cadets the Hon. E. H. Ellis to the Emerald, and A. J. O'Rorke, to the Forte.

Alecto, paddle-sloop, which has recently undergone extensive repairs, has been placed under the hands of the riggers, to be got ready for service with all despatch. She is to be commissioned by Commander Raby, late of the Weser, which has been put out of commission as unserviceable.

Cæsar, 90, Captain T. H. Mason, at Gibraltar, rode out a severe gale lately with three anchors down in the Bay, and steam up, so as to be prepared for any contingency. Two days were occupied in clearing the cables, which were much twisted by the storm. While superintending this duty, the master, Mr. Brehaut, received a fracture of the leg, and was conveyed ashore to the hospital. It is stated that the condition of the boilers of the Cæsar will not admit of her continuing on a foreign station twelve months longer.

Chesapeake, 51. Lieutenant John P. F. Grant, belonging to the screw steam coast-guard ship, Ajax, 60, Captain John M'Boyd, has been appointed additional Lieutenant to the screw steam-frigate, Chesapeake, 51, Rear-Admiral James Hope, C.B., on the China station. Lieutenant Grant goes out passenger from Woolwich in the hired steam-transport, Khersonese.

Duncan, 101, screw, in the steam-basin at Portsmouth, has her screw shafting in, and the whole of her boilers on board and fixed in their respective positions. The remainder of the machinery has not yet been received from the contractors.

Emerald, 51, Captain Cumming, is being fitted up for the conveyance of Rear-Admiral Sir A. Milne to the West Indies.

Espoir, 5, screw, recently launched at Pembroke, is being rapidly rigged as a three-masted schooner, and will shortly be ready to leave for Devonport. She is to carry a pivot gun 10 feet long, 68-pounder, and 4 howitzers.

Greyhound, 17, Commander Sullivan, went out for a trial of her machinery last week, and after a successful trip anchored in Plymouth Sound. She saluted the flag of Admiral Sir Barrington Reynolds, the commander-in-chief at the port.

Harpy, iron steam-vessel, is ordered to be got ready forthwith for the Coast-Guard Service in Scotland.

Howe, 131. The greatest activity still exists in order to complete this fine ship within the present financial year. All the different trades are working extra hours upon her.

Immortalité, 51, screw, although a new ship, having been built at Pembroke in 1858, is now in No. 7 dock at Portsmouth, and in need of repairs. She has some defects in her keel, and her garboard planking is rotten. This fine frigate is a sister ship to the Emerald and Melpomene, and was built after plans by Sir Baldwin Walker. She has never had her engines (600 horse power) on board, and although her defects are not considered serious, yet, having been constructed so recently, her present state can hardly be considered satisfactory. Some allowance must be made, however, for the very rapid manner in which the Navy has been increased, and the demands for seasoned timber has been so pressing that the stock in our yards has never been known so low as at the present moment.

Melpomene, 51, screw, Captain Charles J. F. Ewart, forms one of the Channel Fleet at Portland.

Mersey, 40, screw, Captain Caldwell, C.B., got under way this week at Spithead, for the purpose of testing Griffiths's patent screw-propeller, but she merely took a few turns through the roadstead, and again picked up her moorings, the weather being too boisterous to admit of anything like a trial in Stokes Bay.

Nile, 90, Captain Arthur P. E. Wilmot, C.B., at Devonport, the repairs are progressing satisfactorily. She is to be supplied with a new rudder and stern walk, and will be caulked inside and out; the copper has been stripped off at the water line. While superintending the lowering of a pinnace belonging to the Nile, down the slip at the dockyard comber, on Wednesday, Commander Mackenzie had his leg broken. It appeared that the lowering rope was veered round a bollard, to the end of which the man in charge held on. The tide, however, was so low, that when the pinnace fell over the brow of the slip, the hook was, by the sudden fall, disengaged, and, flying round, struck Commander Mackenzie on the leg and broke it. He was immediately conveyed to the dockyard surgery, and after being examined by Staff-Surgeon Mr. William Folds, was, accompanied by that officer, carried to the Royal Naval Hospital.

Orion, 90, is ordered to Malta.

Perseverance, screw troop-ship, Commander E. R. Power, has embarked troops for Corfu.

Prince of Wales, 131. The launching of the Prince of Wales took place at Portsmouth on Wednesday with the most complete success, in the presence of some thousands of people who had assembled on every point whence a view of the proceedings could be obtained. On the platform erected under the bows of the vessel were—Admiral W. Bowles, C.B., Rear-Admiral the Hon. G. Grey, with Flag-Lieutenants Robinson and Swinburn; Captains Farquhar and Hamilton; Commanders his Serene Highness the Prince of Leiningen, Cator, &c.; her Serene Highness the Princess of Leiningen and Miss Bowles; his Serene Highness Prince Edward of Saxe Weimar, &c. At 12·25 the master-builder, Mr. Abethell, placed the bottle of wine, suspended in the usual manner, in the hands of the Princess of Leiningen, who broke it against the ship's bows amid the cheering of all present, and the ceremony of christening the Prince of Wales was complete. The workmen immediately commenced splitting away the blocks remaining under the ship's keel, and at 12·30 the cord being cut which held the pigs of ballast, these descended in their channels, and liberated the vessel from the dogshores. A few minutes more and she began to move, gliding easily into the water, accompanied by cheering from the crowd, and the strains of the National Anthem from the Victory's band. The ship was no sooner clear of the shed under which she had been constructed, than flag-staffs rose as if by magic from her decks, displaying the Royal Standard, the Admiralty Ensign, and the Union Jack. A bower anchor checked her further progress astern, and being taken in tow by steam-tugs she was berthed alongside the Victorious hulk in the harbour. She will be placed in the steam-basin next spring tides, for the purposes of docking and receiving her machinery, &c. The Prince of Wales was laid down on the 10th of June, 1848, from designs approved by the then Surveyor of the Navy, Sir William Symonds, and intended for a sailing three-decker. It was, however, subsequently determined that, with several others then on the stocks, she should undergo considerable alterations, necessary to adapt her to the "screw;" and for this purpose she was cut asunder amidships and lengthened about 50 feet; her stern was also lengthened as much as was necessary to enable her to receive her outer stern-post for her screw-shafting and rudder. The figure-head of the ship is a bust of his Royal Highness the Prince of Wales, and has been executed by Messrs. Hellyer, of Cosham and Southampton. The following are her principal dimensions, description of armament, engines, &c.:—Length, extreme, 292 feet, 1 inch; Ditto, between perpendiculars, 252 feet; Ditto, keel for tonnage, 213 feet, 3⅜ inches; Breadth, extreme, 60 feet, 2 inches; Ditto, for tonnage, 59 feet, 4 inches; Ditto moulded, 58 feet, 6 inches; Depth in hold, 25 feet, 6½ inches; Height of figure-head from keel, 60 feet, 9 inches; Ditto of taffrail from keel, 64 feet, 9 inches; Burden in tons, 3994. Her propelling power consists of a pair of 400-horse power (nominal) trunk engines, by Messrs. Penn and Sons. Armament: Upper Deck—1 68-pounder, 95cwt., pivot gun, 10 feet long, and 20 32-pounders, 25cwt., 6 feet long. Main Deck—38 32-pounders, 42cwt., 8 feet long. Middle Deck—30 32-pounders, 56cwt., 9 feet 6 inches long, and 6 8-inch guns, 65cwt., 9 feet long. Lower Deck—26 32-pounders, 56cwt., 9 feet 6 inches long, and 10 8-inch guns, 65cwt., 9 feet long.

Princess Royal, 91, screw, was built at Portsmouth, in 1853, upon the same plans as the Algiers. She was first designed as a sailing-ship, but afterwards lengthened and converted into a screw-ship by Sir Baldwin Walker. She was fitted with new engines of 400 horse-power by Maudslay, was commissioned in 1856, and went to the Mediterranean, from whence she returned at the end of last year. This is the only commission this ship has had, and yet the whole of her stern planking has been removed in consequence of being unsound; indeed, her timbers are suspected of being rotten. A number of hands are at work upon her.

Prometheus, 5, paddle, Commander Skipwith, is making good defects at Devonport, and has drawn charts for the Cape of Good Hope and the West Coast of Africa, where she will join the squadron under Rear-Admiral Grey.

Retribution, Commander Edgell, C.B., arrived in Bombay harbour on the night of Wednesday, 21st Dec., from Point de Galle, which port she left on the 16th.

Revenge, 90. Topgallantmasts were sent up on Tuesday at Plymouth.

Rhadamanthus, steam store-ship, Master-Commander Sturdee, arrived at Portsmouth on Thursday from Woolwich, with boilers and machinery for the Sutlej, 50, screw steamer, and a number of supernumeraries from the Fisgard.

Royal Albert, 121. The measles have broken out among he crew. Several officers and men have been sent ashore to the Naval Hospital at Plymouth.

Royal Frederick, 91, screw, nearly complete for launching in No. 2 shed at Portsmouth, has had her name changed to the Frederick William, in compliment to his Royal Highness Prince Frederick William of Prussia.

Sprightly, 2, paddle, Master-Commander George Allen, sailed from Portsmouth on Wednesday for Devonport, having on board Mr. Secretary Frederick J. Fegen, who has been appointed secretary to Rear-Admiral Sir Alexander Milne, K.C.B., who succeeds Sir Houston Stewart in command of the West India station.

Supply, 3, Master W. H. Balliston, having received a supply of fuel, left Devonport for the Mediterranean on Thursday.

Victoria, 121, screw, in the steam-basin at Portsmouth, has her boilers fixed, and her cylinders, with the greater part of her machinery, on board.

Virago, 6, Commander Montagu B. Dunn, left Plymouth Sound on Tuesday afternoon, with supernumeraries for the fleet at Portland.

Wanderer, 4, 200 horse-power, Commander Mark R. Pechell, which was paid off at Chatham on Thursday, has been in commission upwards of four years, having been commissioned at Chatham by Captain J. P. Luce in the latter part of 1855. During the whole time she has been absent from England she has been cruising in the Mediterranean, where she was employed as a despatch vessel, cruising chiefly between Gibraltar, Malta, Corfu, Athens, Constantinople, and in the Black Sea. In February, 1858, Captain Luce, on being posted, was succeeded by Commander Pechell, who has held the command ever since. The crew, generally, have been very healthy, and there has been but a small number of deaths on board from sickness during the time the Wanderer has been in commission. In the month of February, 1859, an accident happened off the mouth of the Danube, by the upsetting of one of the ship's boats, in which five seamen were lost. During the whole time the ship has been in commission there have only been two cases of corporal punishment. Before the ship was paid off Commander Pechell mustered the whole of the petty officers and the crew, and addressed a few words to each on their general character and conduct. The following first-class petty officers were awarded gratuities by the Admiralty for long service and good conduct:—E. Bird, carpenter's coxswain; R. Keast, chief boatswain's mate, and T. Allman, blacksmith; J. Browning, sail-maker's mate, one of the second-class petty officers, was also awarded the gratuity. Most of the crew are continuous service men, and these have been granted six weeks' run ashore, after which they will join the guard-ships at Chatham, Portsmouth, or one of the naval ports. The Wanderer is to be thoroughly overhauled and repaired at Chatham, after which she will be attached to the steam-reserve, in readiness to be re-commissioned.

Weser, Commander J. Raby, brought back to Woolwich, in consequence of the discovery of her being inapplicable for her appointed voyage to La Plata, was on Thursday put out of commission, the whole of the available officers and crew being tranferred to the steam-sloop Alecto. Her stores have been returned to the depôt, and information has been received of her six guns having been landed at La Plata, whither they were despatched with a view of rendering her voyage less perilous.

The steam screw-transport, Khersonese, No. 8, on Thursday terminated the shipment of her cargo of 2000 tons of war stores for China, and left Woolwich yesterday to load her powder and to be adjusted for sea at Greenhithe. Captain Hurst, late of the Golden Fleece, has been appointed to the command. The Khersonese is now the property of Mr. Pearson of Hull, the purchase having been effected on Friday last, and the contract transferred from Mr. Duncan, her late owner.

Notices were posted at Woolwich dockyard on Thursday respecting the entry and promotion of artificers and labourers. They declare that no person will be eligible for entry whose age exceeds 35 years; and certificate of character will also be required. Every candidate, before entry, will be tested in the use of his tools. He must also be examined by the surgeon of the yard, and pronounced fit for service. On first entry to the establishment, all men will be required to serve one month on probation; and if, at the end of that period, they shall have proved themselves competent, to the satisfaction of the superintendent, their appointment will be confirmed. In filling up vacancies in the establishment preference will be given to hired men in the yard, who are of good character and ability. As regards promotions an examination is required of every candidate. Their Lordships will select from the examination list, on the recommendation of the officers, those who are considered to be the best qualified. The claims of those who appear at the head of the examination list will be duly considered, but industry, merit, and practical qualifications, will also have their weight in guiding the selections. Applications must not be made by persons serving in the dockyards, except through their superiars. Any attempt to obtain promotion by political or other indirect influence will be punished,—for a first offence, by reprimand; for a second offence, by a reduction to an inferior situation; and for a third offence, by dismissal from the service.

A series of experiments were carried out on Tuesday evening at the factory department of the Woolwich Dockyard, in the presence of Commodore-Superintendent the Hon. J. R. Drummond, Commander Hawker of the Fisgard flag-ship, Commanders Petley of the Black Eagle, Allen of the Vivid, and other officers, for the purpose of testing the efficiency of the improved ocean telegraphic signal-lights, invented by Mr. William Henry Ward, of Auburn, United States, who attended to explain his simplified code of instructions. The apparatus consists of five strong lights arranged in the form of a cross, and the signals representing letters or numbers are made by means of red and blue glass shades, which are shifted in front of the lights at the will of the operator. The experiments were considered highly satisfactory, and will be reported on to the Admiralty.

The greatest activity still prevails in Portsmouth Dockyard. There are at the present time about 8000 men employed in that establishment, or more than double the permanent staff, and the sum paid weekly in wages amounts to no less than 9000*l*. A more correct idea of the vast

Digitized by Google

increase of labour here may be formed if we state that prior to the Russian war the average payment was only 3000*l.* per week, and it did not throughout that war exceed 5000*l.*, or 4000*l.* less than at the present time.

Fifty continuous service able-bodied seamen, in addition to 100 forwarded last week, from the crews of the Princess Royal, Centurion, and Conqueror, left the receiving-ship Fisgard, at Woolwich, for Plymouth, and a further batch of 100 will leave in a few days for the same destination, probably in the troop-ship Dee, Master-Commander Thomas Pullen.

It is intended to form a naval brigade for service in China, composed of seamen now in Calcutta. This measure will relieve the streets of Calcutta by removing a body of lawless disorderly men, who are at once the prey and the tyrants of the native crimps and vagabonds of all sorts, to a scene of action where their good qualities will be turned to account.

Lieutenant Basil Hall has received his appointment as Flag-Lieutenant to Rear-Admiral Sir Alexander Milne, K.C.B., Commander-in-Chief on the North America and West India station.

Lieut. William D. Harris (1848) died suddenly at Jersey on the 16th inst., aged 35.

Paymaster Charles E. Colman (1849), of her Majesty's ship Edinburgh, died on the 20th instant, aged 42.

The first of the competitive examinations by the Civil Service Commissioners of the candidates for apprenticeship in Chatham dockyard took place at that establishment on Tuesday, when, in addition to the candidates from Chatham, a number of candidates for admission into Sheerness dockyard attended to undergo the examination. The Lords of the Admiralty have decided that these examinations shall be held periodically by the Civil Service Commissioners.

It is said that the Honourable Albert Denison, R.N., second son of the late Lord Londesborough, will be nominated to the vacant seat for Scarborough.

CHATHAM DOCKYARD.—The Lords of the Admiralty have directed a list to be prepared of the names and rank of the whole of the officers and men in this dockyard showing their length of service, and the time they have held their various appointments; the object of the return being, it is understood, to enable their lordships to select the most competent men to fill any vacancies occurring in the various departments. A considerable degree of activity continues to prevail in the shipbuilding department; and all the vessels on the stocks have numerous bodies of shipwrights employed on them to hasten forward their completion. The Atlas, 91, screw-steamer, is a noble specimen of naval architecture, and already gives signs of being completed in a very short period. The Bulwark, 91, line-of-battle screw-steamer, a sister ship to the Atlas, is also progressing, and will be fit to be launched soon after the Atlas. The splendid frigate Undaunted, 51, screw, attracts much interest during her progress, as she promises to be one of the finest vessels of her class of any navy in the world. In addition to the vessels enumerated, there are several other ships also in progress, all of which are in a more or less forward state.

MANNING THE NAVY.—A conversation upon this subject took place in the House of Commons on Thursday Evening, on the occasion of Sir Charles Napier moving for returns of the number of men who entered under the bounty proclamation, and of the number who have since deserted, distinguishing those who entered under the bounty and those who did not so enter; of the total number of men who deserted during the year immediately preceding the time of the proclamation; of the number of men who have enrolled themselves in the Royal Naval Reserve Corps; of the number of men now serving who have completed ten and fifteen years' service, distinguishing each; and of the number of men not serving who received the short-service pension, and the number of men not serving who are entitled to the short-service pension, but who have not claimed it. He said he was told there was some objection to the granting of these returns, on account of the difficulty and expense of them. He thought, however, that when the House had voted a sum of money for a particular purpose, they ought to know how far the expenditure had been efficacious. Lord C. Paget appealed to his hon. and gallant friend not to press this motion. To procure this return would be attended with considerable trouble and expense. With regard to the number of men who had entered, there would be no difficulty, but, in order to ascertain the number who had entered under the bounty, and had since deserted, it would be necessary to send out to China and other distant stations in order to procure the requisite information. There would be no difficulty in granting a return of the number of men who had enrolled themselves in the Royal Navy Reserve Corps, and of the number of men now serving who had completed 10 and 15 years' service; but the other questions would have to be referred to the home and out stations. They could not give the number of men not serving who were entitled to pensions; they had no record of them. These men had left the service and had not claimed the pension. A return, which the hon. and gallant admiral asked for in June, 1858, in reference to deserters, caused the employment of six clerks for six months, at a cost of not less than 500*l.* Sir C. Napier expressed his surprise that the number of deserters could not be given from the two-monthly returns which were sent to the Admiralty from every station; and the Admiralty ought to know the number who were entitled to pension, or how could they prepare the estimates? The motion was then negatived without a division.

THE COAST-GUARD.—Inspecting Chief Officer Mr. George H. Loveridge, Master, has been removed from Greencastle to Westport vice Willcox.

WRECKS ON THE LANCASHIRE COAST. — IMPORTANT LIFE-BOAT SERVICES.—FLEETWOOD, 23rd JAN.—At 6 P.M. last evening, a schooner was observed ashore about 4½ miles N.E. of Fleetwood. A heavy gale was blowing from W.N.W., with a high and dangerous sea. The Fleetwood life-boat, belonging to the National Life-Boat Institution, was immediately dispatched by Captain Wasey, R.N., Inspecting Commander of Coast-guard, and reached the wreck at 8·50 P.M. On nearing the wreck a heavy sea broke over and nearly filled the boat, at the same time breaking two of her oars. The boat's anchor was let go, and an attempt made to get the crew off from to windward by lines thrown to them, but, the tide sweeping past at the rate of five or six miles an hour, prevented success. Efforts were then made to close the vessel to leeward, but ineffectually, as the vessel fell over on her beam-ends, her masts nearly falling on the life-boat. The boat was then again anchored to windward, and veered down until nearly touching the wreck, and lines and a life-buoy were thrown to the crew, and one line fastened to the vessel. One man was thus successfully got into the boat, but the remainder, three in number, appeared unable to avail themselves of the help offered to them, or feared to throw themselves over the vessel's side. A heavy sea at that moment broke over the wreck and the life-boat, and the latter was carried some 300 yards to leeward of the ship. On once more regaining the vessel, sad to relate, the men had all disappeared. The man saved stated that the master had injured his back, and the boy had had both his legs broken, which might have prevented their profiting by the aid so close at hand. After these gallant and persevering efforts the life-boat returned to Fleetwood, where she arrived at half-past two this morning. She was in charge of her coxswain, John Fox, chief boatman of coast-guard. The wrecked vessel was the Ann Mitchell, of Montrose, from Sligo, with a cargo of oats to Liverpool. At 7 A.M. the services of the life-boat were again in requisition, a vessel being observed by the coast-guard on the Shell Wharf Flats, six miles west of Fleetwood, the wind still blowing a heavy gale, with a very high, broken sea. The life-boat was this time taken in tow by the harbour steam-tug. When about a mile from the vessel the latter was seen to be foundered, but men were observed on the part of her foremast which remained above water. At 10 o'clock the life-boat cast off from the steamer, and made two unsuccessful attempts to take the wrecked men off, but drifting to leeward, had again to be towed to windward by the steamer, and veering down from her, fortunately succeeded in taking off the whole crew, consisting of the master and mate and two boys, who were safely landed at Fleetwood soon after noon. The vessel proved to be the Jane Roper, from Ardrossan, laden with pig iron for Morecombe, master, Wm. Harris. The life-boat's crew will be rewarded for their gallant services by the National Life-Boat Institution.

THORPE, SUFFOLK.—TUESDAY NIGHT.—At break of day this morning the life-boat of the Royal National Life-Boat Institution stationed at this place, was instrumental during a very heavy gale of wind in saving three out of eight of the crew of the brig Pallas, of Shields, which had struck in the night on Sizewell Bank. The master and four of the men had previously taken to the ship's boat, and were unfortunately drowned. The life-boat in the tremendous sea behaved nobly.

CAPTAINS, ON THE RESERVED LIST.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In this free country the Press is ever ready to notice the claims of those who have just reason to complain official harshness or neglect, and it is with that view that I request your attention to the case of the Captains on the Reserved List.

These officers (many of whom had served in the wars of 1793 and 1803, and had considerable claims for promotion as men who had been tugging at the labouring oar, and by their untiring efforts as first lieutenants of ships of the line, commanders, &c., to maintain that discipline which recent events prove to be so necessary for the order and efficiency of the fleet) were promoted by an Order in Council dated June, 1851, of which the following is an extract:

"While my Lords have recommended the abandonment of the system of Brevet-Promotion in future, they are nevertheless desirous of meeting the claims of old officers, who have served long and well, and who seek their promotion rather as a reward for past services than in the expectation of future employment. To meet these claims equitably, and at the same time not to fill the active list with officers who cannot long continue fit for service, their Lordships will promote by selection 50 commanders to the rank of captains, &c."

Looking at the wording of the order the officers accepted it with the full understanding that it carried with it every advantage enjoyed by their brother officers on the Active List, excepting service afloat. You will judge therefore of their surprise and mortification when the seniors reached that position on the list which entitled them to claim 12*s.* 6*d.* a day, that they were coolly informed "no provision had been made for any future award of half-pay beyond the amount you at present severally receive."

Now, when it is remembered that this Order in Council abolished "Brevet promotions," which in 1841 and 1846, and on many previous occasions, had given to many old and meritorious commanders their post rank, and that this Reserved rank was intended as a substitute for such Brevets, it will be admitted that these officers have a right to complain that in the estimation of the Admiralty *sixpence* a-day is considered a sufficient reward for services which they have themselves referred to as "long and good." As a proof of the claims of these veterans for some additional remuneration, I will notice briefly the services of the first six as they appear on the Navy List, as a fair sample of the claims of the remaining ninety-four, and having so done I feel assured you will lend them your aid in bringing to the notice of Parliament, and of the country, the claims of those whose services are not surpassed by any of their brother officers on the Navy List.

1. James Gabriel Gordon—entered the Navy 1801—commanded the barge of the Illustrious at the cutting out of a brig from Vivero Harbour, and was present at the attack on the French fleet in Aix Roads,—commanded a gun-boat on the Walcheren expedition when he was severely wounded—was present at the capture of two French frigates, and also at the capture of Guadeloupe—assisted at the passage of the Gironde, as flag-lieutenant under Admiral Penrose; served as commander of the Ordinary at Sheerness from 1827 to 1830 —and also was in command of H.M.S. Ocean from 1846 to 1849.

2. George Bignell—entered the Navy 1795—served as acting-lieutenant of the London—commanded a boat at the battle of Copenhagen, and was instrumental in the destruction of the Danish shipping—was afterwards appointed to the Spartiate, in which vessel he served at Trafalgar, and was employed in guarding the coast of Sicily, and in the reduction of the islands Ischia and Procida—in 1809 he was appointed to the Formidable—in 1812 to the Dover, troop-ship, in the boats of which he retook a schooner off Newfoundland. He afterwards volunteered his services on the Canadian Lakes, and while in command of the Hunter, participated with a flotilla under Commodore Barclay in a hard fought engagement, in which he was severely wounded.

3. Samuel Wriford—entered the Navy 1797. He served on the Mediterranean, Home, and Halifax stations in the Donegal, Renown, Cæsar, Triumph, and Cæsar again. In the Donegal he assisted at the capture of a Spanish frigate. He served as flag-lieutenant in 1808 under Sir R. J. Strachan, was afterwards present at the destruction of the frigates Italienne, Calypso, and Cybele, and was also in the Walcheren expedition. He co-operated in the Malta in the reduction of Gaeta.

4. Edward Hollinworth Delafosse—entered the Navy 1801 —was present at the battle of Copenhagen, and served in the Saturn, Africaine, Greyhound, Blenheim, and Fox. He was present at the surrender of Madeira in the York. He was also present at the reduction of Martinique and the Saintes, and at the seige of Flushing. As lieutenant of the Cerberus, he commanded her boats at the capture of an armed and deeply laden trabaccolo. He also cut out another vessel of the same kind from under a battery near Brindisi, and assisted in destroying a battery and several vessels near St. Vito. He was wounded in a boat affair at the island of Melura, and co-operated in the proximate reduction of Trieste. He served in the Wye, and the Dover, troop-ship, and for his services in the Hebrus, at the bombardment of Algiers, was rewarded with the rank of commander. He afterwadrs served in the coast-guard in Dorsetshire from 1828 to 1831.

5. Christopher Knight, K. H.—entered the Navy 1806. He served in the Minotaur, the Foudroyant, the President, and Elizabeth. In the Astræa he assisted at the capture of the Renomme and the Nereide, in which he was wounded. He was employed for two years on the Home and Canadian stations in the Thisbe under Sir Charles Hamilton. He then served in the Prince Regent, the Thames, and the Impregnable, in which ship he was present at Algiers, and was wounded in three places. He was then appointed to the Tartar, and afterwards commanded the Snapper, in which he proceeded 60 miles up the Calabar river in search of slavers. He was then promoted to the command of the Morgiana. He served afterwards in the coast-guard from 1828 to 1834.

6. Richard Douglas—entered the Navy 1799. He served in the Royal George, Ville de Paris, and Achille, in which he was wounded at the battle of Trafalgar. He was present under Sir Samuel Hood at the capture of four French frigates off Rochfort. He then joined the Neptune, and served at the reduction of Martinique. He was next transferred to the Intrepid, afterwards to the Coquette, Bellona, Namur, and Bulwark. His next appointments were to the coast blockade as supernumerary, to the Severn, and to the coast-guard. He subsequently commanded the Poictiers at Chatham.—I am, sir, your obedient servant,

ONE WHO HAS SERVED UNDER ST. VINCENT.

THE MILITIA.

The City of Dublin Artillery Militia, consisting of 350 officers, non-commissioned officers, and men, under the command of Major Brettingham, arrived at Woolwich on Saturday, from Colchester camp, to occupy the quarters at the Royal Marine Barracks, vacated on the previous day by the 9th Foot, who are ordered to be stationed at Folkestone.

The following commission has been signed by the Right Hon. the Earl of Erne, lieutenant of the county of Fermanagh:—J. Rutherford, Esq., licentiate R.C.S.I., B.A., T.C.D., to be assistant-surgeon of the Fermanagh Regiment, vice Wilson, resigned.

The Royal Limerick County Militia, stationed at Portsmouth, have received orders to hold themselvs in readiness to embark for Queenstown, whence they will proceed to Limerick for disembodiment on the 26th or 28th proximo.

Artillery Regiment of Royal Lancashire Militia—Captain J. Middleton to be Major, vice J. Bourne, resigned; Second Lieutenant C. Collins, to be First Lieutenant, vice F. M. D. Davies, resigned.

7th Regiment of Lancashire Militia—Ensign W. D. Quinlan having absented himself without leave from the last training, to be removed from the strength of the regiment.

Bedfordshire Militia—W. P. Winkworth, Gent., to be Ensign.

Royal North Gloucester Regiment of Militia—Ensign W. W. Brown to be Lieutenant, vice Clarke, resigned.

Royal South Gloucester Light Infantry Regiment of Militia—Memorandum—Her Majesty has been graciously pleased to accept the resignation of the commission held by Lieutenant C. A. Gibson in this regiment.

2nd Regiment of King's Own Staffordshire Militia—Lieutenant W. Woodward to be Captain, vice Levett, resigned.

Royal North Lincoln Militia—Lieutenant T. H. Whittaker to be Captain, vice G. S. Smyth, resigned.

Montgomeryshire Yeomanry Cavalry — Cornet R. R. Wingfield to be Lieutenant, vice Adair, resigned; C. A. Thruston, Gent., to be Cornet, vice Wingfield promoted.

Hampshire Regiment of Militia—Lieutenant Edward Charles Forward to be Captain, vice Best, resigned; Jan. 30.

According to official papers the inscription maritime of France, which in 1791 bore 95,000 names, only had 74,000 in 1818; in 1835 there were 77,000; in 1845, 85,600; in 1850, 96,000. In the present year there are supposed to be about 106,000 to 108,000, but no table has been prepared since 1850. These are men *d'élite*, who may be depended upon, and do not include sick averages or non-availables. The classification of the inscription is made under five heads—officiers, mariniers, et matelots; novices, mousses, ouvriers et apprentis, capitaines-maitres-pilotes.

Digitized by Google

VOLUNTEERS.

The volunteer movement is progressing rapidly. According to some estimates they number 95,000 men, but this calculation is not official. The *Daily News* gives a summary of the numbers, &c. It is observed that about 10,000,000 of the population still remain deaf to the call. This is accounted for by the fact that "the movement is confined to the middle and upper classes; the working people stand aloof." The truth is that working men have taken part in the movement wherever they have received sufficient encouragement. It is curious, however, that scarcely any of the small towns and villages furnish any men. Of the cities, nearly all have joined; of the towns, half the larger ones, and a third of the smaller ones; of the country, not one-twentieth part. Scotland has hitherto been more zealous than England. The maritime counties, both in England and Scotland, are more active than the inland counties. In the towns, the highest proportions are reached at Oxford and Cambridge. The lowest estimate we have seen is, that the volunteers already number 73 794, of whom 6716 are artillery.

METROPOLITAN.

Customs' Rifle Corps.—On Tuesday last this body, which in the course of about a month has already reached a 4th company, held a public meeting in the Long-room Ante-chamber, Mr. Hamel in the chair, when the following promotions and appointments were decided by acclamation or division and counting-off by the drill-sergeants, vote by ballot or even voting-papers being all but unanimously rejected as a means of arriving at the object desired:—Commandant, Mr. Grey (the commissioner); 1st Captain, Mr. Hamel (solicitor); 2nd Captain, Mr. Whybrow (collector); 3rd Captain, Mr. Dobell (assistant-comptroller-general); Adjutant, Mr. Charles Bernard (landing department); 1st Lieutenant, Mr. Pickford (landing department); 2nd Lieutenant, Mr. Ogilvie (landing department); 3rd Lieutenant, Mr. Maclean (secretary of exports); 1st Ensign, Mr. Cobham (inspector of exports); 2nd Ensign, Mr. Lilley (landing department); 3rd Ensign, Mr. Jones (comptroller, legal quays). The staff at present consists of Treasurer or Paymaster (at present held by) Mr. Dobell; Doctor, the well-known Dr. McWilliam; Honorary Secretary (at present held by) Mr. Lilley; Regimental Sergeant-Major, Mr. Freelove. After the customary vote of thanks to the efficient and popular chairman, the meeting terminated with three cheers and one more for the Queen. The drilling of the corps commences every day at half-past four, terminating at half-past six, and takes place in the Long-room and ante-chamber, hall, and passages.

Sheerness Dockyard Artillery Corps.—The Admiralty having granted permission to the people of the yard to form themselves into Volunteer Artillery Corps, a large meeting of officers and artificers was held on Tuesday night in the library and school-room. The chair being taken by the Rev. Roland Wilson, chaplain of the establishment, the following resolution, moved by Mr. Robinson and seconded by Mr. Harper, was carried by acclamation—"That this meeting pledges itself to aid in the formation of Volunteer Artillery Companies, to be composed exclusively of persons belonging to this dockyard." Names more than sufficient for one company have already been given in.

University College.—On Wednesday afternoon a meeting of the past and present students, and professors and other persons connected with University College, was held in the theatre of the Institution in Gower Street, to consider the propriety of forming a rifle corps in connection with the College. Dr. Wood, LL.D., presided, and the attendance was very numerous. The meeting resolved to form a corps, the only dissentient being Mr. Collet, who, amidst considerable uproar, proposed an amendment, censuring the foreign policy of the Government, more especially with regard to China, and advocating the appointment of a committee to examine into the present position of England, and report to a future meeting on the extent of the danger of the country, and the means necessary to avert it. The Chairman decided that it was not a proper amendment, and could not, therefore, be put. Mr. Jaffray proposed that the corps should consist of past and present professors, and students and others connected with University College, and that a list be opened for the names of those who wished to become honorary members. This was seconded by Mr. R. Fenton, and carried *nem. con.* On the motion of Professor Masson a committee was formed to carry out the object of the foregoing resolutions; and thanks to the Chairman and enrolling of members closed the proceedings.

London Rifle Brigade.—A meeting of the council has been held at the Mansion House; Mr. Alderman Rose, vice-president of the council, in the chair. The receipt of various donations was announced. It was announced that 1202 gentlemen had enrolled themselves as members up to this time. On the motion of Mr. Alderman Challis, seconded by Sir Francis Doyle, Bart., it was resolved that the Lord Mayor be requested to convene an immediate meeting of the Court of Lieutenancy, for the purpose of recommending Major-General his Royal Highness the Duke of Cambridge, K.G., Commander-in-Chief, as colonel of this brigade; and for the despatch of other business. The council proceeded to examine the testimonials of gentlemen desirous of holding commissions as majors, captains, and lieutenants, and made several selections. The council also promoted gentlemen holding the commission of ensign to that of lieutenant, subject to the Court of Lieutenancy. Testimonials of gentlemen desirous of holding the office of adjutant to the brigade were also examined; the minimum salary was fixed at 200*l.* a year. It was ultimately resolved that all candidates for the office of adjutant, together with their testimonials, be referred to Lieutenant-Colonel Hicks, in order that he might inquire into their qualifications, and report thereon to the council.

Central London.—A preliminary meeting was held on Monday evening, at the George and Blue Boar, Holborn, for the formation of a rifle corps in the parish of St. Andrew. Mr. Isaacs in the chair. It was proposed by Mr. Hurlstone, and seconded by Mr. Cottle, that it was advisable to hold a public meeting in the Court-house of St. Andrew, Holborn, at which the rector—the Rev. Mr. Blunt—be solicited to preside, on Tuesday evening, the 31st instant, at eight o'clock. The worthy chairman announced he had already received the names of nearly 50 volunteers.

London Irish.—Owing to the very rapid progress of this corps the committee have deemed it expedient to take Hungerford Hall as head-quarters, and drills have been appointed to take place at the hall three times a week, viz., on Tuesdays, Thursdays, and Saturdays. To meet the convenience of all the members of the corps two drills will take place on each of the days named, the first from five o'clock to seven, and the second from seven o'clock to nine. Last Tuesday evening the first of these drills took place at Hungerford Hall, when there was a good attendance at both the appointed hours, and every one seemed pleased with the arrangements. The pattern uniform was exhibited to the corps, it having been finally adopted at a meeting of the committee that afternoon, and with the exception of one or two little alterations in the decorations, the whole suit seemed to give general satisfaction. The uniform is that of Mr. Bartlett, 6, Middle-row North, Knightsbridge, and it consists of a grey cloth, with conspicuous and handsome emerald green facings, the harp and crown with wreaths of shamrocks forming the device of the cap, belt, and pouch plates, while a spray of silver shamrocks stands forth in beautiful relief upon the green collar. The Marquis of Donegal, the Marquis of Conyngham, the Earl of Arran, Lord Garvagh, General Watkins, Lieut.-Colonel Beamish, Major-General Sir J. Sheil, K.C.B., Major-General Sir J. S. Lillie, C.B., and other leading members of the corps, continue to take a most active part in its organisation.

Clerkenwell.—A meeting of the committee of the Clerkenwell Rifle Corps was held on Friday last, at which Mr. Bodkin attended. The subscriptions announced were: the New River Company, 50*l.*; in addition to Messrs. Nicholson, 25*l.*; Messrs. Gardner, 25*l.*; Mr. Glover, 20*l.*; besides many other smaller amounts. The corps now consists of over 100 effectives, and the drill takes place twice a week (Tuesdays and Fridays), at the Amwell Street School-room, under the superintendence of Captain Colville, governor of the House of Correction.

St. Pancras and North Middlesex.—On Saturday the committee of the St. Pancras and North Middlesex Rifle Brigade received the following communication from the War Office, granting them the use of the cavalry barracks in the Regent's Park, for the purposes of drill:

"War Office, Jan. 20, 1860.

"Sir,—In reply to your letter of the 5th inst., requesting permission for the St. Pancras and North Middlesex Rifle Volunteers to drill in the Riding-school of the Regent's Park barracks, I am directed to inform you that Mr. Sidney Herbert has acceded to your request, on condition that no crowd of persons unconnected with the corps shall be allowed to congregate about the barracks, and also that any damage not attributable to fair wear shall be made good by the corps, and that the wants of the troops are not interfered with. I have the honour to be, Sir, your most obedient servant,

"B. Hawes.

"The Hon. Secretary, St. Pancras and North Middlesex Rifles, Vestry Hall, King's Road, St. Pancras Road."

The committee have put themselves in communication with Colonel Fielding Browne, the Barrack-master, so as to make arrangements for drill at the earliest possible period, the Vestry Hall being inadequate, except for preliminary exercise. The corps altogether now numbers between 300 and 400 effective members, which will be largely augmented in a few days by the volunteers from Messrs. Collard's and other large establishments.

ANGUSSHIRE.

Dundee.—Sir John Ogilvy, M.P., at a public meeting in Dundee on behalf of the volunteer movement, held on Friday se'nnight, stated that on the 26th December last, he had addressed a letter to the Secretary of State suggesting the propriety of establishing a school of musketry in Scotland, either in permanence or for a limited time, in reply to which he had received a private letter from Mr. Secretary Herbert, which was satisfactory, and he had reason to think that at least one school of musketry would be established in Scotland.

BEDFORDSHIRE.

Dunstable Rifle Corps.—The first public meeting in favour of this popular and patriotic movement was held on Thursday evening last, at the Town Hall, when H. Brandreth, Esq., of Houghton House, kindly consented to take the chair, despite of his impaired health. The meeting was crowded to excess, and resolutions in support of the movement were carried by acclamation. At the close, the formal document was submitted for signatures, when between twenty and thirty at once signed, and many others are expected to sign who appeared to have objections to set down their names in a public assembly. Arthur Macnamara, Esq., has consented to become Captain, and W. Medland, Esq., Lieutenant. The Ensign is not yet appointed, but a suitable gentleman for that office will, no doubt, shortly be obtained. The meeting then broke up. We are given to understand that between forty and fifty have handed in their names, and everything bids fair to go on successfully.

BUTE.

Bute Volunteer Rifle Corps.—This corps has now been raised in Rothsay about four months, and under the active superintendence of Captain Black, of Larkhall, assisted by a sergeant of the Gordon Highlanders, bids fair to rival any in the country. The uniform has been decided on; it consists of a grey suit with scarlet facings, cap of the same colour, and patent leather belts, presenting altogether a very useful and soldierlike equipment. A large number of the young men of the town have enrolled themselves as effective members, and the total strength is now upwards of 100. The drill is carried on three times a week, and arrangements are being made to establish a depôt for the arms and accoutrements of the corps. A drill and practice ground has been granted them by their Captain, who loses no opportunity of impressing upon their minds the necessity of perfecting themselves in all military movements.

DEVONSHIRE.

Devonshire 1st [or Exeter and South Devon] Volunteer Rifle Corps.—This corps has now some excellent drills, trained amongst themselves. During the last ten weeks, about twenty-five of the best drilled men have been told off in five squads, and each has drilled his squad in his turn, so that now, in that number, eighteen or twenty are very good drills. In the course of next week 180 new members will be added to the corps. A band is in training, numbering fifteen volunteers, who enrolled for the band only.

GLOUCESTERSHIRE.

Cotswold.—A meeting of the members of this corps took place at the Plough Hotel, on Friday last, for the purpose of appointing a council, of which Æ. M'Donnell, Esq., was elected chairmain. Captain Barton proposed that the rule enforcing the payment of 2*s.* 6*d.* for talking in the ranks should be reduced to 1*s.* which was agreed to. Several uniforms were submitted to general inspection, and one from the establishment of Mr. Hardwick, of the High Street, very similar to that worn by the Gloucester corps, was approved of, and will no doubt, be ultimately adopted.

HAMPSHIRE.

Southampton Volunteer Rifles.—The following uniform has been selected for the band. Grey cloth, black braid, same cap as the corps, with scarlet plume. The height of the corps is fixed at 5 feet 4 inches, and the age from eighteen to forty-five years.

KENT.

West Kent.—This week a crowded public meeting was held at the Literary Institution, Royal Hill, Greenwich, to promote the objects of the Greenwich and Deptford division of the West Kent Volunteer Rifle Corps. The members of the corps assembled in uniform, with a brass band, and the spacious hall was tastefully decorated. The chair was occupied by the Rev. W. A. Soames, vicar of Greenwich; and on the platform were the members of the borough—Aldermon Salomons and Mr. Angerstein, Mr. Bristow, M.P. for Kidderminster, and numerous influential residents of the district. The meeting was cordially unanimous, and numerous subscriptions were announced.

Kent Rifle Volunteers.—7th (or Kidbrooke) Company.—Established 21st December, 1859: Head-quarters, Kidbrooke (Blackheath, S.W.). Captain, Simon Fitzherbert Jackson, late Captain and Adjutant, East Kent Militia; Lieutenant, Frederic Morris; Ensign, Richard George Walmesley. Effectives, 60. Honorary, 18. Uniform: green; facings, green; badge—the white horse of Kent. Arms: short Enfield rifle. Accoutrements: black patent leather.

Folkestone Rifle Corps.—On Monday last, Lieut.-General Sir J. C. Chatterton, Bart., K.H., attended the drill of this corps. The following movements were performed: the formation of fours, file-marching, wheeling into columns of subdivisions and sections, close column of sections, skirmishing, and counter-marching. Sir James witnessed these evolutions with marked satisfaction, which he expressed to the corps on retiring. The progress of this corps in its drill is very much due to the unremitting attention and perseverance of the Serjeant-Major of the 49th regiment.

PERTHSHIRE.

Cupar-Angus.—A company of Rifle Volunteers has been raised here, and it is expected that they will shortly be in a position to offer their services to the Queen.

SURREY.

2nd Surrey Rifle Volunteers.—One company formed in May, 1859; a second forming. Officers: Captain, J. H. Campbell; Lieutenant, A. Stewart; Ensign, J. T. Hyde. Effectives, 58; non-effectives, 26; amount of subscription, about 500*l.* Number of honorary members, 70. State of drill and rifle practice very advanced, both in the use of the rifle and also in company drill. Uniform: green, but this may be changed by-and-bye. General Remarks: Short range of 200 yards near the town, and one of upwards of 1000 yards about to be made at Riddlesdown, near the Caterham Junction of the Brighton Railway.

SUSSEX.

East Grimstead.—The formation of a Volunteer Rifle Corps has been most energetically taken up in this town. The corps already numbers 66 effectives, and very many honorary members. The appointment of a commanding officer is daily expected; but there has unfortunately been much delay in appointing officers in this county.

SUTHERLANDSHIRE.

Golspie.—1st Company of the Sutherland Volunteers.—Date of formation: 8th October, 1859. Names of officers: Captain, Major C. S. Weston; Lieutenant, Sutherland Murray, Esq.; Ensign, Joseph Peacock, Esq. 100 effective men. The amount of subscriptions have not as yet been ascertained; but his grace the Duke of Sutherland has, in his princely manner, intimated his readiness to make up any deficiency in the funds required for the clothing, accoutrements, organisation, &c., of the whole of the Sutherland Volunteers, which consists of three companies of rifles, and one of artillery. There are five honorary members. The volunteers have not passed the elements of company drill. The uniform has not been fixed upon.

WARWICKSHIRE.

Birmingham.—The Birmingham Volunteer Rifle Corps appeared in public for the first time on Sunday, when they attended Divine service at St. Martin's Church, the Rev. Dr. Miller having, at the request of the committee, consented to hold a special early service on the occasion. The volunteers assembled on parade at Bingley Hall, at a quarter before eight o'clock, when there were present about 300 men in uniform, and 50 not in uniform. Sir John Ratcliff, Mr. T. P. Salt, Mr. Crosbee, and other honorary members were likewise present in uniform. Headed by an excellent band

Digitized by Google

o 19 musicians, the corps marched from Bingley Hall to St. Martin's. The streets throughout the route were thronged with spectators, who manifested the deepest interest in the proceedings, and whose applause was checked only by the respect due to the sacred character of the day. The volunteers looked and marched well; indeed, their bearing would not have discredited a body of regular troops. At the conclusion of the service the volunteers returned to their parade ground. The ranks of the volunteers have received numerous accessions lately. The clerks, foremen, and principal workmen in the employ of Messrs. A. Everitt and Sons, of the Kingston Metal Works, Adderley Street, have agreed to form a corps, and on Thursday evening 86 members were enrolled by Captain J. O. Mason. Messrs. Everitt and Sons have liberally offered to pay half the cost of equipment, and a grant of 1*l.* per man has been made by the new Birmingham Rifle Corps Association.

YORKSHIRE.

LEEDS.—This corps is gaining daily accessions of strength, and its members are making satisfactory progress in the knowledge of military tactics and manœuvres. The Rev. Dr. Atlay, the vicar of Leeds, has consented to act as chaplain, and on Sunday morning the members of the corps, dressed in full uniform, marched from the Town Hall to the parish church, where they attended Divine service. The Rev. Dr. Atlay preached a sermon very appropriate to the occasion. Notwithstanding that the morning was exceedingly stormy, there was a good muster of the members of the corps, and a crowd of spectators assembled to watch their progress to and from church.

KNARESBOROUGH.—Rapid progress is made in the formation of this company. On Thursday evening a large and influential meeting of the members was held, Mr. Hodgson in the chair, when J. J. Brown, Esq., of Loftus Hill and Leeds, was unanimously elected Captain amidst the cheers of the company. Sir Charles Slingsby has kindly placed the Town Hall at the service of the company for drill.

MALTON.—The members of this volunteer company continue to meet four nights per week for the purposes of drill, and under the tuition of Sergeant Edwards, of Hull, are steadily progressing.

BEDALE.—About 70 members have volunteered for this company, and upwards of 300*l.* has been subscribed to provide equipments, &c. On Wednesday evening last the members were invited to attend a lecture in the Town Hall, Bedale, delivered by Captain Crowther, on the "Training and Practice of Rifle Volunteers." The gallant Captain spoke for upwards of an hour on the rifle, the mode of handling it, and the general practice, its introduction to the service, &c., and was listened to with great interest.

ARE VOLUNTEERS TOLL FREE?—A case of considerable importance, involving the above question, was tried at the Castle of Exeter on Friday se'nnight, before C. Gordon (chairman), Sir J. Y. B. Duckworth, Bart., D. B. Davey, W. Miles, A. Stowey, J. R. Griffiths, and J. Pitman, Esqrs. Mr. Gardener, lessee of tolls, was summoned by Captain Dennis Moore, of the Exeter Volunteers, for demanding and taking 1s. as toll on a carriage and two horses—"the said carriage conveying volunteer infantry, dressed in the uniform of their corps, and having their arms and accoutrements." Captain Moore appeared in person, and complained of the demand, under the Act 3 Geo. IV., c. 126, sec. 32, which exempts any carriage conveying volunteer infantry, or any horse ridden by any person belonging to volunteer infantry, having their arms and accoutrements at the time of such exemption being claimed. Captain Moore proved that he, with two brother officers, Lieutenants Valance and Clarke, went in the carriage and pair to Exmouth for the purpose of inspecting the Volunteer Corps, and that he was on duty. There had been no order given for their attendance, but that day he drilled the company there, and his brother officers assisted him. He was regulated and sworn in under the Volunteer Act, 44 Geo. III. Mr. Toby appeared for the lessee, and contended that the Highway Act referred to by Mr. Moore did not apply; that they were sworn in under the Volunteer Act, and that exception (if any) should be claimed under that Act; that the 3rd Geo. IV. only referred to a carriage when hired by the parties for conveying volunteer infantry on their march, or otherwise; and that it would be monstrous to contend that any gentleman might dress himself in his rifle uniform, go into a carriage, and say he was on duty. The Bench retired, and after a short time returned, deciding that the carriage was not a carriage conveying volunteer infantry within the meaning of the exemption clause.

5th Division of Lancashire Rifle Corps—Jacob Willink, Gent., to be Lieutenant; Samuel Sandbach Parker, Gent., to be Ensign.

30th Company of Lancashire Rifle Volunteers—George Eastham, Esq., to be Captain; Richard Calvert, Gent., to be Lieutenant; William Henry Birley, Gent., to be Ensign.

6th Division of Lancashire Rifle Volunteers—Captain Frank Ashton to be Major.

Glamorganshire Rifle Volunteers—16th Company: Charles Williams David, Esq., to be Captain; Jeremiah Box Stockdale, Gent., to be Lieutenant; Clement Waldron, Gent., to be Ensign.

9th Company of Surrey Rifle Volunteers—Edmund Balfour, Esq., to be Ensign.

1st Sutherland Rifle Volunteers—Sutherland Murray, Gent., to be Lieutenant; Joseph Peacock, Gent., to be Ensign.

1st Suffolk Rifle Volunteers—Colonel Ramsey to be Captain; Henry Haward, Gent., to be Lieutenant; Sterling Westhorp, Gent., to be Ensign, vice Haward, promoted.

Ayrshire Rifle Volunteers—3rd Company: Major Hay Boyd to be Captain; Robert Paton, Gent., to be Lieutenant; James Martin, Gent., to be Ensign.

1st Middlesex Engineer Volunteers—M'Leod, of M'Leod, to be Captain-Commandant.

West Riding Yorkshire Rifle Volunteers—5th Company (Bradford): Abraham Briggs Foster, Gent., to be Lieutenant; George Bankart, Gent., to be Ensign. 6th Company (Bradford): Ensign Henry Sagar Hirst to be Lieutenant, vice A. B. Foster, resigned; John Foster, Gent., to be Ensign, vice Hirst, promoted.

5th Company of Staffordshire Rifle Volunteers—Lieut.-Colonel George Augustus Vernon (late Coldstream Guards) to be Captain. This notification is in substitution for that which appeared in the *Gazette* of 30th Dec. Christopher Atkinson Newnham, Esq., to be Honorary Surgeon.

10th Company of Staffordshire Rifle Volunteers—Michael Daintry Hollins, Esq., to be Captain; Edward Copeland, Esq., to be Lieutenant; Edward Adams, Esq., to be Ensign.

Cambridge University Rifle Volunteers—The Rev. William Emery, B.D., Fellow of Corpus Christi College, to be Honorary Chaplain; Henry James Haviland, Esq., M.D., Pembroke College, to be Surgeon. The name of Captain Newbery is Charles John Newbery, and not Charles James Newbery, as gazetted on the 13th inst.

1st Cambridgeshire Rifle Volunteers—William Prest, Esq., to be Captain; Frederic Barlow, Esq., to be Lieutenant; Albert Decymus Claydon, Esq., to be Ensign.

2nd Cambridgeshire Rifle Volunteers—Frederick Fawsett, Esq., to be Honorary Surgeon.

4th Worcestershire Rifle Volunteers—William Thomas Knapp, Esq., to be Captain; George Adam Bird, Esq., to be Lieutenant; Henry Goddard Mottram, Esq., to be Ensign.

2nd Lincolnshire Rifle Volunteers—Lieutenant William Henry Smyth to be Captain; Ensign William Chaplin to be Lieutenant, vice Smyth, promoted; William Thomas Kime, Gent., to be Ensign, vice Chaplin, promoted.

5th Company of Forfarshire Artillery Volunteers—David Stewart Littlejohn, Esq., to be Captain; David James, Esq., to be First Lieutenant; James Key Caird, Esq., to be Second Lieutenant.

1st Dorset Artillery Volunteers—In the *Gazette* of the 6th Jan., for John George Sarsfield Macnamara Moore, Gent., read John George Sarsfield Macnamara Moore, Lieutenant, R.N.

4th Company of Cornwall Artillery Volunteers—Baker Banks, Esq., to be Captain; William Tonkin Banks, Gent., to be First Lieutenant; Oct. 30.

1st Company of Derbyshire Volunteer Rifles—Francis Johnson Jessopp, Esq., to be Ensign, vice Cox, resigned.

1st Division of Lancashire Artillery Volunteers—Hugh Neill, Esq., (late Surgeon of the 2d Regiment of the Duke of Lancaster's Own Militia) to be Surgeon; Jan. 16.

5th Division of Lancashire Rifle Volunteers—Richard George Bushby, Gent., to be Ensign, vice Charles Edward Crosbie, promoted; Jan. 16.

17th Company of Lancashire Rifle Volunteers—John Dugdale, jun., Esq., to be Captain; Henry Moore, Gent., to be Lieutenant; George Slater, jun., Gent., to be Ensign; Jan. 16.

Renfrewshire Artillery Volunteers—2d Company—Robert Blair, Gent., to be Captain; James Ramsey Hill, Gent., to be First Lieutenant; Hugh Cuthbert, Gent., to be Second Lieutenant; Jan. 20.

3rd. Company—John Duff, Gent., to be Captain; Duncan M'Callum, Gent., to be First Lieutenant; Simon Arbuckle, Gent., to be Second Lieutenant; Jan. 20.

Renfrewshire Volunteer Rifles—1st Company—Ensign Robert Burrell to be Lieutenant, vice Dempster, resigned; Clapperton, Gent., to be Ensign, vice Burrell, promoted; Jan. 24.

2nd Company—Patrick Macnaughton Black, Gent., to be Ensign, vice Ross, resigned; Jan. 20.

13th Company—Lieutenant Duncan Ferguson Dempster, of the 1st Company, to be Captain; Ensign William Ross, of the 2nd Company, to be Lieutenant; Hugh Spiers, Gent., to be Ensign; Jan. 24.

15th Company—Charles Cairns, Gent., to be Captain; Alexander Kirkland, Gent., to be Lieutenant; John Stevenson, Gent., to be Ensign; Jan. 20.

17th Company—Henry Lee Harvey, Esq., to be Captain; John Harvey, Gent., to be Lieutenant; John McNab, Gent., to be Ensign; Jan. 20.

16th Middlesex Rifle Volunteers—William Farnell Watson, Gent., to be Ensign; Jan. 6.

20th Middlesex Rifle Volunteers—William Houghton, Gent., to be Lieutenant; Frederick John Barrow, Gent., to be Lieutenant; Charles Edward Phair, Gent., to be Ensign; Thomas Henry Tims, Gent., to be Ensign; Jan. 19.

1st Company of Buteshire Rifle Volunteers—Archibald M'Kirdy, Esq., to be Captain; Daniel Macbeth, Esq., to be Lieutenant; Charles Fellowes Maclachlan, Esq., to be Ensign; Jan. 19.

OUR VOLUNTEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Notwithstanding our boasted general knowledge, and the credit we claim for strong common sense, there is probably no country in the world more borne down by great names; and it does not appear of much importance whether the great name has been legitimately earned or not. If the most forlorn speculation be but patronised by a great name, it must succeed. Even the great truths of Nature and the deductions of the exact sciences are not unfrequently set aside by the weight of a great name.

In the infinitely varied economy of Nature it must be expected that there will be individuals,—indeed, whole bevies of persons,—who are always holding back, and deprecating innovation; nor can it be denied that these persons, labouring in their vocation, are not extremely useful as mere brakes upon the wheels of progress, to prevent a destructive velocity.

By some strange delusion great weight is attached to the opinions of some men on subjects upon which they never had, nor never could have, any practical experience. They appear to be, by a kind of common consent, allowed to exclaim, "I am Sir Oracle, and, when I ope my lips, let no dog bark."

In the first number of *The Cornhill Magazine* there is an article upon "Our Volunteers," and the Editor gives the credit of the article to "An honoured hand that has borne the sword in a hundred famous fields, and pointed the British guns in the greatest siege in the world." But common report gives the authorship of the article "Our Volunteers" to an officer whose duty it is not to *point guns*, but to build batteries to put guns into, and to see to it that these batteries are constructed in the proper position to produce the greatest effect. Nor is it at all probable that the gallant hero of the "hundred famous fields" ever personally put more than one company (if even so many as a company) of men through the manual and platoon exercise. Most assuredly not for the last forty or fifty years.

This, however, is not said with the slightest intention to depreciate the services of the gallant officer; but the duties of an engineer officer have little more to do with the evolutions of an army in the field than the duties of the commissary-general or the chief of the medical department. His duties are confined to the attack and defence of fortified places, to the construction of temporary field works, to defend important positions, to the construction of temporary bridges across rivers, and to blow down permanent bridges in the event of a retreat.

The writer very properly remarks that "soldiership is become a scientific profession, and an apprenticeship to the art of war, with skill and experience in every branch of it, are absolutely necessary to oppose with success a well-trained and disciplined force." The art of war is become so much of a "scientific profession" that it is absolutely necessary to resort, as in all other complex professions, to a division of labour, and this is at least a tacit acknowledgment, that no one individual is expected to be possessed of "experience in every branch" of this complex science.

Suppose a line officer,—let us say, Lord Clyde,—who appears to handle all sorts of men to great advantage, was to write an article for the forthcoming number of *The Cornhill Magazine* upon the mode of fortifying our coast and dockyards, and our arsenals, and the readiest and most efficient means of throwing up temporary earthworks in the event of an invasion, would not the public think that the gallant old hero had travelled a little out of his depth? And yet the writer of the article "Our Volunteers" has travelled equally far out of his depth; and the public ought not to be frightened out of its propriety by an opinion not based upon *practical experience*.

There can be no doubt but the engineering and the artillery branches of the art of war will, in consequence of modern mechanical improvements, undergo more alterations than the evolutions of the infantry or of the cavalry will undergo, and therefore the officers of these scientific branches of the service ought to devote their undivided attention to their respective branches of the profession of war.

Alterations in the infantry movements will most likely be an approximation towards a breaking up to some extent of that rigid stiffness and extreme formality of movement which appears to have been so detrimental to the Austrian army in the late war, and an approximation to the French more loose style of movement—in fact, to individualise the component parts of the mass more than by the old system.

But it may not be amiss to point out a few fallacies contained in the article "Our Volunteers."

The writer states that, "according to our system, that of voluntary and not compulsory enlistment, it is so long before we can procure the necessary number of men for the war establishment that our only safety must consist in a much greater amount of permanent forces. In short, our purse must pay for our pride." Now, our purse does not pay for our *pride*, it pays for our *ignorance*. What right has the country to expect soldiers which are really worth having to enter the service for the amount of pay which was fixed before the beginning of the present century, when it is notorious that the wages of the classes from which the army is generally recruited has since then more than doubled.

It is stated that "it should be borne in mind that a robust frame and strong constitution are essential to the efficiency of the soldier, and wanting these physical requisites the best shot would soon become incapacitated." This is all very true, but it is quite a fallacy to suppose that this "robust frame and strong constitution" is anything like a description of the men who are entering the Army at present. The strings of starved-looking striplings who may be seen about the recruiting depôt in Westminster will prove that robust and well-built frames are more applicable to the volunteers than to the men, or rather boys, who are at present entering the Army; and no better class need be expected until the pay and pensions of the army are placed upon a more equitable footing with reference to the civil branches of the service of the Crown.

The writer of the article in question appears to have constantly in his mind the hardships and privations of a foreign campaign, and the difficulties of obtaining commissariat supplies; but to repel an invasion on the coast of Kent or Sussex would not probably last more than three or four weeks, and could not entail the amount of difficulties which existed—some say through mismanagement—in the Crimea to supply food and clothing.

There are many points of comparison drawn between the regular soldier and the volunteer, giving an undue preference to the former at the expense of the latter. There are, however, many good points in the paper by way of suggestion, which may be taken up at a future period if your space will admit of it.

Yours, &c.,

AN OLD SOLDIER.

[If Sir John Burgoyne be the writer of the paper in *The Cornhill Magazine*, and if he is the officer to whom our correspondent alludes, we must say that whatever may be the technical duties of an engineer, there are few men better qualified to give opinions on the merits, deficiencies, and working of all arms of the Service than the Inspector-General of Fortifications. Controversy clears the air, and "An Old Soldier" is welcome to express his sentiments in our columns.—ED.]

On the report of Marshal Randon, the Emperor has decreed that on entering upon a campaign, the staff of each regiment shall have one carriage, and the battalion or two squadrons of cavalry shall have one carriage, for the transport of the officers' baggage, &c. Their baggage is fixed as follows: Colonel, or lieut.-colonel, two boxes of clothes, &c., and one box of cooking, &c., apparatus; the major, one box of each; all other officers have one box of clothes only. For each company or squadron one box is allowed for *batterie de cuisine*. These are all to be of the same size; the carriages are to be drawn by two horses or mules, with a soldier attached to each, who will receive a penny a-day extra for the charge.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq.. LL.D. (Late Special Correspondent of *The Times*.)

The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance; and the postage—uniformly 1d. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street (North), Strand, London, W.C.
[Late "Household Words" Office.]

MR. ALBERT SMITH with his CHINA REPAIRED and MONT BLANC REVISITED, 1859. Every Night (but Saturday) at 8, and TUESDAY and SATURDAY Afternoons at 3 o'clock. Stalls 3s., which can be taken at the Box Office, Egyptian Hall, daily, from 11 till 5; Area 2s., Gallery 1s.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21s. ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:
1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.
2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

ARMORIAL BEARINGS.

DANIEL BAKER, 4, Old Cavendish Street, W., begs to announce that his HERALDIC STUDIO is OPEN, and will be found to contain a most VALUABLE COLLECTION OF HERALDRY. New Designs for Interwoven Monograms, Arms, Crests, &c., in Gothic style. D. B., who for more than ten years was connected with the Heralds' College, has at his command various sources of authentic information. Send name and county. Sketch, 3s. 6d.; or in heraldic colours, 7s. 6d. Seals, dies, copperplates, &c., engraved in a superior style. N.B. Pedigrees correctly traced.

THE ALLIED GENERALS BEFORE SEBASTOPOL.—The Subscribers to this Engraving are informed that the prints are now ready for delivery, and that a great variety of frames made purposely for it may be seen at Messrs. LLOYD BROS. & Co., 96, Gracechurch Street, City, E.C.

EASTWARD HO! is at Mr. JAS. RYMAN'S, Oxford.

HANOVER SQUARE ROOMS.

MRS. SAMS begs to announce that her FIRST GRAND FULL DRESS BALL will take place next THURSDAY, FEBRUARY 2nd. Ladies' tickets, 7s. 6d.; Gentlemens' ditto, 10s. 6d., to be had at the Rooms. W. M. Parker's Band. Commence at half-past Eleven.

MEMORIAL TO THE LATE SIR JAMES McGRIGOR, BART., K.C.B., K.C., K.T.S., F.R.S., &c., &c., &c.

ARMY AND NAVY CLUB, LONDON,
January 12th, 1860.

SIR,—I have the honour to inform you that the admirers of this distinguished officer have determined to testify their deep regard for his memory, by the erection of a Monument, on which shall be inscribed the nature of those long and arduous services (extending over a period of fifty-seven years, in every quarter of the globe), which acquired for him so repeatedly the warmest eulogies in the public despatches of the various General Officers under whom he served, especially in those of the late DUKE OF WELLINGTON, who, on the 26th of July, 1814, when referring to the manner in which the Chief of the Medical Department had conducted that responsible and onerous position, concludes by saying,—

"I consider him one of the most industrious, able, and successful public servants I have ever met with."

SIR JAMES MCGRIGOR was Chief of the Medical Department of the Army in the expedition against the island of Grenada; in the expedition under SIR DAVID BAIRD from Bombay through the deserts of Thebes and Suez to Alexandria; and also in the disastrous Walcheren expedition; moreover, he was present in the same capacity with the army in the Peninsula, from Ciudad Rodrigo to the final battle of Toulouse. He was also twice shipwrecked during his period of active service.

To the Medical Officers of the army, and to the profession in general, his name must always be associated with the two most invaluable Institutions which he founded, and fostered, until the end of his life, with parental care—one, an Assurance Society for granting pensions to widows, and the other, a Benevolent Society, which has been the means of distributing many hundred pounds annually, among the most necessitous orphans of Medical Officers.

SIR JAMES was also the founder of the unrivalled National Museum of Natural History at Fort Pitt, Chatham, as well as a Library, to which he contributed more than 3000 volumes.

To such an energetic, and faithful public servant, one of the contemporaries of England's great Commander, the nation owes a debt of deep gratitude, and it is hoped that a sufficient amount will be realized, to do honour to his name.

As it is anticipated that the Subscription List will be closed in the spring, I trust you will allow your name to appear (if not there already), and be good enough to inform me of the amount you intend to subscribe.

I have the honour to be, your obedient Servant,

JOHN WYATT, COLDSTREAM GUARDS.

The following Gentlemen have consented to act on the Committee.

RT. HON. THE EARL OF FIFE.	J. R. MARTIN, ESQ., F.R.S.
LORD SALTOUN.	J. GIBSON, ESQ., M.D., C.B.
SIR ANDREW SMITH, K.C.B.	W. H. BURRELL, ESQ.
SIR JOHN HALL, K.C.B.	LIEUT.-COL DAWKINS.
SIR AUGUSTUS WEST, K.T.S.	W. H. JUDD, ESQ.
SIR EDWARD JOHNSON.	JOHN WYATT, ESQ.

THE FOLLOWING SUBSCRIPTIONS ARE ANNOUNCED.

	£	s.	d.
T. Alexander, Esq., C.B., Director General, Honorary Surgeon to Her Majesty	10	10	0

NOTICES TO CORRESPONDENTS.

"PRISCIAN'S head is scratched." The forms of grammar quoted are neither cockneyisms nor "Hibernian blots," whatever that latter may be. The admiration of a "friend" "of general talents" is respectfully declined.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not authenticated by the name of the writer, given in confidence to the EDITOR.

The EDITOR begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, JANUARY 28, 1860.

Sir De Lacy Evans is manifestly in earnest in his crusade against the purchase system in the Army, for one of the first notices given after the meeting of Parliament was from the gallant General, to the effect that on an early day he will move an address to Her Majesty for the abolition of the system. We are too well persuaded of the warmth and sincerity of Sir De Lacy's interest in the profession whose fame he has himself so well sustained, not to feel regret at differing from him upon any point connected with the Service. Nevertheless, a careful perusal of the proceedings of the Royal Commissioners of 1857 has not shaken our conviction that anything that could be substituted for the present system of purchase, as it stands substantially, would work to the disadvantage of the Service. In a country in which, as we all know money has a large influence in almost every relation of life, it is more than doubtful whether it is in the power of Parliament and the authorities to abolish all species of systematic purchase. There might indeed be a formal decree terminating its existence, but, after a while, we should find out that we had got rid of a purchase system, over which there was at all events some control, and had substituted for it another, like that in the Indian Army, uncontrolled and grievous, because it is morally compulsory. But even if it were possible to overcome the inducements held out by money, it has yet to be shown, with all respect for the financial abilities of Sir Charles Trevelyan, that a different system can be made to replace it, which will have the effect of bringing officers up to positions of command at an age in which they may be expected to retain possession of their physical as well as mental faculties. Even the consideration that the great majority of officers of the Army, especially those who do not themselves purchase, are advocates of the system, ought to have some influence on the decision of Parliament; for surely where almost every other employé of the state has had his position materially improved of late years, the combatant regimental officer has a right to expect some measure better than a penal visitation, greatly deteriorating the value and prospects of his profession.

Notwithstanding this, however, we freely admit that we do not think the system can or ought to remain without some modification. These sixty vacant cornetcies furnish a strong argument for some change in the system of purchase, as well as some inquiry into the kind of educational tests necessary for admission to the Army. With respect to the latter, we think that the direction lately taken by the Civil Service examinations might be followed with advantage. When these examinations were first instituted, candidates were examined in general subjects, irrespective of the nature and peculiar requirements of the office to which they were designated. They have since been modified, and made to bear more practically and directly upon the duties to be discharged by the candidates. Thus in offices of account, arithmetic is held to be of more value than qualifications for a secretarial office. Why not adapt the army examination to the duties to be undertaken by a subaltern officer? These require, like the duties of a non-commissioned officer, a moderate amount of elementary education, and an acquaintance with the manner of commanding, paying, and manœuvering a company. We believe, as we stated in the first number of our journal, that a self-supporting institution, where young men nominated to commissions would have a few months' instruction in the practical duty of regimental officers, would be far more conducive to the efficiency of the Service. It would be much cheaper to the country because the number of subalterns might be fairly diminished in proportion to those who, under the present system, receive pay and allowances for

Digitized by Google

learning their business at Depôt Battalions. Let us see added to this a less complicated system of regimental promotion. Let purchase stop (as in the Guards) at the rank of Captain. Let the ranks of Major and Ensign (as in the Artillery) merge into the superior ones of Lieut.-Colonel and Lieutenant, and there would be but one point where the grievance could affect the poor man in his way to the higher ranks of the profession. It is quite clear, however, that some change must be made; and it is because we wish for many reasons to preserve the system from total abolition that we express a hope that Sir De Lacy Evans' motion may be met with an announcement that the heads of the Military departments are prepared to take some steps to remove the inequalities and inconveniences which at present professedly prevail.

A controversy has recently been carried on in some journals as to the propriety of exempting private property, not contraband of war, on the high seas, from seizure in time of war. The merchants of Bremen, Manchester, and Liverpool have demanded this innovation on belligerent rights, on the ground that it is conformable to natural justice, and recommended by considerations of public policy.

Their demand has been much canvassed and resisted by our able contemporary the *Times*, which has furnished arguments of no mean value in opposition to a demand so plausible, and apparently so just. Into this discussion, involving, as it does, a variety of considerations, ethical, political, and commercial, we do not desire to enter. But it is our duty to point out what would be the effect of the proposed changes in the naval service, and on our mercantile marine, which is its nursery and support.

When, at the Treaty of Paris, the great maritime powers agreed to abolish the practice of privateering, and to recognise the principle that the flag hereafter should cover the cargo; that the ancient law of the sea, as asserted by England, that enemies' goods were the subject of capture under a neutral flag, should be abrogated; and that the principle upon which the French Prize Courts had hitherto proceeded, that a friend's goods under an enemy's flag might be seized, should no longer prevail; a complete revolution in warfare was effected, beneficial possibly to neutrals, and indirectly in some sense to belligerents, as tending to prevent the complications which arose when neutral interests were involved. But to the naval marine of the belligerent countries and to their shipowners grave consequences must ensue; to the naval marine, particularly, the great sources of prize money will be dried up, as commerce will of necessity be carried on in time of war in neutral bottoms, and no seizures can be made except of the few enemy's vessels on the ocean, or of neutral vessels which convey goods contraband of war, or which are detected in breaking blockade. The different rates of insurance on vessels belonging to neutrals, compared with those the property of belligerents, and the necessity of waiting for convoy, establish so distinctive a preference for neutral vessels in the conveyance of merchandise the property of belligerents, as to practically transfer the whole carrying trade to the neutral, and to sweep the merchantman of the belligerent from the sea. No doubt the merchants generally, and consumers and producers of goods of belligerent countries will be the gainers by the immunity enjoyed by merchandise on the seas, but the Royal and Mercantile Navy will be heavy sufferers.

This subject is more deserving the grave consideration of Parliament than many others of transitory interest which are discussed at great length.

The shipping interest demands, and will probably obtain, in the present session, the attention of a committee directed to the operation of those laws which affect its welfare; and no doubt the international law, as now established, will receive its due share of attention.

The shipowners will probably demand the entire immunity of mercantile shipping in time of war, except when violating blockade or conveying goods contraband of war.

Should this immunity be conceded—and we do not disguise from our readers that the Liverpool memorial especially suggests grave and substantial reasons for the change, to which Lord Palmerston has expressed himself as favourable—a further demand will probably be insisted on, namely, the limitation of blockades to naval arsenals, and ports of naval equipment. We trust in any discussions on these subjects, that Parliament, and our naval friends especially, will not lose sight of the influence of the proposed changes on the prospects of the Navy; but that if such changes be necessitated by considerations of humanity, of public policy, and by the temper of the times, the claims of our officers and men for due consideration will be met in a fair and liberal spirit, and that their interests shall not be lost sight of by those who ought to be their guardians and protectors.

By private letters we learn some interesting particulars of the "last moments" of the rebellion. We closed up every path from the hills and valleys of Nepaul by numerous bodies of Oude police, infantry and cavalry, strengthened by infantry and regular horse, so that not a man could escape. Lieutenant Hall, a very active officer, proceeded to Jung Bahadoor's camp when all was ready, and the Nepaulese then began to move from East to West, driving the baghees before them into an angle formed by the hills and the Areah Nuddee, the latter being held by our troops, who were at Jung's request commanded not to enter the Terai or cross into Nepaul. When Colonel Pulwan Sing came upon Bainie Madhoo's party, and ordered them to retire, the fierce old Chief of Byswarra drew his sword, and was making a cut at the Nepaulese, when he was shot by one of the Goorkha soldiers who saved his colonel's life. Bainie's brother burning to avenge him, shared the same fate; and in the subsequent affair numbers of the Bys people were killed. The Dang and Deokhur valleys were gradually cleared; all the villages were full of sick Sepoys. A party of our men then went round to the pass, to prevent the most compact body of the rebels getting back into the Deokhur valley by a narrow and precipitous path, and came upon them just as they were entering from the inside. As soon as they received our fire the rebels turned and flew to the Nepaulese end, but here the Goorkhas were waiting for them. The Sepoys gave them a volley in answer to a summons to surrender; but the Nepaulese charged, and shot them down, so that, of the 1000 present, about 250 were killed and 150 taken prisoneers; 40 were cut down by our police; the rest got off to die of disease, or to surrender soon afterwards. Such was the fate of the famous Nusseerabad brigade. Its leader, Dabee Dhun, who gave himself up, is described as a handsome young man, very intelligent, an ex-soubadhar of the 60th N.I. It was he who had a smart little affair with Colonel Horsford at Doudpore, and his brigade still numbers 851 men (prisoners). Most of the prisoners are covered with sores and vermin, and "smell horribly." The head men are marched into Lucknow. Those who belonged to regiments which did not murder their officers are permitted to return to their villages, under surveillance.

Mahabeer, the dacoit, says that Nana Sahib disappeared from camp, and is not dead.

Some Christian drummers of the 17th N.I., used by the Nana as grass cutters, state they saw the body of a man burned, which they were told was that of the Nana, but they know it was not his corpse.

Some doubts have existed in the official mind as to the practical application of the recommendation of the Royal Commissioners, that all staff appointments should be made for five years only. It was doubted whether the Head-quarters' Staff were included in this provision of the warrant. We understand, however, that it has just been officially settled that the whole of the staff is included, and that all the Horse Guards' military officials will resign their commands at the expiration of five years' tenure of office, with the exception of the Military Secretary, to whose office it has been considered—and we think very wholesomely—desirable to give a more permanent character than the other appointments. The Adjutant-General and the Deputy Adjutant-General have completed their term of service, but it is believed that no personal change will be made in this department before the 1st of April.

The passages in the Queen's speech in which Her Majesty refers to the different branches of her military services cannot but prove extremely gratifying to those of whom she speaks. To the "judicious forbearance of her naval and civil officers on the spot," the happy escape from a very ugly quarrel in the matter of San Juan is justly attributed. The bravery shown by Admiral Hope and his gallant band at the Peiho is not the less conspicuously alluded to, because it was not attended with victorious results, and in both Houses of Parliament ample amends were made for a somewhat prolonged absence of public approbation of the same gallant action. The public as well as the united services will gladly learn that the estimates have been framed, not as usual "with a due regard to economy," but "with a view to place the naval and military services and the defences of the country upon an efficient footing;" while nothing could be more appropriate than the way in which the most prominent part of the Royal speech—the first paragraph of the portion allotted to internal affairs—was devoted to the Volunteers. "I have accepted," said Her Majesty, "with gratification and pride the extensive offers of voluntary service which I have received from my subjects. This manifestation of public spirit has added an important element to our system of national defence."

H.R.H. the General Commanding-in-Chief has called for a return of non-commissioned officers and soldiers who have been placed on the pension list since the beginning of the war with Russia, on account of the loss of a leg or an arm, in order that they may be employed in public offices as messengers, &c.

We stated last week that an addition of men would be made to each of the Infantry regiments at home and in the colonies, exclusive of India. In this augmentation the Foot Guards will be included, an addition of 1400 men to the brigade, or 200 to each battalion, being resolved on. No increase of officers will take place.

In our last impression we gave currency, but not confirmation, to a rumour to the effect that Sir James Yorke Scarlett was about to leave the Portsmouth command. The gallant officer has only served half his term of command, and we understand that the rumour which prevailed, respecting his departure from the post he held with so much advantage to the service and to the benefit of the town, is unfounded.

We hear it mentioned as very probable that the Select Committee of the House of Commons on the organisation of the great military departments, originally moved for by Captain Vivian, and reappointed last session at the suggestion of the present Secretary of State for War, will not receive any additional evidence this session, but will meet for the purpose of considering their report. Among the witnesses examined have been Lord Panmure, General Peel, Sir Edward Lugard, Mr. Godley, Assistant-Under-Secretary for War, and the Commissary-General.

INCOME TAX.—The following circular has been sent to Paymasters and Army-Agents:

War Office, Pall Mall, 31st December, 1859.

GENTLEMEN,—I am directed by the Income Duty Commissioners for this office to acquaint you, that in the event of advances of pay being made to officers, no deduction for income-tax should be made in respect of any portion of such pay as shall accrue after the 5th of April, 1860.

I am, sir, your obedient servant,
DENHAM ROBINSON, for the Commissioners.

The term Comptroller of the Navy has been substituted for that of Surveyor of the Navy. Is this the beginning of the re-establishment of the old Navy Board, or are the five principal officers of the Navy to form part of the Board or Council of the Admiralty? The introduction of this improved business element into the administration of naval affairs, though open to some objection in point of form, will beyond doubt facilitate the transaction of affairs.

Colonel M'Murdo, C.B., Commandant of the Military Train, has been appointed Inspector-General of Volunteers. There are to be six sub-inspectors, with the rank of Brigade-Major, but the arrangements respecting the selection of these officers are not yet complete.

Admiral Bruce has been appointed the successor of Admiral Bowles at Portsmouth.

Major-General Eden, Commanding the Cork District, will resign his command on the 1st of April next.

We understand that Colonel R. Blucher Wood, C.B., succeeds Colonel Bloomfield in the command of the troops at Colchester.

The Colonelcy of the 73rd Regiment, and the Inspecting Field-Officerships of Glasgow and Cork, remain vacant.

Lord Clyde will be detained longer in India than he anticipated, in consequence of the arrangements which must be made for the Chinese expedition, and the alterations in the stations and dispositions of the various regiments in India. It is not probable that the General will be able to leave till the end of March, so that he cannot be in England till the beginning of May.

The overtures which have been made to the British officers of the Sikh regiments to volunteer for China have not been attended with much success.

The Council of Military Education will sit at the Royal Hospital, Chelsea, from the 1st to the 7th of February, for the examination of candidates for direct Commissions in the Army.

On the report of the Minister, Secretary of State for War, Marshal Randon, the Emperor has constituted the Corps of Veterinary Surgeons in the army as follows:—Principal vets., 5; vets. 1st class, 122; vets. 2nd, 132; aides-vets., 91; aides-vets. stagraires, 20. The last are at least 30 years old, chosen from the diplomatised vets. of the schools. They are sent to the cavalry school for a year, and study for their examination of admission, and then proceed slowly through the stages till they become, if ever, veterinai e principal, on 4000 francs a-year. The stagraire has only 1200 francs, but he is allowed 400 francs and his equipment; and a supplement of 550 francs is allowed to the aides,

SOLDIERS AND THEIR SCIENCE.*

Captain Brabazon has produced a very entertaining book on a subject too often treated in a manner that renders it *caviare* to the general. There is really no reason why the science of soldiers, any more than the science of astronomy, should be regarded as above the comprehension of intelligent men. At the same time, it is more difficult to become a great soldier than it is to become a great astronomer, because, although any one can, like Lescarbault, apply in practice the principles of astronomical science, happily, no one, not even soldiers themselves, can apply at pleasure the principles of military science. At the best, in time of peace, a soldier can only strengthen and train his mind by diligent study, not of mere theoretical works, but of the campaigns of great generals, and even then, should he be entrusted with an army, his success will entirely depend upon his power to adapt the principles of his science to the circumstances in which he finds himself. But, though proficiency in war, practical and practised, is possible for soldiers alone, the capacity of understanding war is not confined to the profession; and the general reader, whose tastes lie that way, will find Captain Brabazon's book quite as entertaining as "the novel of the season," and far more instructive. To the young soldier, who has a true feeling for his calling, it cannot fail to act otherwise than a corrective and a stimulant.

For, happily, our author keeps up a close and sustained fire against what we may call the would-be hierophants of the military mysteries. He is a determined enemy of those who would erect themselves into a military priesthood, and "who claim to be at once the originators and sole dispensers of a science which Napoleon has emphatically declared cannot be learned from books." War can no more be reduced to an "exact science" than daily life; yet it is undeniable that, as a man may profit by knowing how other men have lived, so a general may profit by knowing how other generals have acted.

"Warfare," says Captain Brabazon, "like poetry, is, to a certain extent, an imitative art. The student, if he cannot seize the fire—the inspiration of a great model, may at least hope to acquire some knowledge of his method and style. Aided by experience, he may in due time become skilled in manœuvres and all the minor operations of war. But, without the rare gift of original genius, he can never clear that gulf which divides the general from the tactician, the poet from the rhymester, the artist from the artisan."

It is from this point of view that Captain Brabazon has composed his little work. He has reviewed the history of warfare from the earliest recorded times, always with an eye to the spirit not the letter of the methods of great captains. Far from restricting himself to a narrative of manœuvres and battles, he has touched upon "the various systems of raising, organising, and subsisting troops;" and, as might be expected, he has devoted some space to their armament and to fortification. So that within the compass of three hundred pages we have a spirited and thoughtful commentary on military science, as it has been exemplified in the conduct of its greatest masters. Thus the work is calculated to act as a stimulus to our young soldiers, to make them turn from theoretical works and seek in the original histories of great campaigns the essential constituents of military excellence. There have been many commanders who knew nothing of the doings of those who had gone before, but some of the greatest of them all are known to have been diligent students. Timour must have created a system of war for himself, but Napoleon I. did what he emphatically recommends others to do, he "read and read again the history, the letters, the despatches of great commanders," and Napoleon III. in our own day has actually acquired by faithful obedience to his uncle's precept that military ability which he recently displayed in Italy.

In point of fact, military science has made little progress. No three generals of modern times can be found who surpass Hannibal, Alexander, Cæsar. These men were masters of the art; that is, they knew how to use with effect the destructive agencies placed at their command, under the conditions imposed by the then existing circumstances. It is the difference of conditions, and not any change in principles, which constitutes the difference in the systems of warfare. Timour was as great a commander of cavalry as Seidlitz, and probably a greater, but both breathed their own spirit into the squadrons they commanded. The immense improvements in weapons, especially in fire-arms, will demand a new application of old principles, but the fundamental bases of warfare will remain unchanged. That nation which can get all that can be got out of the rifled musket and the rifled cannon; which adopts a system of permanent and temporary fortification, best calculated to enhance or counteract the effects of the new fire-arms; which possesses a body of horsemen capable of again playing a decisive part in critical moments; whose soldiers are able to fight in independent order, act in concert, and use their legs; who are familiar with the pick and the spade as well as with the rifle and bayonet: the nation which possesses this aggregate of forces, and a man who can rightly use them, will have the most powerful engine of war the world has ever seen; and there is no reason, that we can see, why England should not be that nation, since she possesses in abundance all the raw material required to constitute a matchless army.

Few things would conduce more to this end than that the studies of our rising soldiers should be turned in the direction suggested by Captain Brabazon's book. Leaving out works on the purely technical, mechanical, and scientific branches of military education, we can imagine the library of a soldier reduced to a comparatively small compass. It would consist of the best histories of the military deeds of the few great generals who are the originators and illustrators of the military art, and it would contain no books which pretend to reduce war to an exact science. We quite agree with Captain Brabazon that these books are inimical to the progress of the true science of war, which, like politics, and even more than politics, is a science of exigencies. Keen insight, activity, coolness, sound and rapid judgment, enterprise, untiring industry, these are the qualities which make a great general; and they are qualities which study can develop, but cannot confer.

In his last chapter Captain Brabazon touches on the effect of the new fire-arms upon military operations. As a soldier of the scientific branch who has seen war, his views are worth recording. Fully admitting, as everyone must, and a soldier above all men, the immense importance of the rifle, does he think that it will extinguish the use of the sabre and bayonet? Certainly not. Taking the late campaign in Italy, where the infantry of both armies had a certain proportion of rifles, he finds the bayonet repeatedly brought into use; and he even reads, as we have read, in the daily journals, that the Spaniards in Morocco, closely engaged with the Moors in the early stages of the war, threw down their firelocks to close knife in hand on their swarthy foes. At Montebello there was a fair contest between opposing rifles, and yet the bayonet expelled the Austrians from the churchyard. We have always thought that the extreme dispersion of skirmishers must give opportunities to a really light cavalry, capable of great speed, and that the value of the rifle will be decreased by the smoke and dust of a battle and the accidental atmospheric conditions. Captain Brabazon is of the same opinion. In like manner he foresees that the employment of earthworks and slightly fortified posts, independently of the augmented power of the cannon, will enable artillery to keep its ground. So that the relations between all arms will remain pretty much as they are; but each arm will be more effective, and the individual soldier, educated up to his weapon, will be of greater value.

"But it is not only in individuals that civilisation and progress efface the distinction between the purely professional and the occasional elements of military strength. The material agencies of civil life are daily more valued and employed in war. The railway, the commodious steamer, the electric telegraph, the galvanic battery, and even the balloon,—what are these but so many agents, first called into being by civil wants, yet applicable at any moment to purposes of war? This tendency to incorporate the civil with the military resources of the State not only largely exists, but is rapidly increasing; and those who mark its progress will confirm the prophetic words of Paixhans, uttered thirty years ago—'the strength of nations is no longer in their barracks.'"

On the subject of fortification our author has no undefined views. "The days of the old polygon fortress," he says, "are past—never to return." In future, to meet the new conditions of warfare, nations "must be content with infinitely fewer defensive works; these works, in order to ward off bombardment and to afford a concentric fire, must be of great circumference; and in order to secure economy and to harmonise with the disposition of large bodies of troops, they must incline towards the provisional and elastic, rather than to the regular and circumscribed." He is of opinion that "recent improvements in fire-arms tend to raise the value of earthworks at the expense of more solid and imposing structures. Henceforth, our estimate of a fortress will not be based upon its material strength and power of isolated resistance, but rather as the degree in which it harmonises with and develops that general system of national defence, *the mainspring of which must ever be the existence of a national army in the field.*" True to his principle, our author makes an exception in favour of works liable to a purely naval attack. In other respects, and we agree with him, we must base our system of national defence, not on fortresses, but on a national army.

We take leave of this interesting volume, commending it to the notice of our readers.

* *Soldiers and their Science.* By Captain Brabazon, R.A. (Parker & Son.)

At a late meeting of the Royal London Yacht Club it was proposed by an old officer, and eloquently seconded by the Rev. Mr. Cook, that in future it would be advisable to select the yacht crews from the Coast Volunteer Reserve only. It was not urged that the old yacht sailor should not be employed, but alleged as an inducement to the younger men to volunteer in defence of the country, in order to get permanently employed in gentlemen's yachts. It would thus be a double advantage—first, to the Government, as these men would always be at home; and secondly to themselves, inasmuch as they could serve in the yachts in the summer, and in the leisure hours of the winter learn the exercise of artillery, and merit the provision which Government has so liberally awarded to those attached to the Reserve.

THE ROYAL MILITARY ACADEMIES AT WOOLWICH AND SANDHURST.

The following is the List of Successful Candidates for admission to the Royal Military Academy, Woolwich, at the examination held by the Council of Military Education in January, 1860.

		Marks.
Order 1.	Name, Emilius Clayton; age, 18; place of education, St. Andrew's College, Bradfield	5124
2.	Frederick E. B. Loraine, 17, Abroad, and Mr. Taylor's, Woolwich	5117
3.	John C. Robson, 18, Mr. Fleming's, Tunbridge	5114
4.	Alfred G. Begbie, 17, Abroad, and Rev. W. H. Pritchett's, Old Charlton	4980
5.	Archibald J. Anderson, 17, Repton Grammar School, and Mr. Kieser's, Blackheath	4884
6.	Willoughby B. Hemans, 16, Cheltenham College	4846
7.	Wadham P. Platt, 19, Mr. Fleming's, Tunbridge	4649
8.	Alexander Campbell, 18, Harrow, and Rev. W. H. Pritchett's	4577
9.	Malcolm W. Rogers, 17, New Grammar School, Plymouth	4522
10.	William J. Galway, 18, Beaumont College and Mr. De Burgh's, Dublin	4432
11.	Alexander W. Cunningham, 19, Edinburgh University and Mr. Taylor's	4371
12.	Thomas J. Willans, 18, Queen's College, Belfast	4298
13.	Alured De Vere Brooke, 18, Mr. Hopkirk's, Eltham	4124
14.	Jeffery L. Morgan, 17, Normal College, Swansea, and Mr. De Burgh's, Dublin	4108
15.	Sir Arthur W. J. Mackworth, Bart., 17, Mr. Hopkirk's, Eltham	4107
16.	De La Cherois T. Irwin, 16, Privately, and Mr. Sherratt's, Battersea	3987
17.	William De W. Abney, 16, Rev. W. H. Pritchett's	3945
18.	Lionel F. Perry, 19, Cheltenham College	3886
19.	Herbert A. Taylor, 18, Mr. Taylor's and Mr. Fleming's	3816
20.	Joseph Lobley, 18, Liverpool Collegiate Institution	3794
21.	Edgar Kensington, 17, Privately	3784
22.	Thomas Gaskell, 17, Ipswich and Dorchester Grammar Schools	3706
23.	Frederick Campbell, 16, Dr. Bridgman's, Woolwich	3663
24.	George E. Townsend, 18, Mr. Fleming's	3627
25.	William L. Hutchinson, 17, R. M. College, Sandhurst, and Mr. Fleming's	3601
26.	Robert J. H. Parker, 19, Mr. Heather's, Old Charlton	3580
27.	George Montgomery, 19, Mr. Taylor's	3577
28.	Norman M. D. Burt, 17, Mr. Fleming's	3575
29.	Hugh Stewart, 18, Mr. Taylor's	3550
30.	Charles Stewart, 18, Privately, and Mr. Fleming's	3455
31.	Thomas H. Lloyd, 17, Rugby, and the Rev. C. Hughes'	3392
32.	Edmund S. B. Lockyer, 17, Cheltenham College	3387
33.	John S. Rothwell, 18, Dublin University	3384
34.	Edward V. Stace, 18, R. M. College, Sandhurst, and Rev. E. A. Claydon's, Lee	3382
35.	Robert A. Livesay, 18, Abroad, and Mr. De Burgh's	3321
36.	Walkinshaw O. C. Shippard, 17, King's College School and private tutor	3319
37.	William H. Auchinleck, 19, Dublin University	3298
38.	Henry Champernown, 19, Exeter College, Oxford, and Rev. E. Claydon's	3256
39.	Richard A. Sargeaunt, 18, Charterhouse, and Rev. W. H. Pritchett's	3225
40.	Augustus J. Saunders, 18, Rev. C. Hughes'	3194
41.	Lothian K. Scott, 19, Hanwell College and Mr. Taylor's	3135
42.	Felix Richmond, 17, Wimbledon School	3113
43.	Charles G. Rule, 19, Rev. C. Hughes'	3107
44.	Albert E. Dümmler, 19, Abroad and Privately	3103
45.	Earnshaw Bradley, 17, Richmond Grammar School, Yorkshire, and Dr. Bridgman's	3037
46.	Edward Wighton, 17, King's College School, London, and R. M. College, Sandhurst	2973
46.	Frank Johnson, 19, Lichfield Grammar School and Mr. Taylor's	2973
46.	John G. Knowles, 19, Cheltenham College, and Tenby House, Woodford	2973
49.	George T. Carré, 19, Rev. C. Hughes' and Mr. Fleming's	2896
50.	George A. L. A. Whitmore, 18, King's College, London, and Rev. W. H. Pritchett's	2888
51.	Henry W. Hubback, 18, Mr. Taylor's	2860
52.	Robert A. Laming, 18, Cowbridge Grammar School and Privately	2809
53.	Edward Almon, 18, Cheltenham College	2691
54.	William Bucke, 18, Mr. Taylor's	2668
55.	Horatio F. Smyth, 19, Dublin University and Mr. Barry's, Dublin	2633
56.	William H. Larken, 17, privately	2603
57.	Henry L. Lewis, 17, Dublin University	2577
58.	Henry C. Macdiarmid, 16, Privately	2568
59.	Ernest Johnson, 19, North Cheam School	2527
60.	William Mallins, 18, Dublin University	2423
61.	James Alleyne, 17, Royal Military College, Sandhurst, and Mr. Fleming's	2260
62.	Lee P. Pennethorne, 17, Mr. Pritchard's, Clapham, and Privately	2232
63.	Henry C. Reynolds, 18, Eton and Private Tutors	2230
64.	Carlile Greer, 18, Privately and Mr. D. Burgh's Dublin	2133

SANDHURST.

The following is the official list of successful candidates for admission to the Royal Military College, Sandhurst, at the examination held by the Council of Military Education in December, 1859:—

		Marks.
Order 1.	Name, Edward S. Creek; age, 17; place of education, Winchester College	4945
2.	Stuart L. Richards, 18, St. Peter's College, Radley	4515
3.	Edward O'B. Forsyth, 17, Private Tuition and Wimbledon School	4070
4.	Robert Bleazby, 16, Ennis School	3445
5.	Charles J. Burnett, 18, Proprietary School, Blackheath	3210
6.	Edmund J. Y. Armstrong, 16, Mr. Darch's Brighton, and Dr. Laumann's, Fulham	3160

Digitized by Google

Order.		Marks.
7.	Arthur H. Heyland, 16, Winslow Hall School, Bucks	3085
8.	Frederic C. Lewin, 17, Lansdowne College, Bath	3030
9.	Edward Le Mottée, 16, Elizabeth College, Guersney	2941
10.	David O'N. Power, 17, Portarlington School and Mr. De Burgh's, Dublin	2865
11.	Henry Grenville, 16, Private Tuition and Mr. Furrian's	2745
12.	George E. Osborne, 16, Portland House, Brighton, and Forest School, Walthamstow	2640
13.	William Bigg, 18, Tonbridge School House	2620
14.	John E. C. Doveton, 16, Stapleton School, and Captain Target's, Bath	2598
15.	Richmond G. Nicholas, 16, Stoneyhurst College and Private Tuition	2575
16.	Edward E. G. Clayton, 17, Dr. Bridgman's, Woolwich	2493
17.	Alfred R. H. Swindley, 16, Christ's Hospital and Mr. Whitely's, Woolwich	2485
18.	Thomas P. Lloyd, 18, Private Tuition and Talbot Place, Dublin	2210
19.	William Clark, 16, Royal Grammar School, Colchester, and Trinity College, Glenalmond	2150
20.	Bethel M. Dawes, 16, Knightcott House School, Leamington	2115
21.	Robert G. Fulton, 16, Carlshalton School, and Dr. Bridgman's, Woolwich	2089
22.	Curtis Hayward, 17, Mr. R. Day's, Eton	1990
23.	Edmund Broderip, Private Tuition	1985
24.	Arnold D. Saportas, 16, Mr. Hopkirk's, Eltham	1812
*	Arthur H. Handley, 17, Captain Target's	2416
*	Hugh de G. Seymour, 26, in France and Private Tuition	2340
*	George W. B. Anderson, 16, Dr. Bridgman's, Woolwich	1715
*	Robert C. Dudgeon, 17, Mr. Pritchard's, Clapham	1606
*	Edward W. Stokes, 18, the Grove, Blackheath	1140
*	John A. Murray, 16, Royal Grammar School, Lancaster	1080
*	Henry J. Barr, 16, High School, Bishop Stortford, and Private Tuition	1060

The following Queen's Cadets were also admitted :—

—	Edward P. T. Goldsmith	2820
—	William M. Meacham	2778

THE ARMIES OF THE CONTINENT.

The Army of the German Confederation.

What is the German Confederation? What is the army of the German Confederation? What its power, in case of a general European War?

The German Confederation is thus defined in the 2nd article of its Constitution :

"*Der Bund besteht in seinem Inneren als ein Gemeinschaft selbständiger, unter sich unabhängiger Staaten, mit wechselseitiger gleicher Vertrags-Rechten und Vertrags-Obliegenheiten, in seinen äusseren Verhältnissen aber als eine in politischer Einheit verbundene Gesammtmacht.*" Which, put into English, means :

"The German Confederation consists in its internal organisation as a community of independent States, each independent of each other, with mutual equal treaty-rights and obligations, but in its external relations a whole power, bound together in political unity."

The initiative of forming a German Confederation was taken at the Congress of Vienna, in November, 1814, by Austria, Prussia, Bavaria, Hanover, and Würtemberg. In 1815 the other sovereign states of Germany joined them. The act of the Confederation was drawn up at Vienna on the 8th June, 1815. It consists of 20 articles, of which the 11 first were inserted in the act of the Congress of Vienna of the 9th of June, and thereby placed under the guarantee of the great European powers.

The Confederation consists of 34 independent states and principalities, and of 4 free cities, and their territories, viz :—

1. Austria (but including only the Archduchy of Austria, Styria, Illyria, Tyrol, Bohemia, Moravia, Silesia, and Austrian Galicia), an amount of territory of 3687 square miles, and *circa* 12,000,000 inhabitants.

2. Prussia (including Brandenburg, Pomerania, Silesia, Prussian Saxony, Westphalia, and Rhenish Prussia), or 3,340 square miles, and 10,500,000 inhabitants.

3. Bavaria; 4. Saxony; 5. Hanover; 6. Wurtemberg; 7. Baden; 8. Electorate of Hesse; 9. Hesse Darmstadt; 10. Holstein and Lauenburg (belonging to the King of Denmark); 11. Luxemburg (belonging to the King of Holland); 12. Saxe-Weimar; 13. Saxe-Meiningen; 14. Saxe-Altenburg; 15. Saxe-Coburg-Gotha; 16. Brunswick; 17. Nassau; 18. Mecklenburg-Schwerin; 19. Mecklenburg-Strelitz; 20. Oldenburg; 21. Anhalt-Dessau; 22. Anhalt-Bernburg; 23. Anhalt-Köthen; 24. Schwarzburg-Sondershauzen; 25. Schwarzburg-Rudolstadt; 26. Hohenzollern-Hechingen; 27. Hohenzollern-Sigmaringen; 28. Waldeck; 29. Reuss (elder branch); 30. Reuss (junior branch); 31. Lippe-Schaumburg; 32. Lippe-Detmold; 33. Lichtenstein; 34. Hesse-Homburg; and the free cities of Lübeck, Frankfort, Bremen, and Hamburg.

According to the 11th Article of the "Act of Confederation," all the above states are bound to defend the whole of Germany, as well as any individual state of the Confederation, and mutually guarantee all their respective territories comprised in the Confederation. For instance, had France, during the late Italian war, bombarded Trieste or Pola, the Confederation would have been bound to take up arms, whilst she might have bombarded Venice with impunity.

The other chief regulations of the Diet are as follows :

When war is declared by the Confederation, no member thereof can enter into private negotiations with the enemy, nor singly conclude peace or war.

Each member of the Confederation has the right to conclude any treaties it may think fit, provided they are not directed *against* the safety of the Confederation, or against that of any state or member thereof.

The seat of the Diet is *Frankfort*.

The Diet consists of plenipotentiaries from the 38 states.

Austria has the perpetual presidency.

The Diet consists of a full assembly or Plenum, in which each member has at least one, the larger states more, votes : thus Austria and the five kingdoms have each four votes (24); Baden, Electorate of Hesse, Hesse-Darmstadt, Holstein and Luxemburg, each three (15); Brunswick, Mecklenburg-Schwerin, and Nassau, each two (6); the other states each one; so that the Plenum altogether has 70 votes.

In the lesser council or "Government of the Diet," the votes of the 38 states are reduced to 17. Austria, Prussia, Bavaria, Saxony, Hanover, Würtemberg, Baden, Electorate of Hesse, Hesse-Darmstadt (with Hesse-Homburg), Holstein, and Luxemburg, have each one vote (11); the others have divided votes; the twelfth vote falls to the Saxon states; the thirteenth to Brunswick and Nassau; the fourteenth to Mecklenburg-Schwerin and Mecklenburg-Strelitz; the fifteenth to Oldenburg, the three Anhalts, and the Schwarzburg lines; the sixteenth to the Hohenzollerns, with Reuss, Lichtenstein, Lippe, and Waldeck, and the seventeenth to the four free cities.

Peace and war are decided by the Plenum. A majority of two-thirds is requisite. The Plenum does not bring forward, but simply votes upon questions, which the lesser assembly has thought fit to be discussed. An absolute majority decides questions in the lesser council.

The army of the German Confederation consists of 10 *corps d'armée* and a reserve; the whole formed from contingents from each of the 38 members.

Austria provides 3 *corps d'armée* of 2 divisions.

Prussia also 3 of 2 divisions.

Bavaria provides the 7th *corps d'armée* in 2 divisions.

Wurtemberg, Baden (and Rhine Hesse), form the 8th corps, each sending 1 division.

Saxony and the Electorate of Hesse form the 1st division of the 9th corps, and Nassau and Luxemburg the 2nd.

The 10th *corps d'armée* is divided into 2 divisions. The 1st is formed by Hanover, Brunswick, Holstein, and the 2 Mecklenburgs; the 2nd by Oldenburg and the 3 Hanse towns.

The reserve consists solely of infantry, and is made up from the contingents of the 18 lesser states, and of that of the free city of Frankfort.

The amount of contingent sent by each state is regulated according to the census of the population. Each member of the Confederation has to send : 1st., the simple contingent of one per cent. of the population; 2ndly, a reserve of one-third per cent. within ten weeks after the "mobilisation;" 3rdly, a reserve of one-third per cent. The cavalry is one-seventh of the contingent, and the artillery consists of 2 guns to every 1000 men, of which, one-fourth are 12 pounders, one-sixth 6-pounders, and one-fourth howitzers; one-third horse-artillery. The park of siege artillery is fixed at 200 pieces. The engineers are provided exclusively by Austria and Prussia. Pioneers, sappers, &c., one-hundredth. At least one-twentieth of the infantry are riflemen.

According to the last statistical returns, the strength of the army of the Confederation amounted in round numbers to 600,000 men.

The official returns of 1858 are as follows :

Infantry, contingent, and reserve, 395,897; riflemen, 31,000; cavalry, 72,955; artillery, 48,846; engineers, sappers and miners, &c., 11,530; staff, 2487; giving a total of 562,735 men.

Guns, 1356; 56 rocket batteries, and 250 pieces of siege-artillery.*

The German Confederation possesses six fortresses : Landau, Mayence, Luxemburg, Rastatt, Ulm, and Ingolstadt. Of these Mayence on the Rhine, Rastatt in Baden, opposite the French frontier, and Ulm in Wurtemberg, close on the Bavarian frontier, are first-class fortresses.

Whilst we are writing these lines the question of a reform of the organisation of the army of the German Confederation is actually before the Diet.

One great fault is the want of military uniformity.

The formation of all the contingents of the army of the Confederation is based upon a subdivision of the troops into battalions, regiments, and batteries. Some contingents consist of troops from different states, but they all fight under the command of their own officers. There is another fault. The calibre is not the same in the different contingents. It is true that each contingent is presumed to bring sufficient ammunition for its own guns and rifles, but in case of falling short the results would be disastrous. It was a wise idea in our own Volunteer confederation of riflemen that the calibre should be universally the same.

The armies *proper* of Austria, Prussia, and other states of Germany will be treated separately. Austria, Prussia, and the rest of Germany together could bring an army of 1,500,000 men into the field.

Disasters seem to pursue the Great Eastern and all connected with her. Brunel is dead, the directors and shareholders are quarrelling; but a calamity happened on Saturday morning which, in an age of superstition, would have made men believe that the great ship was doomed. Early on that day Captain Harrison left the Great Eastern for Southampton, accompanied by the surgeon of the ship, a young boy named Ley, and with a boat's crew of six men. The distance was not far, but a heavy gale was blowing, and on reaching the jetty, at the entrance of the tide-dock, with a lug sail set, the boat was caught by a sudden squall and upset. The probability of the accident had been observed by Captain Weeks, of the Peninsular and Oriental Company's steam ship Indus, who sent off two boats, and every possible exertion was made. The six men were recovered, as well as Dr. Watson, but Captain Harrison and young Ley were drowned. Captain Harrison's body was picked up, but all efforts to bring him back to consciousness were unavailing. An inquest was held and a verdict of accidental death was returned. The coxswain of the boat also died. The fate of Captain Harrison has excited national sympathy, and the Corporation and citizens of Southampton have done all that lay in their power to soothe the afflicted lady, in whose sorrows there are many sharers.

Lord Palmerston has been elected one of the elder brethren of the Trinity House, in the room of the Earl of Minto, deceased.

VOLUNTEER CAVALRY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Your correspondent "M.," on Volunteer Cavalry, appears to have brought his opinions to a state of equilibrium, produced by a force of irregular cavalry on one side of the scale, and a force of riflemen on the other.

This unfortunately is the case with many influential men in our counties, who are losing time in discussing this subject, instead of regarding it in a common sense point of view, when there could be no ground for discussion at all.

When we look at that vast machine, constructed of energy and fed by enthusiasm, that is now moulding Rifle Volunteers throughout the kingdom, our admiring minds picture to our imaginations the whole of this force assembled in battle array, supported by its sister force, the Volunteer Artillery. But we look in vain for an adequate force of cavalry—that powerful arm which has so often proved the seal of victory.

A small body of regular cavalry, acknowledged by all nations to be the finest in the world,* and a handful of yeomanry cavalry, are all that can be produced to act as the mainspring of this vast army now forming throughout our country.

Now we may assume that the efficiency of a cavalry soldier consists in *four* essentials.

1. He must be *well mounted.*
2. Must have a thorough knowledge of his *drill.*
3. Skilled in the use of his weapons.
4. A skilful rider. And we may take the two extremes of these four essentials as equal to the two means.

Therefore as our small band of regular cavalry, which is the admiration of the world, is supplied by recruits taken for the most part from mechanics out of work, there cannot be a doubt that our country farmers and their sons excel this class of men in the 1st and 4th essentials of a cavalry soldier; and since these are equal to the other two essentials, it follows that they possess the *qualifications* and *means* of forming a superior body of cavalry to that of our regulars; in other words, they would be the finest cavalry in the world!

Whether they are so or not must depend upon the manipulation of the materials they have in their possession.

Now, England could produce 30,000 of these men who have it in their power (as has been shown) to supply the want of cavalry which our country is certainly labouring under. And yet they waste their time in many counties (particularly in this) in arguing as to the expediency of forming county *cavalry* or *infantry* corps!

If you with your powerful pen would trace out the line that should be taken in the organisation of these corps, it would materially advance their formation. Trusting that I have not trespassed too much upon your columns, I am, sir,

Your obedient servant,

Jan. 18, 1860. Cantab.

CURIOUS OPTICAL DELUSION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I have received notice from a member of my company that he is going to resign, the reason being that *he cannot close his left eye without closing his right.* Two gentlemen whom I asked to join also gave me the same reason for not doing so, and yet the whole three have perfect vision, and are suitable in every other respect. Will you, therefore, please inform me in your next number what is done in a similar case with recruits in the army, and what are the best means for curing that weakness of the eyelids, I suppose I may call it, and oblige your obedient servant,

A Captain of Rifle Volunteers.†

Liverpool, Jan. 23, 1860.

WHICH IS THE RIGHT DRILL-BOOK?

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The question "Which is the right Drill-book?" put by a Volunteer in your paper is easily answered.

The services of the Volunteers were accepted by the Secretary of State at War on certain conditions, which are laid down in a circular issued to Lords-Lieutenants of counties. In this circular it is expressly stated that the Rifle Volunteers are to be drilled according to the "Drill, &c., for Volunteer Rifle Corps." This book has been drawn up by an officer of high rank and great experience in the Army, and while the drill has been simplified by the omission of some of the facings, the "secure arms," in the Manual, and some motions in the platoon exercise, yet everything *absolutely necessary* has been retained, and I have no doubt that any good battalion drill could take six companies who had *never learned anything but the simple lessons in the Volunteer Drill-book*, and make them go through any of the most useful battalion evolutions, —those which a battalion in brigade would probably have to do on service. In fact, the only trouble would be with the officers and covering sergeants (I suppose them all to be Volunteers), to whom full explanations would of course have to be given previous to each movement. I would therefore advise "Volunteer" and his comrades to stick to their authorised drill-books instead of burning them, and if their sergeant does not choose to take the trouble of teaching the prescribed drill, to send him to the "right about." Your obedient servant,

S. W. H. R.

We learn from Central India that Captain Mayne is to raise two more regiments of Mayne's Horse for service in the country about Goonah. They will be organised on a new principle. Captain Mayne will command all three regiments, and have a captain and adjutant with each, with one or two young officers attached. He was to commence recruiting on his return from Calcutta to Goonah, on the 1st of January.

Captain Leicester Vernon has given notice that, on Tuesday, the 7th February, he will call attention in the House of Commons to the report of the committee on contracts.

Not qualified in every subject, but admitted on special recommendation to fill existing vacancies.

* Beiträge zur Statistik der freien Stadt Frankfurt.

* In the opinion of Sir John Burgoyne and others, our cavalry is *not* the finest in the world. [Ed.]

† The order, "eyes right," would not cure a case of malingering of the strange nature which we here offer to the notice of military surgeons. Their modes of cure are rather rough, but the disease seems to require the heroic treatment. [Ed.]

THE ARMSTRONG GUN.

The *Times* has published an elaborate description of the mode of manufacture of the great weapon invented by Sir William Armstrong, from which we extract the following passages. They relate principally to its relative weight, cost, range, accuracy, and the rate at which it can be produced compared with the old-fashioned smooth-bored artillery—in short, all its essential qualities as a working gun.

The Government, ten months ago, pledged itself by the united exertions of the factories at Elswick and Woolwich to complete 100 Armstrong guns within the last year. Before the close of 1859 upwards of 100 guns had been completed at Woolwich alone, where the work has been so constantly and so successfully urged forward that the rate of manufacture has risen from 5 to 23 guns per week. Up to the present time 113 12-pounder field-guns are already finished there, and in all 220 are more or less advanced towards completion. All these are 12-pounders; but as between Elswick and Woolwich a sufficient number of guns of this calibre has either been already manufactured or is nearly finished to re-arm the whole of our field-batteries, no more of this size are to be made, and both factories will in future concentrate their efforts on heavy, or at least much heavier ordnance.

Allowing for the delay consequent upon the heavy forging of the 25, 40, 70, and 100-pounder guns, such as are now soon to be begun, still Woolwich ought, and we have not the least doubt will, complete its 1000 guns before next Christmas. From Sir William Armstrong's own works at Elswick, in addition to a few heavy guns, two complete 12-pounder field-batteries have been sent to China, with 21 12-pounder guns for boat service, for which from their extreme lightness they are most admirably suited. In addition to this 40 12-pounder guns for the field-batteries are ready, and only waiting to be forwarded to Woolwich for mounting. Two 40-pounder guns are being made per day; while the manufacture of the heavy ordnance has commenced with a 100-pounder. Like Woolwich, the Elswick works have risen also in their rate of production, from about 3 per week to 14, and there is no doubt but that at a pinch, even with their present staffs, Elswick and Woolwich could easily turn out 40 completed guns each week.

The Armstrong gun is in every point of view, except, perhaps, that of mere first cost, the cheapest weapon that has yet been produced. Thus an ordinary 12-pounder field-battery gun costs, in metal and labour, about 200*l*. Its utmost really accurate range is 1400 yards; its weight is 19 cwt., requiring six horses to draw it in the field. It is capable of firing 800 rounds of shot under favourable circumstances, after which number, if it survives so long, it is always condemned and broken up, realising about half its cost as gun metal. The Armstrong 12-pounder gun costs about 250*l*.; its aim is accurate at much more than 5000 yards; its weight is only 8 cwt., and it therefore only requires four horses to move it with the utmost rapidity. Some of those already made have actually fired upwards of 3500 rounds of shot and shell, and are still new guns. For the number of shots in proportion to the cost of the gun, the old muzzle-loader cost 5*s*. for every discharge, the Armstrong only 1*s*. 3*d*., though the former is ineffectual at three quarters of a mile, and the latter unerring at two. The chief and most important saving, however, is in the smaller number of men it requires to work it, and, above all, in the saving of horse labour.

While still retaining the same strength the Armstrong gun could easily be reduced to almost half the weight at which it is now manufactured, but that there are limits to the amount of lightness which is desirable in these guns. The backward recoil of the gun is in exact proportion to the velocity and force with which the shot leaves the breech, and even the 8 cwt. 12-pounder "kicks" to an extent that may render it necessary to strengthen considerably the present form of carriages for field-artillery.

Up to the present time, Sir W. Armstrong has not manufactured any gun with a view of attaining a long range. The range of all the guns on this principle is of course immense, but Sir William's main and almost only object has been to secure perfect accuracy of aim. The gunners who are used to the Armstrong declare that with it they would undertake never once to miss a man at a mile! At one of the factories a strip of board is shown, 22 in. long by 9 in. broad, which, when the gunners were practising, was whitened over and put up as a target at a distance of three-quarters of a mile. Though only just visible at this great range, it was hit three times in four shots. At the Elswick works at Newcastle, a 100-pounder about 11 feet in length, is being manufactured with almost the express view of attaining a long range. This piece, it is anticipated, will have an effective range over 6½ miles. All these tremendous results, it must be remembered, too, are accomplished with little more than one-half the charge of powder used with the present muzzle-loading cannon. The Armstrong shot is of course conical, and about 2½ diameters in length. At the shoulder of the cone is a ring of lead dovetailed into the iron, and a similar one at the base. These are both made about one-sixteenth of an inch larger than the diameter of the bore of the gun, so that the finest lines of the rifling are filled up, and no windage whatever takes place. With an ordinary muzzle-loading 32-pounder, weighing 56 cwt., it requires 10lb. of powder to hit at 3000 yards' distance. An Armstrong 32-pounder, weighing 20 cwt., only takes 5lb. of powder to send its ball nearly 10,000 yards.

There are now six new inventions under the consideration of the War Office, viz: a gun of Sir William Armstrong, one by Commander Scott, R.N., one by Mr. Whitworth, one by Mr. Lancaster, one by Mr. Bashley Brittain, and one by Mr. Jeffries. Which will be the invention eventually chosen we, of course, cannot pretend to say, though it is generally understood that the struggle rests between Mr. Whitworth and Sir William. The former gentleman has himself invented a breech-loading cannon which for strength, simplicity, range, and accuracy is said to surpass even the Armstrong; but this point will be set at rest in a few days, when a public trial of the gun will be made near Liverpool.

Of the two greatest breech-loading guns which have yet been constructed—those of Armstrong and Whitworth—the latter, it is said, cannot be burst, while it is certain that no one has ever yet succeeded in bursting the former. So immense, indeed, is the strength of the Armstrong gun, that a piece of iron cut from it at any part bears a tensile strain of no less than 33 *tons* to the square inch.

In the *Times* will be found lengthy and lucid details of the actual processes of manufacture, and of the principles of construction, to which we cannot now give insertion, even if they possessed greater interest. There is now no secret about the Armstrong gun. All the world knows it; but neither France nor any other power will set to work to make Armstrong guns, for many reasons—among which may be their faith in their own artillery—a faith which our artillery shared with them, and from which we are barely driven by the Armstrong gun. Hitherto there was much mystery observed at Woolwich in regard to these cannon. Not very long ago, indeed, when the Prince of Prussia, armed with a special order, visited Woolwich, Sir Richard Dacres and his staff, who were in attendance on his Royal Highness, were refused permission to enter the factories. If report is to be trusted, the members of the Defence Commission were treated in the same way—they may now read all about it in the *Times*.

LORD CLYDE ON THE BOMBAY ARMY.

On Friday, December 2nd, the Commander-in-Chief of the army in India—having arrived the night before from Agra, where the Governor-General had just held his grand durbar of native rajahs and chiefs—ordered a review of all the troops now stationed in Morar, the cantonment some four miles from Gwalior.

It was a cold foggy morning, but at a quarter before seven o'clock there was Lord Clyde, vigorous, efficient, energetic as a man who had not seen half his service, or his years; and there, as the fog cleared off were to be seen on the wide, flat, irregular ground, between the little cantonments and the distant hills, many regiments of British and native troops drawn up in highest order and expectation, waiting the inspection—which all knew would be no play-work—of their Commander-in-Chief.

Nearest the houses, tents, and trees, on their various parade-grounds, stood the 71st Highland Light Infantry, a fine corps, who have seen much service, not only in the Crimea, but in India. The 3rd Bengal Europeans, the Bengal Artillery, the 9th Bombay Native Infantry came next; further off, half-way up a rising ground, a compact group of the Gwalior Infantry; and on the top, against the sky, were visible the Royal Artillery and the fluttering pennons of the 17th Lancers. At a quarter before 7 o'clock Lord Clyde, with General Sir Robert Napier (Bengal Engineers), and their staff, were on the ground. The Commander-in-Chief left his carriage, and with a commanding-officer of each regiment walked down the lines, remarked on them, spoke to the men, and showed a thorough knowledge of their antecedents, as well as a regard for their welfare. His carriage, and his staff on horseback, were then seen driving and galloping to the brow of the hill, where he inspected the Royal Artillery, the 17th Lancers, and the Gwalior Infantry; and—completing a large circle of some two miles—he came at last to the 9th Bombay Native Infantry, the only regiment which represents the Bombay army in this distant station.

His lordship's remarks on this regiment, to Major Evans, its commanding-officer, were so complimentary—not only to it, and to its officers, but to the whole Bombay army—that I think they ought not to be lost; I therefore do my best to record, as nearly as I can remember, words which must warm the heart of every member of the Bombay native army.

The Commander-in-Chief said:

"Major Evans,—Yours is the first regiment of the Bombay army I have had the pleasure of meeting since the mutiny, and I have now the opportunity I have long sought of thanking you and your fine regiment for its soldier-like appearance, with which I can scarcely find words to express my entire satisfaction. But I am more especially pleased to have an opportunity of thanking the 9th Regiment of Bombay N.I., not only for its eminent services in the engagements it had with the enemy in the Sappoora range of hills, in the hot season of 1858, but for its stedfast, loyal, and soldierly conduct, when sorely tempted and tried during the storm that so lately raged over the greater part of Her Majesty's dominions in India. To the whole native army of Bombay I express my warm acknowledgments. Not only I, but the Governor-General of India, the Government at home, Her Majesty the Queen, and the people of England watched with great anxiety the conduct of the Bombay army during the critical year of the revolt, and now gladly acknowledge and thank the Bombay native army for that strict discipline which I first observed when serving with some of you at Peshawur, ten years ago, and which has kept you true to your duty, stedfast in your obedience, and loyal to the Government when the whole Bengal army, as if in a fit of insanity, threw itself into a state of open and defiant mutiny. That wide-spread, ill-concerted mutiny, hopeless as it was from the first, the gigantic strength of the British Government was soon able to crush. And the Bombay army, not only by remaining faithful, as it did, but by fighting bravely, side by side with some of the best regiments of our European soldiers, contributed in no small degree to the pacification of the country, and to the tranquillity which reigns throughout India. Major Evans, kindly explain to your native officers and men what I have now said, for I know little of the native languages. Let them clearly understand, that in acknowledging their services I wish my thanks to be conveyed, through them, to the whole Bombay army; and now, wishing you all a pleasant march to your own presidency, I bid you farewell."

It was thus his lordship spoke, or words to this effect. A greater compliment from a greater man the Bombay Native Army has probably seldom received.

A General Order from the Commander-in-Chief has also been published, in which he warmly eulogises the conduct of the Madras and Bombay armies during recent operations.

By the last mail the Bombay Government received an outline plan of defence for Bombay in the event of hostilities from any quarter.

The *Moniteur* announces that Vice-Admiral Le Barbier de Tinan has been appointed Commander of the squadron of of evolutions, replacing Admiral Desfossés.

THE ARMY RESERVE FORCE.

The Assistant Under-Secretary of th War Department has issued a circular to the staff officers of pensioners in the several districts, accompanied by the Act passed at the end of the last session, also the warrant and regulations for an Army Reserve Force, calling the attention f the officers to the course which the Secretary of State for War requests them to adopt for making known the conditions of this service, and inducing suitable persons to engage in it:—

"1. There are herewith forwarded copies of notices to be posted in the most public places at the head-quarters of your district, and at all out-stations, calling upon such men as may be disposed to volunteer, and have the necessary qualifications for this force, to present themselves before you at the pay stations nearest their respective residences for instructions.

"2. Though the notice excludes pensioners, that is not to prevent men who have been discharged with temporary pensions from volunteering after their pensions have ceased; but as only those who are in good health can be approved for this service, should you find any who, from their appearance, are obviously unfit, you will at once inform them that they cannot be taken, but that, should they recover, they may be examined in future years.

"3. If any of the others appear likely to fulfil the required conditions with respect to service, character, and efficiency, you will note their addresses, and inform them that in the course of a few weeks they will be summoned by notice through the post-office to your head-quarters for the purpose of being medically inspected.

"4. Pending the arrangements which will thereafter be necessary for this inspection, you will cause careful inquiries to be made by means of your out-station sergeants and other persons to whom these volunteers may be known, as to their character and habits, particularly whether they have any fixed residence or employment, so as to render it probable that they can always be found when wanted.

"5. It will also be necessary that you satisfy yourself that they really are the persons they represent themselves to be; for as the parchment certificate of service contains no exact description of a soldier, it might, without some check of this kind, be fraudulently used by deserters or others to attain the pension and advantages corresponding to service which they were not entitled to reckon.

"6. These inquiries having been completed, you will transmit to this office a list of all who have applied to you for enrolment, and have fulfilled the required conditions as to service; and you will note therein your objections to any whom you have found unsuitable for the force, when arrangements will be made with the medical department to send round proper officers to inspect the remainder.

"7. Each Volunteer who is at such medical examination found fit for service must be attested for the force before a magistrate, when he will become entitled to 1*l*. of enrolment money, from which he must immediately provide himself with one pair of ankle boots, two shirts, two pairs of socks, and a stock, to be retained in your district store till the first period of training; and you will then inform him that, on appearing before you at the pension head-quarters, or out-station nearest his residence every quarter, he will, on the production of a receipt and certificate of residence, in the form hereto annexed, be paid the like sum of one pound, without any deduction, except for fines or penalties incurred by him.

"8. You will issue to these men one penny a mile for any distance they have travelled, going to or returning from this inspection, together with one day's pay, at the rate to which they would have been entitled if serving with a regiment; and one-half of these rates may, in each case, be allowed to those who have appeared and been medically rejected. Instructions will shortly be forwarded to you as to the mode of obtaining and accounting for the money required for this purpose.

"9. Before any of the volunteers who have been approved for the reserve are attested, you will read over to them the Act of Parliament under which the force is constituted, and the regulations following thereon, so that they may clearly understand the nature of the duties for which they engage; and before they leave your head-quarters you will note, in red ink, on their parchment certificates that they have been enrolled in the Army Reserve Force of your district, so as to operate as a check on double enrolment; you will also note, in a record book to be kept for the purpose, all the particulars respecting such man who has been enrolled, and also forward his measurement in the accompanying form, that he may be provided with clothing, of which you will soon be furnished with a pattern.

"10. You will also inform each of the volunteers that he must notify, either to yourself or to your nearest out-station sergeant, whose address you will give him, any change in his residence, that he may always be found when required, and that as persons will from time to time be appointed to visit his residence, any default in this respect will readily be detected, and lead to the suspension of his allowance.

"11. When soldiers, on being discharged from their regiments or depôts, express an intention of entering the force, a note will be made to that effect on their parchment certificate by the officer commanding, which they will present to you on joining the district, and which will be your authority for having them medically inspected and enrolled in manner as herein directed for others who may now be in your district.

"12. You will use your best endeavours to make the conditions and advantages of this warrant extensively known over your district, through the medium of the pensioners, in the hopes that a useful reserve force may thus be obtained for Her Majesty's Service."

NATIONAL DEFENCES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Permit me to offer a few remarks on our present position, particularly with reference to certain questions likely to engage the attention of the legislature. Mr. John Bright points triumphantly to the "man across the water" closeted with Mr. Cobden, and issuing commercial treaties, while he at Manchester, at a reform meeting, ventilates the calumny that Englishmen, by becoming soldiers and Volunteer Riflemen, lose a portion of their free spirit! Would to God that good-will and friendly treaties made up the whole

Digitized by Google

picture! But we have a back-ground of facts and acts systematically carried out, which shows that it is not all gold that glitters. France, by her geographical position, is the only European power from which it is possible to apprehend any attack on this country. We have had very recently the strongest proof of how sudden and great an effort France can make for, at a moment when we were told that she could not disarm because she had never armed, she assembled beyond the Alps an army of upwards of 200,000 fighting men. France, within the last few years, has been making gigantic efforts to be as strong as England at sea. She has greatly increased her naval power; for during the last year she has spent on her Navy alone two hundred and forty millions of francs, her dockyards and arsenals are ringing with the notes of preparation (to carry out the commercial treaty?), the system of railroads throughout France are being centralised at Cherbourg, so as rapidly to transport soldiers from all parts of the country to that immense naval arsenal which she has lately constructed, capable of holding fleets of steamships of the line and steam-transports, under the protection of almost impregnable fortresses, and where there are arrangements of the most complete and elaborate character for embarking in the shortest possible time a very large army (of commercial men?); and lastly, France is *now* building a fleet of steam-transports of the largest class, each capable of holding 2000 men (or 3000 for a short voyage), with a fair proportion of artillery. With these facts before us, surely it is patriotic to wish England placed in a calm and impregnable position, *ready* both to carry out treaties or meet invasion the day after signature or declaration, at the least possible outlay or expenditure. 1. England, to hold her own on the seas, should have powerful fleets, with steam-gunboats, as suggested by Rear-Admiral Randolph; 2. Her capital, dockyards, and commercial ports and harbours should be placed *in such a state of defence* that no sudden dash at them could inflict a serious or vital injury; 3. To provide organised bodies of men for these defensive works, so as to enable the whole of the regular forces to take the field against any foe. Now with reference to the defensive works. Is it likely that any foreign foe who has the secret intention of invading England would give us five years to spend ten millions in raising gigantic permanent fortifications, on purpose to render his plans a failure? Can it be seriously thought that the regular siege of any fortified place in England would be undertaken when the besieger must of necessity have his base of operations on the other side of the Channel? So, strong, massive earthen forts, with very wide and deep ditches, always filled with water when available, and when water cannot possibly be obtained, judiciously strengthened with caponieres, palisades, &c., applying all the resources of able engineers, heavily armed with artillery, are proposed; because these works would answer every purpose, at about one-tenth of the cost of permanent works built of masonry, and if covered with good sod-work, would last, with slight repairs, for the next century. They could be rapidly raised by a few thousand navvies, under engineer officers; and they would hold out sufficiently long against any invading force, until the whole available resources of the country could be brought to crush the invader. Silistria has taught us what an obstacle weak defences can present to a large and disciplined army; and surely the defence of the Residency at Lucknow shows what may be expected from Englishmen. Great care should be taken in fortifying the mouths of rivers and harbours, where the national property and commerce are exposed, and the works covering our capital and dockyards should be constructed with an eye to the commanding sites, and at such a distance as to prevent the enemy from firing the public buildings, stores, &c., by means of projectiles, as well as mutually to support each other and sweep every approach to the capital or dockyard with a destructive fire. The lines of Torres Vedras, covering the capital of Portugal, which formed the *ne plus ultra* of the powerful French army under Massena, and from which the tide of war was rolled back broken into Spain, consisted of independent earthen works, so placed as to command and enfilade every approach to the capital, as well as mutually to support each other by a cross or flanking fire. Defensive barracks of stone or masonry capable of holding some 1500 or 2000 men each, might be constructed in the earthen forts around London, &c. (as barrack accommodation is much wanted in England), and a railway laid down connecting them with each other, and the whole with the Aldershot line of railway, so that the troops occupying these barracks might be easily massed at Aldershot for a field day, thus combining the advantage of practical instruction in the rapid transmission of troops by rail from one point to another with the manifest advantage of working them together in very large bodies. With reference to the "organised bodies of men to man these defensive works," wherever they are constructed, there, on the spot, we should have the defenders in the shape of Rifle Volunteers and Local Militia. Allow me, Sir, a few words about each. To each regiment of Rifle Volunteers there might be attached an adjutant, an officer who is either at present on half-pay, or who would go on half-pay, to take the appointment; also, a sergeant-major taken from the regular army. There are many intelligent non-commissioned officers now serving in the Army who would gladly take the position.* Now, if Government gave an annual allowance of 10*s.* for each rifle, or 250*l.* for every 500 rifles mustered, 200*l.* of this might go to the adjutant and 50*l.* to the sergeant-major: this would be a great help; all other expenses being defrayed by the regiment, the colonel of which would naturally be the most influential man, elected by the regiment. The adjutant and sergeant-major being appointed by Government, the former would be responsible to the colonel and the Government for the thorough efficiency of all and everything connected with the regiment; and the whole volunteer force thus organised, and under the supervision of an efficient volunteer permanent staff attached to the Horse Guards, would prove a valuable, efficient, and economical national force. A good local Militia bill, with the ballot substituted for voluntary engagement, would secure to the country a *bonâ fide* force, and the mobilisation of this force might be limited to the time of actual war, the short period when annually called out for training in their respective counties sufficing to keep them in a state available for home defence at a short notice. Thus we should have in these forces men enough to occupy and defend all our strategic points and defensive works; but it would not be advisable to leave these forts, heavily armed with artillery, solely to the Volunteer or Militia Artillery, their training only fits them *up to a certain point* to act as artillery men. For artillery to be really effective, there must be thoroughly disciplined and intelligent gunners, well up in the manipulation of the different machines used in artillery service, as well as thoroughly instructed in the manifold details and duties of their profession, a knowledge of the Armstrong gun, &c. All artillerymen, who do not undergo a systematic training, so as to have a well grounded practical knowledge of their particular arm, are, after all, only such in name and dress. To wear a "busby" does not constitute an artilleryman. The aim of Government, under its present able administration, is manifestly to increase this powerful arm, and to make it more effective. The French, during the last few years, have lavished unceasing energy and talent on the improvement of *their numerous artillery*. The following comparison will show how *weak* England is in this particular arm.

	Artillery-men.	Field Batteries.	Guns.	Grand Total. Fld. Gns.
Russia	44,000	with 192	of 8	each 1536
Austria	51,000	with 168	of 8	each 1344
France	60,000	with 197	of 6	each 1182
Prussia	37,000	with 108	of 8	each 864
England { Home 11,524 / Colonies 12,228 }	23,752	with 33 / 30	63 of	6 each 378

So that for the defence of Great Britain, Ireland, and the Channel Islands we have only 11,524 artillerymen, with 33 field batteries. It should not be forgotten that it takes a much longer time to turn out an artilleryman than to make an infantry or cavalry soldier; hence the manifest wisdom of the decision to largely increase this distinguished and powerful arm of the Service.

Your obedient servant,
Camp, Jan. 24, 1860. PORTFIRE.

* Unfortunately the Army has not got them to spare. [ED.]

PAYMASTERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

The medical officers of the army, whose zeal and intelligence deserve all praise, and whose heavy responsibilities require the greatest amount of ability and perseverance, have very properly received from the hands of the Government a reward to which all classes of officers admit that they were very fairly entitled. That the Paymasters, concerning whose laborious duties and great liabilities no question has ever arisen, have not been successful in their endeavours to obtain a similar meed of justice, is, I think, entirely attributable to the want of some organisation, by which the wishes of their whole body might have been made known to Her Majesty's Government.

I heard the other day, on very good authority, that early last year a memorial was presented to the then Secretary of State for War in the name of the Paymasters of the Service, praying for an amelioration of their condition, and that General Peel was inclined to take the case under his favourable consideration. Several officers, however, who had not been consulted in the preparation of this memorial, and who found that its prayers did not touch their own peculiar grievances, besieged the War Minister with individual applications. The consequence of this line of conduct has been undoubtedly to weaken the interest which the War Office had taken in the subject, and (I much fear) to reduce the new Warrant to proportions of much smaller dimensions than those assigned to it by your journal.

Now, not wishing entirely to approve the conduct of those Paymasters who constituted themselves the exponents of their class, and not wholly condemning others who, dissatisfied that their opinions had not been consulted, preferred that the Warrant should be jeopardised rather than see their own cases untouched by its operations, I will trespass a little longer on your space to suggest to the Paymasters of the Army that by united action any grievances of which they may have to complain, after the issue of the forthcoming Warrant, may be brought prominently to the notice of Government. I of course do not for one moment propose anything so unmilitary or insubordinate as a unanimous demand for the redress of imaginary (or even real) wrongs; but I do think if the opinions of *all* the Paymasters could be obtained on the best scheme for the amelioration (or I should rather say rectification) of their position, that a plan based on those opinions and submitted to the Secretary of State for War, would meet with very favourable consideration.

Until we know exactly the improvements which the new Warrant will effect, it would be hardly useful to take any steps in the matter; but I feel convinced that the ventilation of the subject in your able and widely-circulated journal will greatly facilitate the adoption of any measures which at a future time may be deemed expedient. I enclose my card, and am, Sir, Your obedient servant,

ONE OF THEM.

VETERINARY SURGEONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I respectfully beg permission to draw your attention to the late Royal Warrant published in *Hart's Army List* for last September, page 99, dated 1st of July last, raising the position and rank, and increasing the pay and pension, of Veterinary Surgeons serving in the Royal Army. From the kind interest you take in the Indian Army, I am induced to hope you will kindly condescend to notice this letter in the ARMY AND NAVY GAZETTE in behalf of the Veterinary Surgeons in Her Majesty's Indian Army participating in the benefit of this new Warrant. Permit me to draw a brief outline of the relative position of the Veterinary Surgeons of the Royal and Indian Army since the date of this new Warrant, and you will see the advantages are now all on the side of the Veterinary Surgeons serving in the Royal Army. To the striking inequality in the rates of pay, pension, and social position, I would solicit your kind attention.

In the Royal Army, for instance, since the date of this Royal Warrant, dated 1st of July, 1859, a Veterinary Surgeon receives, on entering the Service, 10*s.* a-day; after five years, 11*s.* 6*d.*, or, if promoted to be a First-Class Veterinary Surgeon, 12*s.* 6*d.* a-day; after ten years, 13*s.*, or, if promoted, 14*s.* 6*d.* a-day; after fifteen years, 15*s.* 6*d.*, or, if promoted, 21*s.* a-day, with the honorary rank of Captain; after twenty years, 17*s.* and 21*s.*, with the rank of Major; after twenty-five years, 20*s.* and 23*s.*, with an additional allowance according to their rank; whilst the Veterinary Surgeon in Her Majesty's Indian Army, for the first ten years, ranks as Cornet, and receives 8*s.* a-day; after ten, or under twenty, years' service, 9*s.* a day, and ranks as Lieutenant; after twenty years' service, 14*s.* 7*d.* a-day, and ranks as a Captain. Thus a Veterinary Surgeon in the Royal Army, after ten years' service, is entitled to a higher rate of pay than a Veterinary Surgeon in Her Majesty's Indian army after nineteen years: also an afflicting disparity prevails with regard to invalid pensions. In the Royal Army a Veterinary Surgeon, compelled to invalid from ill health, or his wounds, receives, after five years' service, 7*s.* a day; after ten years, 8*s.* 6*d.*; or should he have been promoted to a First-class Veterinary Surgeon, 9*s.* 6*d.* a day: after fifteen years, 9*s.* 6*d.*, or if promoted, 10*s.* 6*d.* a day; after twenty years, 11*s.* 6*d.*, or 14*s.* if promoted; and after twenty-five years, 13*s.*, or 15*s.* if he was promoted to the staff before retiring.

In Her Majesty's Indian service, on the other hand, a Veterinary Surgeon compelled to invalid from sickness or wounds, of five years' service, would receive 3*s.* a day; after ten years (passed in India on duty), 4*s.* a day; after fifteen years and four months passed in India on duty, 6*s.* 6*d.* a day; after twenty years actual duty passed in India, 10*s.* 6*d.* a day; after twenty-five years, 250*l.*, and after twenty-eight years' service passed on duty in India, 800*l.* a year. If there be common justice in the world the Veterinary Surgeon in the Indian Army ought to receive the same pay, pension, and rank, as their professional brethren now do in the Royal Army. This honest simple statement I trust will suffice, and I pray, dear sir, you will say something in behalf of the Veterinary Surgeon in the Indian Army. In India our case is peculiarly hard. We progress in rank, as you will see, very slowly every ten years, and then we just get a shilling or two difference of pay, and we are compelled to pay our share to all the expenses of an Indian cavalry mess, share of regimental parties, balls, &c., which keeps us I may say, always in debt, whilst other officers of the same regiment advance quicker in rank, and pay, and allowance. The Surgeons and Assistants' position in both armies have been so much improved. The Paymaster, Quartermaster, and the Veterinary Surgeon in the Royal Army, have been also so much improved, and surely the Veterinary Surgeon's position in the Indian Army ought to be improved. They have no funds to help them as their medical brethren in the Indian Army have. The military fund merely grants our wives and children a pension, which we pay high for. And how much must a Veterinary Surgeon, forced to invalid from the Indian Army on 3*s.*, 4*s.*, 6*s.* 6*d.*, or 10*s.* 6*d.* a day, feel the heavy subscription cut from his pension on account of the military fund—eight to fifteen pounds a year. I make bold to leave our case in your hands, to draw the attention of the authorities to place us on the same footing as regards pay, pension, and rank as now exists in the Royal Army. We have no Principal Veterinary Surgeon to represent us at the Horse Guards.

ARMY DESERTIONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A Parliamentary return of last May, giving the enlistments for 1858 as 91,971, and the desertions as 20,234, whilst on Dec. 31, of that year, only 42,234 of the above recruits remained effective in the ranks (thus leaving us to suppose that 29,377 of the above grand total paid smart money or purchased their discharge), presents such a fearful *hiatus*, that one is constrained to put the question to oneself—Can such a lax and demoralising system as this be remedied? I fearlessly answer, yes. Let each recruit receive on attestation 10*s.*, and 10*s.* more, as extra pay, within the fortnight of his joining his depôt, and let the remainder of his bounty be placed to his credit in the regimental savings' bank, with a proviso that the same be not drawn by him therefrom, *pro rata*, within less than three years subsequent to his attestation. This would form with thousands of lads a stimulus to economy, and tempt them to add to so goodly a nucleus—the interest of such increasing *pari passu* with their incremental deposits thereto. It would, moreover, prevent the present wicked waste of the bounty, beneficial now only to publicans, and so detrimental to discipline and sobriety; for the constant joining of recruits keeps the men constantly drunk, and saps, too, the *morale* of a corps. The chief inducement to fictitious enlistment will also thus be avoided, and the public thereby advantaged proportionately.—I am, Sir, yours truly,

EMERITUS.

LORD MELVILLE AND THE VOLUNTEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Lord Melville's reported speech in Scotland, reflecting on the Volunteers as an inefficient force, and unworthy of being commanded by a general officer, would lead your readers to imagine that the British Volunteers were inferior to those of other countries where, as in Portugal for instance, during the commencement of the Peninsular war, the Portuguese Volunteers when brigaded with British troops fought in a manner that surprised their friends, as well as their foes, not only aiding in repelling the foes that invaded their country, but in pursuing the veterans of the First Napoleon over the Pyrenees to their own soil, and there terminating a war that devasted Europe for such a lengthened period.

Having aided in the organisation of those troops, and witnessed on many occasions their efficiency in the field, I hope, with your aid, that our authorities in this country may pursue a similar course and brigade these new levies with any troops of the line, a militia that may be stationed in their respective neighbourhoods; they will then, I'll answer for it, not be found less worthy than (these raw Portuguese levies) of being commanded by British generals, more especially if they are properly drilled into a knowledge of their duties by efficient officers and non-commissioned officers from the foot-guards or line. These ought to be provided by Government, as well as convenient shooting-grounds for target practice, attention to these

Digitized by Google

essential points being indispensable. The Volunteers will then have a confidence in themselves that will place them beyond the power of discouragement by such speeches as that of the noble lord; for it should be borne in mind that when coming evils are casting their shadows before, and are looming in the distance, the imagination is frequently acted upon by such speeches in a favourable or unfavourable manner—*the fear of ill* being often worse than *the ill we fear*, as the appearance of strength has on the other hand frequently a moral effect more imposing than strength itself.

Hoping, for the sake of the country and of our free institutions, that these sentiments may be duly impressed upon our rulers through your columns, I am, sir, your very obedient servant, JOHN SCOTT LILLIE.

Jan. 25, 1860.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—According to the report of a speech made by a general officer at a late public meeting in Edinburgh, he expressed himself as follows: "You can never make efficient this, which I call loose and useless, Volunteer force," and again: "The Volunteer force can never be efficient in the field; they are perfectly useless, and no General would command them!"

In opposition to the above, which cannot but excite regret and surprise, I can inform the gentlemen who have so patriotically enrolled themselves as Volunteers, that if they do not, after a few days' embodiment, become most "useful and efficient" auxiliaries to the regular Army, it will be the fault of inefficient instructors, and not of the Volunteers.

The Militia of Nova Scotia, when I was there, were only called out for four days in the year, and on the 4th day of their annual training I saw them move in brigade with the 52nd Regiment and Rifle Brigade, under Lieut.-General Sir Harry Smith.

I likewise saw a Militia Corps in England on the 26th day of their *first* annual training, fourteen days of which it rained nearly incessantly, perform every movement that a line regiment could do; while, as artillery, they loaded, fired, and exercised garrison and field guns, with quickness and precision, and without the occurrence of the slightest accident. I am, sir, your obedient servant,

D. MACDOUGALL.

112, Eaton Square, Jan. 26, 1860.

ASSISTANT-ENGINEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The correspondent of the *Devonport and Plymouth Telegraph*, whose letter you quoted, was right in stating that the Admiralty circular of the 10th December, 1859, is obnoxious to Naval Assistant-Engineers. Its effects must ultimately be as injurious upon the Service as it will be upon our class. What can be thought of a circular which renders a quarter-deck officer liable to be ordered to repair a water-closet—which, in fact, places us as at the disposal of the ship's armourers, blacksmiths, &c., and which deprives us of any right to the leisure time that is enjoyed by both officers and crew? Besides, it comes to us under false pretences; for only those who are well acquainted with the Service can know that they might not get a day's check pay in ten years for such extra duties, though continually engaged in them. Has not nearly every ship in the navy her own engineers to make good her defects? But it is only when employed away from our own ship that extra pay is granted.

Lastly, we are told that ten hours of such employment—neither more nor less—shall constitute a day's work. Where can the Government expect to find respectable and educated engineers who will take upon themselves the responsible charge of the valuable and easily deranged machinery of a man-of-war while such regulations as this are in existence, in addition to our many other just causes of complaint? I am, sir, yours very obediently,

Portsmouth, Jan. 21, 1860. ASSISTANT-ENGINEER.

UNITED SERVICE INSTITUTION.—An interesting lecture was delivered at the United Service Institution, Whitehall Yard, on Friday afternoon, 20th inst., by J. Bird, Esq., M.D., Captain Fishbourne, R.N., in the chair. The subject chosen was, "the Military and Sanitary conditions of the Roman Armies, and the causes of the decay of the Legions." Few nations were so mindful of the health, discipline, and the general welfare of their troops as the Romans. Recruits were selected from the huntsmen, who gained their subsistence from hard and laborious work, so that although much inferior to the Gauls in stature, the Roman troops for nine hundred years were considered invincible. In the art of warfare the Greeks were their preceptors, from them they derived the foundation of all their military institutions. Before entering the army the recruit was tested as to his strength and mental capacity. He was not considered fit to enter the ranks without undergoing daily exercise for four months. The sanitary arrangements were never lost sight of. Frequent change of camp, abundance of corn, wine, and vinegar, and the utmost attention in summer and winter, served to chase away all signs of disease. In fact, a close student of our best Roman authors will find that all the sanitary measures, lately so powerfully and ably advocated by the press of modern times, and now carried out in the British army, were perfectly well known and acted on by the great Roman generals. But, ere long luxury weakened the strength of the Roman troops. Mercenaries filled the legions hitherto considered invincible, and from this and other causes we may ourselves in this day draw a useful lesson in keeping up the physical and moral standard of our troops, and being in a state of constant preparation for war.

The will of the late General Sir Joseph Thackwell, G.C.B., has just been proved. By a codicil, dated the day before his death, he deprives his eldest son, Captain Thackwell, the author of the "Second Sikh War, in 1848-9," and now a barrister-at-law, of all the property left him in a former will, including Aghada Hall, Cork, and Conneragh House, Waterford, and gives it to trustees in trust for his grandchildren, who must be educated in the tenets of the Protestant religion. Captain Thackwell had been received into the Roman Catholic Church only a short time previous to Sir Joseph's decease.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BARWELL—Dec. 5, at Bareilly, East Indies, the wife of Lieutenant-Colonel Charles A. Barwell, of a son.

BAYLY—Jan. 23, at Brighton, the wife of Captain Abingdon Bayly, Assistant-Auditor-General, Bombay, of a daughter.

CHILD—Jan. 19, at Goldsmid Road, Brighton, the wife of Septimus Child, Esq., H.M.I.N., of a son.

GRANT—Jan. 23, at the Royal Clarence Yard, Gosport, the wife of Thomas G. Grant, Esq., of a son.

GRIFFITHS—Jan. 20, at Woolwich, the wife of Lieutenant Leonard Griffiths, Royal Artillery, of a daughter.

STARKEY—Jan. 22, at Wrenbury Hall, Cheshire, the wife of Major Starkey, of a son.

THORNTON—Jan. 21, at 4, Cassillis Street, Ayr, the wife of Captain C. E. Thornton, Staff Officer of Pensioners, prematurely, of twin daughters, stillborn.

WICKHAM—Jan. 22, at Bath, the wife of Captain E. T. Wickham, 61st Foot, of a son.

MARRIAGES.

CAMPBELL—BOYD—Nov. 3, at Sydney, Australia, Major James Campbell, 50th Regiment, M.N.I., to Margaret Alexina, daughter of the late John Boyd, Esq., of Broadmeadows, Selkirkshire, Scotland.

COPLAND—RONALD—Jan. 19, at St. Thomas's Church, Portman Square, by the incumbent, Rev. Henry Lumsden, Alexander Lester Copland, Esq., late Captain in H.M.'s 57th Regiment, to Rowena Laura, daughter of Rowand Ronald, Esq., of Manchester Square.

ELLIOTT—FRY—Jan. 19, at Highfield, near Southampton, John Elliott, Esq., to Rosa Eleanor, third daughter of the late Captain John Fry, 11th Regiment.

FITZROY—STRANGE—Dec. 6, at Madras, Captain Cavendish FitzRoy, of the 68th Light Infantry, son of Lord Charles FitzRoy, and Aide-de-Camp to the Governor of Madras, to Mary, eldest daughter of Lumsden Strange, Esq., of the Sudr Court of Madras, and granddaughter of the late Sir Thomas Strange, formerly Chief Justice of Madras.

NICOLLS—SICKLEMORE—Jan. 26, at St. Lawrence Church, Isle of Thanet, Kent, by the Rev. John Evans, A.M., Chaplain of the Tower, London, and Secretary to the Christian Knowledge Society, assisted by the Rev. F. G. Hazlewood, LL.B., curate, Captain R. M. Nicolls, late of the 65th Regiment, youngest son of the late Colonel W. B. Nicolls, and nephew of General Sir Edward Nicolls, K.C.B., to Catherine, eldest daughter of the Rev. G. W. Sicklemore, A.M., of Cleve and Nether Court, vicar of St. Lawrence.

SCHREIBER—CLARKE—Jan. 19, at Aglish Church, county Cork, Ireland, by the Rev. William Colbourne, William Thomas Schreiber, of Armagh House, county Cork, Esq., second surviving son of the late Lieutenant-Colonel James Alfred Schreiber, formerly of the 11th Hussars, and of the Hill House, Melton, Suffolk, to Helena Eveleen, eldest daughter of William Clarke, of Farren Lodge, county Cork, Esq.

SINGLETON—CHRISTIE—Jan. 23, at Hillend House, Clackmannanshire, N.B., William Singleton, Esq., M.D., Surgeon H.M.'s 47th Regment, second son of M. Singleton, Esq., R.M., Castleblancy, county Monaghan, to Margaret Mary Caroline, eldest daughter of Captain J. Christie, late of the Highland Borderers, and H.M.'s Indian Army.

STEWARD—HAMILTON—Dec. 15, at St. Thomas's Church, Ghazeepoore, Bengal, by the Rev. A. D. Nicholson, chaplain, Charles S. Steward, Esq., H.M.'s 4th Madras Light Cavalry, to Eliza Ducarel Constance, second daughter of Henry C. Hamilton, Esq., H.M.'s Bengal Civil Service.

WARD—DAVIES—Nov. 19, at St. John's Church, Calcutta, Lieutenant David Ward, Bengal Engineers, to Caroline, eldest daughter of the late J. M. Davies, Esq., of the Bombay Civil Service.

WARRY—STONE—Jan. 24, at Bathwick Church, Bath, by the Rev. W. C. Magee, Major Warry, Staff, 10th Depôt Battalion, Colchester, eldest surviving son of W. R. Warry, Esq., of Martock, Somerset, to Catherine, only surviving child of the late John Stone, Esq., of Lower Upham, Wilts, and Sydney House, Bath.

WILLIAMS—BRUCE—Jan. 19, at the Abbey Church, Great Malvern, by the Rev. Robert Harkness, M.A., incumbent of Trinity Church, assisted by the Rev. H. G. de Bunsen, M.A., Edward C. S. Williams, Esq., Captain Bengal Engineers, to Charlotte Clementina, eldest daughter of Thomas Bruce, Esq., of Arnot, N.B.

DEATHS.

BOAKE—Jan. 17, at Hastings, aged 42, Catherine Mary, the beloved wife of the Rev. Barcroft Boake, B.A., Principal of Queen's College, Colombo, Ceylon, and eldest daughter of Major-General Slade, Royal Engineers.

CALDWELL—Dec. 11, at Sealkote, Bengal, in the 34th year of his age, Lieutenant George Ross Caldwell, 7th Dragoon Guards, second son of the late Lieutenant John Caldwell, H.P. 2nd West India Regiment, of Kew Green, Surrey, and Mount Pleasant, Jamaica.

CAMPBELL—Jan. 16, at Gravesend, Lieutenant W. C. Deans Campbell, 6th European Regiment, Bengal Army, eldest son of John Deans Campbell, Esq., of Corraith, Ayrshire, Scotland.

CAMPBELL—At Pentridge Rectory, Dorset, Margaret Lowther, widow of Lieutenant-Colonel Adam Gordon Campbell, formerly commanding Her Majesty's 16th Regiment of Foot.

COLMAN—Jan. 20, Paymaster Charles E. Colman, of H.M.'s ship, Edinburgh, aged 42.

CURTIS—Jan. 25, at East Cosham, Hants, the residence of his grandfather, Admiral Sir Lucius Curtis, Bart., C. B. Lucius Irwine Curtis, eldest son of the late Roger William Curtis, Esq., aged three years and seven months.

DUNCAN—Nov. 27th, at Malligaum, Khandeish, aged 28, George Munro Duncan, Captain Bombay Engineers, son of Alexander Duncan, Esq., of 11, Ladbroke Villas, Notting-hill, late Superintending-Surgeon, Bombay Presidency.

EDGELL—Jan. 23, at Ellough Parsonage, Suffolk, Lawrence, youngest son of Major R. J. Edgell, aged 1 year and 23 days.

EVEREST—Jan. 24, at 10, Westbourne Street, Hyde Park Gardens, Benigna Edith, the infant daughter of Colonel and Mrs. Everest.

HARRIS—Jan. 16, Lieutenant William D. Harris, suddenly, at Jersey, aged 35.

HASLEWOOD—Jan. 22, at 28, Manchester Street, Manchester Square, Major Alexander Malet Haslewood, Bombay Army, aged 49.

HENDERSON—Jan 20, at Dawlish, Maud Thomasina, the youngest daughter of Rear-Admiral Thomas Henderson.

HOLMES—Jan. 17, suddenly, at Belcos, county Fermanagh, Benjamin Hayes Holmes, Esq., Resident Magistrate for the county, and surviving brother of Lieut.-Colonel Holmes, K.H., formerly Deputy-Inspector-General of Constabulary in Ireland, deeply regretted.

HOPKINS—Jan. 21, at his residence, Glan Conway, Denbighshire, Edward Jervis Hopkins, Esq., R.N., aged 62.

HOSKINS—Jan. 21, of lingering paralysis, William Henry, younger son of Captain Hoskins, R.N., of Broxbourne House, Herts.

HOWARD—Jan. 22, at Cullompton, Devon, Fred. Howard, Esq., surgeon, in the 36th year of his age, late of the Royal Artillery, and eldest son of Fred. Robt. Howard, Esq., of Horsham, Sussex.

JULIAN—Jan. 15, at No. 2, Wesleyan Terrace, East India Road, London, Georgina Louisa, widow of the late Captain Julian, R.N., and sister of Captain Hanchett, formerly Inspector-General of the Coast-Guard, greatly respected and deeply lamented. Her end was peace.

NELTHORPE—Jan. 20, at Scawby-hall, Lincolnshire, of pneumonia, Henry Nelthorpe, Esq., late of H.M.'s 9th Lancers, only brother of Sir John Nelthorpe, Bart., aged 38.

PARRY—Jan. 21st, at his residence, 5, Belgrave-place, Brighton, Charles Henry Parry, Esq., of Summer-hill, Bath, eldest brother of the late Rear-Admiral Sir W. Edward Parry.

ROLLESTON—Jan. 1, at Peterborough, Canada West, after a few days' illness, and most deeply mourned by his family, S. M. Rolleston, Esq., the only and dearly beloved son of James Rolleston, Esq., Commander, R.N.

SCOTT—Jan. 21st, at Brighton, Elizabeth, relict of Captain Colin Campbell Jackson Scott, 32nd Regiment, Native Infantry, Bengal, and eldest daughter of the late George Holden, Esq.

SPERLING—Dec. 16, at Ishapore, near Calcutta, after a few days' illness, aged 61, Major Sperling, late of the 16th Lancers, eldest son of the late Rev. J. Sperling, vicar of great Maplestead, Essex.

SPOOR—Jan. 8, at Gibraltar, aged 33, Captain N. A. Spoor, 25th Regiment (King's Own Borderers).

WOODRIFF—Jan. 20, at 6, Lansdown-road, Old Charlton, of bronchitis, Captain Daniel James Woodriff, R.N., one of the surviving officers on board H.M.S. Bellerophon in the action of Trafalgar, and eldest son of the late Captain Daniel Woodriff, R.N., C.B.

Archibald Cockburn, Esq.
P. Northall Laurie, Esq.
Charles J. Knowles, Esq.

Robert Strachan, Secretary.

LIFE ASSURANCE.—The principles on which this Company conducts its business combine the system of Mutual Assurance with the safety of a large Protecting Capital.

DIVISION OF PROFITS.—The Profits are divided every seven years, *and Nine-tenths (or 90 per cent.) of the Profits are allocated to participating Policies.* At the last investigation in December, 1858, the Profit which was then allocated, as having accrued during the preceding seven years, amounted to upwards of 136,000*l.* Bonuses may be added to the sum Assured, or surrendered for a cash payment, or applied to the reduction of the future Premiums. At last Balance a Prospective Bonus of 1*l.* per cent. per annum was declared in favour of such of the then existing Policies as may become Claims within the next seven years. By this arrangement the advantage of an Annual Division is obtained, without its disadvantages. The same privilege was extended to all new Policies which may become Claims after payment of five annual premiums.

SPECIAL NOTICE.—For the convenience of parties, Tables have been framed on the following new principles:—1. Half Premium System. 2. Assurance and Annuity System. 3. Double Assurance System. Prospectuses, fully detailing these and the other principles of the office, may be had on application to the head office or any of its agents.

RIFLE CORPS.—Policies are not affected by the Assured joining Rifle or Artillery Corps.

FIRE INSURANCE.—The Company INSURES against FIRE Silk, Cotton, Woollen, and Flax Mills, Buildings of all descriptions, Furniture, Stock in Trade, Merchandise, Agricultural Stock, Implements of Husbandry, and effects of every kind, at the lowest rates of Premium corresponding to the risk. Farming Stock is Insured without the Average Clause, and loss and damage by Lightning made good. No Charge for Transfers from other Offices.

64, Princes Street, Edinburgh, Jan. 1860.

DAVID SMITH, Manager.
JOHN OGILVIE, Secretary.

THE STANDARD LIFE ASSURANCE COMPANY. Constituted by Special Acts of Parliament. Established 1825.

GOVERNOR.—His Grace the Duke of BUCCLEUCH and QUEENSBERRY.

DEPUTY GOVERNOR.—The Rt. Hon. the Earl of ELGIN and KINCARDINE.

CHAIRMAN OF THE LONDON BOARD.—The Rt. Hon. the Earl of ABERDEEN.

ORDINARY DIRECTORS.

John Scott, Esq., 4, Hyde Park Street, W.
Francis Le Breton, Esq., 3, Crosby Square, E.C.
Thos. H. Brooking, Esq., 14, New Broad Street, E.C.

Charles Hemery, Esq., 28, Threadneedle Street, E.C.
Lieut.-Colonel James D. G. Tulloch.
Alexander Gillespie, Esq., 3, Billiter Court, E.C.

DIVISION OF PROFITS.—The sixth division of the Company's profits is appointed to be made on the 15th of November, 1860, and all persons now joining will participate in that division.

Sums assured during the year 1858, exclusive of Annuity transactions	£507,522 9 0
Annual Revenue (15th November, 1858)	275,990 8 9
Accumulated Fund, invested in Government Securities, in land, mortgages, &c. (at 15th November, 1858)	1,565,105 9 0

Loans granted on security of policies to the extent of their value any time after payment of one year's premium on the with profit scale.

No extra charge for service in Volunteer Corps or Militia regiments, during peace or war, while within the limits of the United Kingdom.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

CIVIL AND MILITARY EXAMINATIONS.

1.

Fourth Edition, post 8vo. sewed, 2s.; cloth, 2s. 6d.

THE STUDENT'S TEXT-BOOK OF ENGLISH AND GENERAL HISTORY, FROM B.C. 100 TO THE PRESENT TIME. With Genealogical Tables. By D. BEALE.

"This is very much in advance of most works we have seen devoted to similar purposes. To English History, its bearings, influence, character, and results, this Text-book is more immediately devoted; it contains a good *résumé* of Continental History. We can award very high praise to a volume which may prove invaluable to teachers and taught."—*Athenæum.*

2.

Post 8vo. price 4s.

THE ELEMENTS OF THE ENGLISH LANGUAGE. By ERNEST ADAMS, Ph.D. University College School.

"This is one of the most useful works, in which a scholar and man of science is content to give the world a perspicuous and complete account of the ultimate results of inquiry and study, without troubling it with the detail of the processes by which they have been obtained. Mr. Adams has produced an admirable manual of our mother tongue."—*Daily News.*

3.

In Four Parts, crown 8vo., Parts I., II., and III., 2s. 6d. each; Part IV., 1s. 6d.; or in 1 vol. cloth, 7s. 6d.

A TEST-BOOK FOR STUDENTS: COMPRISING SETS of EXAMINATION PAPERS. Designed for Students preparing for the Universities, or for appointments in the Army and Civil Service, and arranged for general use in Schools. By the Rev. J. STANTIAL, M.A., Head Master of the Grammar School, Bridgwater.

CONTENTS OF PART I.:—Scripture—Ancient History—Mediæval History—Modern History, and Geography.

CONTENTS OF PART II.:—Language—English—Greek—Latin, and French.

CONTENTS OF PART III.:—Arithmetic—Algebra—Geometry—Trigonometry—Conic Sections—Mechanics and Answers.

CONTENTS OF PART IV.:—Introductory Paper—Natural Science—Organic Matter—Zoology—Botany—Geology—Chemistry—Natural Philosophy, and Astronomy.

"This is a series of Examination Papers on different subjects. While the mania lasts for testing competency by amount of cramming, such Test-books will be useful. The one before us is full of *common questions*, and is free from the rigmarole which Examiners put into their Papers, to show how deep they are themselves."—*Athenæum.*

Fcap. 8vo. 4s. 6d.

MATERIALS FOR FRENCH PROSE COMPOSITION; OR, SELECTIONS FROM THE BEST ENGLISH PROSE WRITERS. With Copious Foot Notes, and Hints for Idiomatic Renderings. By F. E. A. GASC, French Master at Brighton College.

"M. F. E. A. Gasc, whose edition of La Fontaine we had lately the satisfaction of recommending, has now produced another useful work: 'Materials for French Prose Composition,' consisting of a great variety of extracts from our best prose writers—particularly those of the present day—with notes to assist their translation into French. Advanced students could not have a better guide in their efforts to acquire a correct and idiomatic style of writing that language."—*Athenæum.*

5.

Second Edition, improved, crown 8vo. 3s. 6d.

"UNDER GOVERNMENT:" An Official Key to the Civil Service of the Crown, and Guide for Candidates seeking Appointments. By J. C. PARKINSON, Somerset House.

"The best of its class that has been issued."—*Athenæum.*

"will be very welcome to all who seek employment under Government;' it will clearly show them the advantages and disadvantages of each office, the necessary qualifications, and in whose gift the nominations are."—*Examiner.*

Uniform with the above, price 2s. 6d.

GOVERNMENT EXAMINATIONS:" being a Companion to "Under Government," and a Key to the Civil Service Examinations. By J. C. PARKINSON.

London: BELL & DALDY, 186, Fleet Street, E.C.

HAYDN'S DICTIONARY OF DATES.

In a few days, in 1 Vol., demy 8vo. price 18s. cloth,

HAYDN'S DICTIONARY OF DATES. Comprehending Remarkable Occurrences, Ancient and Modern—the Foundation, Laws, and Governments of Countries—their Progress in Civilisation, Industry, and Science—their Achievements in Arms—their Civil, Military, and Religious Institutions—the Origin and Advance of Human Arts and Inventions, with copious details relating to the BRITISH EMPIRE. The whole comprehending a body of Information, Classical, Political, and Domestic, from the earliest accounts to the present time. NINTH EDITION, revised and greatly enlarged by BENJAMIN VINCENT, Assistant Secretary and Keeper of the Library of the Royal Institution of Great Britain.

In this Edition about Five Hundred new articles have been inserted; a very great number of articles have been re-written; and in order still more to adapt the work to educational purposes, numerous biographical, geographical, literary, and scientific details have been supplied.

"A volume containing upwards of 15,000 articles, facts, receipts, more than 15 times 15,000 facts. What Bradshaw's Railway Directory is to the merchant, this Dictionary of Dates will be found to be to those who are in search of information, whether classical, political, historical, or general."—*Times.*

SANDHURST MATHEMATICAL COURSE.

The Fourth Edition, in 8vo. price half-a-guinea, bound,

ELEMENTS OF GEOMETRY: consisting of the first Four, and the Sixth, Books of Euclid, chiefly from the Text of Dr. Robert Simson; with the Principal Theorems in proportion, and a Course of Practical Geometry on the ground. Also, four Tracts relating to Circles, Planes, and Solids; with one on Spherical Geometry. For the use of the Royal Military College, Sandhurst. By JOHN NARRIEN, F.R.S. and R.A.S., Prof. of Mathematics, &c., in the Institution.

Also, in the Mathematical Course,

ARITHMETIC AND ALGEBRA. By Prof. SCOTT. 10s.

London: LONGMAN, GREEN, LONGMAN, & ROBERTS.

New Edition, in 3 vols. fcap. 8vo. with Woodcuts, price 21s.

ELEMENTS OF PHYSICS. By C. F. PESCHEL, Principal of the Royal Military College, Dresden. Translated from the German, with Notes, by E. WEST.

Vol. I. contains The Physics of Ponderable Bodies, 7s. 6d.

Vols. II. and III. Imponderable Bodies, price 13s. 6d.

"We trace the hand of a master, who has placed before his readers, in the most lucid order, those branches of science in their modern improved state. The work is a little encyclopædia of physical science, and we heartily recommend it as a work by which the public will benefit."—*Philosophical Magazine.*

London: LONGMAN, GREEN, & Co., Paternoster Row, E.C.

BOUCHER'S SCHOOL MENSURATION.

Second Edition, 12mo. with 71 Figures, price 3s. cloth.

MENSURATION, PLANE AND SOLID, for the use of Schools and Colleges, Civil, Military, and Naval, and specially adapted for Self-Instruction; Comprising a Series of Arithmetical Illustrations of the most important practical truths established by Geometry; with clear and familiar Explanations, a variety of novel Diagrams, and upwards of 1600 carefully-constructed Examples (with the Answers). Forming a Companion to Euclid; also an Introduction to Land-Surveying, Trigonometry, and Conic Sections.

By the Rev. J. SIDNEY BOUCHER, M.A., St. John's College, Cambridge; Principal of the Holly Bank School, Birkenhead.

London: LONGMAN, GREEN, & Co., Paternoster Row, E.C.

MR. W. H. RUSSELL'S NEW WORK.

In 2 vols. post 8vo. 21s. cloth.

MY DIARY IN INDIA. With Tinted Illustrations. Sixth Thousand. Now Ready.

From "THE TIMES."

"We commend 'My Diary' freely to our thoughtful countrymen. It is far more important in a political and prospective sense, than as a record of personal adventures, or a series of Photographs of Indian warfare. It has both of these attractive features; but its views of our Indian policy are the grounds on which we regard it as so important to the English public."

London: ROUTLEDGE, WARNE, & ROUTLEDGE, Farringdon Street, E.C.

HANS BUSK'S RIFLE VOLUNTEERS.

In boards, 1s. 6d., with fancy cover.

RIFLE VOLUNTEERS, AND HOW TO DRILL THEM. By HANS BUSK, author of "The Rifle, and How to Use It," "Navies of the World," &c. An entirely New Edition, Enlarged and Improved, with additional Illustrations,

"This is the only Drill-book for Volunteers that can be relied upon as accurately in accordance with the system adopted throughout the army, *the Government manual* differing altogether from the established instructions, and its use having been productive of much confusion. The present work comprises all the information that can be acquired by Volunteers, either as regards their organization, arms, or drill. A set of model rules, a complete compendium of the Company Drill, Light Infantry Exercises, and Battalion Movements, Musketry Instruction, and Position Drill. The whole abundantly illustrated.

London: ROUTLEDGE, WARNE, & ROUTLEDGE, Farringdon Street, E.C.

NEW WORK BY THE AUTHOR OF "HOW WE ARE GOVERNED."

Price 5s. cloth.

RIGHTS AND WRONGS: A Manual of Household Law. By ALBANY FONBLANQUE.

"Every man of 21 years of age should completely study this book. It deserves a prominent place in every house. The work is perfect, and incomparably the best digest of Household Law as yet published."—*British Standard.*

STEREOSCOPIC SLIDES FROM LIFE, from Three Shillings each. Descriptive Catalogues sent on receipt of two stamps. Address DELPLANQUE & Co., Photographers, Kentish Town, London, N.W.

NEW FIRST-CLASS NEWSPAPER FOR THE COLONIES.

"THE ENGLISH MAIL," a Newspaper specially prepared for Circulation throughout Australia and New Zealand. Published in time for despatch by the Mails which leave England (*viâ* Marseilles) for Australia on the 18th of every month.

The want of a well-edited and first-class newspaper for the Australian colonies—one which shall give the news of the month, Domestic, Commercial, and Foreign, easily arranged in the order of its significance and occurrence, and clearly condensed for its ready perusal by colonists eager to know what is going on at home—has led to the starting of *The English Mail.*

To the Australian colonists *The English Mail* cannot fail to be of the greatest service. It claims to be their "reporter," as it were, to note and impartially record all events of public interest relating to Australia, occurring in this country. Special reports of Meetings of Banks, Mining and Insurance Companies, Postal Communication, Mail Service, &c., will find a place in its columns; and it enjoys the advantage of an exclusive connection with the "General Association for the Australian Colonies," established at the Australian and New Zealand Rooms, Jerusalem Coffee House, Cornhill.

Although *The English Mail* is specially intended for Australian circulation, yet owing to the general character and perfect arrangement of its Miscellaneous News, it has found readers elsewhere—in India, China, Canada, and the Cape of Good Hope, and even at home—and it may fairly be considered as *the Englishman's Newspaper Abroad.*

Arrangements have been made to ensure an ample distribution of the paper throughout the various townships in each of the Colonies, as well as at home; and with the assurance of an extensive circulation, it is confidently recommended as a most valuable medium for Advertisements, *Home* and *Colonial.* Price 8d. (Postage to Australia *viâ* Marseilles, 3d. extra).

SUBSCRIBERS' NAMES for copies of *The English Mail*, intended for transmission to Australia, must be sent not later than the day previous to publication; and must be accompanied by Postage Stamps for the full price of the paper (either with or without postage).

ADVERTISEMENTS will be received up to the evening of the 17th of each month. The charge for six lines is 3s. 6d.; 6d. a line after.

Office for Advertisements and Subscriptions, No. 1, St. Bride's Avenue, Fleet Street, E.C.

V. R.

ARMY RESERVE FORCE.—Her Majesty's Government having, with the sanction of Parliament, determined on establishing an Army Reserve Force, THIS IS TO GIVE NOTICE, that any person possessing the following qualifications may, if he is not a pensioner, be ENROLLED in this force, and will thereupon be entitled to the advantages and be subject to the obligations after-mentioned :—

QUALIFICATIONS FOR THE RESERVE.

1. Every volunteer for this force must have completed the period for which he originally enlisted in the army, or if discharged previously, either by purchase or in any other way, he must have completed a service of at least five years.
2. He must have been discharged within five years preceding the date of his enrolment as a volunteer.
3. He must be resident within the limits of the pension district in which he is enrolled.
4. He must be free from any bodily infirmity likely to disqualify him for active service.
5. He must not have been discharged for misconduct.

ADVANTAGES OF THE RESERVE.

Every volunteer will receive—
1. The sum of 4*l.* annually, by equal quarterly payments, one of which may be at the training period.
2. The pay and allowances of his rank, according to the rates usual in infantry, during any period for which he may be called out, together with the good-conduct pay to which he was entitled when he left his regiment.
3. One penny per mile to cover his travelling expenses, by rail or otherwise, to and from the place of assembly.
4. A suit of clothing once in seven years, or oftener, if on any occasion he be kept up permanently.
5. If wounded or injured in actual service, the same rate of pension as for corresponding ranks in the Line.
6. If not pensioned for wounds or injuries, he may by service and good conduct attain a pension not exceeding 10*d.* a day for a private, 1*s.* for a corporal, and 1*s.* 3*d.* for a sergeant or other superior non-commissioned officer, by reckoning two years' service in the Reserve as one towards the completion of the period for which a service pension may be awarded by Her Majesty's Regulations.

OBLIGATIONS OF THE RESERVE FORCE.

1. Every volunteer for this Force must be attested to serve for such period as may be wanting to complete 21 years' service if he originally enlisted in Infantry; or 24 if he enlisted in Cavalry, Artillery, or Engineers, reckoning two years of such service as one towards the attainment of these periods.
2. He must attend drill for 12 days in each year with a regiment, depôt, or the pensioner force of the district, as may be directed.
3. He must not change his residence in the district without giving due notice.
4. He must appear once a quarter before the staff officer of pensioners of the district in which he is enrolled to receive his quarterly allowance.
5. If called out for permanent duty in case of war, he must join a regiment of the line or depôt as may be directed, and continue to serve in the United Kingdom while required.
6. Upon all such occasions, or when called out for exercise, he shall be liable to the Articles of War, and be under the command of the military authorities.
7. When his pension has been attained, he shall, up to the age of 55, be liable to serve with the enrolled pensioners, on the same conditions as are laid down in the Acts and Warrants for the regulation of that Force.
8. If he fail to fulfil these obligations, he shall be liable to forfeit all the advantages here enumerated, in addition to any other punishment which a Court-Martial may award.

WEST MIDDLESEX RIFLES. — Head Quarters, —d's Cricket Ground.—Drill at Head Quarters every Tuesday, 7 P.M.; Wednesday, 5 P.M.; Friday, 7 P.M.; Saturday, 5 P.M.; and at Portman Barracks, Portman Square, W., every Monday and Thursday evenings, from 7 till 9 o'clock. WANTED, A DISCHARGED CAVALRY TRUMPETER FOR A YEOMANRY REGIMENT; one with a pension and no children preferred. Apply by letter, stating particulars of service, &c., to Messrs. Hawkes & Co., Army Accoutrement Makers, 14, Piccadilly, London, W.

NAVAL CADETS.

ROYAL NAVAL ESTABLISHMENT.

EASTERN PARADE, SOUTHSEA.

Conducted by Mr. THOMAS EASTMAN, R.N.

Mr. Eastman offers advantages which cannot be obtained in Establishments for general education, since he receives Naval Pupils only, who are instructed in the course exactly required.

Pupils are taught Steam and Rigging, the former from a working model of a marine steam engine; the latter from a model of a line-of-battle-ship, 24 feet in length.

346 Gentlemen have passed as Naval Cadets, and nearly 250 as Marine Cadets, &c.

The following Gentlemen have passed as Naval Cadets from this Establishment during the past year:—

Mr. H. P. Wylly	Mr. E. S. Nuthall	Mr. A. W. Brabazon
„ R. T. Bruce	„ J. H. O'Brien	„ E. G. F. Law
„ J. H. Bainbridge	„ J. Bedingfeld	„ J. Hazel
„ W. E. Heathcote	„ F. G. Powell	„ J. Needham
„ P. W. Jenkins	„ W. H. Roberts	„ H. W. Gibson
„ J. Evans	„ C. G. Hunt	„ M. W. Abbot
„ N. Byng	„ H. E. Walters	„ J. L. Smith
„ J. S. Alexander	„ A. P. Pascoe	„ L. W. Hyman
„ G. A. Ellis	„ H. Pugh	„ H. M. Millman
„ K. Garnier	„ W. F. E. Freeland	„ C. G. St. J. Hough
„ T. L. Mallory	„ R. M. Jaffray	„ E. T. Dugdale
„ T. S. Hoghton	Lord Albert Clinton	„ F. Coddington
„ A. R. Boddam	Mr. S. J. Weld	„ C. E. Gissing
„ J. D. Maycock	„ R. G. Fairfax	„ G. L. Lindeman
„ H. G. Gillum	„ A. Hutchinson	„ A. E. Bancroft
„ M. C. Osborn	„ C. W. Atkinson	„ A. H. Campbell

NAVAL CADETS.

Reduction of Examination and Age. New Regulations for Entry into Her Majesty's Service.

MESSRS. GALT & CO., Portsmouth, will be glad to forward, on application, the New Admiralty Regulations and other information necessary for passing the R.N. College.

Outfitters by appointment to H.S.H. the Prince of Leiningen.

NAVAL AND MILITARY CADETS.

THE REV. J. W. INMAN, M.A., late Fellow of St. John's College, Cambridge, receives into his house PUPILS to prepare for the Naval and Military Services, and for the Public Examinations.

Mr. Inman is Proprietor and Editor of the late Dr. Inman's Works, "Inman's Navigation and Nautical Astronomy," "Inman's Nautical Tables."

For terms apply at 2, Gloucester Terrace, Southsea.

NAVAL CADETS.

OF THE 50 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, on the 13th December, SIXTEEN were from the Establishment at NORTH GROVE HOUSE, Southsea, viz., Messrs. Moysey, Dicken, Eyres, Mandeville, Clark, Gataker, Stevenson, Lang, English, Tyler, Greenway, Ranking, Wood, Burt, Brereton, Wallace. 11 Cadets passed from the Establishment in September, and 11 others last June.

N.B. Twenty candidates out of seventy were rejected in December, 1859.

W. Johnson, Naval Instructor; W. Bell, Chaplain; J. A. Burrow, Chaplain and Naval Instructor.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—The constant success of the Pupils of this Establishment at the Examinations for the Line, Sandhurst, &c., is a guarantee of the excellence of the studies there pursued. Every candidate sent to the Woolwich competitive examination has obtained admission at his first trial. The number of Officers of all ranks who come to read for the Staff continues to increase. Six of them entered the Staff College this year. Apply to Captain Lendy, Sunbury, S.W.

W. R. LOOKER & Co., ARMY, NAVY, EAST INDIA, AND COLONIAL AGENTS.

Full and Half Pay, Pensions, Dividends, &c., received and remitted.

Loans effected in connection with Life Assurance.

Supplies of all kinds purchased, insured, and forwarded by overland or long sea routes to all parts of the world.

Life and other assurances effected free of charge for Agency.

Passages secured, free of charge, and baggage forwarded.

Letters, Newspapers, Parcels, &c., taken charge of and forwarded.

12, Pall Mall East, London, S.W.

NOTICE OF DIVIDEND.—BANK OF DEPOSIT (Established A.D. 1844), No. 3, Pall Mall East, London, S.W.—The WARRANTS for the HALF-YEARLY INTEREST, at the rate of 5 per cent. per annum, on Deposit Accounts, to the 31st December, are ready for delivery, and payable daily between the hours of 10 and 4.

Peter Morrison, Managing Director.

10th January, 1860.

Parties desirous of Investing Money are requested to examine the plan of the BANK OF DEPOSIT. Prospectuses and forms sent free on application.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., viâ EGYPT. The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.—For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

CAPTAIN ARMINE WODEHOUSE, R.N., deceased. Pursuant to an Act of Parliament made and passed in the 22nd and 23rd years of the reign of Her present Majesty, intituled "An Act to further Amend the Law of Property and to Relieve Trustees," NOTICE IS HEREBY GIVEN, that the Creditors of Captain ARMINE WODEHOUSE, R.N., late of Her Majesty's Ship "Cormorant," and of No. 38, Bury Street, St. James's, in the County of Middlesex, who died on the 19th day of November, 1859, and whose will was proved in the Principal Registry of Her Majesty's Court of Probate by Marsham Elwin, Esq., of Lincoln's Inn, in the said County, Barrister-at-Law, the Sole Executor named in the said Will; and all other persons claiming Debts or Liabilities affecting the Estate of the said Captain Armine Wodehouse, deceased, are to send in to the said Executor, at his aforesaid residence, or to his Solicitors, Messrs Bircham, Dalrymple & Drake, of 46, Parliament Street, in the said County, their claims against the Estate of the said Testator, on or before the 1st day of MARCH, 1860, at the expiration of which time the said Executor will distribute the whole of the Assets of the Testator amongst the parties entitled thereto, having regard to the claims of which he shall then have notice. Dated this 7th day of January, 1860. Bircham, Dalrymple, & Drake, 46, Parliament Street, London, S.W., Solicitors for the said Marsham Elwin, the Executor.

COLT'S PATENT REPEATING FIRE-ARMS.

RIFLE (New Model), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

*** "Colt's Pistol is the best repeating arm that we have."—Charles Lancaster, before Government Small Arms Committee.

Caution.—Notice is hereby given, that certain FOREIGN FABRICANTS of REVOLVERS, attending more to cheapness of manufacture than to quality, and the rage of under-selling each other, have thereby deteriorated the article; the importation and sale of all such made rifles, carbines, revolvers, &c., bearing the patentee's trade marks and others, stamped "Colt Brevetè," "Colt's Patent," &c., is illegal and forbidden. Beware of mongrel imitations and patent infringements. The genuine Pistols are stamped on the barrel, "Address, Col. Colt, London," and bear the British proof mark on the barrel and cylinder between each nipple; and can be had, in any quantity, on favourable terms, of the patentee and manufacturer,

Saml. Colt, 14, Pall Mall, S.W., or through any respectable Agency.

CAPTAIN NORTON'S GOSSAMER CARTRIDGES are found superior for use, in either breech or muzzle-loading guns, also for the Enfield rifle. Can be had at Leetch's Patent Gun Factory, 29, Great Portland Street, Regent Street, London, W.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.

Apply to B. De la Coue, 327, High Street, Chatham.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved Enfield-pattern Rifle, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

George H. Daw, Gun-maker and Contractor, 57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

THERE is not, perhaps, amongst the ancient and time-honoured institutions of Great Britain, one more dear to the hearts of the people than that venerable pile of building which, grandly ornamenting the margin of the Thames, commemorates the graceful homage of a sovereign to the virtues of his deceased Queen by the most noble of all dedications, "To the worn-out and disabled seaman." There can be no doubt that both William and Mary had long contemplated a plan to provide a refuge for the maimed survivors of the glorious battle of "La Hogue," before the final appropriation of this site was decided upon, but there is every reason to believe that William acted upon the wishes of his deceased partner in converting her favourite residence to the purpose she had so much at heart.

Since the year 1694, this edifice has been consecrated to the sole use of the veteran sailor, and has been from time to time enriched by successive donations from individuals and grants from the public (amongst the most curious of which was the estate of Captain Kidd, the notorious pirate, valued at upwards of 6000*l.*, and transferred to Greenwich in 1705); and for the greater part of this time it has maintained its character as chief of public hospitals, and the most interesting of all charitable institutions. Some slight troubles have shaken without disturbing the solid basis on which the good sense of its founders had established it; the most notorious being the squabble between Lord Sandwich and the Lieutenant-Governor of the hospital, in which the *latter* accused the First Lord of the Admiralty with filling up the situations at Greenwich with *Huntingdonshire voters*. It was in the celebrated trial that ensued from those allegations that Erskine won his first forensic laurels.

In our times the London citizen and the country cousin equally seek the umbrageous refuge of Greenwich Park, and love to dwell upon the view of the sightly and massive edifice that intervenes between them and the river. Presently, descending the hill slope, and approaching more nearly, they distinguish *inside* some gigantic iron railings, small knots of aged and feeble men dressed in a costume of quaint character, some smoking, others with remulous gait tottering to and fro, but the greater number in a sort of semi-torpid state, either propped against the walls or reclining upon benches.

These are the Greenwich Pensioners! It would be difficult to disabuse the minds of the gazers at such a moment of the idea which they obtain from this short glimpse into Paradise, but it is not difficult to show that the state of unmixed happiness which they regard with so much complacency is in reality nothing but a hotbed of discontent, and that naught but the most dire necessity can induce an aged seaman to become an inmate of Greenwich Hospital, in which there are upwards of *one thousand* vacancies.

Yet so it is; and if the falling off in the number of applicants for admission continues to increase in the same ratio as heretofore, ten years more will see the gates closed and the grass growing on its walks.

The present Government have most wisely instituted an inquiry into the state and condition of this noble charity, and pending these proceedings it is unnecessary to do more than point out some of the most salient grievances that are complained of by its inmates.

They complain that both the diet and the dress are unsuited to the times in which they live; that one is insufficient, and the other ridiculous.

Next, that all out-pensions cease after the admission of a pensioner to the Hospital. They consider that all those who have lost a limb, or have received wounds or hurts certified to be equal to the loss of a limb, should receive their pension in addition to the Hospital treatment.

That there should be no degrading punishments, and that expulsion from the Hospital should be the one and only treatment for bad conduct.

Outside the Hospital it is assumed that, in conformity with its original charter, admission should be extended to seamen from the merchant service; but this, of course, would involve a return to the trifling deduction from mercantile wages, formerly called the *naval sixpence*. If merchant seamen are allowed the benefits of Greenwich Hospital, it is clear that the power of conferring admission to this establishment must be taken from the Admiralty, and vested in a mixed commission; and any such arrangement would be a great boon to the Admiralty and its over-taxed officers, who have at present the whole work of Greenwich thrown upon their hands, whilst the admirals, captains, commanders, and lieutenants on the staff of Greenwich enjoy almost a complete sinecure. Surely the primary business of the Admiralty is to build a fleet, to man and officer it, and then to keep it in good order. The pensioning of old or disabled servants of the Crown would be much more fitly entrusted to those who—themselves wounded or disabled—would be keen critics of all who advanced their claims to smaller but similar rewards.

With all these matters the Commission now sitting will probably deal; and we look for their report with considerable anxiety, for they have a responsibility of no ordinary nature on their hands. It is curious to remark how deeply Greenwich Hospital seems to have sunk into the minds of men who, vested with power, have from time to time, and during all times (since it was established), flourished the advantages of this institution before so many generations. It is reserved for the present stiff-necked one to take exception to the general rule. What can be more ludicrous than to watch the pertinacity with which the "benefits of Greenwich Hospital" are paraded in the largest type whenever a fresh issue of parti-coloured placards inviting seamen to enter H.M.'s Service are daubed over the dead walls of the metropolis? It is one of the old bequests left to us by our grandfathers, and as reverentially preserved as Lord Nelson's shoe- buckles.

Fortunately for us, the alluring inducements of "Pensions for wounds" "gratuities for the loss of a limb," and "admission to the hospital," do not appear to strike the eager volunteer with that fever of enthusiasm which the talented compilers of those posters expected. If men did reflect at all, they would scarcely appreciate this invitation to the tourniquet and the amputating knife, and it is more than probable they would turn away to the splendidly dressed and mellifluous sergeant of dragoons, who, with greater foresight, produces to the admiring eyes of the yokel a highly coloured representation of a trooper cutting down a whole body of Sikh cavalry, or emerging from the ruins of Delhi or Lucknow with a casket full of jewels on the point of his sabre.

To what man of the age of twenty did it ever occur to make provision for his latter days? To him life just begun appears an eternity of pleasure, and he flings himself into the career he has chosen with unbounded enjoyment of the present, and with no misgivings as to the future; and well for us that it is so, or there would be little hopes of finding either soldier or sailor to assist us in our emergencies.

Greenwich Hospital is one of the noblest of our institutions, and might be made with proper management as useful as it is now inefficient, and become as it once was—a sailors' home, instead of a seaman's prison; but it is utterly useless to parade it as an inducement to enter the Service. What the seaman desires is present pay and present enjoyment. The future is to him inconceivable; and a pound a week would outweigh in his mind all the prospective advantages of all the hospitals in the world.

A very remarkable paper entitled "the Army," appears in *The Constitutional Press Magazine* for February under the signature "Crux." The writer describes himself as one who had served in the ranks, and we cannot doubt the fact of his having acquired such knowledge of the internal economy and working of regimental life as could not have been obtained under any other circumstances except constant residence in barracks and acquaintance with private soldiers. If Lord Palmerston reads this letter he will learn more of the "grievances" of the soldier than he ever knew or heard of, or suspected the existence of, before The fault of this most tersely written and ably expressed *exposé* is a certain bitterness of spirit, which having exhausted itself in demonstration, scarcely has energy enough to prescribe for the cure of the evils it indicates. If our columns were not overcrowded we would willingly reprint much of it, and we entreat all officers who desire to see the two sides of the question of discipline and barrack life, or who wish to be able to argue the question of flogging by meeting all the considerations which are urged against it, to take the trouble of looking at this paper. An extract, which does not bear particularly on any of the graver considerations of the question, affords, however, a very amusing illustration of the way in which official administration and the necessities of forms may occasionally produce what are called grave complications by our French friends.

"A certain man enlisted into the British Army, and began to complain on one and the same day; he remained in the army for many years, because he couldn't get out of it, and never ceased making complaints the while. At last, he died of a complaint without doing any harm to anybody, or having been done good to. But, on his death-bed, he wrote to the Horse Guards, making a complaint that his complaint had been wrongfully treated by the Sergeant-Poultice-Major of his regiment. This document the Horse Guards sent back to the complainant, requiring him to sign and fill up another document (therewith sent also), to the effect that he had sent the first. This was done by the complainant, who complained of having to do it. The Horse Guards sent back another document, to say that his complaint was 'lodged in the proper quarter' (meaning the official one). While it was lodged there, and while some one was seeing about it, and round it, and to it, but not into it, the complainant died and was buried. In about twelve months or so another document was sent after him, to give notice that he was to hold himself in readiness to appear before a regimental committee, which was to sit upon the Sergeant-Poultice-Major and the Lance-Bandage-Corporal immediately. This document went to a man of the same name in Corfu, who returned to England in another twelve months, and who was tried and punished for doing so, under false pretences. The special committee, which is paid for its trouble, of course, is sitting still, with its collective arms folded, only waiting for the right man in order to settle the matter, and to reprimand the guilty officials, who meanwhile hold their own, pending judgment."

We have received several letters respecting the impropriety of sending the 14th Light Dragoons to Newbridge, which is popularly assigned as their destination on their return from India. The quarter is said to be damp, cold, and exposed; some others say it is destitute of those means of amusement which a soldier from India can appreciate after a long life in cantonments and towns. Now, whether the regiment be going to Newbridge or not, it is quite certain that if the men were asked to give a popular account of a nice station, supposing they were asked for it in India, they would expatiate largely on the advantages of cold and wet; but, if medical men declare that the immediate transfer of troops would be attended with dangerous consequences, of course their representations should be attended to. We want some large stations and barracks for cavalry and infantry from India on the south coasts of England and Ireland.

Lord Canning has been refused permission by the Home Government to send whatever troops he may consider necessary to China without reference to the authorities in the first instance. All our intelligence from that quarter is unsatisfactory. Mr. Bruce has received information that the people are arming, and the coast population, hitherto friendly to us, are full of insolence since the disaster of the Peiho, which has quite obliterated the remembrance of our Canton victories. Let us hope that India may remain quiet under whatever taxation may be introduced, for in the disorganised state of the Indian Army, and in the reduced numbers of the European troops, are elements of weakness and serious danger.

THE ARMY.

2nd Dragoon Guards. Major H. M. Stapylton has obtained 18 months' leave to England.

3rd Dragoon Guards. Captain Miller has obtained 12 months' leave from India.

The 5th Royal Irish Lancers are under orders to proceed from Newbridge to Aldershott next month by the Himalaya troop-ship. It is believed that the march to their future quarters from Liverpool will occupy about 21 days. The regiment during the past week has, by directions of their gallant colonel, been engaged in acquiring a knowledge of the duty of embarking and disembarking, according to regulations. The regiment consists of 650 sabres, and their horses are in the finest condition, the regiment being reported by the Inspector-General of Cavalry as fit for home or foreign service.

6th Inniskilling Dragoons. Cornet T. W. Rathbone is about to retire from the Service. Lieut.-Colonel Fitzwygram is on leave to the Neilgherries for 2 months.

8th Hussars. Lieutenant the Hon. E. Stourton has leave from India, and is attached to the depôt at Canterbury.

14th Light Dragoons. The depôt from Maidstone, under the command of Brevet-Lieut.-Colonel Gall, C.B., arrived at the North Wall, Dublin, on Friday morning, on board the steam-transport Trafalgar, disembarked, and proceeded to Newbridge Barracks, to await the return from India of the service-troops of the regiment, which proceeded on foreign service in the year 1841. The regiment comes home in the Himalaya.

17th Lancers. Lieutenant H.E. Wood is appointed temporarily to the command of the 1st Regiment of Beatson's Horse.

Royal Artillery.—Lieut.-Colonel the Hon. D. M. Fraser, Major G. C. Henry, and Vet. Surgeon J. B. Hall have leave from India to England.

The most active measures are now in progress for an augmentation of the Royal Artillery by two additional brigades, and a large number of recruits (many of whom are discharged soldiers from the East India Company's service) have recently joined the corps at head-quarters. About 70 recruits joined in one day this week, at Woolwich, nearly the whole of whom passed the medical examination. The 1st brigade of Garrison Artillery at Woolwich, Col. Evelegh commanding, is about to be mounted for field duties, Col. Teesdale having received instructions to purchase 1000 horses for that purpose. Since November last, the average number of recruits, passed and entered from all sources, has been stated at about 20 per day at Woolwich.

Second Captain-Major Francis Downes, of the Royal Artillery, having resigned his situation at the staff college, has taken up his appointment as adjutant, vice Le Mesurier, who will be supernumerary until a vacancy occurs for promotion, and is ordered to do duty in the depôt brigade at Woolwich.

The following general regimental orders, signed by Colonel C. Bingham, Deputy-Adjutant-General, have just been received at the head-quarters of the Royal Artillery, Woolwich, from the Horse Guards:—"Her Majesty's Government having, on the recommendation of his Royal Highness the General Commanding-in-Chief, approved of the appointment, in the Royal Artillery, of sixteen instructors and thirty-two assistant-instructors of gunnery, at the daily rates of 2*s.* 6*d.* and 1*s.*, in addition to their regimental pay, the same is notified to the regiment; and the following regulations will be adopted in giving effect thereto, viz.: The extra allowance to the repository and drill sergeants will cease on the appointment of the gunnery instructors, and the whole of these non-commissioned officers, now in England, are to be sent to Shoeburyness to undergo a course of instruction in the school of gunnery, and from these the selections will be made for the assistant-instructors. It must be distinctly understood that no individual will be selected, either as instructor or assistant-instructor, except those who have passed through a course at the school of gunnery. The instructors will be selected from those officers who will complete the long course in March next, as far as their numbers will permit, and another squad will then be formed. The allowance of 6*d.* per day to drill-sergeants (which is confined to the Royal Artillery) will altogether cease, as it is considered that the elementary instruction of recruits in marching and carbine drill should be performed without remuneration by the non-commissioned officers of batteries, the same as in regiments of the Line; and when the recruits are sufficiently advanced for the more important part of their instruction as artillerymen, the paid assistant-instructors will take them in hand, and teach them the whole of their field and garrison gun drill and exercises, as well as the use of all artillery machines.

Lieutenants Leacock, Palmer, Noyes, Wing, Lacey, Schack, Bell, Sands, Yale, Hallett, Townsend, Barham, Strike, Barclay, Graves, Nelson, Ireland, Chute, and Hornsby, who recently received their commissions, joined the regiment of Royal Artillery at head-quarters on the 1st, to be attached to their respective batteries, but the nine last-named are ordered for embarkation to join their batteries at India and Malta.

Royal Engineers.—The 4th company of this corps is ordered from India to England, with the exception of 20 men, who are ordered to proceed to Melbourne under the command of Captain Scratchley. The 11th and 21st companies are ordered from India to the Mauritius, under the command of Lieut.-Colonel Brown, C.B., and Lieutenants Gossett, Swetenham, Paterson, Lloyd, and Crozier. On the arrival of these companies the 22nd company will leave the Mauritius for England, under the command of Lieutenant W. B. Gossett. The 23rd company, under the command of Major Grantham, has removed from India to China.

The annual dinner of the corps of Royal Engineers took place last night at the Freemasons' Tavern, Great Queen Street, Lincoln's-inn-fields. The chair was taken by General Sir John Burgoyne, G.C.B.; and among the officers present were General Sir Charles Pasley, Lieutenant-General Oldfield, Major-General Sir Harry Jones; Colonels Sandham Dawson, C.B., Gordon, C.B., Walpole, Ross, Chapman, C.B., Hadden, Owen, C.B., Lennox and Montagu; Major Jervois, Captain Vitch, A. Clarke, &c., &c. he dinner being a domestic *réunion*, guests are rarely invited, but on this occasion Major-General Sir F. Abbot and Major Patrick Stuart, of the East India Engineers, who have been co-operating with the Royal Engineers in several measures of public importance, were guests, also Mr. Norman M'Leod, of M'Cleod, the captain of the South Kennington Volunteer Engineers, and Mr. Marriott, of the house of Cox and Co., the agents of the corps.

The following changes have recently taken place in this corps: Colonel Twiss, on passage home from the Mauritius; Colonel Bargemann, ordered to the Mauritius; Colonel Stace, removed from Gosport to Guernsey; Colonels Gray and Robertson from leave to Ireland; Captain Galton, appointed Assistant-Inspector-General; Captain Wray, specially employed on passage to Belize; Captain the Hon. J. J. Bury, on passage home from Australia; Captain C. A. Rice, appointed to Dover; Captain Akers, ordered from the Cape of Good Hope to Aldershott; Major Grantham and Lieutenant Malcolm, from India to China; Lieutenant Decie, from Dover to Malta; Lieutenant Fellowes, from Ireland to the West Indies; Lieutenant Wilson, ordered home from Barbadoes; and Lieutenants Pritchard, Harrison, and Shine, from India to China.

The following gentlemen cadets from the Royal Military College, at Sandhurst, have been appointed lieutenants in the corps of Royal Engineers, and joined head-quarters at Brompton Barracks on Wednesday:—H. J. W. Geble, C. W. Whinfield, J. V. Smith, A. L. Buckle, P. G. Tarbet, W. H. Pattern, W. H. Collins, J. H. Smith, A. J. Hepper, W. Masterman, R. F. Morris, G. Harris, L. J. G. Ferrier, S. W. Jenner, A. C. Wallinger, H. Robinson, A. C. C. Mackenzie, and E. Harvey. The following officers from East India Military College at Addiscombe have also joined the Royal Engineer establishment with the local rank of lieutenants:—W. Shepherd, R. P. Tickell, B. O. Seton, E. G. Clayton, E. D. O. Twemley, S. C. Clarke, C. A. M. G. Skinner, and J. D. Cruikshank.

1st Royal Regiment. Lieutenant Wheeler has been posted to the 1st battalion in Madras presidency, Captain Manners has been posted to the 2nd battalion, and is ordered to join at Hong Kong. Captain Coles, instructor of musketry at Colchester, is attached to the staff at Hythe.

5th Fusiliers. Assistant-Surgeon Leet has been directed to join the 1st battalion at Allahabad.

7th Fusiliers. Owing to a paucity of officers with the head-quarters of the 1st battalion, Paymaster Scott is acting as Quartermaster. The services of Captain Marten are placed at the disposal of the Punjaub Government for employment in the department of public works.

8th Regiment. The 1st battalion is ordered from Futteyghur to Calcutta, preparatory to its return to England. The battalion has been in India since 1846.

18th Royal Irish. Major J. Borrow and Captain W. H. Graves have been granted leave to England on medical certificate.

19th Regiment. Captain Amos Goren has obtained sick leave from India to England.

22nd Regiment. Captain Swann, who has just exchanged into this regiment from the 54th, has been appointed instructor of musketry to the 9th Depôt Battalion at Colchester.

24th Regiment. The 2nd battalion is held in readiness to embark at Cork for the Mauritius, relieving 61st.

33rd Regiment. Captain Rogers retires from the service, Lieutenant Trent and Ensign Gore obtaining the step by purchase.

36th Regiment, stationed in the Raglan Barracks, Devonport, were exercised in embarkation and disembarkation on Tuesday last. Headed by their splendid band, they left their quarters in heavy marching order at 1 o'clock, took boat at Keyham steam-yard, and went on board the 90-gun ship Clarence, lying in ordinary off St. John's Lake, in Hamoaze. Here all the necessary arrangements for proceeding to sea were executed. They then left the boats in two divisions for the point of attack, Cremhill Beach, Mount Edgcumbe. A party of seamen-gunners from the Cambridge first jumped ashore on each flank, and, by skirmishing, protected the beach for the soldiers, who all landed in the space of two minutes. They re-embarked in four minutes, and formed a single line of boats, which extended up and down the harbour towards Mount Wise. On the call of the bugle to "disperse," they immediately separated in four divisions, one of which landed at Mount Wise, one at Mutton Cove, the other two at the Royal William Victualling-yard and Stonehouse-steps. All the regiment was back at their quarters, dismissed, and accoutrements off before 4 o'clock, having been absent three hours only from the barracks. The 36th was under the immediate command of Colonel Hort. Captain Jerningham, of the Cambridge, regulated the operations in the boats, and Captain Stewart, C.B., of the flag-ship Impregnable, superintended the arrangements on board the Clarence. The boats (23) were supplied by the Impregnable, the Royal William, the Cambridge, the Emerald, and other ships fitting out. Being gathered without much notice, this first experiment at Plymouth appears very creditable.

37th Regiment. Captain Burton has leave home to November 30, 1860.

38th Regiment. Lieutenant R. J. Stanfield is appointed to the station staff at Agra. Captain Gaynor has been ordered to proceed to Calcutta in charge of invalids.

43rd Light Infantry. Captain W. S. Richardson exchanges with Captain A. H. Waldy, of the 46th regiment.

44th Regiment. Brevet-Major Fletcher is about to retire from the service.

46th Regiment. Captain A. H. Waldy exchanges with Captain Richardson, 43rd Light Infantry.

Royal Marine Light Infantry. Lieut.-Colonel Hadfield, Woolwich division of Royal Marine Light Infantry, has joined his division, from Her Majesty's ship Algiers, on his promotion, having been relieved by Captain Tribe. The battalion of Royal Marines at Woolwich was this week paraded in the Barrack-square to witness the presentation of badges "for good shooting," 30 of which were delivered personally, and 45 were ordered to be forwarded to men on board various ships on duty. The badges entitle the recipients to a reward of 1*d.*, 2*d.*, and 3*d.* per day for one year, according to their classification. Clause No. 14 of the Admiralty regulations specifies that "men embarked and being on foreign stations, or detached from head-quarters, under any circumstances, so as to prevent the annual course of practice being proceeded with, are permitted to wear and retain their badges of distinction, until an opportunity shall occur of their being challenged by another annual course of practice."

53rd Regiment. Brevet-Major J. A. Dalzell is appointed Commandant of the Chinsurah Depôt, and Ensign Birch, late 27th Bengal N. I., is appointed interpreter to the regiment in his place. Lieutenant W. H. J. Clarke is ordered home to England in charge of invalid detachments.

60th Rifles. Captain Robertson has been appointed to the 1st battalion expected shortly to return home, and Captain Bowles to the 2nd battalion.

61st Regiment. About to return to England from the Mauritius.

64th Regiment. Lieutenant Davies has leave to England.

71st Highlanders. The leave of Captain C.F. Smith from India is prolonged to July 5, 1860.

73rd Regiment. Captain G. J. Burne has left Chatham in command of a detachment for Eastbourne for musketry instruction.

74th Highlanders. Lieutenant J. W. Lawson has leave to England.

81st Regiment. Captain Belts is coming home on leave to the 1st of October, 1860.

82nd Regiment. Lieut.-Colonel Blagden Hale has obtained leave to England for eighteen months.

89th Regiment. Captains Holmes and Marsh, and Lieutenants Lloyd and Newbiggin, have passed in Hindostanee.

90th Light Infantry. Ensigns Edgell and Handy have passed in Hindostanee.

93d Highlanders. Captain M'Bean is appointed to be Deputy Assistant-Adjutant-General to H. M. Forces in Bombay.

94th Regiment. Lieutenants Hall and Godfrey have leave to England.

98th Regiment. Lieutenant T. Gardiner has been ordered to England in charge of invalids of various regiments. Lieutenant S. C. Walker has been appointed to act as Station Staff Officer at Murree.

99th Rifle Brigade. Lieutenant and Adjutant D. A. Gordon of the 2nd battalion is about to retire from the Service.

Shorncliffe Camp.—The 9th Regiment, stationed at Woolwich and Shorncliffe, has left for Corfu, and the 10th Regiment will occupy the quarters vacated at the camp by the 9th.

Chatham.—The non-commissioned officers of the 1st battalion at this garrison have presented a massive silver teapot to Colour-Sergeant Horton, 53rd Regiment, on the occasion of his retiring from that regiment. Quartermaster-Serjeant Robert Moore, of the 35th Regiment, who has returned from his regiment in India, has been presented with a handsome chased goblet, made by A. Lyons, at Chatham. The money for the testimonial was subscribed by the serjeants of the 35th regiment in India, who forwarded it to the depôt at Chatham, as a mark of their esteem and respect. The quartermaster-serjeant went out with the regiment in 1854 to Bengal, and he was in all the engagements during the rebellion in that presidency.

Canterbury.—The children of the garrison were hospitably entertained on Tuesday evening last by Colonel and Mrs. Gibsone. Cake and oranges were distributed with a liberal hand; the band played some of its most cheerful music, and a magic lantern, with a set of well-selected slides, called forth shouts of approval. This feast was given more particularly to the children of the Depôt of the 17th Lancers, on their leaving Canterbury for Maidstone. On Thursday, at 11 A.M., the Depôt, under the command of Captain Macartney, marched down to the South-Eastern Railway, accompanied by the Cavalry Band and the Fifes and Drums of the 4th Depôt Battalion. A troop of the 8th Hussars and 2nd Dragoon Guards formed the escort. During the stay of the Depôt of the 17th Lancers in Canterbury, the conduct of the men has been most exemplary, and their appearance on leaving the barracks was very striking and soldierly.

On Monday, Mrs. Gascoigne, wife of Major-General Gascoigne, commanding the Dublin division, entertained two hundred children attending the schools of the Royal Barracks, in the Garrison School-room. After tea, to which the children did ample justice, a curtain was let down, and a magnificent Christmas tree exhibited to the delighted gaze of the juveniles. It was beautifully decorated with lights and toys innumerable, after the distribution of which the entertainment concluded by an exhibition of the magic lantern, accompanied by singing. The company attending was large, and the excitement of the children indescribable; it broke out into loud and continued cheering on the entrance of Major-General Gascoigne, who honoured the party with his presence.

The examination of candidates by the Council of Military Education for direct commissions commenced on Wednesday morning at the Royal Hospital, Chelsea, before Major-General Portlock and Colonel Elwyn. The first day's examination was confined to the medical examination of the candidates, about 100 in number. The examination extends over six days, terminating on the 7th inst.

A reduction of the French Army is again announced.

WAR-OFFICE, PALL MALL, Jan. 31.

Royal Regiment of Horse Guards—Veterinary-Surgeon Matthew John Harpley, from the Royal Artillery, to be Veterinary-Surgeon, vice Byrne, who retires upon half-pay.

22nd Foot—Captain John Sackville Swann, from the 54th Foot, to be Captain, vice Robin, who exchanges.

23rd Foot—Ensign William Robert Murray has been permitted to resign his commission.

25th Foot—Captain Seth Nuttall Fisher, from half-pay Unattached, to be Captain; Lieutenant John Frederic Everett, from the 13th Foot, to be Captain, by purchase, vice Fisher, who retires.

30th Foot—Ensign William Glascott to be Lieutenant, by purchase, vice Tyner, who retires; Ensign the Hon. Leopold William Henry Powys to be Lieutenant, by purchase, vice Austin, who retires.

31st Foot—Captain William Wood Senhouse, from half-pay Unattached, to be Captain, vice Law, who exchanges; Lieutenant John William Townsend Fyler to be Captain, by purchase, vice Senhouse, who retires; Ensign George Alexander Gordon Selwyn Maynard to be Lieutenant, by purchase, vice Fyler.

34th Foot—Sergeant Daniel O'Niell to be Quartermaster, vice Rowan, appointed Paymaster.

38th Foot—Ensign George John Skinner, from the 100th Foot, to be Ensign, vice Bailey, promoted.

43rd Foot—Captain William Thomas Waldy, from the 46th Foot, to be Captain, vice Richardson, who exchanges.

46th Foot—Captain William Stewart Richardson, from the 43rd Foot, to be Captain, vice W. T. Waldy, who exchanges.

54th Foot—Captain Thomas Smith Robin, from the 22nd Foot, to be Captain, vice Swann, who exchanges.

75th Foot—Lieutenant Ernest Le Pelley to be Captain, without purchase, vice Brevet-Lieut.-Colonel Mollan, C.B., promoted.

77th Foot—Assistant-Surgeon Francis Edward M'Farland, from the Staff, to be Assistant-Surgeon, vice Adams, whose appointment to the 77th Foot, which appeared in the *Gazette* of the 30th ult. has been cancelled.

88th Foot—Captain Alexander Ross Bayly, from the 8th Foot, to be Captain, vice Jones, who exchanges.

90th Foot—Ensign Henry James Edgell, to be Lieutenant, without purchase, vice Bingham, deceased; Ensign James Felix Haig to be Lieutenant, by purchase, vice Edgell, whose promotion, by purchase on the 13th inst. has been cancelled; Randall Ironside Ward, Gent., to be Ensign, by purchase, vice Edgell, promoted.

96th Foot—Ensign William Robert Estridge Durrant to be Lieutenant, by purchase, vice Geddes, who retires.

1st West India Regiment—Captain John Owens, from the 14th Foot, to be Captain, vice Dobie, who exchanges.

Royal Canadian Rifle Regiment—Ensign Sydenham Clitherow M'Gill, from the 73rd Foot, to be Ensign.

COMMISSARIAT DEPARTMENT.

Deputy Assistant-Commissary-General Horace Neville Tharp has been permitted to resign his commission.

HOSPITAL STAFF.

Surgeon-Major Robert Templeton, M.D., who retires on half-pay, to have the honorary rank of Deputy Inspector-General of Hospitals, in accordance with the Royal Warrant of 1st October, 1858.

Assistant-Surgeon Theophilus Dolan, from the 31st Foot, to be Assistant-Surgeon to the Forces, vice Stewart, appointed to the Royal Artillery.

Assistant-Surgeon Francis John Shortt, from the 20th Foot, to be Assistant-Surgeon to the Forces, vice Richmond, appointed to the Royal Artillery.

Benjamin Hinde, Gent., to be Assistant-Surgeon to the Forces.

VETERINARY MEDICAL DEPARTMENT.—To be Acting Veterinary-Surgeons: Griffith Evans, Gent.; James Joseph Meyrick, Gent.; John Marshall Wilson, Gent.; William Appleton, Gent.; Robert Marshall, Gent.; Adam Elijah Clarke, Gent.; John Anderson, Gent.

BREVET.

Brevet-Colonel Henry Keane Bloomfield, half-pay 11th Foot, to have the temporary rank of Major-General while holding the command of a brigade in Ireland.

Brevet-Colonel Charles Franklyn, C.B., from Inspecting Field Officer of a Recruiting District, to have the temporary rank of Major-General while holding the command of a brigade at Gibraltar.

Captain Seth Nuttall Fisher, 25th Foot, to be Major in the Army.

Brevet-Major Seth Nuttall Fisher, 25th Foot, to be Lieutenant-Colonel in the Army.

The undermentioned promotions to take place consequent upon the death of Major-General Henry Edward Robinson on 14th January:—

Major-General Sir Thomas Harte Franks, K.C.B., the Senior Officer promoted to the rank of Major-General for distinguished service, to be placed upon the Fixed Establishment of General Officers, in accordance with the 6th clause of the Royal Warrant of 14th October, 1858.

Captain and Lieut.-Colonel Charles Lennox Brownlow Maitland, of the Grenadier Guards, to be Colonel.

Brevet-Major William Garstin, half-pay 24th Dragoons, Staff-Officer of Pensioners, to be Lieut.-Colonel.

Captain Frederick William Haultain, Royal Artillery, to be Major.

WAR OFFICE, PALL MALL, FEB. 3.

7th Regiment Dragoon Guards—Lieutenant Christopher Barton to be Captain, by purchase, vice Dowbiggin, who retires; Feb. 3, Cornet William Macnaghton Erskine to be Lieutenant, without purchase, vice Caldwell, deceased; Dec. 12. Cornet Edward Henry O'Dowd to be Lieutenant, by purchase, vice Barton; Feb. 3.

2nd Dragoons—The commission of Veterinary-Surgeon Thornton Hart to be antedated to the 4th July, 1855.

5th Light Dragoons—Cornet Alexander Malcolmson to be Lieutenant, without purchase, vice Cowan, deceased; Jan. 8. Lieutenant Richard Parnham Ridley, from the 14th Light Dragoons, to be Lieutenant, vice Mather, who exchanges; Feb. 3.

Royal Artillery—Brevet-Major Henry Clerk, on the Supernumerary List, to be Lieutenant-Colonel; Brevet-Major Francis Beckford Ward to be Lieut.-Colonel, vice W. J. Smythe, placed on the Supernumerary List; Brevet-Major Henry Rogers, from half-pay, to be Captain, vice Ward; Nov. 28; Paymaster Thomas Hanson Ratcliff, from half-pay, 9th Dragoons, to be Paymaster, vice Landers, resigned; Jan. 10; James Woodyer Callow to be Veterinary-Surgeon, vice Cochrane, deceased; Dec. 14, 1857. The name of Lieutenant Ireland, of the Royal Artillery, is Edward Clayfield Ireland, and not Ireland only, as previously stated.

Royal Engineers—Brevet-Major Robert Michael Laffan to be Lieutenant-Colonel, vice Robinson, placed on the Supernumerary List; Nov. 28. Second Captain Sidney Baynton Farrell, on the Supernumerary List, to be Captain; Second Captain Charles William Barry to be Captain, vice Laffan; Lieutenant John Popham Maquay to be Second Captain, vice Barry; Dec. 13. The Commissions of Captain and Brevet-Major F. E. Cox, and Second Captain Darah, to be dated 28th Nov., instead of 13th Dec. The surname of the Gentleman Cadet appointed on 22nd Dec., is Masterson, and not Masterton, as stated in the Gazette of 3rd Jan.

Military Train—Captain Thomas George Brutton Atkinson, from half-pay Unattached, to be Captain, vice Balcombe, whose appointment, as stated in the *Gazette* of the 4th Nov., has been cancelled; Nov. 4.

9th Regiment of Foot—Captain William Lawrence Murphy, from the 40th Foot, to be Captain, vice the Honourable F. Le Poer Trench, who exchanges; Feb. 3.

16th Foot—The first Christian name of Lieutenant Reyne is Charlton, and not Charles, as hitherto stated.

24th Foot—Lieutenant and Quartermaster John Cusack to be Lieutenant, vice Farquharson, who has resigned; Lieutenant John Cusack to be Adjutant, vice Surplice, who resigns the Adjutancy only; Feb. 3.

25th Foot—Lieutenant Frederick Stephen Terry to be Captain without purchase, vice Spoor, deceased; Ensign Fowell Buxton to be Lieutenant, without purchase, vice Terry; Jan. 9. Lieutenant Thomas Smith, from Paymaster 97th Foot, to be Paymaster; Feb. 3.

31st Foot—Lieutenant William Hill James to be Adjutant, vice Leeson, promoted; Nov. 30.

40th Foot—Captain the Hon. Frederick Le Poer Trench, from the 9th Foot, to be Captain, vice Murphy, who exchanges; Feb. 3.

52nd Foot—Brevet-Lieut.-Colonel Charles Albert Denison to be Lieut.-Colonel, without purchase, vice Brevet-Colonel George Campbell, C.B., appointed Inspecting Field Officer of a Recruiting District; Captain Arthur Lennox Peel to be Major, without purchase, vice Denison; Lieutenant Thomas Archer Julian to be Captain, without purchase, vice Peel; Jan. 31.

55th Foot—Lieutenant George Augustus Bayly, from half-pay 57th Foot, to be Lieutenant, vice Williams, promoted, without purchase, to an Unattached Company; Ensign Charles F. Faber to be Lieutenant, by purchase, vice Bayly, who retires; Feb. 3.

55th Foot — Assistant-Surgeon, James Winterscale Lougheed, from the Staff, to be Assistant-Surgeon, vice Parr, appointed to the Staff; Feb. 3.

57th Foot—Lieutenant Henry Douglas Mackenzie Shute to be Captain, by purchase, vice Bird, who retires; Ensign Walter De Warrenne Waller to be Lieutenant, by purchase, vice Shute; Feb. 3.

61st Foot—Captain William Blackett, from the 98th Foot, to be Captain, vice Hamilton, who exchanges; Lieutenant John Sloman to be Captain, by purchase, vice Sadlier, who retires; Feb. 3.

73rd Foot—Major-General Sir Michael Creagh to be Colonel, vice Lieutenant-General C. Grant Falconar, deceased; Jan. 11. Lieutenant Matthew Smith Blyth to be Captain, by purchase, vice Aitchison, who retires; Ensign St. John Dupond Galwey to be Lieutenant, by purchase, vice Blyth; Peter Trant Foley, Gent., to be Ensign, by purchase, vice Kirk, who retires; Feb. 3.

74th Foot—Ensign Thomas Oliver Wingate, from the 8th Foot, to be Ensign, vice Clowes, deceased; Feb. 3.

75th Foot—Lieutenant Francis Rawdon Macnamara, from the 93rd Foot, to be Lieutenant, vice Brocas, who exchanges; Nov. 14.

79th Foot—Lieutenant William Henry Makesey, to be Captain, without purchase, vice Newport, deceased; Dec. 6.

81st Foot—Assistant-Surgeon James Shand Duncan, M.D., from the Staff, to be Assistant-Surgeon, vice Mullan, who exchanges; Nov. 20.

86th Foot—Brevet-Lieutenant-Colonel William Kier Stuart to be Lieut.-Colonel, without purchase, vice Brevet-Colonel Henry Lowth, C.B., retired upon full pay; Brevet-Major John Perkins Mayers to be Major, without purchase, vice Stuart; Lieutenant James Kenneth Douglas Mackenzie to be Captain, without purchase, vice Mayers; Jan. 24.

87th Foot—Lieutenant Edmund Henry John Meredyth to be Captain, without purchase, vice Brevet-Major Ring, deceased; Ensign George Robert Storey to be Lieutenant, without purchase, vice Meredyth; Jan. 20.

93rd Foot—Lieutenant Reginald Brocas, from the 75th Foot, to be Lieutenant, vice Macnamara, who exchanges; Nov. 14.

95th Foot—Louis Thomas Kough Gutavinski, Gent., to be Ensign, without purchase, vice John Henry Prior, who resigns; Surgeon John Gibbons, from the Staff, to be Surgeon, vice Webb, appointed to the Staff; Feb. 3.

98th Foot—Captain Thomas Rice Hamilton, from the 61st Foot, to be Captain, vice Blackett, who exchanges; Feb. 3.

99th Foot—Assistant-Surgeon William Kippen Stewart, M.D., from the Staff, to be Assistant-Surgeon, vice Whitla, appointed to the Staff; Feb. 3.

DEPÔT BATTALION.

Captain and Adjutant Richard Young to be Major, by purchase, vice McDonald, promoted; Feb. 3.

Captain Robert Bennett, from the 63d Foot, to be Adjutant, vice Young; Feb. 3.

RECRUITING DISTRICT.

Brevet-Colonel George Campbell, C. B., from the the 52d Foot, to be Inspecting Field Officer, vice Brevet-Colonel Pole, promoted to the rank of Major-General; Jan. 31.

Brevet-Colonel James Robert Brunker, from half-pay as Lieutenant-Colonel Unattached, to be Inspecting Field Officer vice Brevet-Colonel Charles Franklyn, C. B., placed on the Staff, with the temporary rank of Major-General; Feb. 3.

ARMY HOSPITAL CORPS.

Captain and Brevet-Major Stonehouse George Banbury, from the Medical Staff Corps, to be Captain; Feb. 3.

Captain Richard S. Cole, from the Medical Staff Corps, to be Captain; Feb. 3.

CHAPLAIN'S DEPARTMENT.

The Commission of the Rev. Charles Morgan as Chaplain of the Fourth Class, to bear date 7th September, 1857, instead of 1st April, 1859, as stated in the *Gazette* of the latter date.

UNATTACHED.

Captain Theodore Wirgman, from the 8th Light Dragoons, to be Major, by purchase; Feb. 3.

HOSPITAL STAFF.

Surgeon Henry March Webb, M.B., from the 95th Foot, to be Surgeon, vice Gibbons, appointed to the 95th Foot; Feb. 3.

Assistant-Surgeon William James Mullan, from the 81st Foot, to be Assistant-Surgeon to the Forces, vice Duncan, who exchanges; Nov. 20.

Assistant-Surgeon James Parr, from the 56th Foot, to be Assistant-Surgeon to the Forces, vice Lougheed, appointed to the 56th Foot; Feb. 3.

Assistant Surgeon George Whittla, from the 99th Foot, to be Assistant-Surgeon to the Forces, vice William Kippen Stewart, M.D., appointed to the 99th foot; Feb. 3.

Acting Assistant-Surgeon John Mills Wills, has been permitted to resign his appointment; Feb. 3.

BREVET.

The promotion of Brevet-Colonel the Honourable Augustus Almoric Spencer, C.B., and Brevet-Colonel Arthur Augustus Thurlow Cunynghame, C.B., to the rank of Major-General in the East Indies, to be temporary and local and not local only, as stated in the *Gazette* of the 13th January.

Brevet-Colonel William Anson McCleverty, Lieutenant-Colonel on half-pay unattached, to have the temporary and local rank of Major-General in the East Indies; Feb. 3.

Lieutenant-Colonel Wilmot Henry Bradford, of the Royal Canadian Rifle Regiment, having completed five years in the rank of Lieut.-Colonel Commanding a Regiment, to be Colonel in the Army; Dec. 29.

Captain Archibald Tisdall, of the 35th Foot, to be Major in the Army; Feb. 3.

Captain Compton Alwyne Serrie Dickins, 12th Foot, to be Major in the Army; Feb. 3.

MEMORANDA.—Thomas Hunt, Esq., to be Paymaster to the Royal Artillery and Royal Engineers in China; Jan. 21.

Brevet-Lieut.-Colonel Frederick Geddes Bull has been permitted to retire from the Service by the Sale of an Unattached Majority, he being about to become a Settler in Canada; Feb. 3.

ROYAL INDIAN MILITARY COLLEGE AT ADDISCOMBE.

The following is the Official List of Successful Candidates for admission to the Royal Indian Military College, Addiscombe, at the examination held by the Council of Military Education at the Royal Hospital, Chelsea, in January, 1860.

Order.		Marks.
1.	Name, Andrew A. Jopp; age, 17; places of education, Edinburgh Academy, and Southland's, Battersea	3779
2.	Henry H. Hardinge, 17, Trinity College, Dublin, and Merchant Taylors' School	3747
3.	Kellow C. Pye, 17, St. John's Wood Proprietary School, and King's College, London	3561
4.	William J. R. Harrison, 18, Harrow	3555
5.	Alfred E. Turner, 18, King's College, London, and private tuition	3534
6.	Bindon Blood, 17, Royal School, Barraghow	3338
7.	Ralph R. E. Brockman, 18, Rev. G. Wardlaw's, Helensburgh; Mr. Brown's, Kensington Grammar School; and Rev. W. Foy's, Hampstead	3313
8.	James F. Brough, 17, Victoria College, Jersey	3107
9.	Charles H. Spragge, 18, Cheltenham College, and Rev. W. Kieser's, Blackheath	2966
10.	Robert J. M'Clure, 18, Queen's College, Belfast	2758
11.	Edward Stedman, 17, City of London School	2757
12.	William A. J. Wallace, 18, Kingstown School, Dublin	2753
13.	Windham H. Hallett, 17, Rev. G. Ewbank's, Brighton	2713
14.	Charles W. Long, 17, Wimbledon School	2634

THE ROYAL MARINE ARTILLERY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As a well-wisher to the naval service of my country, I feel that I am addressing one who entertains that feeling in a greater degree, at the same time combining therewith the desire to do good service to anything connected with what is truly held to be our country's safeguard and only reliance in time of danger. I have only to regret my want of ability to put forth the ideas that I wish to lay before you; but if I can succeed in rendering myself at all intelligible, I must trust to your forbearance and beg your powerful aid in the cause I have so much at heart. For why? It is the cause of justice and fair-play, which is at all times dear to a true-hearted sailor, and in my experience I have been enabled to judge somewhat of the relative usefulness and value in every point of the corps, which I now invoke your aid in favour of—the corps of Royal Marine Artillery, the most useful corps under the Crown; and this I say without fear of contradiction. Now, in this time of steam-power, line-of-battle ships, that formerly required some 800 seamen, might go to sea with 100, and be equally efficient for all fighting purposes, provided you can put, say 300 marines and 300 marine artillery on board for the armament, particularly now with so many shell guns, &c., and Armstrongs. This is for an emergency to increase the Reserved squadron in time of need, and the seamen being scarce, or not to be had. Then how useful this corps is to garrison the dock-yard fortifications, and different forts, along-shore. I need not point out the usefulness of the corps, and I believe it is fully admitted in high and influential quarters; but the army, that is, Guards, Royal Artillery, and Line, alone find favour, for the great and influential interests are all connected with those branches of the Army, and the poor Marine Artillery as also the Marines, have no powerful friends; men of rank and wealth do not like the salt water much, or the slow promotion of the Marines. The officers of the Royal Marine Artillery are a most scientific body, equal in all respects to the Royal Artillery, if not superior in some. What is the present system, in consequence of the small number of the Marine Artillery? The senior subalterns now, when promoted, have to go back to the Marines, losing—in the course of these three or four years' attachment to that corps, for want of vacant companies in their own—all the artillery and shell-practice, and neglecting other scientific acquirements, which they have attained to by extra studies and examinations they have had to pass. Besides, how inconvenient and expensive to the individuals so circumstanced: different uniforms (from blue to red), mess entrances, &c., and losing that *esprit de corps* which is so essential, to the young officers more especially, to uphold! But why should I occupy your valuable time in enumerating further disabilities they labour under: you no doubt are acquainted with them already. Suffice it now merely to add my opinion, that the corps of Royal Marine Artillery, of now some twelve companies, consisting of about fifteen hundred men, should be increased to thirty companies, of 150 each, or five thousand in total; that is, marine artillery on peace establishment should consist of not less than 5000, and war establishment, 8000; and the Royal Marine Light Infantry, of peace establishment, 15,000, war establishment, 20,000: this force should be the minimum, even were you to reduce the Line and Royal Artillery to effect it. But now nothing is done but augmenting the Line and Royal Artillery; and the Marine Artillery, as I before observed, the most useful corps under the Crown, is neglected. I will not longer trespass upon your time and patience, but leave it to your sense of justice and patriotism, and hope I have said sufficient to enlist your powerful aid in their cause. In a future letter, when time will permit, I will give you some more connected particulars.—I am, sir, &c.,

POST-CAPTAIN, R.N.

Cheltenham, February 1, 1860.

HONOURS TO THE INDIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have received a letter, which I subjoin, from a field-officer of some standing in the Indian Army, comparing the amount of brevet and other honours conferred upon Royal officers for late services in India, with those granted for precisely the same services to officers of the late East India Company's Service. A tabular statement appended will show the great disproportion in favour of the Royal Service.

In addition to the subject named in this letter, there is another point on which Indian officers express and feel much dissatisfaction, and that is, the uncertainty in which they are kept concerning their future prospects. I am talking now more particularly of the Bombay Army, who have been so highly and justly praised by Lord Clyde in his recent address to the 9th Bombay Native Infantry. No one knows if that army is to be maintained in its present state, or degraded to the condition of a mere body of police. Artillery officers look with apprehension on the prospect of their amalgamation with the Royal Artillery, because it will involve their supersession by officers of half their standing. Officers of Native Cavalry fear that their regiments will be broken up, and that there is to be some change in this department we infer from the fact of the issue of Cavalry cadetships being stopped, and the fragments put together after the pattern of the Irregular Horse; and the Native Infantry dread being the police, or, what is worse, the treasure and family escorts of the country. The questions asked of some hundreds of witnesses by the Royal Commission for considering the reorganisation of the Indian army, are still in the mouths of Indian officers, who have not been in the least enlightened by the enormous book full of evidence elicited by the Royal Commissioners; and scarcely at all by the Report of the Commissioners themselves. I am not at all sure that a transfer of the whole Indian Army would be distasteful to the majority of Indian officers (to the junior portion I think it would not); but I am sure that there is a pretty general fear (warranted by the opinion of what I may call the Royal side of the commission and the Royal witnesses) that *all* the European portion of the late company's army will shortly be placed under the Horse Guards, and the native portion left as it is under the rule of the Indian minister and the council. I only trust most sincerely that such a state of affairs will not come to pass; but that if the Horse Guards are to have the Europeans, they may have ALL, so that all may have an equal chance of Horse-Guard favour and esteem. But the main end so earnestly desired by Indian officers is that Government will settle something quickly—and surely it does not seem an unreasonable desire; at present no Indian officer can make any arrangement for the future, and he knows too little of his new masters to trust their liberality, as he always did that of his old masters. I hope, therefore, that Parliament this session will make a great effort, and dispel the gloomy views held by officers who have served their country so well.

Yours faithfully,

Feb. 2, 1860. H.E.I.C.S.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—When the rule of John Company was superseded in India, the officers of their army were assured by Act of Parliament that, at all events, their position and rights would be respected. Brevet promotion in the Royal Army, which almost every mail increases, has created a feeling of gloom and despair, at least in the Bombay Army, the officers of which have, since the mutinies broke out in May, 1857, been continually on field service, brigaded with royal troops, fighting side by side, charging with equal spirit and effect, pursuing rebel armies with equal determination and endurance, mentioned in the same terms in their despatches by generals and other commandants,—and yet these Indian officers find no honours, no rewards, no Brevet pushing *them* up the ladder of promotion; on the contrary, each occasion on which they have nobly done their duty has, from the neglect of the Home Government to promote them equally with their fortunate brothers of the Royal Army, been a source of disappointment, dissatisfaction, and disgust. In order that the people of England may know the extent to which Indian officers are thus superseded, and the justice which, perhaps unintentionally, is dispensed to them, enclosed is a list of the troops employed in the Rajpootana and Malwa divisions of the Bombay Army, from January, 1858, with the services rendered, and Brevets granted in consequence, distinguishing the results of the two Services.

"RAJPOOTANA," FROM JANUARY, 1858.

Troops on Service.	Services.
H. M.'s 8th Hussars.	Assault and Storm of Rowah.
1st Bombay Lancers.	Siege and Destruction of Awah.

THE NAVY.

ADMIRALTY, JAN. 28.—APPOINTMENTS.—Masters S. Libby (b) to the Fawn, C. Barney (additional) and J. D. Rogers to the Dasher.

Chief-Engineers J. G. Oakshott to the Conqueror; W. A. Dinnen to the Asia, for service in the Prince of Wales; and J. Churcher to the Cumberland, for service in the Tartar.

Surgeons Dr. J. Gallagher to the Sans Pareil, and W. R. Dalton to the Castor.

Paymaster J. Shepherd to the Racer.

JAN. 30.—PROMOTIONS.—Engineers W. M. Biden, promoted to chief-engineer, and appointed to the Asia, 84, at Portsmouth, for service in the Stromboli, 16, at Portsmouth; W. E. Campion, promoted to chief-engineer, and to remain in the Firebrand; J. G. G. Dunn, promoted to chief-engineer, and appointed to the Wellington, 72, at Devonport, for service in the Desperate, 8, at Devonport; W. M'Dowall, promoted to first-class assistant-engineer, and appointed to the Asia, for service in the Hornet, 17, at Portsmouth; T. E. Miller, promoted to first-class assistant-engineer in the Nimrod, 6, East India and China station; W. H. Hooper, promoted to first-class assistant-engineer, and appointed to the Ariadne, 26, at Portsmouth; W. D. Beaton, promoted to first-class assistant-engineer in the Pembroke, 60, at Harwich, for service in the Magnet, tender; J. Lethlean, promoted to acting first-class assistant-engineer in the Racoon, 22, Mediterranean station; and J. Fox, promoted to acting first-class assistant-engineer in the Renown, 91, Mediterranean station.

APPOINTMENTS.—Assistant-Paymaster W. H. S. Batt (1859) to the Algiers, 91, screw steam-ship, with the Channel squadron.

Assistant-Clerk R. C. Webb, to the Conqueror, 101, screw steam-ship Mediterranean station.

Second-Class Assistant-Engineer J. W. M'Kenzie to the Fawn, 17, screw steam-sloop, at Sheerness.

Acting Second-Class Assistant-Engineer R. H. Alvin to the Rhadamanthus, 4, paddle-wheel steam-vessel, at Woolwich.

Acting Third-Class Assistant-Engineer, J. T. Kelly, to the Flying Fish, 6, screw steam-sloop, with the Channel squadron.

JAN. 31.—APPOINTMENTS.—Second-Class Assistant-Engineer E. T. Read to the Hogue, 60, screw steam-ship, on coastguard service at Greenock, for service in the Harpy, 1, paddle-wheel steam-vessel, at Woolwich.

Acting Third-Class Assistant-Engineer R. Wyllie, to the Hogue, for service in the Harpy.

Midshipman A. Grenfell, to the Nile, 90, screw steam flag-ship at Devonport.

Naval Cadets M. G. Thorold and A. P. Douglas to the Forte, 51, screw steam-frigate, at Sheerness.

FEB. 1.—PROMOTION.—Engineer N. Farrant, promoted to second-class assistant-engineer and appointed to the Cumberland 70, at Sheerness, for charge of machinery of the Wrangler, 4, screw steam gun-vessel, at Sheerness.

APPOINTMENTS.—Lieutenants Lord C. T. M. D. Scott (1859) to the Forte; H. J. F. Campbell (1859) to the Excellent, gunnery-ship, at Portsmouth; J. J. Gregory (1859) to the Queen, 86, screw steam-ship, at Sheerness; J. E. Stokes (1858) to the Alecto, 5, paddle-wheel steam-sloop, at Woolwich; H. N. Hippisley to the Alacrity, 4, screw steam-sloop, at Sheerness; and R. J. St. Aubyn (1841) to the Pembroke, 60, screw steam-ship, on coast-guard service at Harwich, additional for service in the coast-guard.

Chief-Engineers J. C. Robinson to the Majestic, 80, screw steam-ship, at Sheerness; H. J. Layland to the Forte; and B. Greetham (1855) to the Majestic, for service in the Hastings, 60, screw steam-ship, on coast-guard service at Liverpool.

Surgeons J. G. Risk (1846) to the Hawke, 60, screw steam-ship, on coast-guard service on the coast of Ireland; and T. J. Layton, M.D. (1850), to the Conqueror, 101, screw steam-ship, Mediterranean station.

Paymasters F. J. Fegen (1849) to be Secretary to Rear-Admiral Sir A. Milne, K.C.B.; and J. T. Sueter to be Secretary to Admiral Bowles, C.B.

Assistant-Surgeon M. W. Cowan, M.D. (1854) to the Forte.

Midshipman C. F. Cox to the Melpomene, 50, screw steam-frigate, with the Channel squadron; and W. H. C. Selby to the Forte.

First-Class Assistant-Engineers J. H. H. Smale to the Forte; and G. H. Beaton to the Majestic, for service in the Dapper, steam gun-boat.

Second-Class Assistant-Engineer W. M. Harvey to the Majestic.

Third-Class Assistant-Engineers C. Platt to the Majestic, for service in the Dapper; C. M'Keever and T. Rose to the Majestic.

Acting Third-Class Assistant-Engineers H. W. Masterman to the Fisguard, 42, at Woolwich, for temporary charge of the machinery of the Weser, 6, paddle-wheel steam-vessel, at Woolwich; S. M'Dougall to the Pembroke; H. Clyde to the Cumberland, for temporary charge of the machinery of the Fly, steam gun-boat; W. M'Glashan to the Majestic; J. Mutter to the Cumberland, for service in the Bullfrog, steam gun-boat; J. M'Arthur to the Majestic, for service in the Hastings; W. Ball and C. M. Johnson to the Forte.

Naval Cadet H. F. Gye to the Forte.

The following officers have also been appointed to the Forte:—Captain, Edward Winterton Turnour (1857); Commander, Cecil William Buckley, V.C. (1856); Lieutenants, Edmund Joseph Squire (1855) and Edward Henry Wilkinson (1856); Master, Francis Hooff May (1844); Surgeon, John Irwin Crawford, M.D. (1843); Secretary, Matless Gledhill Autey, paymaster of 1858; Paymaster, George Henry Whillier (1854); Paymaster's Assistant, George Washington Jones (1859); Naval Cadet, Albert J. O'Rooke.

FEB. 2.—APPOINTMENTS.—Assistant-Surgeons W. J. Eames (1856) to the Emerald, 51, screw steam-frigate, at Devonport; J. Hudson (1853) to Haslar Hospital; J. Austin (1852) to the Sans Pareil, 70, screw steam-ship, at Devonport; A. Stevenson (1852) to the Hero, 91, screw steam-ship, with the Channel squadron; and W. D. Smyth, M.D. (1854), to be additional to the Victory, 101, flag-ship, at Portsmouth.

Acting Assistant-Surgeons P. Keelan (1859) to the Industry, and C. J. Watson, to the Conqueror.

Midshipman G. A. W. Birch to the Forte.

Naval Cadet the Marquis of Queensberry to the Forte.

Aboukir, 90, Captain Charles F. Schomberg, from Portland, arrived in Plymouth Sound on Wednesday.

Alacrity, 4, screw gun-vessel, Commander J. K. Baird, is filling up her complement of coal from the depôt at Spithead.

Alecto, steam-vessel, Commander Raby, is fitting at Woolwich for service in the River Plate.

Amethyst, 26, Captain Sidney Grenfell. Commissioned July, 1856, and sailed from England in September same year; ordered home from the Pacific.

Arachne, 18, Commander J. E. Montgomerie. Commissioned October, 1855, and left England in December the same year. Is ordered home from the West India station.

Arethusa, 50, at Devonport, is ordered to be sent to Chatham, where she is to be converted into a screw ship. The Virago, steam-sloop, will tow her to the eastern yard.

Ariadne, 26, screw, Captain Vansittart, at Spithead, will not resume her screw trials until Monday.

Atalanta, 16, Commander T. M. S. Pasley. Commissioned May, 1856, and left England in July in the same year—home from the West India Station.

Bacchante, 51, screw, in the steam-basin at Portsmouth, is nearly complete at the hands of the riggers and steam reserve. She has commenced shipping her stores and coaling, preparatory to her steam trial.

Brilliant, 20, one of the sailing frigates at this port which is fitting for the service of the Naval Coast Volunteers, is to have a complement of 25 men, who are to be borne as supernumeraries. This vessel is progressing very fast, and will be completed by the end of February. A few more hired carpenters are still required to assist in finishing her.

Brunswick was in the Tagus on the 27th of January.

Castor. Admiralty orders have been received to lay down moorings at Greenhithe for the Castor, 36, fitted out as a training-ship for naval volunteers. The Castor was formerly commanded by Commodore Trotter, and stationed at the Cape of Good Hope.

Centurion, 80, screw, Captain Rogers, fitting at Devonport, has filled up her complement of men, and is progressing rapidly with her equipment.

Conqueror, 101, screw, Captain C. Sotheby, fitting at Devonport, has but few vacancies to fill up.

Cossack was at Carthagena when the last West India Mail left.

Cressy was at Baiæ the week before last. She was obliged to run out of port on one occasion, the weather was so bad.

Diadem, 32, screw, Captain J. H. Cockburn, is refitting at Spithead, and has sent down fore and mainyards, topsail-yards, topgallantmast, and rigged in jibboom. Her crew were paid wages on Monday, and granted leave ashore (five days) by watches.

Elk, 12, Commander Hubert Campion. Commissioned May, 1856, and left England in July the same year, ordered home from Australia.

Emerald, 51, Captain Andrew Cumming, will be ready in a few days to proceed with Admiral Milne.

Espoir, 5, arrived at Devonport, on Friday, the 27th ult., from Pembroke, in the charge of Mr. Paul, and was towed on Wednesday to Keyham Yard, where she will be docked, coppered, and receive her machinery.

Euryalus, 51, Captain Tarleton, on her return from the Mediterranean, is to call at Plymouth, where she will remain some days to afford Prince Alfred an opportunity of visiting the public works, &c. A programme of the receptions to be given to His Royal Highness is with the local government officials.

Forte, Rear-Admiral of the White, the Hon. Sir H. Keppel, K.C.B., has been appointed to the command of the above station, vice Rear-Admiral the Hon. Sir F. W. Grey, G.C.B., and he will shortly hoist his flag on board the new 51 gun screw-frigate Forte, at Sheerness.

Gorgon was at Greytown when the last accounts left.

Greyhound, 17, Commander F. W. Sullivan, has filled up with coal, and is now waiting orders in Plymouth Sound.

Hermes, 6, steam-vessel, Commander W. E. A. Gordon. Commissioned 1855, left England 1857; ordered home from the Cape.

Highflyer. There was a report that H.M.S. Highflyer was lost off Japan. By a letter received by this mail she was quite safe at Hong Kong on the 10th December last.

Impregnable, 104, Captain W. H. Stewart, flag-ship of the Commander-in-Chief at Devonport, was paid wages on Wednesday.

Majestic, 80, at Chatham, attached to the steam reserve, is to be sent round to Liverpool, in order that the officers and crew of the screw-steamer Hastings, 60, employed on the coast-guard service at that port, may be transferred to that vessel, the Lords of the Admiralty having decided on employing the Hastings as a drilling-ship in the Mersey for the Naval Coast Volunteers.

Medusa, 4, steam-vessel, Commander W. Bowden. Commissioned in 1856, and left England in October the same year; ordered home from the west coast of Africa.

Mersey, 40, screw, Captain H. Caldwell, C.B., got under way at Spithead on Saturday morning, and proceeded to the trial ground in Stokes Bay, in charge of Captain George T. Gordon, commanding steam reserve at Portsmouth, to test her "Griffiths" propeller. Mr. J. Dinnen, the Admiralty inspector of machinery afloat, Mr. G. Murdoch, inspector afloat at Portsmouth, and Mr. Miller, asssistant-chief-engineer at Portsmouth, were also on board to superintend the trial. The Admiralty having entered into an agreement with the patentee of the "Griffiths" propeller to pay a "royalty" of a certain sum per horse-power for all vessels in Her Majesty's Navy to which his principle might be applied, the present trial was instituted to test the comparative merits of the Griffiths and the common screw, as used on the ship's trial trip in Stokes Bay, in March, 1859. Saturday proved as favourable in every point of view for the trial as could possibly have been desired, but at one time an accident occurred, which might have led to very serious results. The ship, at the conclusion of one of her runs, was on the point of rounding to for commencing another run to the westward, when the wheel-ropes carried away, and for some moments the Mersey, with her head to the shore, going at full speed, was in danger of running full tilt on the ground. Prompt measures on deck and in the engine-room, however, averted the catastrophe. Six runs were made at the measured mile, and the results gave the ship a speed, in knots, of 12 and eight-tenths. Draught of water—forward, 21 feet 4 inches; aft, 22 feet 10 inches. Pressure of steam—in the boilers, 20 lb.; on engines, 19 lb. Average revolutions of engines, 57½; the *maximum* being 59. Diameter of screw, 20 feet; pitch, 29. The following is a description of the screw,—the "Griffiths," with the blades attached to the boss or sphere, on Messrs. Maudslay's plan. The ship's steering properties were found to be good, and with the helm hard a-starboard, under full steam, she made a complete circle in eight minutes six seconds. The speeed realised on the trial trip in March last was 13·290, with the *maximum* of 56 revolutions of engines. The present trial, therefore, shows an increase of indicated horse-power of engines, but a decrease of half a knot per hour in the ship's speed. The loss in speed may be accounted for in two ways. The ship is now five and a-half inches deeper in the water than on the former trial, and as she has not been in dock since she has been in commission, her bottom must necessarily be foul, and the only means to arrive at a correct conclusion as to the merits of the two screws in point of speed would be for the Mersey to re-ship her old screw, and test it under circumstances of wind and weather as closely approximating to Saturday's trial as possible. The vibration of the Mersey on Saturday was not so great as in March last, and up to nearly three-quarter speed there was not much perceptible; from three-quarter to full speed it very sensibly increased, but as it is a characteristic feature of the Mersey to drive a tremendous sea before her when at full speed, it may be a question as to what amount of the vibration really arises from that cause alone. A different pitch of the screw might also increase the ship's speed; but it is very doubtful whether the Mersey will ever excel, if even she equals, whatever form of screw be applied to her, the rate of speed she realised on her trial trip of March, 1859. The Mersey, left Spithead at noon on Thursday, under canvas, for the westward. Wind fresh from N.N.E.

Neptune was in the Tagus on Jan. 27th.

Nimrod, 4, screw, Commander R. J. Wynniatt. Commissioned March, 1857, and sailed in April same year; ordered home from the East.

Osborne, steam-vessel, Master-Commander G. H. K. Bower, is ordered to be repaired and fitted with all possible dispatch. It is said upon very good authority that his Royal Highness the Prince of Wales will visit Canada in this ship early in the spring. As the Osborne is not capable of stowing conveniently sufficient fuel for a voyage across the Atlantic, it is conjectured that she will be towed to a certain latitude, and then cast adrift, when she will rely upon her own resources and make for St. John's. A large quantity of patent fuel is to be shipped on board the Osborne. His Royal Highness is expected to be absent nearly the whole of the summer, and will of course ascend the St. Lawrence, visit the lakes, Niagara, as well as Quebec, Montreal, &c.

Perseverance, 2, iron screw troop-ship, Commander E. R. Power, sailed from Portsmouth on Saturday for Corfu, having on board the 1st battalion of the 9th Regiment, under the command of Lieut.-Colonel Bethune. The battalion comprised 21 officers, 1 surgeon, and 1 assistant-surgeon, 34 sergeants, 14 drummers, 28 corporals, 457 privates, 56 women, 71 children, 3 officers' wives and 6 children.

Pluto, 4, steam-vessel, Lieut.-Commander C. H. Simpson. Commissioned December 1856, left England 1857; ordered home from the west coast of Africa. The Pluto has taken a great slave prize as we learn by the following extract of a letter dated Pluto, at sea, Nov. 30:—"We left Mayomba on Friday last, and stood out for a cruise. We are now about 200 miles off the land, and yesterday and the day before we chased a Yankee brigantine, but without success. This morning, however, we captured the notable Orion, with 888 slaves on board. Only fancy, after the Yankees have sent her to New York, and she has been let go, and now the Yankees have taken her into the Congo and detained her, and the Triton had her in tow, that we should take her with very little trouble. It was a glorious sight. I shall never forget it. We saw her at daylight about eight or ten miles off, and steamed after her, coming up to her in about an hour. Well, we did not hoist our colours till we were close to her, and then she sent up the stars and stripes. Then we steamed round her, and our captain hailed to know what ship it was, and the fellow sung out 'Orion,' and that he was going to New York; so our captain said he would board her, and as he was stepping out of the boat to go on board they pulled down their colours, tore them in half, and hove them overboard. Our men then gave three cheers, which were answered by the liberated slaves in a manner that we shall all remember as long as we live. She is a splendid prize. This is a great loss to the slave-dealers, as they feel the loss of slaves more than ships, and this makes 2080 taken in less than two months." From previous letters it appears that the Orion was captured in April last by Her Majesty's steamer Triton; she then nailed the American flag to her mast and refused to surrender, but was afterwards taken possession of by the American cruisers, and conveyed to New York.

Prince Regent, 90 guns, sailing two-decker, at Portsmouth, is ordered to be placed in dock and receive the necessary lengthening and alterations to her stern to adapt it to the screw. The Prince Regent is a ship of good capacity of stowage. She was originally constructed as a three-decked ship, but afterwards had her upper deck removed.

Prometheus, 5, Lieutenant T. B. Hollinworth, has discharged her powder in Plymouth Sound, and went into dock at Devonport yesterday.

Racoon left Malta on the 21st for Leghorn, to relieve the Terrible.

Racer was at Greytown at the end of December.

Ranger, 5, launched from Deptford yard, and fitted by Messrs. Rennie with a couple of 80-horse engines, is ordered to proceed to Woolwich, and enter into trial of her machinery at the measured mile.

Renown, 91, screw, Captain Arthur Forbes. Commissioned at Sheerness in November, 1857, and left England in

Digitized by Google

April, 1859. It is rumoured that the Renown is to escort the Prince of Wales to Canada in the spring. She is ordered home from the Mediterranean.

Rodney, 91, screw steamer, completing at Chatham, has a large party of engineers at work on board, who are employed from 6 o'clock in the morning until half-past 7 in the evening in preparing the ship for the reception of her screw, machinery, and engines, and as soon as they have been fixed on board she will be taken into dock to be completed for the first division of the steam reserve.

Royal Albert, 121, bearing the flag of Rear-Admiral Sir Charles Fremantle, Commander-in-Chief of the Channel Fleet, arrived at Portland on Wednesday, under steam from Plymouth, and took up her old position in the harbour. The following officers belonging to this ship, at Plymouth, are at present under treatment for measles in the Royal Naval Hospital, viz. :—Captain George Drury, Royal Marines; Lieut. Elibank H. Murray, R.N.; Mr. John V. D. Butler, mate, and Mr. Charles Brown, midshipman. Of her seamen, marines, and boys, there are in the naval establishment six cases of measles, one of small-pox, and one of scarlatina. These patients are, it is stated, progressing favourably under their medical treatment. Some officers, sick, are ashore at their own homes. There is no local cause on board the ship to account for the outbreak. Measles and small-pox have been prevalent in the vicinity of Plymouth for some weeks.

Royal William, 90, will probably be taken out of dock at Devonport next Thursday.

Siren, 16, Commander G. M. Balfour. Commissioned 1855, and left England in October same year; ordered home.

Trident, 6, iron steam-vessel, last from the West Coast of Africa, has been docked, to be refitted for service.

Vesuvius, 6, steam-vessel, Commander C. Wise. Commissioned 1857, and left England in June same year; ordered home from the west coast of Africa.

Viper, 4, screw, Commander W. N. Hewitt. Commissioned November, 1857, and left England January, 1858; ordered home from the west coast of Africa.

CHATHAM, Jan. 29.—The utmost activity now prevails in all the departments of Chatham Dockyard, and the mechanics and workmen connected with the various establishments are employed extra hours at unlimited wages, in order to hasten forward the completion of those vessels now on the stocks. In consequence of orders just received from the Admiralty, the whole of the shipwrights and mechanics are to be employed during the time formerly granted them for dinner, and consequently they will not be allowed to leave the dockyard from the time they enter in the morning until they discontinue work in the evening, a few minutes in the middle of the day being allowed them for refreshments. The ships on the stocks which have the greatest number of hands employed on them are the Bulwark, 91, the Atlas, 91, the Undaunted, 51, the Orpheus, 21, and the Rattlesnake, 20. A numerous body of shipwrights is also employed on the Severn, 51, undergoing the process of conversion from a sailing-frigate to a screw-steamer.

A very serious accident occurred in Chatham Dockyard on Tuesday morning to a workman named Thomas Burton, a leading man of the labourers employed on board the Severn, 51, in dock, who by some accident fell down the aperture left for the screw into the dock, a depth of about 30 feet, receiving most serious injuries, chiefly on the head. He was at once removed to the surgery, and afterwards to Melville Hospital; but it is not thought he can recover.

PEMBROKE DOCKYARD.—It is stated that a 60-gun ship, probably the Blenheim, screw block-ship, is about to be placed on the Milford station, for coast-guard and coast volunteer service.

Owing to the non-fulfilment of the contract for excavating the mud out of the fitting basin in the Portsmouth dockyard, four steam-ships of war, namely, Bulldog, 6, paddle, Medea, 6, paddle, Nelson, 91, screw, and Stromboli, 6, paddle, are completely fastened in their respective docks, Nos. 2, 3, 4, and 5. The vessels were reported to the Admiralty ready to be undocked on the 27th instant, having all been thoroughly repaired and re-coppered.

It is reported at Portsmouth that provision is about to be made for accommodating seamen, belonging to ships fitting out, in barracks about to be constructed, instead of in berthing in hulks, as under the present system. For this purpose it is said that the rigging house and sail loft in the Dockyard are to be converted into barracks, and that the south store will be appropriated for a rigging house and the middle store for a sail loft.

Mr. J. Oliver, temporary clerk in the accountant's office, Dockyard, Devonport, having completed satisfactorily the usual period of probation, has been confirmed as a third-class clerk. Messrs. J. Nauscawen and J. Lampen, shipwrights in the same establishment, have been superannuated, each on 46*l.* 19*s.* per annum.

Notice is given that the distribution of the amount of prize money awarded for the destruction of pirates in the China Seas, by her Majesty's ship Comus, between the 24th and 27th of August, 1856, will commence on Monday. The following are the shares due to an individual in the several classes :—Commander, 188*l.* 0*s.* 5*d.*; third class, 37*l.* 6*s.* 2*d.*; fourth, 23*l.* 19*s.* 8*d.*; fifth, 13*l.* 6*s.* 6*d.*; sixth, 11*l.* 19*s.* 11*d.*; seventh, 7*l.* 19*s.* 11*d.*; eighth, 3*l.* 19*l.* 11*d.*; ninth, 2*l.* 13*s.* 4*d.*; tenth, 1*l.* 6*s.* 7*d.*

Captain Stuart, R.N., a well known writer on naval abuses, has arrived in Devonport, and attended a meeting on Monday of the executive officers of the Navy, for the purpose of making arrangements to hold a general meeting of the executive officers of H.M. Service, and memorialise the Admiralty on the present confused and illiberal system of retirement.

There are now three admirals at Portland—Fremantle, Erskine, and Elliott, and the following ships and gun-boats :—the Royal Albert, 121, Capt. H. J. Lacon; the Edgar, 91, Capt. James E. Katon; the Algiers, 91, Capt. W. D. O'Callaghan; the Mars, 80, Capt. James N. Strange; the Donegal, 101, Capt. Henry Broadhead; the Hero, 91, Capt. G. H. Seymour; the Trafalgar, 91, Capt. Edward G. Fanshawe; the Melpomene, 51, Capt. J. F. Ewart; the Mutine, 17, Commander William Graham; the Blenheim, 60, Capt. Francis Scott; the Flying Fish, 6, Commander C. W. Hope; and the gun-boats Biter, 2, and Partridge, 2.

Fifty first and second class lads were yesterday enrolled in the Fisgard's offices at Woolwich for the Navy, and an additional number of 80, supplied with a complete sea-going kit, were despatched by rail to Portsmouth as disposable for the fleet.

W. Stewart, R.N., F.R.G.S., has proceeded from Southampton in a Peninsular and Oriental steamer for Malta, to join the flag-ship of Admiral Rodney Mundy.

ENGINEERS AND STOKERS.—The following will be the future establishment of engineers and stokers on board Her Majesty's ships :—

ENGINEERS.

Vessels under 200 horse-power		3 assistants.
Do. at 200 h.-p., and under 350 h.-p.,	1 chief and 3	do.
Do. at 350 h.-p., and under 500 h.-p.,	1 do. and 4	do.
Do. at 500 h.-p. and upwards ...	1 do. and 6	do.

STOKERS.

Screw.			Paddle.	
Leading Stokers.	Stokers and Second-Class Stokers.	Horse-power.	Leading Stokers.	Stokers and Second-Class Stokers.
1	5	under 100...	2	6
2	6	100, and under 150...	3	6
2	8	150 — 200...	3	9
3	9	200* — 250...	3	12
3	11	250 — 300...	4	14
4	12	300 — 400...	4	17
4	14	400 — 500...	6	18
5	15	500 — 550...	6	21
5	17	550 — 600...	6	24
6	18	600 — 700...	6	27
6	20	700 — 800...	6	30
6	22	800 — 900...	6	33
6	24	900 — 1,000...	6	36

* Sloops of Mutine class, with two stokeholes, to have 12 stokers.

ALTERATION OF RATING.—The following circular has been received at Portsmouth dockyard, and promulgated by the authorities by order from the Admiralty :—

"Circular No. 403. "Admiralty, Jan 24, 1860.
(Revision of the Complements of Her Majesty's Ships.)

"The Lords Commissioners of the Admiralty, having had under their consideration the complements of Her Majesty's ships, are pleased to direct that the undermentioned additions and alterations shall be made with regard to the positions and ratings of the officers and men to be borne on the books of Her Majesty's ships hereafter commissioned.

"1. The gunner, boatswain, and carpenter to rank next and after second master.

"2. The yeoman of the signals to be a first-class petty officer, and to be paid the same as other first-class petty officers; one to be borne in addition in flagships at home and abroad, and to be paid as a chief petty officer.

"3. A new rate of signalman established as a second-class petty officer, and to be paid as the present yeoman of signals.

"4. The armourer to be a first-class petty officer, and to be paid the same as a blacksmith.

"5. A new rating of plumber to be established as a first-class petty officer, and to be paid as a blacksmith.

"6. New ratings of tinsmith and second-class stokers to be established, and paid the same as a painter.

"7. A new rating as a sick-berth steward to be established, to have the same pay as a non-continuous service leading seaman, and the sick-berth gratuity allowed to the present sick-berth attendant.

"8. The sick-berth attendant for the future to be paid the same as a non-continuous service ordinary seaman, and to receive only half the sick-berth gratuity at present allowed; but on board a sixth-rate in which a sick-berth steward is not borne, to be paid the whole sick-berth gratuity.

"9. The following new ratings established to be paid as severally stated :—Shoemaker, lamp trimmer, engineer's servant, engineer's cook's assistant—with same pay as non-continuous service able seaman. Captain's servant, captain's cook's assistant, ward-room servant, ward-room cook's assistant, gun-room servant, gun-room cook's assistant—with same pay as non-continuous service second-class ordinary seamen.

"By order, W. G. ROMAINE."

COAST-GUARD OFFICES, FEB. 2.—APPOINTMENTS.—Chief Officers: Lieutenants Jocelin J. W. Jervis to command the Saint Catherine's, and Robert I. St. Aubyn, the Shoeburyness Stations.

STATIONS OF THE ROYAL NAVY IN COMMISSION.

With the dates of Commission of the Officers in Command.

Aboukir, 90, sc., Capt. D. Curry, 1846, Channel Squadron.
Acorn, 12, Com. R. B. Pearse, 1856, East Indies.
Actæon, 26, surv.-v., Com. J. Ward (b), 1858, East Indies.

NAVAL RENDEZVOUS

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Our great naval ports present a great contrast to the feverish excitement of manning a fleet during the last French war. Then we had a press-gang, and seamen found guilty of being ashore were liable to be sent to prison and fined. Our streets were crowded with *liberty* men, who spent their hard-earned pay in the wildest excesses. The Naval Rendezvous was full of fiddlers and Nancy Dawsons, and jolly Jacks were to be seen stamping and roaring away like so many madmen in these low public-houses.

Now, nearly all this demoralisation is changed or undergoing reformation. Our skilled seamen-gunners no longer eat 5*l.* notes between slices of bread, or fry their watches in butter to grease the spring. These reminiscences of the brave but thoughtless *pigtails* are remembered now as so much *yarn*, and are not practised by the man-o'-warsmen of the present day. For perhaps no class of men have undergone a greater change during the present generation than sailors; as Jack says, "Since Admiral Steam has hoisted his broad black pennant aboard a Queen's ship every thing is altered, from the figure-head to the rudder-chains."

Nevertheless, the "Naval Rendezvous" still remains, where every now and then, when there is a pressing demand for "hands" for the Navy, much of the demoralisation of former days may be seen. Why the Naval Rendezvous should generally be a dirty little public-house, situated in the worst locality in the town, is a question I shall not stop to discuss; the fact that it is so, and that these places are a disgrace to the Service, is the excuse I offer for taking the liberty of drawing your attention to them.

Now, sir, while admitting that there must be a sort of licence allowed at places of this description, yet it is impossible not to see that the present Naval Rendezvous are far behind even the (salt-water) manners of the age. Indeed I have some reason for speaking positively upon this matter, for these places are seldom entered by the respectable and steady seamen required for our ships of war now-a-days. And further, I have seen officers, whose duty it has been to endeavour to obtain men for their ships, shrink in disgust at the riotous scenes presented to them when engaged in that very disagreeable duty. There is no reason why this should be, and it would be a wise step for any government to adopt some better mode for engaging men for the Navy. Sailors' Homes have done much towards making seamen more comfortable when ashore by removing them from the temptations of the grogshop; but I question whether a greater boon would not be conferred upon the Service if suitable buildings, free from the pestiferous influences of the public-house, were selected at each of our great naval ports, where both officers and men could meet without being exposed to the insubordination that is almost certain to attend upon intoxication.

It would be easy to extend these remarks, but I fear to trespass upon your valuable space. I believe, however, I have said enough to indicate the advantages that would accrue to the Service, if a clean and respectable building was appropriated for a Naval Rendezvous at each of our leading seaports, where both men and officers could enter without being liable to meet with the annoyances they are at present subject to. I am, sir, yours obediently,

A LIEUTENANT, R.N.

LIFE-BELTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I must preface my few remarks by stating they are founded on dearly-bought experience, for I think I may venture to say, that few persons (if any) now alive have been shipwrecked oftener than myself, and I never was without a Life-Belt. Wrecks usually occur not very far from the land, frequently on it, or within swimming distance. Scarcely ever is a ship lost so immediately but that each person on board could have time to put on his or her belt, and inflate it.

In one case the ship went down in fifteen fathoms water in fifteen minutes after she struck, and that at midnight, when all save the watch on deck were below, and turned in. Yet I had time to put on my belt, inflate it, and in three minutes after she struck was prepared for a three miles' swim, the distance she was from the land; and though it so happened that I had not to swim that distance, still I felt the fullest confidence in being able to do so; and that confidence was not only, I can assure you, sir, very pleasant, but proved very advantageous; and I think I can safely assert that had those who unfortunately lost their lives on that occasion been similarly provided, a large proportion would in all human probability have been saved; for at daylight next morning several fishing-boats went to the scene, and picked off from portions of the wreck several who had been able to cling to it during the night. Nor does it need much logic to prove that those who can by this artificial means keep afloat, have a much better prospect of being saved than they who cannot.

In the minds of our seafaring population, *i. e.*, "Jack," a strong prejudice exists against these belts; not that he doesn't believe in their usefulness, but because he says, "Who'd go to sea with such a thing as that in his kit? He'd be taken for a swimming-master next;" but what new plan, beneficial or not, isn't Jack prejudiced against? And why? He seldom allows himself to think or reason. It is clearly therefore for his benefit that some one should do that part of the business for him; and, as the object of this letter is solely to draw attention to the adoption of a simple means of saving human life, I hope, sir, you will further it by reasoning and thinking a little for Jack and others who have to go to sea, and recommend them "not to go without a life-belt."

Scarcely a week passes but we read of some accident occurring, where, if the sufferers had been provided with a belt, or had on a pea jacket with one made in it (which, by the bye, is a very good plan), their lives might have been saved. Look at the last sad accident at Southampton—that dangerous water for boat sailing! With the wind from the S.-W. or N.-E. (off the land), how many, with assistance so close, would have been lost? Probably none.

I beg to subscribe myself as having, on more occasions than one, experienced the advantage of these belts, and who has been for many years AN OBSERVER THROUGHOUT.

N.B.—The simplest are the best. Just a belt to go under the arms, with a strap over each shoulder, and an inflating tube in front within reach of your mouth, will be found to answer every purpose; and their price, say 9*s.* 6*d.*, places them within reach of almost every one.

PRESERVATION OF LIFE FROM SHIPWRECK.—On Thursday a meeting of the Royal National Life-boat Institution was held at its house, John Street, Adelphi, Thomas Chapman, Esq., F.R.S., in the chair. The silver medal of the institution was voted to Captain Wasey, Inspecting-Commander of the Coast-Guard at Fleetwood, and to John Fox, coxswain of the life-boat, in admiration of their gallant and persevering conduct in putting off on two occasions in the Society's life-boat stationed at that place, and rescuing seven men from the schooner Ann Mitchell, of Montrose, and the Jane Roper, of Ulverstone. The brave crew of the life-boat also received 23*l.* 10*s.* for their intrepid services. Rewards, amounting to 34*l.* 10*s.*, were also voted to the crew of the Redcar life-boat, which is in connection with this institution, for rescuing on two different occasions the crew of eleven men from the Prussian wrecked brig Fortuna, of Memel, and also two men from a fishing coble which was found in a disabled state off Redcar. A reward of 6*l.* was also voted to the crew of the Institution's life-boat stationed at Thorpness for rescuing on the morning of the 24th ult. three out of eight of the crew of the brig Pallas, of Shields, which during a heavy gale of wind was wrecked on Sizenell Bank. Rewards amounting to 52*l.* were also voted to the crews of the life-boats of the Institution stationed at Newbiggin, Carnsore, Barmouth, Llanddwyn, and Portmadoc, for putting off with the view of rendering assistance to ships' crews in distress. A reward of 6*l.* 10*s.* was also voted to the crew of the Society's life-boat stationed at Arklow for putting off and saving nine men from the ship Ann Mitchell, of Glasgow, which during heavy weather and a tremendous sea, was wrecked on Monday last, on those dangerous banks. The second service clasp of the Institution and 1*l.* were also voted to Daniel Shea, coxswain of the Society's life-boat at Padstow, and 1*l.* to John Knight, in acknowledgment of their gallant conduct in wading into the surf and rescuing, at much risk of life, two of the crew of the ship James Alexander, which during a heavy gale of wind was wrecked near Padstow on the 22nd ult. The silver medal and 1*l.* were also voted to Mr. John Dyer, in testimony of his brave conduct in wading into the surf, which three or four times completely immersed him, and saving the master of the schooner Beverley of Youghal, the remainder of the crew having been saved by the rocket apparatus. Various other rewards were afterwards voted for saving life from different wrecks. It was reported that Englishmen resident in Australia, China, the East and West Indies, and in St. Petersburg, had forwarded to the Institution some contributions as tokens of their estimation of its important and philanthropic operations. During the past month life-boats had been forwarded to St. Andrew's in Scotland, and the vicinity of Carmarthen Bay. The Admiralty presented to the Institution a valuable series of charts of the coast of the British Isles, on which are marked the life-boat and rocket stations. It was stated that the Royal Victoria Yacht Club had decided to present the cost (380*l.*) of a life-boat station on the Isle of Wight to the Society. The late Mr. Edwin Cuthbert had left the Society a liberal legacy of 50*l.* Admiral Sir Thomas Herbert, K.C.B., and Sir Edward Perrott, Bart., were elected Vice-Presidents of the Institution. For the past nine years Sir Edward Perrott had been most zealous and active in aiding to carry on the important work of the Life-boat Society. A letter was read from "S. G. O.," the well-known correspondent of the *Times*, expressing his approval of the mode of management and system of accounts of the Life-boat Institution, and forwarding a liberal donation in aid of its funds. Payments amounting to 660*l.* on various life-boat establishments having been made, the proceedings closed.

THE MILITIA.

ARMAGH ARTILLERY.—The commanding-officer of this corps has received an intimation from the War-Office that two 24-pounders will be supplied at head-quarters, Armagh, for the training of the men. Sheds are to be built on the ground occupied by the huts, adjoining the barracks.

LONGFORD RIFLES.—Colonel Henry White, M.P., Lieutenant of the county of Longford, has been pleased, with the sanction of his Excellency the Lord Lieutenant of Ireland, to appoint Edward Robert King Harman, Esq., of Newcastle, late lieutenant in the 60th Rifles, a captain in the Royal Longford Rifle Regiment of Militia, vice Shuldham, resigned.

NORTH CORK are ordered from Ayr to Cork, to be disembodied at Buttevant.

LIMERICK COUNTY ordered from Portsmouth to Limerick for disembodiment.

FERMANAGH.—The following is an extract from a letter, dated "Horse Guards," and addressed to the General commanding the northern district, which has been sent to the head-quarters of the Fermanagh Light Infantry, stationed at Chester:—"The report of this regiment (the Fermanagh Light Infantry) is highly satisfactory to his Royal Highness, who desires you will express his gratification to Colonel the Earl of Enniskillen, for the state of discipline and efficiency in which this corps is stated to be."

The nomination of Lord Churston to the following commission has been approved of, and signed by the Right Hon. Earl Fortescue, Lord-Lieutenant of the county of Devon: Edward Holberton, Esq., to be Ensign in the 2nd Devon Regiment of Milita.

The Kerry Militia move from the Curragh Camp to the Royal Barracks, Dublin.

2nd or Eastern Regiment of Norfolk Militia—W. Hardcment, Gent., to be Quartermaster. This notification is in substitution of that which appeared in the *Gazette* of the 9th December, 1859.

The Essex Rifles—H. W. Hartley, Gent., to be Ensign, vice Godfrey, superseded.

Her Majesty has been graciously pleased to accept the resignation of Captain S. Robertson of his commission in the Royal South Lincoln Militia.

Dorset Regiment of Militia—H. T. Baylie, Gent., to be Ensign, to complete the establishment.

Royal Flintshire Militia—R. Richardson, jun., Gent., to be Ensign.

Norfolk Artillery Regiment of Militia—The Right Hon. J. H. Delaval, Lord Hastings, to be Honorary Colonel, vice Jacob, Lord Hastings, deceased.

ERRATUM in the memorandum inserted in the *Gazette* of the 3rd instant, of the commission of H. C. Ibbetson, in the Royal Bucks Yeomanry Cavalry:—For Ibbotson read Ibbetson.

MEMORANDUM—4th or Royal South Middlesex Regiment of Militia—Ensigns Thomas Allibone Norman and George Rooke, absent without leave from the last training, have been removed from the strength of the Regiment.

2nd Royal Cheshire Militia—Ensign Walter Alexander James Wakeman to be Lieutenant, vice James Taylor, removed from the Regiment; Jan. 20. Arthur Bradshaw Salisbury Isherwood, Gent., to be Ensign, vice Wakeman, promoted; Jan. 25.

Light Infantry Battalion of the Royal Sussex Militia—Henry Morton Orme, Gent., to be Ensign, vice Charles Hamilton Bell, promoted; Jan. 26.

DOUBLE COMMISSIONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A reference to the Army List will show you that there are several officers of the Militia who also hold commissions in the Yeomanry Cavalry, and some officers of the latter actually hold commissions in the Life Guards! The authorities at the War Office will not allow an officer of the Militia to hold a commission in one of the newly-raised rifle corps, and very justly; because in the event of invasion or other emergency, when the services of both corps would be required, an officer connected with both services should, of course, neglect one. Should not the rule which renders an officer of Militia ineligible to serve in one corps apply to all others? During the late war there were many instances of officers serving with *embodied* regiments of Militia, who also held commissions in the Yeomanry Cavalry. The latter is a most useful corps; their services are fortunately seldom required, but in cases of riot or popular tumult they have often aided with effect the civil power; but no body of men requires more strongly on such occasions the assistance of their officers; and the presence of the latter in their district is the more requisite because each troop is a sort of regiment for the locality to which it belongs. For these reasons it appears to me that no officer of any one corps should be allowed to hold a commission in the other; it interferes with the efficiency of both, it retards promotion, and, worse than all, it brings both Services into disrepute. Rumour states that great changes will shortly be made in the law relating to the Militia and other reserve corps; the present seems therefore a good time to call the attention of the authorities to this important subject.—I am, sir, your obedient servant,

MILES.

VOLUNTEERS.

METROPOLITAN.

Woolwich Arsenal.—The members of the artillery and rifle corps, consisting of the workmen at this establishment, meet nightly for drill at the several departments.

The 20th Middlesex (Railway) Rifles. — A public meeting was held at the Camden Hall, King Street, Camden Town, on Saturday, for the purpose of affording persons connected with the metropolitan railways and with institutions closely connected therewith, and who might be desirous of joining the corps, the opportunity of obtaining full and explicit information regarding the expense for accoutrements, &c., that would be incurred by the volunteers. The meeting was numerously attended, but the whole of the proceedings, as far as business matters were concerned, was comprised in a short statement by the secretary, from which it appeared that the cost of equipment would be small, and the payment spread over a period that would enable almost all the railway officials to participate in the national volunteer movement.

London Irish.—An important meeting of the working committee of this corps was held this week, Mr. Morgan John O'Connell presiding, on the motion of the Earl of Arran; the other members of the committee present besides his lordship, including Major-General Sir Justin Sheil, K.C.B., Major-General Watkins, Mr. Digby Seymour, M.P., Dr. O'Connor, Mr. James Connell, Mr. D. T. L. Clanchy, Mr. R. M. Montgomery, &c. A deputation from the effective members of the corps waited upon the committee to propose some alterations in the uniform agreed upon by the committee at a previous meeting. The deputation, which comprised six members, namely, Messrs. R. Jones, J. S. Pursell, W. F. Gardiner, J. H. Clarke, W. D. Scott, and J. Macnamara, laid before the board a very courteous address, in which they urged that it was not to be supposed that the corps intended to contravene their (the board's) wishes, it being merely their desire to make certain modifications in a few points of detail. The deputation then stated the alterations proposed to be made, which were of a very trifling character, the only particular addition being a whistle and chain to the cross-belt, together with a slight tracing of silver cord on the cuffs and collar. After a brief discussion respecting the increased cost of the uniform consequent upon the alterations named, which, it seemed, was very small, confining the whole amount to 4*l.* 15*s.*, the board resolved "That the uniform recommended by the committee of taste, with the alterations proposed by the deputation from the corps, be definitely adopted." The deputation were thereupon informed that the corps must consider the uniform definitely settled, to which they agreed, as representing the majority of the members; and having thanked the board for the urbanity with which they had been received, the deputation retired, apparently highly pleased with their interview. Mr. Dempsey, the Honorary Secretary, announced the receipt of several fresh subscriptions and the names of various new honorary and effective members; and it was suggested that the Irish firms in the metropolis should be called upon to aid in the further enrolment of effectives. The board then adjourned.

BERWICKSHIRE.

Dunse.—A large field at Wellrig, about a mile from Dunse, has been granted for the use of the Rifle Corps by the Marquis of Breadalbane. In addition to a donation of 20*l.* to the Volunteer Fund, the noble marquis has given liberal donations to other corps.

CAMBRIDGESHIRE.

Wisbeach, or 2nd Cambridgeshire, Volunteers.—On Tuesday, the 24th ult., this company assembled at the Corn Exchange, Wisbeach, at one o'clock, P.M., when the men were sized, and sections alloted to the different sergeants. At two o'clock they marched on to the Market Place, preceded by their drum and fife band, all in uniform. Here a handsome Queen's colour, purchased by subscriptions from the ladies of Wisbeach and its immediate neighbourhood, and also a new bugle, with an appropriate inscription, were presented to the company by Mrs. Young, the Mayoress of Wisbeach, who originated the subscription, and took a leading part in carrying out the idea. An immense concourse of persons thronged the streets and Market Place during the proceedings, in which they took the most enthusiastic interest. The company then paraded the town until three o'clock, when they entered the parish church, which was thronged to excess. After evening prayers a sermon, eminently suited to the occasion, was preached by the Rev. W. B. Hopkins, the vicar; and at its close the company proceeded to the Market Place, where they were dismissed. The colours were borne by Ensign Young (who is also Mayor of Wisbeach) from the time of their delivery to him by Captain Fryer, who received them from Mrs. Young, until the company separated, and he then marched with them to the Rose and Crown Hotel. The Volunteers assembled there at five o'clock, and sat down to an excellent dinner, the room being tastefully decorated for the occasion,—several crossed rifles and swords, and a star, formed of sword-bayonets, giving character to the scene. Many loyal, patriotic, and friendly toasts and speeches were elicited, varied by the vocal powers of some of the Volunteers. The banquet closed about ten o'clock, and the company separated, having cemented their union more closely by these proceedings.

DEVONSHIRE.

The Lord Lieutenant of Devon, Earl Fortescue, has signified to Major Sir Edmund Prideaux that the offer of service of four additional companies in the 1st (or Exeter and South Devon) Volunteer Rifle Battalion, has been graciously accepted by Her Majesty.

ESSEX.

Plumstead Artillery.—An officer of Royal Artillery has been instructed to post two guns for the service of this corps, and the uniform adopted is similar to that of the Gravesend Volunteer Artillery.

HAMPSHIRE.

Portsmouth. — There is still a difference of opinion existing between the effective members of this force and the Lord-Lieutenant of the county upon the question of the colour of their uniform. This is very much to be regretted, as in all matters relating to drill and other soldierly duties the companies are sufficiently advanced for enrolment. But the further developement of the corps is entirely frustrated, in consequence of the Marquis of Winchester refusing to sanction the Volunteers to dress in a green uniform.

In one of our former impressions we recorded the dislike of this force to light grey and green facings—the colour insisted upon by the noble marquis—in consequence of its similarity to the dress of the hospital attendants, as well as the invalids at that institution, and also to the uniform of the convicts, who are to be seen in gangs in all parts of Portsmouth. It is felt that in a garrison town some allowance ought to be made for the feelings of the inhabitants who may volunteer, upon the subject of the dress they may be called upon to wear, particularly when its colour is too obvious to escape unpleasant comparison.

On Monday last a committee composed of the *élite* of the members held a meeting, and it has transpired that so distasteful is the colour insisted upon by the Lord-Lieutenant, to the entire force, that another effort is to be made to induce his lordship to change his opinion.

Without sharing in the repugnance of the Portsmouth Volunteers to a light grey as a colour for a rifle regiment, it is admitted that they have the best of the argument; for if grey is so suitable, how is it that the Rifle Brigade is not clothed in a uniform of that colour. It is further stated that the colour being a very light grey, it is liable to stain, to show dirt, and from its very flimsy texture, would be worn to pieces in the course of a few weeks' hard work.

But irrespective of these evils, and also of the authority which the example of the Government gives to the proceedings of the corps in selecting green, there seems to be something rather arbitrary in compelling a free corps, willing to bear all expenses of clothing, to wear an obnoxious coloured cloth of an expensive sort to suit the whim or fancy of one individual. After the sentiments of the Volunteers became known to his lordship, it would have been more gracious to have acceded the point at once, particularly as the noble marquis must be well aware that in many other instances the wishes of the Volunteers with respect to the colour of their uniform has not been made an impediment to their formation.

It is to be feared if the Marquis of Winchester still continues to insist upon the corps wearing his flimsy light grey and green facings, he may carry his point, but it will be at the expense of seeing a rifle regiment, that at one time promised to be a "crack" one, dwindle away to a few members. The Volunteer movement is fortunately beyond the power of any single individual to do it serious injury; for a national feeling like the present is too sacred to be trifled with upon such a subject as the colour of a tunic, or the shape of a shako.

KENT.

Gravesend Artillery.—A communication has been received from the War Department to the effect that the Government intend to award to the sergeants of this corps a superior description of sword to that recently supplied. An excellent band has been formed, and in consequence of the increasing number of Volunteers a second company is to be formed.

LANARKSHIRE.

Glasgow.—The number of volunteers enrolled and drilling is not less than 6000, of whom 5000 are officially recognised and numbered. The movement is not confined to the upper and middle classes, as not less than 1200 to 1500 men have been raised exclusively from the working population. The uniform for these Volunteers costs about 3*l.* per man, the expense of which is defrayed, partly by subscription, and partly by a contribution of 30*s.* to 40*s.* each, payable in weekly instalments. This method has proved very successful, and is worthy of being followed in other cities containing a large artisan population.

OXFORDSHIRE.

Oxford University.—This corps, which consists of four companies of 100 members in each, have resumed their drill, the 1st company meeting at Queen's College; the 2nd at St. John's College; the 3rd at Magdalen College; and the 4th at the Armoury.

Oxford City.—The authority from Government for the enrolment of this corps has been received, immediately upon which the mayor issued a notice inviting parties to attend at the Town-hall, and take the oath of allegiance, and in the first morning 110 citizens responded to the call, so that one company was immediately completed. It is anticipated that three other companies will be formed in the city. Captain Henry Atkins Bowyer, of Steeple Aston House, Oxon, has been unanimously selected as commanding officer, and the lord lieutenant has ratified the appointment. The gallant officer has seen considerable service, as is evidenced by some wounds which he still bears, and is no less distinguished for kindness and courtesy than he is for bravery and devotion to the Service. He is much beloved throughout the whole county, and the appointment has not only given general satisfaction, but will do much to strengthen the rifle movement here.

ROSS-SHIRE.

Sir J. J. R. Mackenzie, of Scatwell, has subscribed 125*l.* to the funds of the third company of Ross-shire Rifle Volunteers, and has promised to equip all his tenants, or their sons, paying from 20*l.* up to 100*l.* of rent, and to give a first-rate rifle range, free of any charge.

SOMERSETSHIRE.

Chefton-Mallett.—A promising Rifle Corps, numbering nearly 70 effectives, and possessing funds to the amount of 300*l.*, has been formed in this town. The following gentlemen have been elected as officers, and their names sent to the Lord-Lieutenant for his approval:—Henry Ernst, Esq., Westcombe House, captain; Mr. Samuel Craddock, lieutenant; Mr. Joseph Allen, ensign; the Rev. Canon Gray, hon. chaplain; Dr. Wybrants, hon. surgeon.

WILTSHIRE.

Westbury.—The members of the local Volunteer Rifle Corps, now numbering 68, met in the Town Hall on Monday evening last, for the purpose of choosing a commanding officer. The corps, on the motion of Mr. Beckett Turner, seconded by Mr. Alfred Hall, unanimously elected H. G. G. Ludlow, Esq., of Heywood House, as captain. Mr. Ludlow accepted the appointment, and having acknowledged the honour of his selection, the proceedings were terminated by enthusiastic cheers for the mayor, the captain, the corps, and the Queen.

Volunteer Cavalry.—It will be seen on reference to the advertisement in another column, that a squadron of mounted riflemen is now being formed in connection with the First Surrey Rifle Battalion, under the direction of Major Boucher (formerly of the 5th Dragoon Guards), Commandant of the First Division of the Volunteer Force of the County of Surrey. The following extract is from a circular issued on the subject: "In attaching a troop or squadron of mounted riflemen to the First Surrey Battalion, it is intended that they should become the *eyes*, as it were, of their dismounted comrades, in reconnoitring, performing the duty of outposts, advanced picquets, &c.; the more, therefore, that their chargers possess the hunter's qualities the better, for both man and horse must be trained to go *across country*. They will be taught to move in *skirmishing* order with *supports*; to dismount (for the purpose of firing), and to mount again *rapidly*, for which purpose the horses should measure somewhat *low*, rather than high, as they are mounted and dismounted all the more quickly. Much attention must be devoted to rifle shooting, steadying the horse under fire, the right arm being passed through the bridle rein when firing dismounted; for the fire of a mounted man can never be depended on." The dress is a green tunic, with scarlet facings; a light helmet, resembling a hunting cap, with plume for occasions of parade only; pantaloons, and Napoleon boots; appropriate arms and accoutrements.

The Skiddaw Greys.—This corps is drilling every night, and now numbers nearly 80. Lieut.-Colonel Beatson examined the rifle range of the company on the breast of Skiddaw, and said it was the finest he had seen. The view into the heart of the mountains over Derwentwater is, indeed, magnificent, and for rifle-shooting, safe and good ground, from 100 to 900, or 1000 yards is available. The colonel, who recommends great simplicity and quietness in the uniform, said that the Skiddaw Grey colour of the cloth of the hills was much superior to the Government colours with which he compared it, and he observed that a uniform of the true Skiddaw Grey colour, with a simple edging of red or green would be the best rifle uniform.

Whitehall, Feb. 3.

Artillery Company of London — The commissions of the following officers are renewed for a further period of five years:—Captain Peter Morrison, Captain John Biden, Captain William Bokenham, Captain William Chickall Jay, Captain William Jeremiah Jordan, Lieutenant Adolphus John Lewis, Quartermaster George Ballin, Physician Henry Jeaffreson, Lieutenant John William Parker Field, Instructor of Musketry, to have the rank of Captain. Sergeant John Blockley to be Lieutenant, vice Harrison, whose commission is cancelled for continued absence without leave.

2nd Company of Lincolnshire Artillery Volunteers—Adam Smith, Esq., to be Captain; John Whitford, Gent., to be First Lieutenant; Francis Long, Gent., to be Second Lieutenant. Her Majesty has been graciously pleased to accept the resignation, by Captain Struan Robertson, of his commission in the Royal South Lincoln Militia.

1st Company of Lincolnshire Rifle Volunteers—The Commission of Francis Delaval Walsh, Esq., as Honorary Surgeon, is to bear date January 22, 1860, instead of December 3, 1859.

19th Lancashire Rifle Volunteers—James Maxwell, Esq., to be Captain; George Alexander Mackenzie, Esq., to be Captain; James Muir Dowie, Esq., to be Captain; William Donald Ryrie, Gent., to be Lieutenant; Alexander Macdonald Glassford, Gent., to be Lieutenant; James Campbell Fraser, Gent., to be Ensign.

21st Lancashire Rifle Volunteers—Nathaniel Eckersley, Esq., to be Captain; Egerton Leigh Wright, Esq., to be Captain; George William Gunning, Gent. (late Captain in the 2nd Regiment of the Duke of Manchester's Own Militia), to be Lieutenant; Thomas Marshall, Gent., to be Lieutenant; Edward Scott, jun., Gent., to be Ensign; Lever Robert Rowbottom, Gent., to be Ensign; Thomas Joshua Heaton, Gent., to be Assistant-Surgeon.

1st Subdivision of Lancashire Rifle Volunteers—George Frederick Martin, Gent., to be Lieutenant; William Clarke Deeley, Gent., to be Ensign.

City of Norwich Rifle Volunteer Corps—John Davy Brett, Esq. (late Major 17th Lancers), to be Major-Commandant; Charles Foster, Esq., to be Captain; John Barwell, jun., Gent., to be Lieutenant; Alfred Master, Gent., to be Ensign, vice Foster, resigned; Beaumont Wilson Jolly, Gent., to be Ensign.

Glamorganshire Rifle Volunteers—16th Company: Charles Williams David, Esq., to be Captain; Clement Waldron, Gent., to be Lieutenant; Jeremiah Box Stockdale, Gent., to be Ensign.

11th Company Kent Rifle Volunteers—Montagu Lubbock, Esq., to be Captain; Edward Osmond Berens, Esq., to be Lieutenant; William Darwin, Esq., to be Ensign; Edward Augustus Williams, Esq., to be Honorary Surgeon.

1st Subdivision Cambridgeshire Rifle Volunteers—Edward Loomes, Esq., to be Lieutenant; William Harris Bowker, Esq., to be Ensign.

1st Cambridgeshire Rifle Volunteers—The name of Ensign Claydon is Albert Decimus Claydon, and not Albert Decymus Claydon, as gazetted on the 24th instant.

1st City of Edinburgh Artillery Volunteers—John Boyd, jun., Esq., to be Captain; John Macnab, Esq., to be First Lieutenant; William Elgin, jun., Esq., to be Second Lieutenant.

13th Aberdeenshire Rifle Volunteers—Alexander Simpson,

Digitized by Google

jun., Esq., to be Captain; Alexander Macdonald, jun., Esq., to be Lieutenant; Alexander Francis Blaikie, Esq., to be Ensign.

1st Company of the Banff Volunteer Artillery Corps—William James Whyte, M.D., to be Captain.

2nd Company of Cheshire Rifle Volunteers—John Usher Cunningham, Gent., to be Ensign; Jan. 20.

18th Middlesex Rifle Volunteers—Thomas Bridgewater, Esq., M.D., to be Honorary Surgeon.

7th Company of Derbyshire Volunteer Rifles—Arthur Neild, Esq., to be Captain; Norman Bennett, Esq., to be Lieutenant; Andrew Welch, Gent., to be Ensign; Feb. 1.

8th Company of Derbyshire Volunteer Rifles—Haughton Charles Okeover, Esq., to be Captain; Andrew George Corbet, Esq., to be Lieutenant; Edward Alfred Dyke, Esq., to be Ensign; Robert Doxey Goodwin, Esq., to be Honorary Surgeon; Feb. 1.

7th Company Cornwall Rifle Volunteers—Thomas Phillips Tyacke, Esq., to be Captain; Frederick Vivian Hill, Gent., to be Lieutenant; George Reid, Gent., to be Ensign; Jan. 25.

2nd Company of Dorsetshire Rifle Volunteers—Oliver William Farrer, Esq., to be Captain; William Charles Lacey, Esq., to be Lieutenant; Charles James Radclyffe, jun., Esq., to be Ensign; Jan. 28.

7th Surrey Rifle Volunteers—Captain Francis Marcus Beresford to be Captain-Commandant; Robert Crowe, Esq., to be Captain; Owen Clutton, Gent., to be Lieutenant; Joseph John Smithies, Gent., to be Ensign; Feb. 1.

Wilford Volunteer Rifles—Francis Capper Brooke, Esq., to be Captain; Frederick William Brook, Lord Rendelsham, to be Lieutenant; Arthur George Brooke, Gent., to be Ensign; Jan. 26.

4th Sussex Rifle Volunteers—Bernard Husey-Hunt to be Captain; Jan. 25.

Isle of Wight Rifle Volunteers—1st Company—Sir John Lees, Bart., to be Captain; Charles Cavendish Clifford, Esq., M.P., to be Lieutenant; Jan. 25.

2d Company—Sir John Simeon, Bart., to be Captain; Arthur Harbottle Estcourt, Esq., to be Lieutenant; John Tooke, Gent., to be Ensign; Jan. 14.

3d Company—John Brown Willis Fleming, Esq., to be Captain; Ernest Edwards, Gent., to be Ensign; Jan. 25.

Haddingtonshire Artillery Volunteers—No. 1—Dunbar Company—James George Hay, Esq., to be Captain; John Jaffray, Esq., to be First Lieutenant; Mr. John Brown Wright to be Second Lieutenant; Jan. 18.

East Lothian Rifle Volunteers—No. 1—Haddington Company—Alexander Kinloch, Esq., to be Captain; Mr. George Gaukroger to be Lieutenant; Mr. Robert Richardson to be Ensign; Jan. 19.

No. 2—Gifford Company—John Charles Hay, Esq., to be Captain; Mr. Peter Burn Swinton, to be Lieutenant; Mr. Robert Hope Bogue to be Ensign; Jan. 20.

No. 3, Haddington Company—David Ronghead, Esq., to be Captain; Mr. David Shirriff to be Lieutenant; Mr. William James Dods to be Ensign; Jan. 21.

1st Company of Denbighshire Rifle Volunteers—Sir Watkin Williams Wynn, Bart., M.P., to be Captain; Hugh McCorquodale, Gent., to be Lieutenant; John Devereux Pugh, Gent., to be Ensign; Jan. 30.

2nd Company Stirlingshire Volunteer Rifle Corps—Francis Mackison, Esq., to be Captain; William Mackison, Gent., to be Lieutenant; George Christie, Gent., to be Ensign.

[*The following* appointment is substituted for that of "Edmund *Balfour*," which appeared in the Gazette of the 24th Jan.]

9th Company of Surrey Rifle Volunteers—Edmund Belfour, Esq., to be Ensign; Jan. 21.

WORKING-MEN AND THE UNIFORM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your leading article of last week will do the Volunteer cause great good. I think if the returns were made up to this time that twice the number (80,000) you speak of will be found to have joined the ranks;—there are, at least, if all were counted up, 1000 in the little county of Cumberland alone, and it has only recently joined in the movement. In the widely-scattered population of the parish of Crosthwaite (numbering nearly 6000) of which Keswick (containing about half the population) is the market town, there are already about 80, with the certainty of there being, by-and-bye, 100 effectives, all finding their own uniform. It seems to me that it will mainly depend on the dress whether the Volunteer movement is to have very great, or only very moderate success. Unless the best of the working-men enter, the movement will neither be wholesome nor successful. Unless the uniform is quiet, neat, and *useful*, and as any man may wear on high days and holidays, it cannot be expected that working-men will *purchase* it; and it is exceedingly desirable, out of respect to the independence of the working-men themselves, as well as to preserve a high tone in the citizen force which you entrust with arms, that every Volunteer should at least stand in his own clothes. If you make the dress as *useful* and neat as any other dress,—and bear in mind that it is a dress of honour,—I cannot see that you are asking any sacrifice which any respectable working-man could not cheerfully make, provided he really thought it an honour and a privilege to stand forward as one of the defenders of the country. If he does not think it an honour and a privilege the nation is better without him. In hard times and popular tumults it may become very essential that our Volunteers should be patriotic and sensible men; and it will be in favour of this that as few men as possible shall be bribed by a dress to enter. When large employers present their men with uniforms, or private individuals kindly offer the dress to a neighbour whom they respect, that is all very well; indeed, one of the many excellent things accompanying this Volunteer movement is, that good-will between man and man may thus be shown.

But where you offer the dress from the public funds of the corps, I maintain that the sentiment of charity enters, and that the *morale* of the whole effort is lowered. Those who buy their dress are discontented; those who get it for nothing—especially if, by a little effort, they could have got it for themselves—are more or less pauperised in feeling. You spoil the whole, and convert what ought to be an elevating into a lowering influence. It ought to be recollected that this Volunteer movement is different, and higher in tone, from any which the nation has ever known before; this time it is not a calling out of the people by the Government, but a calling out of the Government by the people; and the nation—now for the first time since the Revolution—trusted with their own arms, must take care that they do not again lose this highest privilege and greatest honour which a government can confer on a free and intelligent people by any faults in the organisation or *morale* of the force. There may be occasional cases of hardship, and an occasional exclusion of a good man, by insisting on every one providing his own dress; but the good will, I respectfully affirm, greatly counterbalance the evil.

It will be essential, for the purpose referred to, that the dress be free from bedizenment and vain-glorious display; that, in fact, while indicating the volunteer by its uniform cut and simple ornament, it substantially clothes the citizen and the earnest, quiet Englishman. To let so noble a sentiment run off to slashed cuffs and collars, or rivers of tawdry braid and lace, or be lost in bottomless trousers, would be not only to do wrong to the patriotism which is the soul of the movement, but, by unfitting the dress for that of the quiet sensible working-man, would be to prevent his joining the ranks.

On the other hand, no other expense whatever should fall on working-men. The wealthier members of each corps should provide prizes, and meet the expenses connected with the gatherings of various neighbouring companies for shooting and field manœuvres (and these, if the Volunteer movemement is to be permanent, will cost something considerable), while the expenses for instruction, targets, and ammunition, should be either provided by Government or by a county rate.

It seems extraordinary that Volunteers should have such difficulty in getting instructors, and have, in many cases, to pay so high for them, when there must be hundreds of soldiers competent for the task, if the Secretary at War chose to send them. The expenses for instruction will soon be over; if the permanent expenses were divided, so that the Government provided the ammunition, targets, and rifles for those who did not provide their own, while the funds of the corps were devoted to the rent of rooms, keeping the arms clean, prizes, and the expenses consequent on field days and county meetings for competition, not only in shooting, but athletic sports, I believe there would be little danger of the Volunteer organisation languishing either for want of funds or want of interest in the great national pastime. I am, sir, your obedient servant,

ONE OF THE SKIDDAW GREYS.

Derwentwater, Jan. 25th, 1860.

VOLUNTEERS.

BY AN OFFICER OF ROYAL RIFLES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The notable feature of this present volunteer movement is, that England has at last become awake to the paramount necessity and duty of self defence. The warnings long ago uttered, of England's greatest soldier, are now bearing fruit. That they should be bearing fruit at all is a proof, let us believe, of the innate goodness of the soil on which they were sown, and an earnest that what has allowed years to pass before it showed any sign of life, will really flourish the longer and take root deeper. England, in seeing the holy duty of national defence, is recognising another equally important truth, that her defenders must be her own sons, that men, born and nurtured on her own soil, are the only "walls" to be depended on. The pens of a few practical sailors have, happily, lately demolished the dangerous theory that the Navy might, henceforth, be left to engineers, and gunners, and yet uphold at sea the glory of the English name. Let the Navy be called our "wooden walls," or our "iron walls;" let every ship of the line composing it equal the Great Eastern in tonnage; all will be of little avail unless the true race of sailors is preserved. No ships, no forts, no earth-works, will ever defend England, unless the supply of *men* is ready at a moment's notice. Let every defensible point on the sea-board be armed; let London be surrounded by walls and forts; when all this had been done, the only walls for England would still be—as they now are—the bodies of her sons. It was truly said, not long since, by a distinguished authority, that an undue confidence in the invincibility of a channel fleet might ruin the national defences of England; it would cause the absence of preparations for contingencies on shore. This present rush to arms, with no apparent motive but true patriotism, proves—if any doubted—that the men of England are not wanting in the old virtues. We have more to lose than any nation. It is impossible to say what effect the loss of any one of our possessions, far or near, might have on the moral, political, and commercial welfare of England; and the country must never again grudge a sufficient force of trained soldiers, ready for instant service in any part of the world; in fact, a standing army proportionate not merely to the bare necessities, but to the grandeur of the nation. If every man in England is trained to the use of arms, we must not neglect on this account to keep up an adequate supply of those whose *first* business, instead of their *second*, is the science of warfare. The true interest of the country will always be to keep at their utmost degree of efficiency both the regular Army and its sister the Militia force, which is so constantly called on to supply the place of regular soldiers at home, and, at times, abroad. What is useful as an *auxiliary*, must never be relied on as a sole support in case of danger. There is another risk, too, to be guarded against,—what will this movement be in four or five years? Should occasion arise for the active services of the force now called into existence, the movement may by that time be considered as a most important safeguard to the country: but, on the other hand, where will it be if no occasion has come to call forth more of the existing spirit than the monotony of drill, varied only by occasional rifle practice? This is a point which *must* meet with consideration and forethought. The zeal with which every new object of interest is handled is proverbial; and this kind of zeal is more than doubled when the object is one which combines men, which gives for the moment one aim to men of totally different rank, feelings, and pursuits. If this movement is to be of the real service which it may be, and which most of us hope and believe it will be, it must be an increasing movement. If from any cause interest flags—if volunteers do not come forward, or, when enrolled, do not throw themselves heart and soul into the work,—if, in, fact, the force should ever become nominal merely in efficiency, instead of being a vital reality,—then will it be dangerous instead of useful; and the day which called it forth will be a bad day for England. To preserve its efficiency, the same classes who have now put life into the movement must not abate one atom of their interest in it. The rich, in influence, in rank, in land, in money, must bring what they have to its support. Subscriptions must continue to be cheerfully paid; rank and influence must show by example as well as precept what is to be done, and the right way to do it. The women of England must help, and must put forward, as a motive for joining the force, the defence of homes and families—not an effervescing excitement, or the love of wearing a uniform. They can help, too, by the prestige of their presence on all fitting occasions—while the bone and sinew, the men who make the force and fill the ranks, must enrol themselves in sufficient numbers, and, when enrolled, keep manfully to their work, and not throw it up from some temporary distaste, annoyance, or jealousy. Again, there is another point of importance—discipline—without which no amount of drill is worth anything whatever. The great, in fact the principal, objection to the use of irregular troops on actual service, is their want of that kind of discipline which is absolutely necessary to a soldier. A man may be as brave, as scientific, as cool as you please; but, be he officer or soldier, if he is not a *disciplined* man, he is only half a soldier. No matter what the relative positions of commander and commanded may be in ordinary life, "on parade" the principle of "passive obedience" cannot be carried too far. Now this may appear simple; but any soldier who has had any experience of half-trained troops will say that it is not so simple an affair—that even "silence in the ranks" is a most difficult, as well as *most* essential, point to arrive at. If this is gained, a great deal has been accomplished; and where, as in most instances with our Volunteers, officers and men have the same amount of experience, or of absence of experience, of all military affairs, anything like a proper regard to this will be found to require much care and attention on all sides. A case occurred not long ago in a "crack" Yeomanry regiment, where a trumpeter, a farmer, was reprimanded by the captain of his troop for having a cigar in his mouth during drill. The trumpeter, strong in his acquaintance with the customs of Her Majesty's service, rejoined, "It's all right, sir—just you ask what they do in the regulars"—a kind of answer likely enough, varied slightly by circumstances, to find its way to the lips of many another zealous, but ill-informed Volunteer. A great disadvantage to the Volunteer force now, as regards efficiency, is the way in which it is officered; and this is said without any disparagement to those who hold the commissions which have been conferred on them as a compliment, without consideration of the qualifications of the holders. In proportion as soldiers are unsteady and ill-trained, do they require to be led by experienced men, in whom they can feel thorough confidence. A man of forty or fifty years old, who has lived up to that time as a country gentleman, a lawyer, or a doctor, finds it impossible, in nine cases out of ten, to acquire even such an amount of steadiness and precision as is necessary to command a company, much more a battalion, on a field-day. Not every soldier by profession ever becomes a "good drill"—a man thoroughly up to his work; much less can "civilians" expect to acquire this steadiness by occasional study of the profession. The best and steadiest troops will be unsteadied by incompetent and undecided commanders. How great will be the difficulty, then, with Volunteer forces constituted as ours are. Strict attention on the part of commanders, and due discipline on the part of the commanded, can alone in any measure obviate the disadvantage alluded to.

It was common enough a few years ago for military men to disparage, as inefficient, anything approaching to a volunteer or irregular force. Late years, however, have taken away many prejudices on this head. Those who have seen—as most may have seen, now-a-days—raw Militia regiments, with half the men in their ranks recruits, called out for embodied service, and after a month's or six weeks' training in the country town, sent to do hard garrison duty at arsenals and dockyards, can never doubt the capabilities of the material which England possesses, or the existence of the power of adapting this material to the purposes required. This will be further evident, when it is found that these same Militia regiments, as has really happened in almost every case, have done duty as correctly, and preserved themselves as free from crime, as ordinary regiments of the Line. Now, what can be done, say, in six months, by the class of men who form the Line and Militia force, ought to be done in four by our Volunteers. Intelligence and education should be of great help; and will be so, unless a "little knowledge" interferes with necessary subordination. Again, the power of having very frequently short periods of drill, should be made the most of. Six or seven hours even, each week, of regular drill, continued for five or six months, ought to make a vast difference all over the country, and as a rule it is likely to be found that those corps will be most efficient whose members live within a small distance of each other, and, from following similar occupations, can be constantly brought together, though only for a short space of time. One word as to *dress*—a subject which will probably be taken in hand very shortly by the Government. It is of the greatest importance, with a view to any service to be expected from Volunteeer corps, that uniforms, all over the country, should, in colour and fashion, be assimilated, so that a Volunteer may be known as readily as possible. There will be plenty of room for distinction between different corps in the colour of facings and badges. The uniform, too, should be plain, with as little lace or braid as possible, as this kind of adornment is ornamental only when new, and as a uniform becomes worn it only gives an untidy and shabby appearance to it.

To repeat what has already been urged—the proof of what this movement really is, must be looked for four or five years hence, not sooner. If in that time any symptoms of decay appear, let the *corps* become *clubs*, or what they will, but let them be no longer as a national defence, a delusion to the country. If, on the contrary, the movement is then fulfilling its present promise, if it is increasing steadily in popularity and efficiency, then it may fairly claim to be considered a real national institution, and so far as in it lies, a reliable national defence.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street (North), Strand, London, W.C.
[Late "Household Words" Office.]

MR. ALBERT SMITH with his CHINA REPAIRED and MONT BLANC REVISITED, 1859. Every Night (but Saturday) at 8, and TUESDAY and SATURDAY Afternoons at 3 o'clock. Stalls 3*s.*, which can be taken at the Box Office, Egyptian Hall, daily, from 11 till 5; Area 2*s.*, Gallery 1*s.*

DOUDNEY & SONS' RIFLE SUITS.—1ST SURREY, 4*l.* 2*s.*; SOUTH MIDDLESEX, 4*l.* 10*s.*; RIFLE BRIGADE, 4*l.*—17, Old Bond Street, W.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s.* ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, *Cavalry or* Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

EASTWARD HO! is at Mr. JAS. RYMAN'S, Oxford.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; *it is as* harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured *permanently* the moment it is touched by the dye. In cases at 5*s.* 6*d.*, 10*s.* 6*d.*, and 21*s.* at UNWIN & ALBERT'S, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye

TO VOLUNTEER RIFLE CORPS.—A SERJEANT-MAJOR of long standing, possessed of great experience and ability, is OPEN TO AN ENGAGEMENT as DRILL INSTRUCTOR, or to perform any duty connected with the discipline and organisation of Volunteer Corps.—Address, by letter, C. K., Post Office, Norwich.

RIFLE VOLUNTEERS.—A RIFLE SERJEANT-MAJOR, a good DRILL, OPEN TO AN ENGAGEMENT in Town.—Address SERJEANT MAJOR, 28, Soho Square, W.

PERMANENT STAFF SERJEANTS.—TWO EFFICIENT DRILLS ARE REQUIRED for the Permanent Staff of the Northumberland Light Infantry (disembodied). Non-commissioned officers recently discharged, or eligible for transfer, may apply, enclosing testimonials, to Captain GALTON, Adjutant, Alnwick.

BANDMASTER.—A NATIVE OF GERMANY, who has served eight years in that capacity in an English Regiment, is now OPEN TO AN ENGAGEMENT. The highest testimonials.—Address C. W. F., Post Office, South Camp, Aldershott; or Messrs. BOOSEY & SONS, Holles Street, W.

THE ARMY PRINTING OFFICE, 102 & 114, HIGH STREET, PORTSMOUTH.—HENRY LEWIS.—Company Ledgers, Pay Books, Order and Day Books, Defaulter Sheets, District and Garrison Forms.

ARMY AND NAVY GAZETTE.

JOSEPH CLAYTON & SON, NEWSPAPER AND ADVERTISING AGENTS, respectfully inform H. M. Officers of both Services, the Nobility, Gentry, and Public, that they punctually supply THE ARMY AND NAVY GAZETTE, Edited by W. H. RUSSELL, Esq., LL.D., immediately on publication. Orders addressed to either of the following Establishments will ensure attention:—

CLAYTON & SON ..... 265, STRAND, W.C.
Ditto ..... 223, PICCADILLY, W.
Ditto ..... DUBLIN.
CLAYTON & CO. ..... CHATHAM.

THE ARMY AND NAVY GAZETTE will be kept on Sale all the following week, at each Establishment. Morning Newspapers supplied by the first trains on every line out of London. Country Agents supplied on the lowest terms.

265, STRAND, LONDON, W.C.

MEMORIAL TO THE LATE SIR JAMES MC GRIGOR, BART., K.C.B., K.C., K.T.S., F.R.S., &c., &c., &c.

The following Gentlemen have consented to act on the Committee.

NOTICES TO CORRESPONDENTS.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not authenticated by the name of the writer, given in confidence to the EDITOR.

The EDITOR begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, FEBRUARY 4, 1860.

The motion for the abolition of the Purchase System, which Sir De Lacy Evans was to have made this week, has been postponed for a fortnight. When it is brought forward, we expect to find that the opposition on the part of the Government will not be of a very strong character, and that the question will lie between modification and total abolition. Mr. Sidney Herbert was one of the Members of the Royal Commission on Purchase who recommended that the position of Regimental Lieutenant-Colonel should be no longer purchaseable, but should be filled by an officer selected for his competence by the Commander-in-Chief. It is not likely that, as Secretary of State for War, he will renounce the opinion so deliberately recorded two or three years since; and we have good reason to anticipate that in replying to Sir De Lacy Evans he will express his readiness at once to carry out that part of the recommendation of the Royal Commission. We should not be at all surprised if further and much greater changes, extending even to the gradual abolition of the whole system, were to be taken into consideration by the Government. Some very decided modification is certainly imminent, and we shall only express a hope that not merely vested interests but the future interests of the officers will be taken into careful consideration, before any step is actually taken to interfere with a system which has so powerful an influence upon the whole fabric of the Army. We have more than once stated our opinion that a simplification of our regimental system might very advantageously be made the means of effecting great improvements in the purchase system. If the unnecessary ranks of Major and Ensign were abolished, and field officers appointed by selection, there would be but one step of promotion to be obtained by purchase, while every officer in a regiment, with the exception of the field officers, would have practically the same inducement to retire and make way for younger men that they have at present. It will be well for Parliament, before voting for the abolition of the system, to ascertain whether, if it be really in their power to abolish money bargains for promotion—they will not have an entirely illicit traffic going on instead of the open and regulated one which at present prevails. It is plainly the duty of the Secretary of State, before assenting to any considerable interference with the system, to devise some plan which will replace it, and which will not have the re-actionary effect of keeping officers out of positions of command until they have attained an age at which the physical vigour so necessary in a commander cannot be looked for in men not specially favoured by nature. It must be recollected, however, that the Secretary of State for War advocates the modification of the purchase system, and the Under-Secretary, Lord de Grey, its entire abolition. We speak advisedly when we tell the officers of the Army to be prepared for considerable changes at a very early period.

A profitless controversy has arisen between the most powerful organ of public opinion in the world and the representatives of military experience, traditions, and knowledge, in reference to the value of Volunteers in war. On the side of our great contemporary there is, however, it must be said, either evasion or ignorance of the main proposition, which amounts solely to this,—that undisciplined forces must be inferior to disciplined forces. It is preposterous to maintain for a moment that a body of men, accustomed to obey orders, and to act in concert in military operations, are not *ipso facto* superior to the same or a much larger body not acting with submission to orders or with any mutual co-operation. The great fallacy of the whole argument seems to lie in the assumption that *because* the French attack in shockingly loose order, *therefore* they are *not* thoroughly drilled, and that in fact they are nothing better than a huge aggregate of volunteers. Now it so happens that no

Digitized by Google

troops in the world are more perfectly disciplined or more thoroughly drilled than the Imperial Guard and the Zouaves who fought at Magenta and Solferino, and who bore the shock of the Italian battles. In attack they throw out masses of companies it is true, "in shockingly loose order," who skirmish with such immense skill and vigour as to produce great effects on the stolid enemy who does not send out skirmishers to meet them, and who persists in opposing solid columns to their fire; but those companies are always—invariably, and without exception—supported by massive reserves ready to advance, and occupy the ground as the enemy recedes, to receive the reforming companies if they are forced to retire, and to resist the columns of the pursuing enemy. Nay more—let these scattered masses be threatened by cavalry, or be compromised by a sudden flank movement of infantry, and one shall see how speedily they will contract, as if each man were linked by an invisible chain to his neighbour, till they present a square of bristling bayonets, or the usual massive formation of the French columns. The very writer who gives such a beautiful description of the two orders of battle shows what he means by the use of the words, "opening out." "Opening out" of what? Why, from regular order in column, or three deep ranks, into loose skirmishing order, in order to attack, whilst the Austrians attacked in solid columns, undeployed, and moved in doubled sections, as the Russians did at Inkerman. When it is said that the French were "without a smack of the style learnt on drill or parade," it is forgotten that every single movement the troops are described as performing in action was carefully and laboriously drilled and paraded into them, as any one may know who ever saw a French regiment at exercise. The words "there was no forming from beginning to end," imply simply that there was no alteration of the extended order, which, with all respect, is a formation, although when we read some other accounts of these battles it would seem as if the "charges" spoken of could scarcely have been made without some qualification of the assertion. The opposition by way of antithesis of "regular battalions" to "light troops" is not consistent with sense, for light troops are just as regular as the heaviest infantry. There is no such thing as "irregular discipline," as any body of men who, without discipline, went out to fight disciplined troops would find to their cost. The gist of the matter is however in this reflection, that we are never likely to fight the Austrians. Assuredly not. Against what aggression is the volunteer movement intended to provide? Against the march of the very troops who are confessedly masters of the whole science of the new mode of attack — those who have devoted years to its study and to its practice in actual battle-fields and long campaigns; who can form square with the steadiest and smartest infantry; who can execute every manœuvre with the utmost precision; who are orderly, obedient, accustomed to act together and in masses; who can march for long days with heavy packs and full cartridge boxes; who can charge with the bayonet, or deliver heavy volleys against hostile squadrons; who can deploy into line or close up into column with equal celerity; and who to those military excellences add all the qualities of the most "shockingly loose" ordered Volunteers—who, in fact, have everything that the Volunteers possess, and something — a great deal—more; and that something Volunteers must acquire by drill and discipline ere they become the equal of Zouaves, or grenadiers, or chasseurs in the loosest order in the world.

There is another writer whose valuable communications may enable us to appreciate the result of great courage, "irregular discipline," and numbers, when opposed to regular troops, particularly when those who possess the former are not acting in accordance with strategical science. The Moors represent a Volunteer force—certainly not like our English Volunteers, but still brave and determined men, fighting for their homes; the Spaniards, though fighting in loose order, are disciplined troops. All admit the bravery of the Moors in their early encounters. But the steadiness and discipline of their opponents, aided by good generalship and better military equipment, is doing its work, if it has not already effected it. Day by day the Moors lose confidence, whilst the Spaniards acquire experience and certainty of success in every fight.

That the Volunteers, when organised a few months more, will present a most formidable front to any enemy, and prove the materiel of troops as good or better than any in the world, we do not doubt; but they must work to gain that knowledge. It will be seen that Garibaldi maintains that Volunteers are of real utility, on the supposition that they approach the Bersaglieri in skill and discipline. Well, then, we can assure our Volunteers that there are not in any army in Europe troops more thoroughly drilled, more orderly, more solid, when they form in column, than the Sardinian rifle regiments to which the Italian soldier refers. The honour just accorded by the Queen to the officers of her Volunteer forces, will no doubt be the best incentive to their efforts to advance the efficiency and discipline of their corps. No one doubts but that every man of them would behave individually, on the battle field, as well as the best drilled Englishman who ever stood face to face with a foeman.

We announced, a week or two since, that the intention of the Government was to add about 22,000 men to the regular army, disbanding the Militia at the same time, and bringing home several regiments from India. We have reason to believe that the spirit of economy has, since then, stepped in, and that the proposed augmentation will be considerably less than that originally proposed, and all but officially settled at the time of our announcement. The Army estimates are understood to have been revised, with a view to reduction, and they will be laid before the House of Commons in their new shape in the course of next week. We expect to find the proposed increase to the Guards altogether abandoned, and that of the Royal Artillery and the Line very considerably modified. As statements continue to be made by some of our contemporaries respecting new battalions, perhaps it may be well for us to repeat what we have before said, that the increase in the Line will be made in the shape of an addition to each company; consequently, that no new battalions will be formed.

A telegram from India received yesterday, acquaints us with some of the arrangements of the China expedition, which are almost completely in the hands of the military authorities in India. Besides the 1st Royals (2nd battalion) at Hong Kong, the 2nd (1st battalion), on their way from the Cape, and the 3rd Buffs (1st battalion), and 67th, now in Canton, the following regiments of infantry will be sent from India, viz., 1st battalion 6th, 1st battalion 8th, 31st, 37th, 44th, 56th, 60th (battalion not mentioned, but very probably the 3rd from Madras), 66th, 67th, and 73rd, with eight native regiments. The cavalry regiment selected is the King's Dragoon Guards. Respecting the staff the telegram is somewhat confused. It says, the staff of the China force is composed as follows: Sir Hope Grant, Commander-in-Chief; Generals Napier and Michel, Generals of Divisions; Colonel Stephens, Deputy Adjutant-General; Colonel Mackenzie, Quartermaster-General; Colonel Bruce and Colonel Haythorne, Chiefs of the Staff.

By "Colonel Stephens," Colonel Stephenson of the Scots Fusilier Guards, now at Hong Kong, is probably meant. Sir W. Mansfield was appointed by the Home Government, and the news of his nomination doubtless had not reached Calcutta at the time the telegram was despatched.

The statement that certain captains were to be promoted, in order to get young men on the admirals' list, which appeared some short time back, having given rise to many inquiries, it may be as well to state that there is no foundation for the report.

Lord Seaton resigns the command in Ireland on the 1st of April, and Lord Melville that in Scotland at the same time, but the statements which have appeared with regard to their presumed successors have no substantial foundation, no arrangements having been yet made respecting the anticipated vacancies.

The death of General Sir Thomas Makdougall Brisbane will cause the following promotions:—Lieut.-General E. B. Wynyard, C.B., to be General; Major-General Sir H. Ferguson Davie to be Lieut.-General; Colonel C. Stuart, Military Secretary to Lord Canning, to be Major-General; Lieut.-Colonel W. D. Deverell, of the 15th Depôt Battalion, to be Colonel; and Major W. F. Harvey, Staff-Officer of Pensioners, to be Lieut.-Colonel in the army.

The Colonelcy of the 34th Regiment is vacant by the death of General Sir T. Makdougall Brisbane. That of the 73rd has been filled by the appointment of Major-General Sir Michael Creagh, an old and distinguished officer.

Colonel Congreve, C.B., half-pay 29th Regiment, and Quartermaster-General of the Bengal Presidency, has been placed upon the list of officers receiving rewards for distinguished services. Colonel Congreve commanded the 29th in the Sutlej campaign of 1845-46, and was severely wounded at Ferozeshah; he also served in the Punjaub campaign of 1848-49, and as Adjutant-General during the mutiny of 1857.

Colonel M'Cleverty, Assistant-Adjutant-General at Edinburgh, has been appointed to a command in India, with the temporary rank of Major-General.

Colonel Campbell, C.B., of the 52nd Light Infantry, will succeed Major-General Van Notten Pole as Inspecting Field Officer at Glasgow, and Colonel Brunker succeeds Major-General Franklyn at York. The Inspecting Field Officership at Cork is vacant.

The following officers have been appointed sub-inspectors of Volunteers. For the Artillery, Major Fortescue. For the Rifles, Lieut.-Colonel R. G. A. Luard, Major Gustavus Hume, Major G. B. Harman, Major W. G. D. Stewart, and Major A. A. Nelson. They will have the pay and allowances of Majors of Brigade; the chief Inspector-Colonel, McMurdo, C.B., ranks as a Deputy-Adjutant-General.

Colonel J. Clark Kennedy, C.B., Assistant-Quartermaster-General, at Aldershot, has been appointed to succeed Colonel McMurdo as Commandant of the Military Train.

The appointments to the professorships in the School of Medicine at Chatham have been made. Mr. Longmore (formerly of the H.M.'s 19th Regiment, and now Deputy-Inspector-General of Hospitals, stationed at Colchester Camp), is professor of surgery. Mr. Moorehead (formerly in the Indian service) is professor of clinical medicine; Mr. Parker is professor of hygienic and sanitary science. We believe that there will be no chair of chemistry, and it is doubtful if there will be any professor of pathology.

Lieutenant Wilson, 86th Regiment, superintending officer of recruiting at Boyle, has been moved to Reading, in the room of Lieutenant Davy, Rifle Brigade, and Lieutenant Musgrave, 87th Fusiliers, has become Superintending Officer at Boyle.

Captain John Yates, lately Adjutant of the 11th Hussars, has been appointed Adjutant of the Cavalry Depôt at Canterbury.

A portion of the 26th Regiment have been for some time wearing experimentally Colonel Spiller's and Mr. Berrington's new knapsacks. The result of this trial, as far as the 26th Regiment is concerned, has been a report very unfavourable to Mr. Berrington's pack, which is found to hurt the man greatly across the chest. This pack has also another very great disadvantage, viz., in consequence of the great-coat being rolled and worn round three sides of the pack, the width of the pack is considerably increased, being with the great-coat 2 inches wider than either Col. Spiller's pack, or the pack of 1857, now generally in use in the Army. This increased width is a very great disadvantage, as it obstructs the free use of the soldier's arms; it also prevents the rear-rank man from putting his rifle down to take aim. Indeed it may not be out of place here to remark that all the packs hitherto in use are too wide, which fact has two very serious results, more especially in the present day of accurate rifle shooting. 1st, the pack being wide, immediately file-firing commences, the ranks are all jostling one another, thus completely neutralising the advantage of the rifle, and destroying anything approaching to accuracy of aim, which, as far as rifle firing is concerned, not only reduces the rifle to the level of Brown Bess, by destroying its superior accuracy, but virtually reduces it below the old arm, inasmuch as, the excellence of accuracy being lost, the advantage of rapidity of loading and firing is on the side of the old smooth bore. The soldier cannot freely use his arms, and his weapon as a pike is thus prejudiced; this second disadvantage is more felt now than it was some years ago, from the fact of the men being, for the most part, smaller than they were before the Crimean war, especially in the 2nd battalions; in the Guards and old regiments, where the men are of a larger class, this fault does not tell so much. Colonel Spiller's pack is reported in a tolerably favourable manner, but no appreciable advantage over the present pack is remarked by the great men—the fault which is difficult to remedy, viz., the straps under the arms that hurt the soldier being still retained. This fault Mr. Berrington attempts to remedy, and throws the strain on the chest, where the soldier complains still more of the inconvenience.

The Secretary of State for War has authorised an allowance of 4*d.* per diem to men employed in camps of instruction in throwing up field works, &c. It is understood, however, that this is not to be considered in the light of working pay, but as a compensation for the injury to clothing likely to arise.

Her Majesty is about to pay a very gracious compliment to the Volunteer Corps, by setting apart a day especially for the reception of the officers. We believe that some day about the middle of next month is likely to be selected, so that ample time will be afforded to procure uniforms and appointments.

Lord Seaton, commanding the troops in Ireland, has arrived in England.

The latest accounts from China give rather contradictory statements respecting the prospects of the British and French expedition. On the one hand it is reported that the fortifications of Pekin are being strengthened, and that large numbers of Tartar troops are being concentrated on the Peiho. On the other hand, it is said that the Taku forts have been to some extent dismantled, and that no opposition will be offered to a large English force. In that case the *Overland China Mail* says, "the English commanders will require to exercise the greatest caution in ascending up to Tien-tsin—if they attempt to do so—lest their vessels be caught by masked batteries in the turnings of the rivers."

TENTS AND TENT-LIFE.*

We have Armstrong guns, and Enfield rifles. Continual improvements are daily springing up in all instruments for the destruction of life. It must be but poor economy which fosters all those appliances tending to exterminate our enemies, but neglects those which nearly concern our own welfare. So argues Major Rhodes; and the result of his cogitations has been not only the production of a very ingenious and excellent description of tent, but of an amusing volume on tent-life generally.

In the early ages of the world, beginning indeed as far back as 4000 B.C., and since that time, tents have been constantly made use of as habitations; and Major Rhodes treats us to an interesting account of these dwellings, from the rude antediluvian tents, covered with the skins of animals, down to the more elaborate bell-tents and marquees of our own time; and, combining instruction with amusement, he gives us many curious particulars of the habits of the nomadic tribes who most affected this mode of life.

One thing which strikes one very forcibly in perusing these pages is the paucity of improvements which in the lapse of time have been brought to bear upon tent architecture, the principle of construction varying little at present from what it did many hundreds of centuries back; indeed, Major Rhodes tells us that in an old illustrated edition of "Cæsar's Commentaries," there are represented "three tents of the exact form now used in England, the old pattern 'round tent,' or, as they are erroneously called, 'bell-tents,' without the improved short wall" (p. 16). Of course, in materials and some minor details of tent-making, we have advanced considerably; but it is strange to observe how pertinaciously we appear to have clung to most of the defects which were observable in the tents of the early Arabs; and of these defects, one of the greatest is that of opposing a flat, and internally unsupported surface of canvass, instead of a convex one to the force of the wind, an error perpetuated by means of the pole, which hitherto, in some shape or another, has been considered a *sine qua non* in the construction of a tent. In the common round tent of the present day this defect is peculiarly appreciable, as any one of Crimean experience will testify, and few who have passed a stormy night in one of these most unsatisfactory habitations will readily forget the misery of awaking to find one side of their tent bellying inwards with the force of the wind and beating rain, till, yielding at length to the severe strain (if the ropes have not yielded before), the pegs are drawn from the sloppy ground, and the whole tent topples over to leeward.

But Major Rhodes has changed all this. In his preface (p. viii.), he observes: "Convinced that by adhering to the present plan of constructing tents (viz., by having interior vertical poles, and innumerable outside supports, in the shape of ropes, for the purpose of keeping the tent upright, besides acting as props or stays to resist the wind), I could not increase their stability or rigidity without very materially adding to their weight, and thereby decreasing their usefulness in the shape of portability, I at once banished all such methods of construction from my mind."

He accordingly discards the pole altogether, and substitutes a sort of framework, somewhat like that of an umbrella (which indeed the drawings of his field-tent closely resemble), the ribs, of which there are eight, being composed "of stout laths of ash, bamboo, or any other flexible material." These ribs effect a junction at a point about eight feet from the ground (the height of the tent) in a head-piece formed with radial sockets to receive them; the butt end of each rib is forced into the ground, and, "to facilitate this operation, the extremity of the rib is provided with a metal shoe in the shape of a wedge." The rib is kept in its place by means of a double-twisted rope, laid in a circular form upon the ground, and having fixed loops at equal distances, the butt of the rib also having stops upon it to prevent the rope slipping up, and the whole is covered with double waterproof canvas, which Major Rhodes recommends should be painted grey, or some other similar colour; "the strong canvas covering in which the whole tent is rolled up can be divided into two parts, and buttoned to the inside of the tent, the buttons being provided for the purpose, thereby affording a material ground-support to the whole of the canvas around the bottom of the tent, when the rifles and knapsacks of the men are placed thereon; this prevents the ground-current of air from blowing directly on the men when lying down" (p. 180) and "additional security or firmness is given by outside 'storm-ropes,' radiating from the cover at the back of each rib." (P. 180.) Such is roughly a description of Major Rhodes' field-tent, which, when pitched, assumes the form of a curvilinear octagon, of 13 feet diameter; his guard tent is a modification of the same, but only 9 feet in diameter and 5 in height; while his hospital tent, which is of an oblong form, 30 feet in length, 15 wide and 10 high, and intended to accommodate 20 patients, is constructed entirely on the same principle, and weighs only 395 pounds to the Government one of 507 pounds.

The ventilation, which in all cases is secured by a hole in the head-piece, which can be closed or opened at will, is admirable.

A little consideration will enable the reader, particularly such an one as has had some experience of tent-life, to appreciate the many advantages of these tents. From their form they are "less liable to catch the wind than the perpendicular wall, and conical sides of tents, constructed on the old principle." (P. 179.) They are considerably more portable, and can be pitched and struck with greater ease and rapidity. They occupy, when pitched, much less room than the old-fashioned tents, from the absence of ropes; and indeed it is in itself no small boon to have rendered locomotion in a camp a work of less difficulty, and less fraught with danger of ugly falls over tightly-stretched, unseen tent ropes than heretofore; and last not least their peculiar form secures a vast increase of interior space.

It may be interesting before we conclude, to compare briefly a few statistics of the old tents and those of Major Rhodes' invention:—"An ordinary single-poled circular, conical tent, without any side walls, but occupying the same space of ground as my field tent" (we quote our author's own words) "contains about 354 cubic feet of air, thus allowing about 44½ cubic feet per man, 8 men in a tent, or about 29½ with 12 men in a tent."

Major Rhodes' field tent contains 531 cubic feet of air, giving for each man, 8 men in a tent, 66½ cubic feet each, or with 12 men about 44½ cubic feet for each.

Five of Major Rhodes' hospital tents, accommodating in all 100 sick, or 150 healthy men, and giving 119 cubic feet of air to each soldier in the first case, or 79½ in the latter, occupy superficially only the extent required for one Government hospital tent, accommodating only 20 sick or 30 healthy soldiers.

But we have already transgressed our proposed limits, not we hope, however, without convincing our readers of the superiority of Major Rhodes' invention over the tents now in use.

He has received a gold medal from His Majesty the Emperor of Austria "in approval of His Majesty's high approbation," and that his tents have been tested in the Hanoverian service; and in an official document on the subject appended to the volume we are told that "eight men with very moderate practice can pitch an hospital tent in from ten to twelve minutes; and four men a field tent in five minutes; the same with the guard tent."

There is little room for any display of literary powers in this little volume; but it is modestly and clearly written, and it is with much satisfaction we observe that a new edition of it has already been found necessary; the illustrations also assist very materially in conveying a just idea of the different natures of tents which the author describes. We conclude this notice by wishing Major Rhodes' tents and volume every success, nor can we doubt that the intrinsic merits of both will ensure it.

* *Tents and Tent Life, from the Earliest Ages to the Present Time.* By Godrey Rhodes, Major (Unattached). New Edition, with Supplement. Illustrated. (London: 1859.)

NATIONAL DEFENCE.*

Any remarks from the pen of Sir Robert Gardiner are sure to be welcome; while the boldness of the views which he enunciates, and the ability with which they are expressed must at least ensure for them attention, even if the known experience and talents of the gallant author failed to do so. No one will be surprised to find General Gardiner at a time like the present discussing so important a question as that of National Defence; and those who are intimate with his former productions will be still less so to find the subject discussed in this little pamphlet with more than ordinary vigour and determination. The object of these pages is threefold: to impress on the people of England the possibility—not to say probability—of war rolling, ere many years have flown, towards our little island; to point out to them how unprepared in that case we should be to meet it; and to suggest means for averting the evil, not only for the present but for the future, and recommending "not a policy of the moment, to meet unlooked-for emergencies like that now keeping England alive and awake, but a policy which will ensure and perpetuate the military security of the country." (P. 19.)

By pointing to the ever-increasing power of France, and to the love of military glory which characterises that nation, by indicating the combination of tradition with circumstances, rendering the invasion of England peculiarly congenial; by reminding us of the success which has invariably attended the designs of the Emperor Napoleon, of the suddenness with which war broke upon Austria, as little expecting or fearing it as ourselves, of the turn which affairs, within the last twelvemonths, have taken on the continent generally, and which they are now taking in the Mediterranean particularly; the gallant General, if he does not establish his first proposition to the satisfaction of all, must at least secure the sympathies of a large proportion of his readers, and demonstrates successfully the necessity of being on the *qui vive*, prepared constantly for the worst.

On the subject of our defenceless state he has much to say, and it is scarcely surprising at this particular time to find him holding the same opinions which he three years ago advanced in his pamphlet, entitled, "Is England a Military Nation or not?" and in some remarks published about the same time on "Legislative Military Responsibility." Deeply impressed with the consciousness that, at the beginning of last year, we narrowly escaped a great danger; and that when war broke out in Italy, "our depôts of arms, ammunition, and stores, were literally found empty, and our barracks and magazines falling into decay" (p. 57), he proceeds to point out how, in spite of much that has been done since that time, much more remains to do, and that even now we should be entirely incompetent to withstand the first shock of an energetic, well-timed descent upon our shores; how, to oppose the 250,000 men, at which, as the *lowest* calculation, he estimates the force which would be likely to be brought against us, we should be unable to concentrate more than 50,000 disciplined soldiers, regular troops and embodied militia.

If, upon the subject of Volunteers, Sir Robert may not be quite so enthusiastic as the spirit of the times demands; if he attempts to show that a Volunteer force will not come up to the expectations of its ultra-ardent admirers; if he deprecates strongly the arming of such a force at the *expense* of the regular army (especially in the Artillery branch), and warns the supporters of the movement against being too sanguine—not of its success, but of its results—he but indorses, to a certain extent, the sentiments of Sir John Burgoyne in his article in *The Cornhill Magazine*, and expresses the opinion of many sensible persons, and by no means intends to underrate the value of the Volunteers as auxiliaries to the regular army; indeed, at page 66, he expressly disclaims any such idea, for after his remarks on the subject, he adds: "I say this with no depreciation of the motives of Volunteer self-trained bodies. I honour their patriotism; I confide in their courage. But these qualities, however invincibly possessed, without systematic training and permanently maintained discipline, as in the regular troops and embodied militia, will not in themselves repel or overcome an invading army."

But the great object of this little volume is to suggest a remedy for all this; and the remedy he tells the people of England lies with them, *at* least with all possessors of the elective franchise, as having the "representatives *of* their will also *at* their will;" and in plain, earnest, soldier-like language he urges them to face boldly any outlay which may be necessary; to scout for the future the hustings-cry of "military retrenchment;" to insist on their representatives supporting all schemes for Army and Navy augmentation and reform; and generally to assist, by their voices and by their votes, in making up for time lost, and placing England in such a state of defence as her interests and the aspect of affairs demand.

It may be startling to be told that, in Sir Robert's opinion, 24,000,000*l.* are necessary for doing all this; that unless conscription is introduced as a means of recruiting the regular army, we shall be unable to keep it up to the requisite strength; or, to be reminded of a speech delivered by the Minister of War last year, whereby it appears that 9000 men of the numbers voted by Parliament existed only on paper—it may be unsatisfactory to learn that though in 1803-4, in addition to an army of 180,000 regular troops and militia, we had 300,000 armed and organised volunteers; and in 1805 (when Napoleon *purposed* invasion), 800,000 men were in arms, while that now, "when invasion could be effected with far greater certainty of success than in 1803-4 or 1805, our army, including 23,000 militia, amounts to 229,000 men" (p. 61)—our population being more than double what it then was—but a truth is none the less important because unpalateable; and our thanks are due to Sir Robert Gardiner for coming forward thus boldly to confront us with stubborn facts and figures; and if his conclusions are not always our own, and if we are inclined to dissent from his views on the subject of our peace policy during the late war, and on the subject of an alliance between France and England, and on other points of less importance, we are not the less ready to admire the English spirit which has given them birth, and the fearlessness with which they are expressed.

We can heartily recommend this pamphlet to those to whom it is addressed—the people of England—and it is more especially acceptable at this present time, when the voice of public opinion is likely to be needed to support the Government in carrying out such measures for national defence as they may consider necessary.

* *Political and Legislative Considerations on National Defence; Addressed to the People of England.* By General Sir Robert Gardiner, G.C.B., Royal Artillery. (London: 1860.)

The Minister of War has published a long circular or instruction relative to the examination for pupils to be admitted in the Imperial Navy school. The order of examination comprises arithmetic, algebra, geometry, trigonometry, applied mathematics, physics, chemistry, geography, the English language, compositions in French, Latin, English themes, geometrical drawing, drawing of head from model, all equally obligatory.

A young assistant-surgeon of the Hospital of Gros Caillou, named Chevallier, has invented a most valuable adaptation of photography, by which officers of engineers and others can take plans of any locality with precision and rapidity, and multiply them, when made, to any extent. We recommend our engineer officers to look to this invention, of which they will find a description in the *Moniteur de l'Armée* of Jan. 1st. It is a great improvement on the tachi-goniomètre of Major Laussedat of the Ecole Polytechnique, and is in effect an ingenious combination of the camera-obscura and the photographic elements.—See *l'Année Scientifique et Industrielle*, 1860.

LORD CLYDE, COMMANDING OFFICERS, AND MEDICAL OFFICERS.

Lord Clyde, in an order of the day, which we subjoin, gives a severe rebuke to commanding officers and medical men in India, for neglecting their duty in not protesting against carelessness as to the proper supply of medical *matériel*:—

"Adjutant-General's Office, Her Majesty's British Forces, Calcutta, Dec. 21. Head-quarters, Camp Saidabad, Dec. 10.

"On the occasion of a recent inspection, conducted by the Commander-in-Chief in person, Lord Clyde made the painful discovery, at two stations where three of Her Majesty's regiments are quartered, that the hospitals have been devoid of quinine for several months.

"Lord Clyde is obliged to reiterate, what every commanding officer must be aware of, that the principal medical officer of a regiment is not the commanding officer.

"He is as much responsible that his hospital is duly supplied with medicines as that his men receive their daily pay.

"If the regimental doctor has reason to complain of the superintending surgeon, and cannot get what he wants, the commanding officer should address the general officer commanding the division.

"If that is of no avail, he should write to the Adjutant-General of Her Majesty's Forces.

"If that resource fail him, it is his bounden duty to address the Commander-in-Chief in person.

"In the same manner, in common justice to the regiment he commands, he should never rest till he has obtained the best accommodation, furniture, shelter, &c., which the circumstances under which he is placed may permit.

"It does not belong to his situation patiently to endure what appears to be ignorance, sloth, or carelessness in the functionaries who are bound to provide his regiment, according to their various vocations, whether it be the commissariat, barrack department, the executive engineer, the civil authorities, or the superintending surgeon; it is incumbent on him, as being entrusted with a great and trying responsibility, to report to superior authority when he considers his regiment wronged or neglected, or that it is suffering from causes which it may be in the power of the Commander-in-Chief to remove.

"By order of his Excellency the Commander-in-Chief.

"W. L. PAKENHAM, Colonel,
"Adjutant-General Her Majesty's Forces in India."

[In reference to this rebuke we may state, as a matter within our own knowledge and observation, that the Indian Government has been frequently blamed by the medical officers of the Royal Army for the extreme *stinginess* of its supplies of medicines, many valuable agents being quite unknown, and others scantily issued in Indian Hospitals.—Ed.]

HER MAJESTY'S INDIAN NAVY.

In a Memorandum, dated Horse Guards, 25th April, 1855, published in the *London Gazette* of the 1st May, 1855, it is declared that "it is Her Majesty's pleasure that officers of the H. E. I. C.'s Service, whose commissions shall be signed by authorities duly deputed to do so by Her Majesty shall have rank and precedence with officers of H.M. regular Army, according to the dates of their commissions in all parts of H.M.'s dominions or elsewhere;" and section 58 of the recent Act for the better government of India determines that "all persons who at the commencement of this Act shall hold any offices, employments, or commissions whatever, under the said Company in India, shall thenceforth be deemed to hold such offices, employments, or commissions under Her Majesty." Officers of the Indian Navy do therefore take rank with officers of the Army, the precise Army rank of each naval officer being specially stated on his commission. The Royal Navy does the same, and thus both Royal and Indian Navies apparently take rank with each other, the Army being the standard of rank in each case; but it is desirable that this should be declared by authority in a more direct and precise manner, and the present position of the Indian Navy exactly defined.

Should the Indian Navy Service be continued, any change in the present system of promotion by seniority would not be desired by the members of the Service. This system has always formed a fundamental principle of the Indian Service both military and naval; and although open to objection on some points, it is generally felt that it is on the whole better adapted than any other to so small a body as the Indian Navy. The point where inconvenience is principally felt from this system, is that it presents no means of rewarding signal services; so that, when co-operating with the Royal Navy in any of the recent wars in the East, as in China in 1841-42, and in Burmah in 1852; or when engaged in distinct operations as in Persia in 1856-57, and in Bengal in 1857-58; the officers of the Indian Navy have remained unrewarded for services precisely similar to those for which officers of the Royal Navy have at once received promotion to higher rank.

As a remedy for this, it has been proposed that Brevet may be granted in the Indian Navy, precisely in the same manner that it is given to the Indian Army. It may be urged against this, that the principle of Brevet in the Navy is at present unknown. It is so, because in the Royal Navy it is not required, substantive promotion being always given instead; but there is nothing either in the constitution of the Services, or in the principle of Brevet itself, which in any way militates against its introduction, while it presents the only method of reward for services which now remain unrewarded only for want of such a method. It meets with no objection, and works well in the Army, and there is no reason to suppose that it should do otherwise in the Navy.

In some cases where officers have been placed in civil appointments, and although the duties of such appointments may have been immediately connected with their profession, they have been called upon to resign or retire from the Indian Navy. The cases in which this condition has been required are quite exceptional, there being no known rule enforcing it, while there are at present, and for years have been, instances of Indian Navy officers holding essentially civil appointments, and still retaining their position in the Service.

As these appointments are, generally speaking, the prizes of the Service, and bestowed upon the best men, the effect of such a rule, if established and acted upon, would be to remove from the Active List officers distinguished by special qualifications or special services, and incapacitate them from ever holding a command again, at a time when their experience or their attainments had identified them as valuable servants of the State, and when they were the more likely to do honour to the Service they belong to. The officers thus required to give up all active connection with their profession suffer a serious hardship; and such an obligation is no less injurious to the whole of their brother officers, for the promotion occasioned by the one or two vacancies thus caused can in no way compensate for the disadvantage of holding commissions which they must resign if they aspire to fill a more responsible office; a disadvantage which detracts from their present position one half its value, or renders it most valuable to those who are unable or unconcerned to show themselves worthy of anything higher.

Reasonable ground for resignation of the Service being exacted as above, is no doubt to be found in the necessity for maintaining on the effective list the full number of officers allowed; but this end is gained in the Royal Artillery and Engineers (which corps give a large proportion of officers to civil employment), in a manner which tends to the great advantage instead of to the detriment of the officers concerned; and, if a similar system of "seconding" were granted to the Indian Navy, promotion, now most tardy, would be thereby accelerated, and a boon conferred, which would greatly tend to increase the *esprit de corps*, and promote the efficiency of the Service. Thus, if the complement of commanders were twenty, and three of these were on civil employ, these three would still retain their position on the list and rise with the rest, but they would be "seconded," the three senior lieutenants being promoted to commander to make up the full complement of active officers. There would then be twenty-three commanders on the list, the names of those in civil appointments being distinguished by italics,—and the same in the other grades, the full number of active officers being always maintained, and those on civil employ being promoted in their turn, and always "*seconded.*"

UNIFORM.—The present uniform of the Indian Navy is very similar to that of the Royal Navy (the chief distinction being the facings, which are white in the Royal Navy, and blue in the Indian Navy), but the badge of the late East India Company (the lion rampant holding a crown), now without significancy, is still worn by the officers, and borne on the broad pendants of the Indian Navy.

PAY.—Whenever the subject of the pay received by officers of the Indian Navy is brought forward, it is very usual to compare it with that of the Royal Navy, and the result of this comparison is as follows:—

ROYAL NAVY SERVING IN INDIA.				INDIAN NAVY.
2nd Class Commodore.				*2nd Class Commodore.*
Pay as Captain not less than			£500	Pay and Allowances, Rs. 1300 per month, or Indian Pay per annum £1560
Additional as Commodore ...			182	
Allowance granted by the Indian Government			1000	
Indian Pay per annum			£1682	
Captain.				*Captain.*
Pay according to Rate of Ship.	Indian Allowance.		Per annum.	Pay according to Rate of Ship:—
£400	+ £500	=	£900	Rs. 800 per month or £960 per an.
500	+ 500	=	1000	or or
600	+ 500	=	1100	Rs. 900 ,, £1080 ,,
700	+ 500	=	1200	
Commander.				*Commander.*
Pay			£301	Pay Rs. 500 p. month or £600 p. an.
Indian Allowance			250	or or
Indian Pay per annum.....			£551	Rs. 600 ,, £720 ,,
Lieutenants.				*Lieutenants.*
Lieutenants of 7 years and senior of a ship, Pay ...			£200 15	The first 15 on the List, who are of from 18 to 20 years' service, Rs. 175 per month, or per annum £210
Indian Allowance			15 0	
Indian Pay per annum ...			£215 15	
All others, Pay			£182 10	All others, Rs. 145 per month, or per annum £174
Indian Allowance			15 0	
Indian Pay per annum ...			£197 10	

The Indian allowance here mentioned for Lieutenants, is granted in a round sum for the wardroom mess of each vessel, according to rate, and is equivalent to an average of 15*l.* per annum for each officer. The salaries of the Indian Navy officers are stated as they stood before the recent reductions made by the government of Bombay, but which have not yet received the sanction of Her Majesty's Ministers. Commanders of the Indian Navy, when in command of steam frigates, properly Captains-Commanders, draw Rs. 700 per month. In a corresponding case in the Royal Navy, the Commander is promoted to Acting-Captain.

The above comparative statement of pay of the two Services shows that in the grade of Lieutenants, those of the Indian Navy receive 23*l.* 10*s.*, or nearly one-seventh less than officers of the Royal Navy; this applies to the larger number of each. Between those on the higher rate of pay, there is still a difference in favour of the Royal Navy, notwithstanding that the length of service of Lieutenants of the Indian Navy, before arriving at the increased rate of pay, is so much greater than required in the Royal Navy.

But this comparison can be by no means a fair one, for the cases are in no way parallel. Officers of the Royal Navy are not subject to expenses which those of the Indian Navy are constantly obliged to incur. Servants are provided for them, and their cabin furniture supplied by the state, whereas in the Indian Navy these have to be paid for by the officers; their period of service in India is short, and scarcely exposes them to the necessity of purchasing European articles at the greatly enhanced prices which they obtain in the East; and they are never called upon to defray the heavy expense attending the passage to and from England, which falls upon the Indian officer, and that most generally on account of failing health induced by the climate. To show how heavily this bears, it is only necessary to quote the case of a Lieutenant returning from sick leave in perhaps his fourteenth or fifteenth year of service. Officers of this grade are granted passage money for the voyage home only, but those of higher rank bear their own expenses both out and home. To enable the Lieutenant to return to his duty, he is obliged to borrow money from the Indian Navy Fund, the repayment of which, together with his subscription to the Fund, will subject him to deductions for the period of two years to the amount of Rs. 36 per month, the residue of his salary being Rs. 109 per month, or 130*l.* per annum: and this is the entire income derived from his profession by a man of sixteen or seventeen years' experience as a naval officer. The deductions are still greater if he be married. At the same time, the pilots of Bombay harbour, men who have mostly been brought up in the Indian Navy, and who have probably served as ships' boys under these very Lieutenants, are granted 220*l.* to 260*l.* a year.

But, as before stated, comparisons in point of pay between the Royal Navy and Indian Navy cannot be made with any more reason than the pay of the Army in England can be compared to that for India; and the same principle which warrants increased pay for the officers of the Army in India, applies equally to the case of the Navy.

A comparison between the pay in the Indian Army and that of the corresponding ranks in the Indian Navy, again shows how much this service is underpaid. To quote a single instance, the Pay and Indian Allowance of a Captain of Infantry in India is 298*l.* 17*s.* 6*d.* per annum (extra expenses, such as house-rent, tentage, &c., being met by extra allowances), while that of a Lieutenant in the Indian Navy, as before shown, is 174*l.* or 210*l.*, according to length of service. The contrast is still greater between the allowances of a Captain in the Army and a Lieutenant in the Navy, when on sick leave in the interior of India, in which case their expenses are exactly similar, and it might be supposed that their pay would also be assimilated.

The only other covenanted maritime service under the government of India is the Bengal Pilot Service; and if a comparison be instituted between the pay received in this Service and that in the Indian Navy, it will be seen that pilots appointed in the season 1841 are now drawing 840*l.* per annum as branch pilots, while officers of similar length of Service in the Indian Navy are receiving 480*l.* a year in command of cruisers or steam sloops. But it is well known that the pay of a pilot is but a very small portion of his income. The system of gratuities, which, though not directly acknowledged by Government, is not prohibited, increases the receipts of a branch pilot to 2400*l.* or 2500*l.* per annum, and in some cases to more than this, while men of fifteen or sixteen years' standing realise from 1400*l.* to 1600*l.* a year. This is mentioned to show the marketable value in India of nautical men of certain experience, and to prove how inadequate is the remuneration received in the Indian Navy. As further instances it may be stated that the Masters of the inland river steamers realise 1200*l.* to 1400*l.* a year, and with scarcely any exception the Commanders of sea-going steamers in India are of a similar value.

I have endeavoured to be strictly correct in these statements, and I trust that the whole subject of the pay of the Indian Navy may be brought under consideration by the Right Honourable the Secretary of State, as the position of the officers of the Indian Navy as regards pay, especially the Lieutenants of from ten to fifteen years' standing, is such as cannot fail to induce a distaste for the service, when viewed in contrast with the more liberal emoluments received in every other Service and every other sphere of life in India.

J. H.

CHARACTERISTICS OF THE SPANISH TROOPS.

[FROM A CORRESPONDENT.]

The eyes of Europe being at present turned towards the proceedings of the troops of Spain engaged in warfare with the Moors, it may not be unacceptable to know a little of the manner in which they conduct themselves in the field, from a person who has been an eye-witness of their behaviour in actual service. At the commencement of the Peninsular War every person in England was charmed with the heroic bravery and devotion of the *famous Spanish Guerillas*; it was the topic of conversation in every circle, and regiments which were ordered out to that country to take part in the war, were considered most fortunate in being likely to assist such gallant men. But the army under Sir John Moore, after marching a considerable distance up the country, deluded by the promise of assistance, were obliged at last to retreat; because the Spaniards either would not, or could not, act in union. At the Battle of Barossa the division of Spaniards would not fight, because it was Sunday, and allowed their Allies, the British, to bear the brunt of the attack made by troops much their superior in numbers.

At Salamanca their want of co-operation is well known; at Talavera the Allies were left to fight the battle while the Spaniards looked on. Lord Wellington, during the latter part of the war, was appointed Generalissimo of the Spanish Army, for previously the Spanish troops were under their own generals, who, being independent of the movements of the British, generally declined fighting unless they were actually forced.

At the Battle of Toulouse, the Duke of Wellington thought he had an excellent opportunity of allowing "*Los Valerosos*" to distinguish themselves. It may be remembered that in the position in front of Toulouse the French had constructed five redoubts, three in front, and two in rear, chequerwise, so that if one of the front were taken it would be under the command of that behind; a part of the 6th Division, especially the Highland Brigade, was ordered to carry the redoubt on the right; and the whole Spanish army was ordered to attack rather a formidable one on the left, which contained about three battalions of French; it was supposed that the capture of the two flanks would cause the centre to fall. The Spaniards were most valiant; they cheered; they put their shakos upon their bayonets; and "*Muerte à los Franceses!*" was the cry. But they were nearly a mile off! However, they continued to advance bravely till they came to a deep, hollow road, about 200 yards from the redoubt, which they got into, and their discretion being greater than their valour, they thought it most prudent to remain there; this was only the advance, the remainder were also discreet, and as the Spaniards are always fond of etiquette, it would not have been polite for a regiment in the rear to precede one more advanced. Even Lord

Digitized by Google

Wellington got off his horse and tried to lead them on; he took off his hat to cheer them, but all his exertions were of no avail.

In those days the Spanish troops were clothed in a uniform so nearly resembling the French, that it was difficult at a little distance to distinguish one from the other. Their artillery was very scarce and bad; nothing could be much worse as far as the equipment was concerned; the carriages were very ricketty, and mules were attached to them with long rope traces, knotted together in twenty places. The limber wheels were very small, and a long pole emanated from some part of them, sticking up between the ears of the mules. The cavalry was bad, the horses far too light for their work, and the men were shocking bad horsemen, riding with very long stirrups, their toes pointing down, so that they had a very bad seat, with tremendous long swords and a heavy carbine, and looked *a la Español, muy hoco valeroso*, or rather, *val para nada*.

The British Legion, sent out twenty-three years afterwards under Lieutenant-General Evans, consisted of 10,000 men: two regiments of cavalry, ten of the line, one of rifles, and a corps of artillery, with four field-batteries fully equipped—the whole Legion armed and clothed by the British Government.

General Cordova came to Vittoria soon after the Legion got there; he brought a large body of troops. The French Legion also joined. Great deeds were expected; the troops of all nations marched towards the great Carlist stronghold, the Castle of Guevara. The British formed the right column, the Spaniards the centre, the French the left; after a little skirmishing on the right and left, the British took a village,—here stopped the proceedings of the 15th January, 1836; the next day there was a change of position; the next, one of the heaviest falls of snow ever seen, succeeded by as wonderful a fog; still the two Legions held their ground; but to the utter astonishment of General Evans, in the night Cordova, not liking the cold, retired to Vittoria.

This wretched affair brought on all the misery that followed—no rations for man or horse, no medicine or accommodation for sick or well; all had to lie on the cold stones of the church floors; no money to purchase anything; cold, sharp frost and snow without, empty bellies within; no wonder the men died by dozens daily.

This little episode is merely given to show that Spaniards did not improve in twenty-three years; and though improvements were shown to them, in the superiority of equipment in the British cavalry and artillery, they would not adopt them or change their old habits. The *matériel* of their artillery was a little improved, but still very bad. The officers had a profound contempt for tangent scales, and were in perfect ignorance of the time of flight of a shell, or the proper length to cut a fuzee; they left it long enough, so that it was pretty sure to burst after it had lain some time on the ground. The powder for mortars was put in by guess.* The Spanish infantry is good; the men are sober, and most excellent marchers.

Their cavalry is not much improved since the old war: the horses are under their work, and the men ride as badly as ever; all their saddlery and harness is badly made and fitted; and sore backs are prevalent. The recent accounts speak in high terms of the Spanish cavalry.

O'Donnel is a brave man, rather too fond of exposing himself; he was taken by the Carlists twice in one day, and rescued by the Lancers of the Legion. He is tall and good-looking, with light hair and eyes, and a florid complexion, which may be accounted for by his Hibernian origin. A certain set of the Spanish officers are well-educated men, and are generally found above the subalterns, who are mostly composed of men risen from the ranks, and do not hope for higher grades than that of captain; so good sergeants are spoiled, and make bad officers. The higher grades are chiefly composed of *hidalgos*.

The men are mostly raised by conscription, or something like it. Droves of *volunteers* are occasionally met with under an armed escort, unpleasantly attached to a long chain; at night, while on their march, they are quartered in the prison, or corridors of some convent; in fact, anywhere where they can be kept from deserting. They arrive at head-quarters in a most filthy state, and have to be thoroughly cleansed and purified before they are allowed to mix with the other men. From their being drawn for five years, they are generally known by the denomination of Quintos.

The Basques are a fine race of men, and, from their activity and mountain hardy habits, make most excellent light troops. In many respects they resemble the Scotch Highlanders in their clothing and customs, and have an instrument much resembling the Scotch bagpipe; they were the principal supporters of Don Carlos; they are almost offended at being called Spaniards. Further south, in Andalusia, Granada, &c., appears the cross of the Moorish blood. In the plains in the centre of Spain, and towards the north-west, from Castille to Gallicia, the people fall off exceedingly in appearance and stature—for a general idea, *vide* Sancho Panza,—scores of them are to be met with, all veritable specimens of that worthy, if not lineal descendants.

Such are the men sent to conquer the Moors. Let them take care of catching Tartars, as well as Moors; for if these wild fellows come down upon them in their wild mode of warfare, Spaniards will have little chance of ultimate success; and the further they advance into the country the worse for them, as the natives will be sure to cut off escorts and stragglers,—in short, play the same game with them as they did with the French during *La Guerra de Independencia*.

This last paragraph is inserted to show the danger of prophecy—above all, the mischief of prejudices so apt to be created by military cooperation among officers of diverse nationalities.

In future the French embassies at St. Petersburg, London, Vienna, and Berlin, will have a French officer attached to the *personnel*. They are already named by the Minister of War. Lieut.-Colonel Colson (of the Staff) to Russia; Major (of the Staff) d'Andigné to England; Major (of the Staff) d'Andlau to Austria; Major (6th Hussards) Prince de Bauffremont, to Prussia.

* It would seem that the Artillery of Spain has been greatly improved since our correspondent saw them. They have preceded us in the use of rifled cannon.

THE ARMIES OF THE CONTINENT.

THE FRENCH ARMY.

In the accounts we are publishing of the relative strength of the armies of the Continent, we placed the Sardinian army first, because it is round it that Italy must rally when the *final* struggle comes. The fate of Italian independence lies, it is true, to a certain extent, in the hands of the French Emperor; but as his Imperial Majesty has indirectly yet distinctly declared that France will not interfere to restore the princes of Central Italy, it would be only in case Austria attempted to do so that the French flag would be again unfurled on the Alps.* The immense power of the French army would therefore not be brought into play except under such an eventuality, or unless Austria and Naples should attempt to preserve the Romagna to the Pope by force of arms.

If we take the aggregate fighting strength of the French army, it amounts to 660,000 men, and 1200 field-pieces.

The INFANTYR is composed as follows :‡

Garde: 3 regiments of grenadiers of 4 battalions and 6 companies; 4 regiments voltigeurs, 4 battalions, and 6 companies; chasseurs-à-pied, 1 battalion of 10 companies; Zouaves, 1 regiment of 2 battalions of 14 companies. This gives a total of 8 regiments and 1 battalion, amounting on the war-footing to 31,000 men.

The Infantry of the Line consists of 108 regiments, 32 battalions, and 2 companies, giving a total on the war-footing of 346,000 men.

Thus, the whole of the French Infantry, including the *Garde*, consists of 116 regiments, 33 battalions and 10 companies, equal to 377,000 fighting men.

The French CAVALRY consists of 6 regiments of *Garde* and 58 regiments of regulars.

The Cavalry of the *Garde* consists of 1 squadron of cent-gardes, 2 regiments of cuirassiers, 1 regiment of dragoons, 1 regiment of Uhlans, 1 regiment of chasseurs, 1 regiment of *Gardes*, giving a total of 9000 men.

The regular cavalry consists of 2 regiments of carabineers, 10 regiments of cuirassiers, 12 regiments of dragoons, 8 regiments of Uhlans, 3 regiments of chasseurs d'Afrique, 3 regiments Spahis, 10 companies of re-mounts, giving a total of 83,000 men.

The whole of the French Cavalry therefore consists, including that of the *Garde*, of 64 regiments, 1 squadron, and 10 companies, giving for the war-footing an effective force of 92,000 men.

The French ARTILLERY consists of 2 regiments (18 batteries and 2 companies) of the *Garde*, of which 1 regiment of 12 batteries and 1 company is foot, and 1 regiment and 6 batteries horse—total strength, 5000; and of 17 regiments (Line), with 227 batteries and 50 companies, giving an effective force in time of war of 68,000 men.

Thus, including the *Artillerie de la Garde*, the effective strength of the French Artillery consists of 19 regiments, 245 batteries and 52 companies, or, on the war-footing, 73,000 men. Of these numbers about one-third are horse artillery.

The total strength of the French ENGINEERS, including 300 men of the *Garde*, is 8500 men on the war-footing.

The Imperial Gendarmerie consists of 25,000 men.

The above figures are taken from a remarkable pamphlet which originally appeared in the German *Quarterly Review*, from the pen of a Prussian Artillery-Officer.† The official returns of the numerical strength of the French army are much higher. The official tables give the actual strength of the French army at 760,951 men.

To be impartial we will therefore subjoin the official returns :—‡

STAFF—(États-Majors).—The staff consists of 13 marshals, 90 generals of division (active), 77 ditto (reserve), 180 generals of brigade (active), 172 ditto (reserve); corps d'état major, 610, état-major de places, 341 officers and 365 subalterns, intendance militaire 342, officiers d'administration, 1317 officers and 328 sous-officiers, military corps of health, 1766, veterinary surgeons 358, officers in non-activity 513. This gives a total of 6472.

Military Schools 2100 men. Invalides 3800 men.

GENDARMERIE.—The whole of the French gendarmerie, horse and foot, including the Gendarmerie Coloniale, Garde de Paris, veterans, and Sapeurs-pompiers de Paris, is put down at 26,278 men.

THE INFANTRY—(WAR-FOOTING).—The infantry, including grenadiers, voltigeurs, infantry of the line, chasseurs-à-pièd, Zouaves, light African infantry, foreign legion, Algerian riflemen, compagnies de discipline, veterans, &c., is put down at 120 regiments, 493 battalions, 3088 companies, *plus* 117 companies and 24 sections *hors rang*, giving a total of 510,640 men.

Of this number, 8 regiments, 31 battalions, 192 companies, figure as Imperial Guard.

THE CAVALRY—(WAR-FOOTING).—The cavalry, including cent-gardes, carabiniers, cuirassiers, dragoons, lancers, chasseurs, guides, hussars, chasseurs d'Afrique, Spahis, and cavaliers de remonte, is put down at 64 regiments, 385 squadrons, 10 companies, and 64 *pelotons hors rang*, making a total of 100,221 men.

Of this number 6 regiments and 37 squadrons figure as Imperial Guard.

ARTILLERY—(PEACE-FOOTING).—The artillery, consisting of staff (*état-major particulier*), foot-artillery, horse-artillery, mounted artillery, pontoon-train, workmen, armourers, veterans, is given at 19 regiments, 291 battalions, 52 companies, *plus* 19 *pelotons hors rang*, with 267 batteries, a force of 68,544 men, and 50,240 horses.

Of this number 2 regiments, 24 batteries, and 2 companies figure as Imperial Guard.

ENGINEERS—(WAR-FOOTING).—The engineers consist of a staff (*état-major particulier*), troop, and workmen, and are put down at 3 regiments, 1 division, 6 battalions, 70 companies, and 3 companies *hors rang*, giving a total of 15,448 men.

TROUPES D'ADMINISTRATION.—Under this denomination are included baggage-train, 12,600; ouvriers d'administration, 7400; hospital staff, 3200; giving a total of 23,200 men. Another item, that of military courts of justice, is put down at 4248 men.

On the whole, the calculation of the Prussian officer may be taken as the average strength France *could bring into the field* in case of a European war.

We have not thought it necessary to allude here to the efficiency of the French army. It has so recently given proof of its qualities in the late Italian campaign, that praise on our part would be superfluous. Let us simply say, it is one of the best disciplined and most efficient armies in the world.

* Nation liberale (*La France*), elle ne saurait contraindre les peuples à subir des gouvernements que leur volonté repousse. (*Le Pape et le Congrès.*)

La France ne saurait intervenir pour le rétablissement de l'autorité temporelle du Pape dans les Romagnes, et elle ne peut permettre à l'Autriche de recourir à la force pour soumettre les populations, quand elle en répudie l'emploi pour son propre compte. (*Id.*)

† Die militärische Schwäche Frankreichs Deutschland gegenüber.

‡ From the official tables published at the end of 1859.

THE ARMIES OF CENTRAL ITALY.

In our notice of the Sardinian army we stated that the great reserve force of Sardinia consists of the aid she may expect from the States of Central Italy. Those states are Tuscany, Modena, Parma, and the Romagna.

To give accurately the numerical strength of those small states would be an impossibility. Like our own "volunteer movement," hundreds of young men flock to the national standard, and once Garibaldi comes forward their numbers will increase tenfold. The last official returns of the Tuscan army made the effective strength 17,000 men; that of Modena 12,000; of Parma 5000.

A very able correspondent of a morning contemporary thus describes the actual state of the armed force in Central Italy.*

"Tuscany is the province of Central Italy furthest advanced in her regular armaments, and if we allow that there are at the present moment 25,000 Tuscans under the standards, we may confidently assert that they make up no less than one-half of the combined Central Italian forces. Now of these 25,000 Tuscans only 10,000 to 12,000, now in the Æmilia, are the contingent supplied by this province to the League. The other half of the Tuscan army consists of 2400 gendarmes or carabineers; of 1200 coastguards, who never leave the country; of the Leghorn and Portoferrajo garrisons (1000 men at least are necessary for the protection of the isle of Elba); and of the depôts of the various corps, generally made up of recruits. A large portion of the Tuscan reserve will therefore never march; another portion will require time and instruction. The government here seem at last bent upon trying the experiment of a levy of new troops by conscription, and it will, it is said, be done on so large a scale as to yield a force of from 3000 to 4000 recruits. These, indeed, are only likely to be ready for the field in a few months, but they will soon take the place of the raw troops now in the depôts, so that I think it extremely probable that before April or May, Tuscany may add from 5000 to 8000 men to the 10,000 or 12,000 she already contributes to the common cause. The Modena, Reggio, Parma, and Romagna brigades may, to some extent, come up with the Tuscan Division in numbers, but they are mostly made up of volunteers and untried troops, and it were vain, I believe, to expect from them the same efficiency we may look for on the part of the veteran Tuscans.

"Still, when all is summed up, it is perfectly doubtless that, before the Pope has 25,000 ready for his invasion of Romagna, Romagna will have it in her power to oppose twice as large a force to the Pope. This would be quite satisfactory, and perfectly reassuring, if Romagna had only the Pope to fear, and if Central Italy were free to turn all her efforts towards the frontier of Cattolica. But Central Italy has about the very worst military position that can be imagined, and she has not the least notion who or how many her enemies may be, and on what quarter it best behoves her to be on her guard.

"If you cast a glance on a map, you will see that the Æmilia is a triangle formed on the north by the Po, on the east by the Adriatic, and on the south and west by the Apennines, which part that province from Tuscany. All the Po line, from Borgoforte to the mouth of the river, all the seacoast, from Comacchio to Rimini, is exposed to attacks. In the Mantua districts south of the Po, at San Benedetto, Revere, and Sermide, the Austrians are already strongly posted, and the Modenese troops, favoured by these, can at any time fall upon the towns of the Duchy, Mirandola, Carpi, Correggio, and even Reggio and Modena. The open frontier of the Duchy requires no less for its protection than double the force which may eventually attack it. Supposing the Duke of Modena to keep from 3000 to 4000 men under arms, it is evident that no less than 10,000 patriots are necessary to secure those provinces from a *coup de main*, in which they might possibly find support among the priest-ridden rural population. At sea the Pope is not strong certainly; still his emancipated subjects are even less so; and a few thousand Swiss embarked in a few large barges at Ancona are sufficient to give the seaports of Rimini, Cervia, Ravenna, and Comacchio such uneasiness as can only be dispelled by the presence of protecting garrisons at all those places.

"Tuscany has no enemy of her own; but owing to her solidarity with the Trans-Apennine provinces, she may look upon the Pope and all his allies as her own foes, and she cannot altogether leave the frontier of Cortona and Arezzo open to the inroads of the unscrupulous Swiss of Perugia; nor can she, as I said, leave her seacoast unguarded, and still less her stronghold of Elba; for the banished Grand Duke has some partisans, however few, and by the capture of Portoferrajo a safe shelter could be afforded to the reactionary party, from which they might not unsuccessfully harass the mainland.

"On the whole, however contemptible enemies the Pope and other Central Italian princes may be in themselves and deprived of foreign aid, still there is no doubt but they can compel their emancipated subjects so to divide their forces as to be unable to bring into the field on any given point many more than may be found arrayed against them; so that if, for instance, the Pope appears at Cattolica at the head of 25,000 men by next April, it is not likely that the Romagnese, should the Central Italian army even number 50,000 or 60,000 combatants, will be able to fight him at very favourable odds. This, of course, as to mere numbers; for if an Italian patriot in the defence of his country is not

* Florence Correspondent of *The Times*.

Digitized by Google

equal to two German mercenaries or Irish fanatics it will not be easy to keep up the sympathy of Europe for his cause."

The numerical strength is not, however, the great point to be considered. The question is, in how much can these troops be relied upon by Sardinia? The answer is satisfactory. Let us take the last official general order of General Fanti, the Commander-in-Chief of the troops in the Romagna. It is dated Head Quarters, Bologna, 26th December, 1859. It commences as follows:

"With the view to unite more closely than ever the troops of the provinces of the Romagna of Modena and Parma with those which are already in the king's service, the following is decreed:

"Art. I. Dated from the 1st of January, 1860. The troops of the provinces of the Romagna of Modena and of Parma will take the name of 'Royal Troops of the Æmilia.'"

The general order then divides into brigades the different regiments already formed. The number of the regiments follows the number of the Sardinian army. Thus the Ravenna brigade forms the 37th and 38th regiments of the Sardinian army; the Bologna brigades the 39th and 40th; the Modena brigade the 41st and 42nd; the Forli brigade the 43rd and 44th; the Reggio brigade the 45th and 46th; the Ferrara brigade the 47th and 48th; the Parma brigade the 49th and 50th.

This general order then enters into minute details of uniform, colours, &c., assimilating them to the other regiments of the Sardinian army.

Since this general order was issued, the Governors-General of the provinces of Central Italy have promulgated the electoral law of Sardinia, and ordered a new coinage to be struck, with the effigy of King Victor Emmanuel. This is the completion *de facto* of the annexation to Piedmont. Henceforth, then, the armies of Central Italy are simply divisions of the Sardinian army.

THE MILITARY-CLOTHING ESTABLISHMENT AT PIMLICO.

In that dreary part of Pimlico which abuts upon the river Thames, close to Messrs. Cubitt's great building works, the new Military-Clothing Establishment seems to have sprung up in a night, vice Weedon, retired. A great quadrangle is already completed, and we suspect that, ere long, a large portion of Messrs. Cubitt's dominions will be annexed.

Taking the royal troops, the militia, and our Indian armies, our entire force does not fall far short of 400,000 fighting-men, the clothing and necessaries for the whole of whom have to be issued from this establishment. In the fine room we first entered—100 feet long by 40 broad—our eye fell upon a solid wall running down its entire length, some 14 feet high and 12 feet thick, substantial enough to withstand a heavy battery. This black-brown-looking mass on a narrower inspection we found to be built up in a very workmanlike manner of bluchers and shoes.

"But," said we to the commissariat-officer who obligingly conducted us round the establishment, "how are soldiers fitted?"

"Oh," he replied, "we make half-a-dozen sizes, and they are sure some of them to fit."

It was a simple question, we confess; but it never struck us at the moment that soldiers' feet never dare to be so far out of regulation as to require fitting. And where, thought we, a twelvemonth hence may all these shoes be? Possibly the mass either doing goose step, or the ordinary work of the soldier; possibly splashing through fields of gore or trampling down the dead in some European battle-field.

Leaving the boots to the future, however, we enter another room in the basement, built up with long avenues of bales of jackets, the light at the end of each vista looking like a mere speck. Leading out of this are other apartments devoted to artillery and hussar cloth, great-coats, &c., and an odd room or two filled with hussars' jackets; and then, again, other long galleries full of soldiers' trousers. Then there is the store of soldiers' necessaries. A horse-soldier has no less than eight brushes in his kit,—he ought to be the best brushed individual in Christendom. The infantry-soldier has five, even in these days when pipe-clay is reduced to the minimum. Then there are an infinity of other articles, such as blacking, sponge, button-sticks, &c., which he has to account for at any moment; which is rather hard, seeing that when a man is campaigning—with the enemy perhaps upon him in a night attack—he can't always pack his knapsack as leisurely as a traveller leaving an inn.

Not far from the store of soldiers' necessaries is the button room. It is quite clear that the Horse Guards haven't souls above buttons, otherwise they would simplify this department of the soldier's dress. Every regiment in British pay has its own distinctive button with its own special device; possibly this arrangement is made for the benefit of the Birmingham button trade.

But estimate for us, good reader, the number of buttons in this room, a 100 feet long by 40 wide, and stuffed with buttons as full as it can hold. Here are the silvered ones for the Militia; big-sized page buttons for the Hussars; rich gilt for the Guards, and second best for the Line. If, like the Covenanters of old, they were to fire these buttons for shot, there would be ammunition enough here, we should fancy, for another Crimean war. Each class of button, of course, has its separate debtor and creditor account; so we may imagine what the book-keeping of this department is like.

Up-stairs there are the various rooms for the overlookers and inspectors. Under the present system every bit of cloth received into store is examined by an inspector, who passes the contents of every bale between himself and the light, and in this manner is capable of instantly detecting the least weak place in it. After this inspection it is measured and weighed, and then refolded by machinery, and passed into store. In like manner the articles when made up, and all accoutrements, are closely examined and tested by the scaled pattern. One room of the establishment is devoted to these scaled patterns, which contain complete suits of each regiment in British pay.

There are no less than sixteen different shades of green alone used as facings in the British army, besides an infinity of buffs, browns, yellows, blues, and all the other colours of the rainbow. The manner in which the soldier is fitted is as follows:—

The regimental tailor makes out certain size rolls, as they are termed, in which the different sizes required for the men are set forth. Garments answering to these sizes are forwarded from the Government store, and served out once a year, on the First of April. If they fit, well and good. If not, the regimental tailor is called upon to alter them, a charge of one shilling being allowed for the service, of which the soldier is expected to pay sixpence.

It certainly is a little hard upon the poor soldier, first to make *upon system* a misfit, and then to charge him with correcting the error. "But it's the way we have in the army," according to their professional song. If a soldier joins a regiment in the middle of the year, he gets half-worn clothing, if towards the end of the year, clothes nearly worn out. There must be some little difficulty in hitting the exact amount of shabbiness of the regiment and supplying the new comer with an equable dilapidation. Thus, soldiers serving in Canada, in winter, have fur caps and flannel under-clothing, together with high Canada boots. The black troops again, serving in the West Indies and on the Gold Coast, are clothed in the Zouave dress—Turkish trousers, sandals, and leather leggings, with the red fez and turban cloth. We wish European regiments serving in the West Indies were as sensibly dressed, as they are certainly less capable of bearing the heat than their coloured comrades. The stifling red cloth coat has been abandoned for the summer wear of troops in the East, and a light red serge blouse, fitting into the waist with the belt, has been substituted in its place.

Hitherto Government has contented itself with procuring all its clothing, &c., from contractors; but there are symptoms of its determination to become its own tailor. In one apartment we see women sewing soldiers' jackets with the new sewing-machines, and doing the work ten times quicker, stronger and better than it was done of old by manual labour. The cutting-out is also done by machinery, so that, if necessary, an immense amount of clothing could be turned out at a very short notice. The cloth of the private's coat is as good and bright a scarlet as the sergeant's, and the sergeant's is equal to that of the officer's four or five years ago. The Crimean war came just in time to test and prove the utter worthlessness of the old system of clothing the troops; and a walk through this establishment is sufficient to prove that we have at last a Government department that is working well. The credit of organising this immense establishment is due to Mr. Ramsay, the deputy store-keeper general, who has undoubtedly proved that Government officials are capable of carrying on a vast establishment of this kind as successfully as private enterprise, and we believe far more soundly; so that we predict we shall hear no more in any future war of shoes that come to pieces in a week's wear, or of great coats made of devil's dust, calculated, like sponge, to let in and retain the water.—Abridged from "*Once a Week.*"

GARIBALDI ON THE BRITISH VOLUNTEERS.

The following interesting letter from Garibaldi has appeared in the journal to which it is addressed:

TO THE EDITOR OF THE COURT JOURNAL.

"Fino, Jan. 15.

"DEAR SIR,—I thank you for the confidence you have placed in me by asking my opinion of the English Volunteer armament, and for the sympathy manifested by you for the cause of my country. You make a very correct comparison between English and Italian liberty, and I am, perfectly of your opinion. When the human family has arrived at that point of civilisation to which progress will conduct it, it will not permit one of its members to remain in a state of servitude or degradation. As regards the Volunteer force, I believe that England has done the best thing possible in availing herself of such an armament, and that this wise measure will render her territory impregnable against any foreign invasion. Would that my country could follow the example!

"Above all theory in the art of warfare one practical fact reigns triumphant—'defeat the enemy'—a truth that will always triumph over all theories. The retreat of the most disciplined troops of Austria before the less disciplined Zouaves, proves that a man may be a soldier without wearing a tight tunic or a tight cravat. The shepherds of Paulus Emilius, armed only with daggers, rushing on the Macedonian Phalanx, those terrible conquerors of Asia; the clouds of French Voltigeurs of the Army of the Republic; and, lastly, the Bersaglièri and Zouaves at St. Martino, Magenta, Solferino, and Palestro, prove that masses are not alone useful in battle-fields, and that Volunteers, Bersaglièri, and Zouaves need not learn how to fight in close order, like troops of the line. Discipline is, no doubt, the basis of the organisation of all armaments, and without it war cannot be correctly carried on; but why should not volunteers, who have sworn not to abandon their standards during the danger of their country, have the same discipline as regular corps? Are patriotism and enthusiasm such despicable and heterogeneous sentiments as to destroy regularity in national troops? Certainly they are not despicable, since, in every war, a wise chief derives advantages from them in his harangues and his proclamations; and the First Napoleon, who was master of half Europe, and the best army in the world, was defeated by the patriotism of the English, so-called 'shopkeepers,' of whom he appeared to have no great opinion.

"If Great Britain organises her 200,000 volunteers, who will form the nucleus of a million of armed patriots in case of need; if she continues to train them (and that will not be difficult for the English), so that they become as disciplined as regular troops, we shall then see who will dare to invade the asylum of all, and the protectress of the universe.

"I believe that the theory of great regularity of masses and lines is generally carried too far, and that the open order of battle is too much neglected, as it has become necessary through the perfection of fire-arms and through the obstacles that cultivation has accumulated at every step. If there is a country in Europe that has served for fields of battle, and continues to do so, that country is certainly and unfortunately Italy. How many places are there in Italy where a squadron formed in line, or a regiment in square, could fight? I believe that there are very few. On the other hand, places may be found in all directions which are adapted to the Bersaglièri. In short, I think that several lines of Bersaglièri, sustained by a few masses of troops, would be the most convenient order of battle in our country and in many others; and that volunteers can be adapted for this end to the same kind of manœuvres as the troops of the line.

"I have read the valuable paper by Sir John Burgoyne on volunteers, and, although I do not know enough English, and have not had the time to form a thorough judgment upon it, it seems to me to be the work of an intelligent soldier who has seen many fields of battle. I do not, however, agree with him that 50,000 veterans will defeat 100,000 volunteers, if the latter have the discipline that all troops ought to have, and that they are, as may be imagined, animated by the love of their country. I do not yet know the way in which the English volunteers are organised, but I believe, however, that for volunteers, in all countries, the training of the Bersaglièri is the best. The lightness of their uniform, the open order that forms the basis of their manœuvring, without hindering them from acting in masses when the occasion presents itself, and, above all, the swiftness of their movements, make them the most perfect soldiers I have known. I wish that all the Italian army was composed of Bersaglièri; and I do not doubt that such an organisation would also be easily attainable by English volunteers, English soldiers having obtained the reputation of intrepidity and coolness under fire.

"Honoured by your question, I have replied to you as a friend to a friend; and such, also, should be all Italians with the noble and generous English nation.—Believe me, yours faithfully,

"G. GARIBALDI."

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—No one who has the pleasure of knowing Sir John Burgoyne, the generally reputed author of the paper on "Our Volunteers," in *The Cornhill Magazine*, will deny to that gallant officer the full weight of his opinion upon military matters in general, but his dictum on subjects out of his own profession as a military engineer must be taken as a mere matter of opinion and nothing more.

Let any one consider the small amount of weight which judges and juries in our courts of law give to mere opinions not grounded upon practical experience, and it will be at once perceived that mere opinion is not much relied upon by the best judges of evidence.

The writer in *The Cornhill Magazine* grounds his opinions upon past history, and this is no doubt a very good general rule when the circumstances are similar or nearly similar. But the circumstances of the present day are widely different from the circumstances of former times, and the inferences drawn are therefore by no means legitimate;* nor is the comparison between the soldiers of the Line and the Volunteers in many other respects at all just. The Volunteers are supposed to require considerable practice before they can successfully accomplish long marches, or be able to carry a knapsack. As a set-off against this supposed difficulty of marching, it ought to be considered that the Volunteers have not been so very absurd as to incapacitate themselves from marching, by wrapping themselves up in clothes almost as tight as the ligaments of an Egyptian mummy. They have wisely chosen a loose dress, and when they have to provide themselves with knapsacks, they will no doubt manifest equally good sense in the choice of a useful article, to contain the few things which might be necessary for a campaign in Kent or Sussex, or any of the maritime counties of England.

Opportunities for the practice of marching may easily be obtained without resorting to a camp. The several corps will, by the beginning of summer, be sufficiently advanced in the preliminary stages of drill to make a very good attempt to act at least in battalions. Volunteers do not go about learning their drill in that dogged, sullen manner in which the generality of recruits do. It is their free choice, and they throw their whole mind and energies into it.

It is also said that "no general would know how to deal with numbers of them under his command, for fear of his dispositions being damaged by their proceedings; nor could any commissariat or other department provide for so fluctuating a body." And it is also supposed that "a rainy night or two in the open fields and occasional short supplies of food, would thin their ranks prodigiously." This supposed thinning of the ranks by a "rainy night" can hardly be called fluctuation; at all events not a fluctuation that could materially embarrass the commissariat department, as it would only lessen the number to be fed, and as for a general not knowing what to do with such loose materials as Volunteers, let us hope that a general may be found among themselves who can lead them to victory. May not a Cromwell, a Clive, or a Garibaldi rise up from among our Volunteers to defend our hallowed shores as effectually as the greatest military martinet, or the greatest admirer of the military stock and pipe-clayed belts, in the British army? It is not usual for great minds to quarrel with the minute details of any great operation, where the principle or ground-work is admitted to be sound; the details are easily worked out according to circumstances, if red tape do not interfere.

The people of England will hardly allow their loyal Volunteers to starve of hunger or cold in a campaign on their own soil, when they made such efforts for the soldiers in the Crimea, so soon as the mismanagement of the constituted authorities was made so apparent by the public press—the safeguard of the soldier, as well as of the institutions of the country. Nor would there be wanting "Nightingales" to minister to the wants of the sick and wounded.

It is not too much to suppose that the inmost prayer of every true-hearted Briton is, that the Volunteer movement, however depreciated by some, may prevent the most pugnacious, the most ambitious, the most idealistic, nation on the face of the earth from attempting to plant a hostile foot upon the free soil of our happy isle.

If the decay of a country is heralded by the decay of its patriotism, the Volunteer movement will at least prove that the heart of England is still sound at the core.

A nation of shopkeepers should at all events show that they are determined to keep all robbers out of their shop.

I am, sir, yours, &c., AN OLD SOLDIER.

* Where is the difference in circumstances, *cæteris paribus*, between cause and event in this year and in the year—say A.D. 900? [ED.]

INDIAN PRIZE MONEY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Permit me, with reference to the annexed little matter of prize-money, to ask, through the medium of your popular paper, what has been decided or done for the British troops who during the rebellion in India held the country from Delhi up to Peshawur. How and from where did the army at Delhi receive its supplies, new levies, &c. ? From the Punjaub. All credit is due and given to Sir John Lawrence ; but we must go further into the matter than merely thank that great man. Were not the British troops, Europeans especially, Queen's and Company's as they then were, artillery, infantry, and volunteer cavalry, well and sorely tried for upwards of eighteen months ? What were the difficult duties they had to perform, and how did they discharge them ? Let Sir J. Lawrence and General Cotton speak out and say, as all must admit, had it not been for their steady conduct, the Punjaub would have been in flames, and Delhi would never have fallen. Did Sir J. Lawrence and General Cotton make no promise to the troops of Batta ? But the Governor-General ignored it. Who then will stand the soldier's friend ? None can tell what the British soldier underwent at the period above alluded to, nor can any one tell the disappointed feelings entertained by them more fully than a comrade

WHO SERVED WITH THEM.

MORE ABOUT PRIZE MONEY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In 1817 the Marquis of Hastings being Governor-General and also Commander-in-Chief of all the forces of the King and the Company in India, commenced hostilities against the Pindarrees and several of the Maharatta princes, who were threatening an invasion of the British territories. With a view to a rigorous prosecution of the war, and an effectual co-operation with the other troops engaged in the same service, his lordship took the field in person, at the head of a large force belonging to the Presidency of Bengal, and denominated the Grand Army; but the chief burden of active war fell upon the forces posted in the vicinity of the hostile states. The troops then assembled, and consisted partly of what formed properly the Deccan division, commanded by Sir Thomas Hislop, and supplied from the Madras army, and partly of brigades and detachments supplied from other divisions and belonging to different presidencies. The whole, however, bore the general appellation of the Army of the Deccan, and was under the orders of Sir Thomas Hislop, as Commander-in-Chief. In the following year hostilities terminated in the total defeat and subjugation of the native powers, and a very large quantity of valuable booty fell into the hands of the conquerors, as the fruits of their success. Portions of this booty were acquired by the enterprise of small detachments, who, acting independently of the main army, attacked and plundered individual forts, and in some instances after the camp had been broken up, and open warfare had ceased. Another, and much the largest portion, was captured by the Deccan Army, by whom the principal operations of the war were performed. But the whole booty, from whatever sources derived, and by whomsoever captured, was thrown into one mass, under the name of the Deccan Prize Money, and was admitted to have vested in the Crown by virtue of the prerogative, so as to be disposable at the King's pleasure.

The whole of the Deccan prize-money was claimed by Sir Thomas Hislop and the army under his immediate command, as the actual captors of the booty. But the Privy Council decided that the Bengal army under the Marquis of Hastings as Governor-General and Commander-in-Chief, though at a great distance from the scene of the capture, were, nevertheless, co-operating by their presence in the field, and by keeping native powers in check, who might have impeded the operations of the army commanded by Sir T. Hislop. Evidence was also given of the orders issued by Lord Hastings, indicative of his having assumed the supreme command over Sir T. Hislop and the Madras army ; and on these grounds the Privy Council held, after protracted legal discussions, that the Bengal army were constructive captors, and entitled as such to stand on the same footing as the Deccan army with reference to the booty in question.

PHŒNIX.

VOLUNTEER OPHTHALMIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have read with interest the melancholy case of the Rifle Volunteers who are obliged to retire from the service because they cannot shut one eye without closing the other. In civil life cases of this kind are rare—the rapid closing of one eye on the approach of a pretty servant girl is almost instinctive with the British youth, and the more difficult operation of gazing fixedly on a glass of port-wine, with one eye closed, to induce your friends to believe you are a judge of the article, is performed after very short study by nineteen young men out of twenty. When once these two minor and yet capital operations are familiar, the next step, of squinting down the barrel of a rifle is easy, and the volunteer who refuses to do his rifle drill after learning the preliminary goosesteps should at least have his grog stopped and be punished as a malingerer if ever detected by the fair sex in the act of winking.

Yours obediently, MEDICUS.

THE VOLUNTEER UNIFORM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE

SIR,—Small causes produce great results. If an illustration of this old saying were wanted, it might be found in the change which has come over the Volunteer movement ever since the War Office condescended to meddle with the clothing department. At first the Volunteers and their uniforms were let alone by the gentlemen whose administrative talents are immortalised in the reports of the Weedon Commission. Corps were forming, arming, and accoutreing themselves everywhere, and there was a zeal for enrolment and drilling which was almost too good a thing to last. Hence there is some danger that it will not last long. The War Office interfered, and appointed a Commission to invent and recommend the most proper uniform to be worn by Volunteers. The task must have been a difficult one, to judge from the time the Commission took to accomplish it. All this while the corps, which were not yet in uniform, stopped their proceedings, and waited for the important result. At length it became known that the Commission had completed its labours, that the model uniform had been invented. But, with a touching coyness, the invention was kept under lock and key, and the important secret was communicated only to one military tailor—one of the Weedon martyrs—who made use of his monopoly of knowledge to make and register several of the most important parts of the model suit. When that suit at length was submitted to public inspection, it was found to consist of cloth or serge of such peculiar make that there is at this present time but one manufacturer who is able to produce it in large quantities, and his services are specially retained by the fortunate confidant of the War Office. It is also found that the cloak, the belt, and the buttons are registered by the same lucky individuals, and that in fact rifle corps who wish to adopt the Government suggestion are compelled to employ these monopolists, who are at liberty to make their own terms.—I am, sir, your obedient servant,

A LOOKER-ON.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Every soldier's friend must regret that the many acts of atrocity committed by the abuse of the *belt* have called forth a notice of motion from Mr. Griffith for the discontinuance of the practice of wearing that article by men "off duty," and as I believe that the Army at large will be disgraced by a legislation enactment being recorded to that effect, I trust some officer of experience will suggest by way of amendment some such remedy as the following, which I think would go far to remedy the evil complained of. Let every man charged with having committed an assault with his belt be consigned to the "tender mercy" of his comrades, and made to suffer such punishment as a "Barrack-Room Court-Martial" may award. The infliction of a dozen or two lashes across the posterior—substituting the "Buff" for the "Cats"—would have a better effect than a fine or imprisonment by sentence of a magistrate ; and with the wholesome dread of the degradation suggested, the few ruffians who thus bring the service into bad repute, would soon discontinue so cowardly and unsoldierlike an offence.

By giving this insertion in your valuable paper, you will not only bring the subject of the proposed "motion" to the notice of military men, but very much oblige yours obediently,

OLD PRACTICAL.

1st February, 1860.

P.S.—I forgot to say that in "old times" the Barrack-Room Table made a capital substitute for the triangles.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In several instances during the past year young, active, and intelligent cornets and ensigns (belonging to regiments in India), were selected at the depôts, and sent to Hythe to qualify themselves for the commission of instructor of musketry to their corps, and upon gaining first-class certificates of competency were gazetted, and sent out to India, specially to commence their important duties.

Is it too much to hope that these deserving young officers should obtain their lieutenancy *without purchase*, as soon as they attain the seniority of their present rank, in the same manner as *Adjutants* have hitherto been rewarded ?

I think if this matter is brought to the notice of the proper authority—it would meet with due consideration. I therefore trust you will give it publicity in your widely-extended and excellent paper. I am, &c.,

February 1st, 1860. RIFLER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—"Ecclesia ecclesiam non desecrat," is a good old saying, and may be fairly translated "Guardsman does not eat Guardsman." A fortiori "Guardsman's Ghost does not eat Guardsman." Guardsman's Ghost has, therefore, offended a high rule in trying to devour Colonel Airey, a gallant soldier, of many climates. This letter is written to inform you that "Guardsman's Ghost" is a West-end policeman, so now you will understand why he is so very fond of running down the "Aireys." Your obedient servant, BETTER OFF THAN A PELICAN.

Canterbury, Feb. 2, 1860.

In the last week's naval intelligence there were two paragraphs of a startling and unpleasant nature. We read that the Princess Royal, 91, which was only commissioned in 1856 was suspected to be built of rotten wood, and that the whole of her stern planking had been removed. Next we are informed that the Immortalité, 51, built less than two years ago, in fact, so new that her engines have never been on board, is in dock, in need of repairs. She has some defects in her keel, and her garboard planking is rotten. She is called a fine ship, but we do not quite see how vessels which are built of unsound timber can be considered of any value, though they cost just as much money at the outset as the best ships, and a good deal more afterwards if they are repaired and rebuilt, and "made good as new," having never been old. Surely there is some one to blame, if not to be hanged, for such neglect in examining the timbers. We do not censure in the least the hard-worked and hard-working department of the Surveyor-General. The Great Eastern was an enormous battle-horse of all Government departments, when the report on her defects and fittings appeared ; but, after all, the State has unquestionably a right to expect greater skill and care on the part of her servants than any private individuals. The man who built two ships of unsound wood would probably never build a third ; his customers would leave him, or he would ruin himself.

The authorities at the War Department have given directions for a new and commodious mess-room, with the other requisite buildings, to be erected at Brompton Barracks, Chatham, for the use of the officers of the Royal and Indian Engineers attached to the Royal Engineer establishment, the present building being altogether inadequate for the requirements of that establishment.

A new description of shell for experimental purposes, invented by an officer of the Royal Engineers, is now being constructed at the laboratory department of the Royal Arsenal.

EXHIBITION OF 1862.—We understand that the Council of the Society of Arts are actively engaged in completing the preliminary arrangements for the proposed Great Exhibition of 1862, and that they will shortly be in a position to make a public announcement on the subject. The promises of support and assistance already received from the highest quarters, both at home and abroad, justify the belief that the Exhibition of 1862 will form a grand success, and that it will be a not unworthy descendant of its great progenitor of 1851.

UNITED SERVICE INSTITUTION.—A very interesting lecture was delivered at three o'clock yesterday by Dr. Livesay, F.L.S., being a "Personal Narrative of the Expedition against the Pirates in Borneo in 1849." Another highly-interesting lecture was delivered in the early part of the week "On Improved Tents for the Army," by Mr. G. Turner (of Northfleet, Kent). He described some of his own inventions, which appear to possess many advantages in the way of increased comfort to the men.

THE MILITARY SYSTEM OF THE UNITED STATES.—The army alone costs the United States, within a trifle, as much as the whole civil, foreign, and miscellaneous services of the Union taken together, and that the army and navy combined absorb nearly half of the entire public expenditure, national debt included. This, however, is not the whole of the lesson to be drawn. We must add a word or two by way of illustration to these figures of 1859. In the year 1853 these two services of the army and navy in the United States were performed for the charges respectively of $9,947,290 and $10,891,639, so that in six short years a purely democratic government, isolated from European complications, and enjoying an absolute immunity from foreign attack, has far more than doubled the expenses of its army, and increased those of its navy by about 50 per cent. Indeed, if we include the cost of fortifications, which in our own accounts would be brought into the Military Estimates, the present outlay upon the army of the United States would approach very nearly to $30,000,000, or upwards of *thrice* its charge in 1853. We need say no more to prove what everybody but Mr. Bright and his friends must know already,—that the military establishments of a country are at least as likely to increase under a Republic as under a Monarchy, and that it is pure absurdity to impute all such augmentations to the sordid intrigues of an aristocracy intent only on its own profit.

The Calcutta Mail, which arrived last Saturday, announces the final extinction of the rebel force on the frontier of Nepaul. The Nana appears really to have died of fever, and Azimoolah, his adviser in the Cawnpore massacre, did not survive him many days. The other rebel chiefs have been accounted for, and the only leader of note now remaining is the Begum, who has some 1500 followsrs, but in very bad condition as regards food and arms.

A "Creditor of the London and Eastern Bank" writes to the *Times* to say that the distinguished colonel named above "is residing in a handsome house, No. 3, Rue Balzac, Paris, at a corner of the Rue Lord Byron, formerly the residence of Mr. Lawrence Peel, and situate in one of the most fashionable and healthy *quartiers* of this brilliant city. As I passed the colonel's mansion the other day, I saw through an open window his domestics spreading 'the social board.' This little incident leads me to the conclusion that the ex-lord of Branksea Castle is still in very comfortable, if not affluent, circumstances." The letter is signed "A Creditor of the London and Eastern Bank, living *au quatrienne*, and eating four-franc dinners."

After the late gales a bottle was picked up at St. Jean-de-Monts, containing the following writing :—"June 17, 1859. To whoever finds this bottle. My name is Montagu Ommaney ; I am on board the ship London, in the Bay of Biscay. I am purser of the ship, and I hope to be in the Mediterranean to-morrow at furthest. I must bid you adieu, dearest Anna. Believe me your affectionate Montagu Ommaney." A portmanteau was also picked up at the same place, containing many articles of gold and jewellery, and a set of cards, on which was engraved "Miss Ellen Bopt."

The portion of the port of Tetuan in the hands of the Spaniards have been declared by them free ports, open to all nations.

On Wednesday last, considerable Moorish forces are said to have attacked the right wing of the Spanish encampment, and to have been repulsed with loss. According to the same report the Spaniards returned the same compliment, threw the Moors into disorder, and took their positions.

At a Volunteer meeting the other evening, it was stated that during the apprehended Chartist disturbances in 1848, the Duke of Hamilton was sworn in a special constable between a footman and a chimney-sweep.

Caduceus, hired transport, is daily expected to arrive at Spithead from Hong Kong, with military and naval invalids. Immediately on her arrival an inquiry will be held on board by the military authorities relative to the death of two soldiers, which occurred on the voyage between Hong Kong and Singapore.

The marriage of Lord Charles Bruce of the 1st Life Guards, youngest son of the late Marquis of Ailesbury, with Miss Augusta Seymour, daughter of Lady Augusta Seymour, and sister of the Countess Spencer, was solemnised on Thursday at St. James's Church, Piccadilly.

In the Divorce Court last week Mrs. Boynton sued for a divorce against her husband, Mr. Boynton, who was formerly in the 11th Hussars, and more recently in the 17th Lancers, on the grounds of cruelty and adultery. Mr. Boynton strongly denied the former; but the Court granted the divorce. The parties were married in 1849, Mr. Boynton having eloped with Mrs. Boynton, who had a considerable fortune, a portion of which was settled on herself. A curious episode in the trial was a statement that John Scott, the celebrated trainer, had been introduced to Mrs. Boynton, which John Scott denies, and Mr. Boynton's solicitors say it was another trainer that was meant.

Colonel Colt has invented a revolving shot gun. It is said that upon a late trial of this valuable gun, at a distance of 30 yards, it put 175 pellets in a circle of 12 inches diameter, penetrating 75 sheets of ordinary brown paper ; the shot used being No. 6 shot, 1¼ ounces and two drachms of powder to each charge. The gun is a five-shooter.—*New York Tribune.*

FRENCH NAVY.

The squadron of evolution was lying ready for sea at Toulon on 27th January, but Vice-Admiral le Barbier de Tinan had not yet assumed command. The correspondent of the *Moniteur de la Flotte* says that the Imperial marine may be considered as on a peace footing, except that the Chinese expeditionary vessels and three frigates, which are kept armed "in case of a return of the troops from Italy," are in port.

Captain Chou and Pilot Picard were tried at Brest on Tuesday by a special council of war, at Brest, for the loss of the "Dugueslin." The captain was defended by a brother captain, and the pilot by a barrister of Brest. The former was acquitted; the pilot, found guilty of carelessness, was sentenced to two years' imprisonment.

Although the whole of the French expeditionary force may be said to have sailed for China, the new gunboats will not be ready at Toulon till the end of February. They will be taken to pieces and packed on board large transports—the largest of which will take four gun-boats on board, the smaller one or two, and it is calculated they will reach the Chinese waters by the end of July.

The Descartes, Vauban, and Gomer, are preparing to leave Toulon for Algeria, to bring back the regiments which have completed their time of African service.

The regiments in garrison in Corsica are also to be relieved. The Prony, on the Leghorn station, is recalled, and Captain Chaigneau, commanding the marine at Genoa, is ordered to return to France.

The division of the squadron of evolution under Rear Admiral Jehenné is still lying at Algesiras.

Experiments have been lately tried at Vincennes with a cannon on a new model, for the French Naval service, which is stated to be very successful.

A letter in the *Débats*, from Florence (Jan. 3), states that Lord Cardigan had inspected carefully the troops in Bologna, which is General Fanti's head-quarters. The division in garrison there counts 20,000 men of all arms; and the British Inspector-General of Cavalry has loudly expressed his utter astonishment at the condition of drill and efficiency he witnessed, as well as the soldierly bearing of the men.

We are happy to notice the public spirit shown by the Peninsular and Oriental and the Royal Mail Steam-Packet Companies respectively, in their co-operation with the Admiralty authorities in aiding the Naval Volunteer movement. Regulations have been made by which every facility and encouragement are given to the men in these two noble fleets to enrol themselves for service and training under the Admiralty regulations. A ship of war will be stationed at Southampton for the purpose of training and gunnery.

We are glad to find that the spirit of national defence has extended to the West Indies. Recent accounts from Barbadoes state that the volunteer movement in that colony had assumed a consolidated form, and the different branches —the Artillery Brigade, the Rifles, and the Yeomanry Cavalry —were all progressing satisfactorily.

The hired steam-transport, Khersonese, laden with war stores for China, has left Greenhithe for her destination. The steam-transport, Britannia, the Mantura, the Leo, and the Agnes, have been chartered by the War Department to ship stores from the Military Store-Offices, Woolwich.

LAND AT OXFORD.—The Conservative Land Society has just acquired its fortieth estate, and made its first purchase in Oxfordshire. The property is called Fair Acres, and forms the south-east point of the New Cowley district, which it is proposed to bring within the jurisdiction of the Commissioners under the Oxford Improvement Act. The land has a frontage on the Henley or London road, and the views from all sides are very picturesque, rendering the estate admirably adapted for building purposes. It is just under a mile from the city, and close to the suburb of St. Clements. It is the highest land in the whole district, rising from the valley of the Thames.

ARMY AND NAVY PENSIONERS' EMPLOYMENT SOCIETY.—This institution, established in 1855, although it contained the elements of great utility, and had met with a large amount of support from the public, was nevertheless in debt to a considerable amount, and its existence imperilled. In the summer of the past year this state of affairs became known to one of the original subscribers, who expressed his belief that the Society might be re-organised if constituted on a different basis. Under these circumstances the former committee, anxious to carry out the original object of the society, but unable many of them to give the necessary attention to its business, offered to resign whenever efficient successors were found. After a lapse of a few months the general plan of management was settled, and the officers at present constituting the committee agreed to act provisionally till a general meeting of subscribers could be called. There can be no doubt that if, through the means of the Society, every soldier leaving the service with a good character is enabled to procure a situation, a very great benefit will be conferred both on the man himself and the country at large. Nothing would tend more to raise the character of the Army and increase its popularity amongst the class from whom it is recruited, than a certainty that when the soldier's service was finished, a good employment was secured him.

THE BELGIAN EXPEDITION TO CHINA.—We lately hinted that Belgium intended sending an expedition to China, with a view to establish commercial relations there. A pamphlet has now appeared on the subject in which that view is ventilated. The semi-official tone of the pamphlet betrays high patronage. It proposes that the Belgian expeditionary force should be placed under the orders of the commander-in-chief of the Anglo-French forces. Having taken part in the war, Belgium would be entitled to a share of the same advantages that might accrue to the English and French in the war-indemnity imposed upon the Chinese, and one of the islands at the mouth of the Yang-tze-Kiang ought to be given to Belgium for establishing a colony. The Belgian writer settles the whole affair as if the campaign was already terminated in the most amusing manner.

Obituary.

General Sir Thomas Makdougall Brisbane, Bart., G.C.B., G.C.H., distinguished as a soldier and an astronomer, died at his seat near Largs, on Friday last, full of years and honours. Sir Thomas was born in the same house in which he died, on the 23rd of July, 1773, and was thus in his 87th year. His ancestors were the Brisbanes of Bishopton, who held during the 14th century a large tract of land on the Clyde, extending from Erskine Ferry to Largs. One of his ancestors, William Brisbane, according to Hailes, "held the office of Chancellor of the Kingdom of Scotland in 1332." Sir Thomas entered the army as an ensign in the 38th Regiment, in 1789, and was at his death one of the oldest officers in the service, having held his comission for the long period of 71 years. In 1790 he joined the 38th in Ireland, where he formed an intimate acquaintance with the future Duke of Wellington, then a lieutenant in a regiment of cavalry. Both of the young heroes were at this period distinguished only for their mutual love of field sports. When the war broke out, in 1793, Sir Thomas raised an independent company in Glasgow, and joined the 53rd, then quartered at Edinburgh. The 53rd formed part of the army of the Duke of York, and young Captain Brisbane, then in his twentieth year, took part in all the affairs of the Flanders campaign, from St. Amand to Nimeguen. At the engagement of Lille he lost in killed and wounded no fewer than 22 men out of the 33 composing his company, he also being wounded. In 1796 he went to the West Indies, and was present at the taking of the islands under Sir Ralph Abercromby. During this campaign he was ordered to attack a fort deemed almost impregnable. On his march up he was met by a brother officer, who remarked, "It cannot be taken," when he gallantly replied. "It can; I have the order in my pocket," and he and his men took it. His health having suffered from the climate, his friends purchased for him the lieut.-colonelcy of the 69th regiment, which had recently returned from these islands, and was not likely to return soon. On Sir Thomas's arrival in England in 1799 he found that the 69th had been sent back to the West Indies shortly after its return home. Having recruited his health he joined his regiment in Jamaica, where he served until it was recalled in 1802. When the 69th was ordered to India, Sir Thomas retired on half-pay, as another campaign in a hot climate would have been dangerous. In 1810 he was appointed Assistant-Adjutant-General to the staff at Canterbury, which he held until he obtained the command of a brigade under the Duke of Wellington, whom he joined at Coimbra, in 1812. At Vittoria, King Joseph's carriages, plate, and wines fell into the hands of Sir Thomas's brigade, as well as the money-boxes, which enabled him to divide five dollars to every soldier of the brigade. At the battle of the Nive, Sir Thomas highly distinguished himself, though the two brigades under his command had 700 killed and wounded. For his bravery in this action he received the thanks of Parliament. During this campaign he was present also at Orthes and Toulouse. After the abdication of Napoleon, Sir Thomas was sent to North America, in command of a brigade. At the unfortunate affair on Lake Champignon he was ordered to cover the retreat, which he accomplished without loss by the destruction of the bridge across the Dead Creek. On Napoleon's escape from Elba, in 1815, the brigade which Sir Thomas commanded was recalled, and he arrived off the coast of France with his twelve regiments just as Waterloo was won. When he reached Paris, Wellington directed him to draw up his brigade in two lines of 5000 men each, and when his grace looked down the lines he exclaimed, "Had I had these men at Waterloo I should not have wanted the assistance of Prussians." He continued in France with the Army of Occupation until 1818, when he was appointed to the command of the southern district of Ireland. In 1819 Sir Thomas married Anna Maria, heiress of Sir H. Hay Makdougall of Makerstoun, who survives him. The fruit of this maraiage was two sons and two daughters, all of whom pre-deceased their honoured father. In 1821, Sir Thomas was, on the recommendation of the Duke of Wellington, appointed Governor of New South Wales, the arduous duties of which he administered during four years. This appointment was alike honourable to the duke and Sir Thomas. The latter used to tell that, while the two heroes were walking arm-in-arm one day in Paris, Sir Thomas remarked that he would gladly accept the governorship of New South Wales, as he was tired of inaction. The duke remarked he would write to Lord Bathurst, the Colonial Secretary, on the subject. Not many days after, the duke meeting him, with a hearty laugh, said—"Do you know, Sir Thomas, what Lord Bathurst writes me this morning? That he wants one that will govern not the heavens, but the earth in New South Wales." Sir Thomas replied warmly—"Your Grace can testify, all the years during which I have had the honour to serve under you in the Peninsula, whether I have ever suffered my scientific predilection to interfere with my military duties?" "Certainly not, certainly not," replied the great captain; "I shall write his lordship that, on the contrary, you were never in one instance absent or late, morning, noon, or night, and that in addition you kept the time of the army." At his residence at Paramatta he established a large observatory, furnished with the best and most expensive instruments which art could produce. Some idea may be formed of the labours which, besides his duties as governor, he voluntarily undertook, when it is stated that he fixed the positions and catalogued 7385 stars hitherto scarcely known to astronomers. For this magnificent work, "The Brisbane Catalogue of Stars," he received the Copley medal, awarded by the Royal Society. On his return from Australia he resided chiefly at Makerstoun, where he established an astronomical observatory, surpassing any other in Scotland at the time. On the death of Sir Walter Scott, Sir Thomas was elected President of the Royal Society, Edinburgh, to which he contributed many valuable papers. He has founded two gold medals as rewards for scientific merit—one for the Royal Society and the other for the Society of Arts. During the latter years of his life he has mostly resided on his patrimonial estate at Brisbane, devoting his whole time to science and philanthropy.

Mr. Thomas Alexander, Director-General of the Army Medical Department, died at 7 A.M. on Wednesday, from gout in the stomach, to the deep regret of a large circle of friends. Although he was only 47 years of age, Mr. Alexander had seen much active service. He served with the 60th Rifles in the Kaffir War of 1851-53, and was the principal medical officer of the expedition across the Kei in 1851. He accompanied the first troops of the Eastern army to Gallipoli as principal medical officer, and was in medical charge of the Light Division of the Eastern Army from its first taking the field throughout the campaign of 1854-55, and was present at the affair of Bulganac, the battles of the Alma and Inkerman, the capture of Balaklava and siege of Sebastopol, and sortie of 26th of October, never being one day absent from duty. The deceased gentleman was the principal medical officer of the Kertch expedition, under General Sir George Brown, G.C.B. In Lord Raglan's dispatch of the battle of Inkerman he was honourably mentioned "for his able exertions" in the exercise of his professional duties. On the Royal commission being appointed to inquire into the sanitary state of the army, Mr. Alexander was selected as one of the commissioners. On the resignation of Dr. Andrew Smith as director-general, in June, 1858, Mr. Alexander was selected by the Secretary of State for War to fill that important post in the army. In recognition of his services with the army in the East, he was, in 1856, made a Companion of the Order of the Bath, and in August last year was made an honorary surgeon to Her Majesty. His commission bore date as follows:—Assistant-surgeon, Oct. 10, 1834; brevet-surgeon, May 30, 1845; staff-surgeon, March 3, 1854; deputy inspector-general, Jan. 12, 1855; and director-general and inspector of hospitals, June 22, 1858. His loss will be severely felt by his department and by the medical officers of the army, whose rights he maintained and whose position he advanced by the most unflinching advocacy. In nerve, skill, and courage he was one of the first operators in the world; but so far from wishing to exhibit his immense ability as a surgeon, he sought on every occasion to advance what is called conservative surgery.

We have to record with much regret the death of Lieut.-Colonel Charles R. Butler, late of the 20th Regiment, at the residence of his mother, 23, Upper Pembroke Street, Dublin. Lieut.-Colonel Butler, was the second son of the late James Butler, of Broomville, Carlow. He served in the Eastern campaign of 1854-55 with the 20th Regiment, including the battles of Alma, Balaklava, and Inkerman, at the latter of which he was severely wounded. He was present at the sortie of the 23rd of March, and was mentioned in Lord Raglan's despatches, and received the brevet rank of major, after the affair of the 18th of June, where the small force under his command repulsed the Russians in a night attack. He acted as aide-de-camp to Brigadier-General Horn from 15th August, 1855, to the end of the war. He received a medal and four clasps, Knight of the Legion of Honour, and 5th class of the Medjidee. Served in the Indian campaign of 1857-58, and was present at the actions of Chanda, Umeerpore, and Suttonpore, and at the siege and capture of Lucknow (mentioned in despatches). During the absence of Brigadier Eversleigh on particular service, in November, 1858, he commanded the whole of the forces on the Cawnpore Road, employed in protecting commissariat stores, keeping open the communication between Cawnpore and Lucknow, and watching the movements of the rebels under Benee Madoo. He commanded the 20th Regiment from the 1st October, 1858, to the end of the campaign. Harassing marches, exposure to weather, &c., destroyed a constitution previously unimpaired, and compelled him to return to his native land, where he lingered a few months, when he sank into a premature grave at the age of 37.

Vice-Admiral Philip Browne died at his residence at Parkstone, near Poole, on the 25th ult., in the 84th year of his age. The deceased was born Sept. 16, 1772, and entered the Navy in 1782, on board the Ruby, 64. He afterwards served many years in the Channel, North Sea, and East Indies, when he joined the Minerva, 38, and assisted at the reduction of Pondicherry, and was employed in her boats cutting out a vessel from under the fire of the batteries of that place. He again served in the East Indies and North Sea, and while in the Channel beheld the capture of a large Swedish convoy, and then proceeded to the West Indies. While afterwards commanding the hired armed-cutter Swan, gun-brig Vixen, Plover sloop, and Hermes frigate, he captured numerous smugglers and 11 privateers, mounting 138 guns, and manned with 868 men. In 1809 he co-operated with the Spanish patriots, and was afterwards at the reduction of Flushing, for which latter service he was officially mentioned and twice gazetted. He obtained flag-rank Nov. 9, 1846, and became vice-admiral (reserved) April 15, 1854.

We are sorry to learn, by a letter from the Cape, that Colonel Rose, of the Royal Engineers, was drowned at Algoa Bay on the 27th of November. A letter from an officer describes this sad occurrence, thus: "I had arranged with Colonel Rose, of the Royal Engineers, to proceed in a whale-boat from the steamer to the shore, but having charge of a deserter and a few soldiers, I directed the boatman to return after landing Colonel Rose and five other passengers. The party proceeded very quietly and smoothly through the bay, but unfortunately the surf was at the time very high, and the boat, though steered by one of the best men, was upset and the whole party thrown out. There was a general rush from the shore, and though poor Colonel Rose was only about four minutes in the water, he was brought out a corpse. Three others were insensible for some time—about a quarter of an hour—but all recovered. Colonel Rose had served forty-four years in the army, and was out here before about thirty years ago, within my time."

It is intended to erect a monument in the hall of the County Limerick Court-House to the memory of the late General Sir Richard Rourke.

[ADVERTISEMENT.]—MAPPINS' DRESSING CASES AND DRESSING BAGS.—Mappin Brothers guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. V. R.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.—HER MAJESTY'S GOVERNMENT having, with the sanction of Parliament, determined on establishing a Reserve Volunteer Force of Seamen trained to the Use of Arms:

THIS IS TO GIVE NOTICE,

That any Seaman possessing the following qualifications may be inrolled as a Royal Naval Volunteer in the Reserve Force, and will thereupon be entitled to the advantages and be subject to the obligations mentioned below:—

QUALIFICATIONS FOR THE RESERVE.

1. A Volunteer must be a British subject:
2. He must be free from infirmity:
3. He must not be over thirty-five years of age:
4. He must within the ten years previous to his joining the Reserve have been five years at sea, one year of that time as an A.B.

ADVANTAGES OF THE RESERVE.

1. A Volunteer will at once receive an annual payment or retainer of 6*l.*, payable quarterly:
2. He will, if he fulfils his obligations and is in the Reserve the requisite time, receive a pension of not less than 12*l.* a year whenever he becomes incapacitated from earning a livelihood, or at sixty years of age if not previously incapacitated:
3. He may elect either to take the whole pension himself, or to take a smaller pension for himself during his life, and to allow his wife a pension after his death, for the remainder of her life:
4. He will not, on account of belonging to the Reserve, forfeit any interest in any Friendly or Benefit Society:
5. His travelling expenses, to and from the place of drill will, when necessary, be provided:
6. He will, during drill, receive, in addition to the retaining fee, the same pay, victualling, and allowances as a seaman of the fleet, according to his rating:
7. He will, if called out on actual service, receive the same pay, allowances, and victuals, and have the same prospect of promotion and prize money, as a continuous service seaman of the fleet, according to his rating, and he will on joining receive the same clothing, bedding, and mess traps:
8. He will, if wounded or injured in actual service, receive the same pension as a seaman in the Navy of the same rating:
9. He will be eligible to the Coast Guard Service and Greenwich Hospital:
10. He may quit the Reserve, if not at the time called out for actual service, at the end of every five years; he may also quit it, when not called out, on paying back the retainers he has received; or, without payment, if he passes an examination as a Master or Mate, and obtains bonâ fide employment as Master or Mate.

OBLIGATIONS OF THE RESERVE.

1. A Volunteer must attend drill for twenty-eight days each year; he may do so, so far as the convenience of the public service will permit, at a time and place convenient to himself; but he cannot in any case take less than seven days' drill at any one time:
2. He must not, without special permission, proceed on a voyage that will occupy more than six months:
3. He must appear before some Shipping Master once in every six months, unless he has leave to be abroad longer, and he must report every change of residence, and employment:
4. In order to earn a Pension he must continue in the Reserve as long as he is physically competent to serve, and he must also have been in the force fifteen years if engaged above thirty, or twenty years if engaged under thirty. In reckoning this time actual service in the fleet will count double:
5. Volunteers may be called upon for actual service in the Navy by Royal Proclamation. It is intended to exercise this power only when an emergency requires a sudden increase in the Naval Force of the country:
6. A Volunteer may in the first instance be called out for three years. If there is then actual war, and he is then serving in one of Her Majesty's ships, he may be required to serve for two years longer; but for the additional two years he will receive 2*d.* a day additional pay:
7. Volunteers when on drill or actual service will be subject to Naval Discipline:
8. A Volunteer who fails to fulfil the obligations of the Reserve will forfeit his claim to Retainer and Pension, and if he fails to join when called out for actual service may be treated as a Straggler or Deserter from the Navy.

The Inrolment commenced on 1st January, 1860.

Full Information and detailed conditions may be obtained on application to the Shipping Master at any Port in the United Kingdom, or to the Officers of Customs in the Channel Islands and Isle of Man.

V. R.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.

LEAVE FOR LONG VOYAGES.

Special Leave for Voyages exceeding Six Months will be granted to ALL VOLUNTEERS on the following Conditions:—

1. The Leave is to be for one ship, and for one voyage only at a time, and to be renewed for each voyage. The ports or countries at which the ship is to touch must be all specified, or if any of these are not specified the voyage must be limited by the articles to twelve months.
2. The Volunteer must have completed his twenty-eight days' drill for the year before the Leave will be given.
3. On an emergency the Reserve may be called out for service at home or *abroad*. If the Volunteer is then abroad, he must, if summoned, join any of H. M. ships abroad; under the same penalties, in case of refusal, as in case of refusal to join in the United Kingdom.
4. The arrears of retainer due will be paid on the Volunteer's return in the ship for which Leave is given.
5. The Admiralty reserve power to withhold this Leave if at any time on an emergency the Volunteers are required for the defence of the country. They also reserve power to withhold the Leave at the end of each Volunteer's first five years of service, when he may, if he pleases, quit the force.
6. Subject to these reservations, it is the intention of the Admiralty to grant Leave upon the above conditions for the first five years of the service of each Volunteer who joins the Reserve under the present Regulations.

AGE OF ADMISSION. During the year 1860 the age of admission will be extended from 35 to 40.

*** *For further Information apply to a Shipping Master.*

Board of Trade,
Whitehall, S.W., 12th December, 1859.

BRIALMONT & GLEIG'S LIFE OF WELLINGTON.

In 4 vols. 8vo. with Maps, Plans, and Portraits, 54s.

HISTORY OF THE LIFE OF ARTHUR DUKE OF WELLINGTON: The Military Memoirs from the French of Captain BRIALMONT, with Additions and Emendations; the Political and Social Life by the Rev. G. R. GLEIG, M.A., Chaplain-General to the Forces and Prebendary of St. Paul's.

"MR. GLEIG'S narrative is rich in anecdote, and presents important explanations on many points still in dispute with reference to the Duke's actions and sentiments. Indeed, his home career is that which Mr. Gleig depicts most elaborately. These volumes contain a full review of the Duke's history as a civil administrator, a legislator, and the member of a great political party. We see him in Parliament, in the Cabinet, and in Cabal drawing-rooms; but we also visit him at Apsley House, at Strathfieldsaye, at Walmer, where he is dining, or sipping coffee, or sitting to a portrait painter, for Mr. Gleig is full of personal reminiscences; and though he all but worships his patron's memory, his comments are generally sober and subdued. He had ample materials to begin with. The present Duke of Wellington placed the whole of his father's papers at Mr. Gleig's disposal; Lord John Russell opened to him the despatches at the State Paper Office; then, his own recollections were extensive and minute; moreover, many friends were ready with their contributions. Thus, that which promised at first to be no more than an annotated translation of a French biography, turns out to be the best book that has been written about the Conqueror of Waterloo."—*Athenæum*, Jan. 21.

THE WORKS OF SHAKESPEARE. The Text revised by the Rev. ALEXANDER DYCE.

*** In this Edition the Notes are placed at the end each play.

"A minute examination has satisfied us that this is the best text of Shakespeare which has yet been given to the world. . . . . This at least is beyond doubt, that we have never possessed so admirable a text of Shakespeare before; and we would suggest to the thousands of people who are always inquiring for something interesting to read, that they should read again the works of the monarch of literature, and read him in the edition of Mr. Dyce."—*Quarterly Review*, January, 1859.

London: EDWARD MOXON & Co., 44, Dover Street, W.

NEW FIRST-CLASS NEWSPAPER FOR THE COLONIES.

"THE ENGLISH MAIL," a Newspaper specially prepared for Circulation throughout Australia and New Zealand. Published in time for despatch by the Mails which leave England (*via* Marseilles) for Australia on the 18th of every month.

The want of a well-edited and first-class newspaper for the Australian colonies—one which shall give the news of the month, Domestic, Commercial, and Foreign, easily arranged in the order of its significance and occurrence, and clearly condensed for its ready perusal by colonists eager to know what is going on at home—has led to the starting of *The English Mail*.

To the Australian colonists *The English Mail* cannot fail to be of the greatest service. It claims to be their "reporter," as it were, to note and impartially record all events of public interest relating to Australia, occurring in this country. Special reports of Meetings of Banks, Mining and Insurance Companies, Postal Communication, Mail Arrivals, &c., will find a place in its columns; and it enjoys the advantage of an exclusive connection with the "General Association for the Australian Colonies," established at the Australian and New Zealand Rooms, Jerusalem Coffee House, Cornhill.

Although *The English Mail* is specially intended for Australian circulation, yet owing to the general character and perfect arrangement of its Miscellaneous News, it has found readers elsewhere—in India, China, Canada, and the Cape of Good Hope, and even at home—and it may fairly be considered as *the English Newspaper Abroad*.

Arrangements have been made to ensure an ample distribution of the paper throughout the various townships in each of the Colonies, as well as at home; and with the assurance of an extensive circulation, it is confidently recommended as a most valuable medium for Advertisements, *Home and Colonial*. Price 8d. (or sent to Australia *viâ* Marseilles, 3d. extra).

Subscribers' Names for copies of *The English Mail* intended for transmission to Australia, must be sent not later than the day previous to publication; and must be accompanied by Postage Stamps for the full price of the paper (either with or without postage).

Advertisements will be received up to the evening of the 17th of each month. The charge for six lines is 3s. 6d.; 6d. a line after.

ROYAL MILITARY ACADEMY, WOOLWICH, S.E.

At the late Competitive Examination for admission to the Royal Military Academy, Woolwich, the following successful Candidates passed *directly*, and on *first trial*, from Mr. R. B. DE BURGH'S Military Classes:

Mr. William J. Galway. | Mr. Robert Levisay.
Mr. Jeffery L. Morgan. | Mr. Carlile Greer.

Mr. W. J. Galway obtained 4432 Marks and Tenth Place; and Mr. J. L. Morgan 4108 Marks, and Fourteenth Place,—the number of Competitors being 120.

All the Candidates directly from Mr. De Burgh's Establishment were successful, and those who passed from the Dublin University had been under his tuition.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—At the late Competitive Examination, held on the 4th ult., and following days,

Mr. Henry Hardinge obtained the SECOND PLACE, being the only Candidate directly from Mr. De Burgh's.

ROYAL MILITARY COLLEGE, SANDHURST.—At the late Examination, held in December last, Mr. O'Neil Power obtained the Tenth Place, being the only Candidate directly from Mr. De Burgh's.

DIRECT COMMISSIONS IN THE ARMY.—At the late Examination, held on the 21st of November last, and following days,

Mr. K. Westropp, 80th Regiment; and Mr. H. Kyle, passed directly from Mr. De Burgh's.

Mr. DE BURGH is assisted by eminent Masters in Classics, French, German, Geometrical Drawing, and Landscape Drawing.

Mr. DE BURGH'S references to the Parents of present and former Pupils include the following:—

Right Hon. and Rev. the Lord Bishop of Meath; the Right Hon. Joseph Napier; Very Rev. Archdeacon Stopford; Colonel Lake, R.E., C.B., Dublin Castle; Col. Knox, J. P., Brittus Castle, Thurles; Col. Morgan, R. A., Swansea.

19, Trinity College, Dublin, February 2nd, 1860.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.

—This Establishment, exclusively military, prepares candidates for the Examinations of the Staff College, Woolwich, Direct Commissions, Sandhurst, and Addiscombe. At three Competitive Examinations for the Staff College, twice the first officers on the list had read at this Establishment.

Apply to Captain LENDY, Sunbury, S.W.

ROYAL NAVAL ESTABLISHMENT,

EASTERN PARADE, SOUTHSEA.

CONDUCTED BY Mr. THOMAS EASTMAN, R.N.

MR. EASTMAN offers advantages which cannot be obtained in Establishments for general education, since he receives Naval Pupils only, whom he instructs in the courses exactly required.

Pupils are taught Steam and Rigging, the latter from a model of a line-of-battle-ship, 24 feet in length.

346 Gentlemen have passed as Naval Cadets, and upwards of 250 as Marine Cadets, &c.

Eastern Parade is situate a few yards from the beach and Southsea Castle, commanding close and uninterrupted views of the Channel, the Isle of Wight, and Spithead.

☞ A seaman rigger is attached to the Establishment.

NAVAL CADETS.

Reduction of Examination and Age. New Regulations for Entry into Her Majesty's Service.

MESSRS. GALT & CO., Portsmouth, will be glad to forward, on application, the New Admiralty Regulations and other information necessary for passing the R.N. College.

Outfitters by appointment to H.S.H. the Prince of Leiningen.

NAVAL AND MILITARY CADETS.

THE REV. J. W. INMAN, M.A., late Fellow of St. John's College, Cambridge, receives into his house PUPILS to prepare for the Naval and Military Services, and for the Public Examinations.

Mr. INMAN is Proprietor and Editor of the late Dr. Inman's Works, "Inman's Navigation and Nautical Astronomy," "Inman's Nautical Tables."

For terms apply at 2, Gloucester Terrace, Southsea.

NAVAL CADETS.

OF THE 50 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, on the 13th December, SIXTEEN were from the Establishment at NORTH GROVE HOUSE, Southsea, viz., Messrs. Moysey, Dicken, Eyres, Mandeville, Clark, Gataker, Stevenson, Lang, English, Tyler, Greenway, Ranking, Wood, Burt, Brereton, Wallace. 11 Cadets passed from the Establishment in September, and 11 others last June.

N.B. Twenty candidates out of seventy were rejected in December, 1859.

W. JOHNSON, Naval Instructor; W. BELL, Chaplain; J. A. BURROW, Chaplain and Naval Instructor.

SOUTHLANDS, BATTERSEA.

Woolwich and Addiscombe Competitive Examinations.

MR. SHERRAT has at present several Vacancies. Reference permitted to the friends of Pupils who were successful at the recent Examinations. At that for Addiscombe a Pupil of Mr. SHERRAT'S was first.

PAYMASTERS IN THE ARMY.—Gentlemen can be INSTRUCTED in the duties devolving upon the above-mentioned offices by a practically qualified Instructor. Address P. P., 27, Manchester Terrace, Liverpool Road, N. N.B. Recent appointments were made subject to a report on probation.

VOLUNTEER CAVALRY.—A SQUADRON OF MOUNTED RIFLEMEN is now being formed in connection with the 1st Surrey Rifle Battalion, under the direction of Major BOUCHER (formerly of the 5th Dragoon Guards), Commandant of the 1st Division of the Volunteer Force of the County of Surrey.

Gentlemen who may wish to join are invited to send in their names to the MAJOR-COMMANDANT, Head-Quarters, Hanover Park, Peckham, S.E.; or to WALTER MELLER, Esq., Broadlands, Clapham Common, S.; THOMAS GREEN, Esq., Dulwich Common, S.; JOSEPH DAW, jun., Esq., Pembury Place, Camberwell Grove, S.

RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

*** "COLT'S Pistol is the best repeating arm that we have."—CHARLES LANCASTER, before Government Small Arms Committee.

CAUTION.—Notice is hereby given, that certain FOREIGN FABRICANTS of REVOLVERS, attending more to cheapness of manufacture than to quality, and the rage of under-selling each other, have thereby deteriorated the article; the importation and sale of all such made rifles, carbines, revolvers, &c., bearing the patentee's trade marks and others, stamped "Colt Breveté," "Colt's Patent," &c., is illegal and forbidden. Beware of mongrel imitations and patent infringements. The genuine Pistols are stamped on the barrel, "Address, Col. Colt, London," and bear the British proof mark on the barrel and cylinder between each nipple; and can be had, in any quantity, on favourable terms, of the patentee and manufacturer,

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

CAPTAIN NORTON'S GOSSAMER CARTRIDGES are found superior for use, in either breech or muzzle-loading guns, also for the Enfield rifle. Can be had at LEETCH'S Patent Gun Factory, 29, Great Portland Street, Regent Street, London, W.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.

Apply to B. DE LA COUR, 327, High Street, Chatham.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.

11, Strand, opposite Trafalgar Square, W.C.

MILITARY DECORATIONS, WAR MEDALS, &c.

ORDER OF THE BATH, LEGION D'HONNEUR, and the MEDJIDIE, in all the different Classes and Sizes.

LIMBIRD'S, 344, Strand, W.C.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especially for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. CARR, Chemist, 171, High Holborn, London, W.C., in bottles, 1*s.* each.

TEETH REPLACED, DECAYED TEETH RESTORED.—Mr. A. ESKELL, Surgeon Dentist, supplies patented Incorrodible Teeth without extracting Teeth or stumps, on his never-failing and painless principle of Self-adhesion; rendering detection impossible. Articulation and mastication guaranteed. Decayed Teeth rendered insensible to pain, and stopped with his Osteoplastic Enamel—of the same colour as the Teeth, permanently useful, and lasting unchanged for years, (a most important discovery in Dental Science!) Loose Teeth fastened, &c. Hours, Ten to Six. Consultation free. Charges strictly moderate. 314, Regent Street (opposite the Polytechnic), W., and Bennett's Hill, Birmingham.

THE GUINEA COAL COMPANY'S WALLSEND COALS, One Guinea per ton "All the Year Round."—Address, HORATIO MORGAN, 17, Wellington Street North, Strand, W.C. (next door to the Office of this Paper).

GLYCERINE SOAP, unscented, natural colour, in 1*s.* packets, the pleasantest and best soap for the skin. Price's non-guttering bed-room candles, in boxes 1*s.* and 3*s.* Candlesticks, 1*s.* and 2*s.* 6*d.*

PRICE'S Patent Candle Company (Limited), London.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle*, *Cottage Gardener*, and *Field*. In boxes, 1*s.*, 3*s.*, 10*s.* 6*d.*, retail of all Nursery and Seedsmen. Wholesale of PRICE'S Patent Candle Company, Limited.

GAY & SONS' DRESSING-CASES are the best and most reasonable.

113, High Holborn, W.C. Established 1820.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 10, Wellington Street North, Strand, in the county of Middlesex.—SATURDAY, February 4, 1860.

THERE is no use in trying to conceal the fact which is suspected by, if not known, to every one who takes an interest in the subject: the scheme for the Naval Reserve is a complete failure. We would call it a lamentable result if much money had been spent upon the experiment, or if the question which the Admiralty sought to solve by it were now proved insoluble. It is at all events mortifying to those who expected considerable success; it is certainly distressing to those who consider that the Admiralty must be well acquainted with the feelings of English sailors. All the sages of the Board sat in deliberation when they proposed to catch their Reserve, and each added to the bait some ingredient which he hoped would be infallible and irresistibly tempting. The wind was in the south, the hooks were laid, but there are no fish. It is evident the anglers are at fault, and that in their ignorance they must fain talk of the capriciousness of the creatures they were anxious to catch as the sole excuse of their unhappy essay. Between the Admiralty and the commercial marine there seems to be a great gulf fixed, which the former are unable, and the latter are unwilling, to cross. The Royal Navy wants men. The registry tells us there are more than a quarter of a million of sailors on the books. How is it the Board cannot get some of them? It is quite clear they do not know the way to allure these men into our ships. It is equally evident that the fleet must be manned. If the Admiralty are not prepared to meet that necessity, let them take council of those who can help them. Let them inquire among those who understand the wishes and feelings of the sailors who man our traders and coasters, what steps they should take to induce the men who formerly were procurable by impressment to transfer their services voluntarily to Her Majesty's ships, either contingently in case of war, or absolutely in time of need. If it should be found that the merchant sailors cannot be persuaded to make a compact with the State which shall entitle the Government to call upon them in case of war, there are two courses open to the State. First to make good the deficiency in the national service by increasing the training establishments of the Navy; secondly, to avail itself of the right it professes to demand—the assistance of all its subjects for the maintenance of its liberties and existence. In event of the expenditure incurred by rearing up sailors for the fleet being too great for the State to bear, it is obvious the alternative must be met. The days of the press-gang are passed; are those of a maritime conscription yet to come?

We must be prepared to look our difficulties in the face without reference to any political complication or combination. The recommendation of the report on the state of the Navy to increase the number of boys to 2000 a year has been adopted. So far, means have been taken to provide for the future. But if France is preparing, as we are told by a writer whose words are reproduced every week by the *Moniteur de la Flotte*, to contest with us the independence of the seas, and that some clever casuist should call on us to expound by the voice of the cannon the difference between independence and domination, how could we make ourselves heard at present? We look forward with great anxiety to the speech of Lord Clarence Paget on the naval estimates next week. We expect from him a fair statement, and a clear exposition of our present condition and future prospects. Let us hope that the House will join in the debate in a grave, serious, thoughtful spirit, such as the vital import of the question under discussion should create in the heart of every Englishman, and let us have no more of those bickerings and jealousies,—see no more of those manœuvres of old sailing line-of-battle ships to execute impossible surprises,—those petty assaults of little gun-boats *blindées* by self-conceit and professional animosity, which are too often exhibited in the naval engagements in the narrow sea-way of the House of Commons.

If the British army should fail in any future campaign, it will be an evil day among us for polite literature and mathematics. The Staff College regulations, which have been issued in a revised form, present a standard of attainments which appear very formidable at first sight, and which on close investigation is sufficiently lofty to daunt a cold or indifferent climber to the heights of military ambition. Admitting that the real test of the security of any curriculum consists rather in the strictness of the examiner, and the penetration of the questions, than in the work presented in the mere programme, there is a scholastic air about the regulations, with their array of difficult subjects, their numbers of marks, and their columns of strong answers, almost as appalling as the first sight of the Greek alphabet to a schoolboy. Little Master Pickle, who wants to get on the Staff, is certain to cry out against the "cruel Duke" of Cambridge, who has stabbed his young hopes so ruthlessly; but unless he be a very great dunce indeed, he will find, on making an honest effort to probe the depth of his mind, he is not in such a bad way after all. There is no change of much consequence introduced in the standard of the regulations, and the changes which are introduced are all, in our opinion, improvements. It is only in the aspect of the letter-press there is anything to be dreaded. On comparing the actual curriculum with the instructions lately issued by the French Minister of War for the admission of pupils to the Ecole Polytechnique, we discover that the subjects are not so high as those which are required of French boys of 14 years of age, except the knowledge of military history and of foreign languages. The French boy must take up English absolutely. The English officer may select German, French, or Hindostani. In mathematics the standards are about equal. Neither is very much above that fixed for naval cadets. We all know how very imposing the dry list of books and subjects of a college examination looks to the student before he has fairly entered. Let any of us who are acquainted with a young officer of moderate ability whom we should like to trust with the command of a company on an outpost, decide whether he could not go through the whole course with ease if he gave himself a fair chance by a little preliminary study. An army of Jominis would be a serious social nuisance —it would probably be a military failure. If all these qualifications were inconsistent with the possession of bodily vigour and martial accomplishments—if we were to sacrifice good horsemanship, power of going across and understanding country, to equations and Euclid, even to German or French—a mistake would be committed which it would be difficult to mend in the heat of a campaign. It must be considered that we shall never more in all probability fight under the conditions in which Marlborough was placed, when he decided great continental battles, and then retired, as it were, with all his army into the sea, leaving his allies to claim the glory in the face of ill-informed courts, and of a more ignorant public. The "wet ditch" which severed us has been narrowed so much that we are almost part of the great European continent. We are liable to escalade by steam-ladders. Our army must be raised to the same level of efficiency in respect to its Staff which the experience of all European States declares to be necessary for their own. In doing so the Government cannot be wrong: in not doing so it might be very culpable. We do not believe that a Staff-officer would be less able to leap a hedge because he had got over the *pons asinorum*, or that he would be in any degree the less admirable as an English aide-de-camp, because he could carry a message in French to a foreign general. Our staff on many occasions have exhibited great excellence: on some they have displayed inconceivable incompetence. The accident of patronage determined the other accident of fitness. We are now taking surety for a general proficiency, and giving a chance to poor men without interest of sharing in the honours which the Staff are sure to gain so largely in active service. If the officers who came out under the new system should fail us, it is scarcely possible to go back to the old; but assuredly it will be a heavy blow and great discouragement to French, Grammar, Hindostani, Geography, History, and Mathematics.

A REVIEW OF THE CRIMEAN WAR.*

Colonel Adye describes his book as "notes, relative to the Crimean War,"—a modest definition. They were written chiefly in 1857. The Indian Mutiny cut short our author in his career. Still he cherished the hope that he should soon return home, obtain access to official documents, and complete his notes. Detained in India, Colonel Adye lost patience, docked his work of its due proportions, hurried it to a close, and sent it to the printer. It is a pity. Colonel Adye would have done better to have kept his notes as they were in his portfolio, until he could have deliberately reviewed them and constructed a regular military narrative out of such materials as are, and might be, available. As it is, the notes read more like a vindication of Lord Raglan and all the superior officers of the army, and a treatise intended to refute the mistakes of the press, than a connected and instructive history of part of the Crimean campaign. Colonel Adye is fair and candid in his criticism, but over-tender to authorities, and wanting in the grasp of mind, courage, and vigour of style essential to a military historian, and above all to the historian of the Russian war. As we have said, the notes have the air of a controversial treatise, and the volume is like a big pamphlet in a red cloth cover. We have neither space nor time at this moment available for controversy, and reserve our comments on the Russian war until a fitter opportunity. Colonel Adye's volume may, pending the publication of a larger and solider narrative of that war, be read as the view which a respectable officer takes of the conduct of his chief, of our allies, and of the press.

Controversy on special points apart, there is one fact brought home to our minds whenever we look into the details of that Eastern war; and, at this juncture, when there is still a strong remnant of ancient prejudice against efficient military establishments, it may not be out of place to state the fact. The fundamental causes of our failures and disasters in the Crimea were two, the secondary causes many. The former were—first, our utterly inadequate means for striking a prompt and decisive blow in the Crimea; secondly, the lamentable lack of foresight on the part of the Government, which sent a small force on an extremely hazardous expedition, and made no preparation for a reverse. Sebastopol was to have been taken by a *coup de main;* the campaign was to have been a battle, a march, an assault. The probability of failure seems to have been overlooked. The unforeseen contingency was precisely that which occurred; we failed, and an army almost without military establishments of any kind, diminished in numbers by disease, was suddenly called upon to do an amount of work which a force of ten times its strength would have shrunk from unless held fast by necessity. Beside these two facts, our national military weakness in 1854, and the absolute want of foresight on the part of our rulers, the secondary causes of our failures sink into comparative shade. The lesson taught by the Crimean war is that a nation which will not maintain on foot an adequate military force, or one which can be easily and rapidly expanded in all its departments, has no right to pursue a foreign policy which is sure to involve it in foreign wars. If England cannot consent to abdicate her position in the world, then the alternative is to take such measures as will secure her army, as far as it is possible to do so, from disasters similar to those it had to encounter in the Crimea during the winter of 1854-55.

* *A Review of the Crimean War, to the Winter of* 1854-55. By Lieut.-Colonel Adye, C.B. (Hurst & Blackett.)

THE ARMY.

1st Dragoon Guards. Two squadrons, numbering 200 men and horses, ordered from Bangalore to Madras to embark for China.

3rd Dragoon Guards. Major Marsh has arrived in England on leave. Captain Swinburne has arrived in England on leave.

12th Lancers. Head-quarters and right wing ordered from Secunderabad to Masulipatam to embark for England. Left wing to follow shortly. This corps has had more changes during the last nine years than any other cavalry regiment in the Service. It embarked for the Cape in 1851, was sent on to Madras in 1853, came across Egypt to the Crimea in 1855, to England in 1856, was sent back to Madras the same year, and was hardly settled down at Bangalore before a wing was attached to General Whitlock's column in the field, the other being sent to do duty at Secunderabad.

17th Lancers. Ordered from Gwalior to Secunderabad, relieving 12th Lancers.

ROYAL ARTILLERY.—The following is extracted from a general regimental order of the Royal Artillery, dated the 7th inst. His Royal Highness the General Commanding-in-Chief has appointed Second Captain Edward Keate to be adjutant provisionally, under the regulations contained in the general order of the 5th of February, 1826, in the room of Penn, who resigns the adjutancy only, and is posted to Lieut.-Colonel Dixon's battery, 3rd brigade, vice Keate. Exchanges of batteries have been sanctioned between the following officers, viz. :—Lieutenant T. Burnett, of No. 4 battery, 3rd brigade, and Lieutenant H. Webber, of No. 7 battery, 8th brigade; Lieutenant J. T. Yule, of No. 8 battery, 1st brigade, and Lieutenant P. D. Barclay, of No. 2 battery, 13th brigade; Lieutenant C. F. Dixon, of the 9th brigade, and Lieutenant M. F. H. M'Causland, of the 10th brigade. Lieutenant L. Griffiths and Lieutenant A. Doull have been appointed instructors in fortification at the Royal Military College at Sandhurst, and are to be transferred to the depôt brigade. Lieutenant H. C. Farrell of the 9th brigade has been appointed to the Gentlemen Cadet Company, vice Griffiths, and ordered to Woolwich. His Royal Highness the General Commanding-in-Chief having ordered the under-mentioned alterations in the batteries and brigades serving in India to take place from the 1st of Jan. inclusive, the same is notified for general information, viz. :—Brevet-Major F. J. Travers' 1st battery, 11th brigade, to become 3rd battery, 14th brigade; Captain R. P. Jones' 4th battery, 11th brigade, to become 4th battery, 14th brigade; Brevet-Lieut.-Colonel S. E. Gordon's 5th battery, 11th brigade, to become 6th battery, 14th brigade; Brevet-Major E. Moubray's 8th battery, 11th brigade, to be become 7th battery, 14th brigade; Brevet-Major F. Ommanny's 2nd battery, 13th brigade, to become 5th battery, 11th brigade; Captain A. F. Connell's 4th battery, 13th brigade, to become 8th battery, 11th brigade; Captain B. Lawson's 3rd battery, 14th brigade, to become 1st battery, 11th brigade; Brevet-Major J. Singleton's 4th battery, 14th brigade, to become 4th battery, 11th brigade; Brevet-Major J. Godbey's 6th battery, 14th brigade, to become 2nd battery, 13th brigade; Captain J. Desborough's 7th battery, 14th brigade, to become 4th battery, 13th brigade; Captain C. Wright's 8th battery, 14th brigade, to become 8th battery, 13th brigade; Brevet-Major J. Pennycuick's 9th battery, 14th brigade, to become 8th battery, 14th brigade. Lieutenant B. L. Forster, has been appointed aide-de-camp to Major-General Pratt, commanding in Australia. The Secretary of State for War having, with reference to page 124 of the finance regulations, directed that for the future all miscellaneous disbursements on account of the Royal Artillery are to be submitted to the War Office, through the paymasters of the respective brigades for a special authority, before they are included as charges in the public accounts, as is the practice for all similar expenses for the Line, the same is notified for general information and guidance. Paymaster Ratcliff is posted to the 13th Brigade, and will proceed to Bombay. The following removals and appointments of master-gunners have been approved, viz. :—Master-Gunner James Clarke from Tilbury Fort to Dublin Bay; South, vice Downey, deceased; Master-Gunner Andrew Dowie, from Chatham Lines, to Tilbury Fort, vice Clarke; Quartermaster-Sergeant Charles Lee, of the 12th Brigade, to be Master-Gunner at Chatham Lines, vice Dowie. Major Rogers is to hold himself in readiness to embark for Bermuda to join his battery by the first opportunity. Lieutenant-Colonel Smythe is transferred to the Depôt-brigade. Lieutenant-Colonel Ward is posted to the 13th Brigade in his stead, and will be marked off "Employed in England." Instances having occurred in which officers commanding batteries of the Royal Artillery have over-estimated for the sums required by them for the payment of their batteries, the Secretary of State for War has requested that the following instructions on this subject be strictly attended to for the future, viz. :—"Captains or officers commanding batteries are, as far as practicable, to repay monthly to the paymasters of their respective brigades, or receive from them, any balance that may appear in the monthly battery pay lists, in order that the aggregate balance of that brigade, for which the paymaster (whether the money be in his possession or in the hands of captains of batteries) is personally responsible, may be kept within the limit prescribed by the regulations, or some good and sufficient reason assigned to justify a departure therefrom." Major Williams having resigned his appointment as military secretary to Major-General Sir W. F. Williams, Bart., commanding the troops in Canada, has been ordered to join his battery at Plymouth. Mr. Thomas Hunt has been appointed paymaster to the force of the Royal Artillery and Royal Engineers serving in China.

Three hundred and fifty service men belonging to Major Bolton's and Major Lukin's batteries of the depôt brigade Royal Artillery have left Woolwich for the camp, in order to relieve the barracks at head-quarters. Instructions were yesterday received at Woolwich for the guidance of officers and others on recruiting service, stating that no enlistment of drivers is to take place until further orders, as the corps already numbers 400 above its prescribed strength. The standard for the admission of gunners is ordered to be increased to 5 feet 6 inches, for growing lads under the age of nineteen, and 5 feet 7 inches above that age.

On account of the vast number of recruits who have been accepted in the Royal Artillery, the strength of the depôt at Woolwich has far outgrown the present barrack accommodation. It has been found necessary, in consequence, to make a division of the brigade, to be stationed in separate quarters. Major Bolton's and Major Lukin's Nos. 1 and 2 batteries, amounting to between 500 and 600 men each, leave head-quarters, Woolwich, for the encampment at Shorncliffe.

ROYAL ENGINEERS. Lieutenant F. T. Warburton embarks shortly in command of a detachment for New Zealand, to be employed in surveying the colony and effecting improvements.

A detachment of 21 non-commissioned officers and men of the Royal Engineers has been ordered to proceed from Brompton barracks to the Royal Military College at Sandhurst, to be employed in the instruction of the cadets at that establishment.

Lieutenant R. H. Williams, R.E., having completed his studies at the Royal Engineer establishment, has proceeded from head-quarters to Dublin, to be attached to the staff of the Commanding Royal Engineer.

24th Regiment. A large detachment from the depot 2nd Battalion 24th foot, disembarked at Waterford, from Winchester, *vid* Bristol, per the Juverna steamer, on the 1st instant, for the purpose of completing the service companies of the battalion, which are under orders to proceed to the Mauritius, to relieve those of the 61st Regiment, which are to return home.

43rd Light Infantry ordered from Saugor to Fort St. George, Madras, to be stationed.

44th Regiment ordered from Fort St. George, Madras, to China.

60th Rifles, 3rd battallion ordered from Jackatalla to Caunanore, relieving 66th regiment.

66th Regiment ordered from Caonanore.

14th 2nd Battalion. A ball and supper, on a very extended scale, both of hospitality and magnificence, was given by the officers of the 2nd Battalion of the 14th Regiment, now under the command of Major Dwyer, in the barracks of Mullingar, on the night of Friday, the 3rd inst. Invitations had been forwarded during the previous week to the gentry of the surrounding neighbourhood, the result of which was to bring together on the occasion between 150 and 200, while the military circle was largely augmented by contributions from the garrisons of Athlone, Longford, and the metropolis, with more than one or two from beyond the Channel. The fine band of the battalion, under its excellent master, Mr. Murphy, enlivened the scene with every description of "sweet sounds;" and the company only separated at the rapid advance of daylight, charmed alike with the entertainment and their gallant and hospitable entertainers.

92nd Highlanders. Major St. John has arrived home on leave.

The subjoined circular memorandum, addressed to officers commanding Royal Artillery, Royal Engineers, and regiments and depôts of Cavalry and Infantry serving at home, has been issued :—

"Horse Guards, S.W., Jan 24.

"The appointment of an Instructor in Military History at the Royal Military College, Sandhurst, having been authorised by the Secretary of State for War, his Royal Highness the General Commanding-in-Chief desires that commanding officers will send to this department, not later than the 10th proximo, the application of such officers as feel themselves qualified for the situation. Each application should be accompanied by a statement of the course of the candidate's reading in military history, and a detailed description of any one important campaign, with a full explanation of the military topography of the country, and its bearing on the operations.

"In forwarding an application the commanding officer should state his opinion of the character of the candidate, both personally and as an officer.

"The salary attached to this instructorship is 350*l.* per annum (inclusive of military pay), with quarters, or in case a quarter should not be provided, an allowance in lieu thereof, such as is accorded to a field officer. The appointment will be probationary for the first year. The successful candidate will be expected to join the college without delay, and to express his intention of continuing to fulfil the duties of his appointment for a period of at least three years.—By command. "G. A. WETHERALL, Adjutant-General."

His Royal Highness the young Prince of Orange, attended by his Aide-de-Camp, Lieut.-Colonel Van den Bosch, Count de Rechteren de Rosande, Count Louis de Bylandt, and Colonel Seymour, Equerry in Waiting, visited Woolwich Arsenal on Tuesday morning. The Prince and suite were received at the entrance of the Arsenal by Major-General Sir Richard Dacres, K.C.B., commanding the garrison; Brigade Major Shaw; Captain Forbes, doing duty as aide-de-camp to the General; and the officers representing the departments generally. After a tour through the various manufacturing and other branches of the establishment, which occupied about three hours, they proceeded, accompanied by the General and staff, to the Royal Artillery mess-room, where an elegant luncheon was provided, after which they returned to London.

The Museum attached to the Royal Engineer establishment at Chatham has been enriched by a number of very interesting specimens of firearms of all descriptions, captured in China, which have been deposited in the department devoted to those descriptions of objects. Most of the pieces are of very extraordinary design and character.

His Royal Highness the Duke of Cambridge visited Dover last week for the purpose of witnessing some operations of the Armstrong guns, the inventor, Sir William Armstrong, being in attendance. The experiments took place upon the heights, and it is stated that they were of a very satisfactory character. His Royal Highness afterwards desired Lieut.-Colonel Carmichael, of the 32nd, to draw out his regiment in the barrack-square. The duke addressed the troops upon the brilliant services they had rendered at Lucknow, and in other parts of India. His Royal Highness dined with the officers of the garrison.

Captain Daniel Thompson, of the 67th Regiment, late district inspector of musketry of the Cork Division, has been removed to the Dublin Division, to relieve Brevet-Lieutenant Colonel Bewes; 73rd Regiment, recently promoted.

The present rifle-range in Stokes Bay, near Portsmouth, for the practice of the troops in that garrison, having only a range of 900 yards, it has been deemed advisable to extend the length of range to about 1250 yards, and for this purpose negociations have for some time been carried on between the military authorities and the proprietor for the purchase of a piece of waste ground at the western extremity of, and adjoining, the present range. This has at length been brought to a close by the authorities refusing to purchase on the terms offered.

Nearly 500 recruits have arrived during the last few weeks at the Indian depôts stationed in the camp at Colchester.

About 300 girls are employed at a building in the laboratory department of Woolwich Arsenal for the purpose of making cartridges. As many of these were compelled from poverty and other causes to remain in the establishment during the day without food, Captain Boxer, R.A., superintendent, has obtained permission to fit up a cooking apparatus, and measures will be adopted to supply a meal of soup, &c., at the charge of three-halfpence.

The Government has purchased from the South-Eastern Railway Company an extensive piece of land at the east end of the town of Gravesend, extending from Parrock Lane, near Christ Church, to the Rochester Road, for the purpose of forming a range for rifle practice and for the erection of various buildings.

About 125 of the soldiers discharged from the East India Company's service who arrived at Plymouth in the Maha Ranee from Calcutta have been disembarked in the Sound. Thirty were transferred on Saturday afternoon to a passenger steamer bound for Cork, and the remainder were landed at the Barbican for the purpose of proceeding on Monday in another passenger steamer to Dublin. Those men entitled to prize-money will not be paid until they arrive at their homes. Those soldiers on board the Maha Ranee will probably proceed in her up Channel.

The first of the series of extensive military operations which are to be carried out by the troops at Chatham, under the direction of Major-General Eyre, commanding that garrison, took place on Wednesday morning with complete success. The plan of operations which it had been previously arranged should be carried into effect consisted in forming the whole of the garrison into an army of observation in advance of a garrison or other strongly fortified position menaced by an enemy, so as to cut off the approach of the opposing force and to repel the advance, the line of country included in the operations extending from the river Medway to a point about five miles distant, the garrison, of course, forming as it were the base of the operations. For this purpose all the available force of the garrison was brought into requisition, the troops engaged in the operations being 18 of the depôts of various East India regiments, forming together three battalions of infantry; the corps of Royal and Indian Engineers; the Mounted Royal Engineer Train, and the battalion of Royal Marine Light Infantry, the entire force numbering upwards of 5000 men under arms, exclusive of officers. The whole of the operations were under the immediate direction of Major-General Eyre.

Captain Leicester Vernon, on the 21st inst., will move as an amendment to the motion of Sir De Lacy Evans, to move "that, whereas the promotion in the seniority corps already existing, viz., the Royal Artillery, Royal Engineers, and Royal Marines, being of an unsatisfactory character, this house is of opinion that it is not desirable to extend the seniority system to the whole of the army."

The Secretary of State for War has appointed Capt. Douglas Galton, R.E., Assistant-Inspector-General of Fortifications, and attached him to the staff of General Sir J. F. Burgoyne, G.C.B., Inspector-General.

Lieut. Daveney of the 6th (Inniskilling Dragoons) has been appointed Adjutant in the Scinde Irregular Cavalry.

The officers and men of the several depôt battalions in Chatham garrison who have been advanced in their battalion and rifle drill, have been put through a course of instruction with the great guns mounted on the Cornwallis-battery, under the direction of the master gunner of the garrison.

A return was issued yesterday of the number of persons flogged in the army and militia during the year 1858, various particulars respecting the nature of the offences, the place at which the sentence was inflicted, &c., being supplied. In the 1st and 2nd Life Guards, the Royal Horse Guards, the 3rd and 7th Dragoon Guards, and the 2nd battalion Scots Fusilier Guards no men have been flogged. In the other Guards regiments men have been flogged, 4 having been so punished in the Guards, 3 in the Coldstreams, and 1 in each of the remaining regiments. In the Royal Artillery 32 men were flogged; in the Military Train 5; and in the Royal Engineers, 4. In the 13th Foot 9 men were flogged; in the 47th, 8; in each of the following regiments, viz. :—the 18th, 19th, 22nd, and 36th, 6 men; in the 4th, 5; in the 10th, 16th, 23rd, 37th, and 68th, 4 men; and in many other regiments 3, 2, or 1 man. The greatest number of lashes inflicted was 50; the lowest, 25. The total number inflicted during the year in both army and militia was 9,338.

A detachment under the command of Captain the Hon. J. J. Bury have arrived at head-quarters, Brompton barracks, from Western Australia, where they have been employed for some time past on surveying duties. Most of the men have returned to England on account of their period of service having expired.

SHORNCLIFFE CAMP.—D. A. C. G. Swan has joined the Camp for the purpose of organising the commissariat department for Shorncliffe similar to that at Aldershot. Bakeries and abattoirs are about being erected for the purpose of baking the bread and killing the beasts for the use of the troops. The whole of the troops on Shorncliffe marched from the camp on Tuesday morning last, and proceeded through Folkestone, headed by the respective bands of the regiments; they then made a detour to what is popularly called Cæsar's Camp on the range of hills to the north of Folkestone, and on their return again passed through the town for the camp, the day being fine a large number of persons were attracted to witness the sight. Lieutenant-General Mansel, attended by his staff and a numerous retinue of officers of the Artillery, Engineers, and other regiments in the camp, went to Dover

Digitized by Google

on Friday the 3rd instant, for the purpose of witnessing the practice of the Armstrong Battery, stationed; the practice gave great satisfaction to all present, and proved the extraordinary power possessed by the unrivalled gun.

COLCHESTER CAMP.—In consequence of the large number of recruits who have joined the several Depôts in the camp, it is purposed to move the detachment of the Donegal Militia Regiment as soon as the buildings at Yarmouth, now undergoing alterations, are ready for their reception. It is expected the necessary alterations will be completed in a few days, and that the detachment will move about the 14th of this month.

Colonel Street, C.B., commanding the 10th Depôt Battalion, rejoined on the 6th instant, from leave of absence. Major West, who was commanding while the gallant colonel was away, has now taken his departure from camp for a short time. The 9th Depôt Battalion is under the command of Major C. de Morel, during the absence on leave of Colonel Dixon, C.B. It is not expected that Major-General Bloomfield will leave for his new command in Dublin until the latter end of March.

Captain Baynes, 88th Regiment, who has been acting as Brigade-Major during the absence of Major Cooch, on leave, has received orders to proceed to Hythe to qualify himself as an instructor of musketry.

Preparations are being made in the vacant ground near the camp, usually employed for drill purposes, for the erection of barracks capable of accommodating one battalion and a battery of artillery. It is understood the new barracks are to be huts, but built of brick.

KNAPSACKS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—With reference to the article which appeared in the ARMY AND NAVY GAZETTE on Saturday last, on the subject of the knapsacks which are now on trial by the 26th Regiment, permit me to correct an error which you have been led into in calling one of these knapsacks by my name. All that I have been allowed to do is to apply the principle only of my invention to the present packs.

With respect to these improvements of mine, from which it appears that "no appreciable advantage over the present packs is remarked by the great men, the straps under the arms that hurt the soldiers are still retained," I beg to say the defect is simply owing to not sending the iron supports in two lengths, to suit the men of different sizes in this regiment; which mistake I no sooner discovered than I wrote off and pointed it out to the colonel commanding, offering, at the same time, to rectify the error by sending to the regiment as many longer irons as they might require, which, I presume, if needed, would have been duly notified to me. It is only necessary to mention, in case of any undue pressure being felt from the slings, it can be easily remedied and even wholly prevented by slightly increasing the length of the irons—even as much as an inch more would insure perfect freedom in the use of the arms to the largest man in the service.

My own pattern knapsack is a narrow one, such as I am glad to see that you would recommend, with the additional advantage of a great coat cover, which necessarily does away with the present great coat straps, and consequently so much pipe clay.—I remain, sir, your obedient servant,

GEORGE SPILLER.

"BEATING-UP."

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—You have just started a paper that promises well to effect some good for the professions to whose interests it is especially dedicated. You will doubtless acknowledge that if its pretensions are so lofty that it will only attempt wholesale improvements and general reforms on a grand scale, its utility will be reduced to the lowest point. If on one subject a long line is clear, I do not advocate in that case bit by bit reform; let what is to be be done at once. But there are so many very minute absurdities, and *little corners* that want sweeping out, that among *them* you will find your golden opportunities of doing, bit by bit, much that we poor tongue-tied, tape-bound soldiers cannot do for ourselves. Take the case of the mediæval mummery of "beating-up." The drums and fifes marching through the crowded market, playing their very loudest, with half-a-dozen sergeants marching in front with *swords drawn*, the weapons having been borrowed from the property-room of the town theatre, they having none of their own.

The result, as far as recruiting is concerned, can be best described by the algebraical negative sign. Neither the oldest Jew in Chatham, nor the oldest soldier, can recall the fact of a single man being added to the strength of a regiment by this stale device. To the town it is an unmitigated nuisance, delays business, and collects a crowd of ragged boys and of the class of the other sex whose frailties have earned the distinction of being called the great social evil. The drum-boys may like the fun, but pity the case of the seregants, who really might be better employed. They have not too much spare time, and naturally hate a duty, the only result of which is, the quizzing they get for being such guys. If they are to be mountebanks, put them on hobby-horses, and let the Pioneers drag them.

ONE OF THEM.

THE ROYAL MARINES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The first number of the ARMY AND NAVY GAZETTE having assigned it the first place among the United Service journals, a few lines in its columns may attract the attention of the public, some patriotic member of Parliament, and those whom it may particularly interest, to the state of the corps of Royal Marines; it is particularly necessary at the present moment, when we find that the Naval Volunteer bounty and reserve systems have proved fallacies and delusions, and when we consider the opinion so lately expressed of one of the most experienced and respected Admirals in the service as to the *increasing spirit of insubordination in the Navy*, and when we peruse the answer of Lord C. Paget to Sir C. Napier in the House of Commons a few evenings ago. The Royal Marines are now 17,000 strong, and it is said that this year's estimates provide for 1000 more, *but without officers!* 18,000 men form a considerable item in Great Britain's scanty forces, and therefore it is well worth the while of the British Nation to see that these 18,000 men are not rendered inefficient by the parsimony and injustice of those who rule them.

With respect to the rank and file, their number is so small in comparison with the demand that men are now embarking who have not gone through their drills since they left their last ships, being required to embark again after their usual furloughs on return from abroad—thus is destroyed their efficiency as soldiers; thus is destroyed the *esprit de corps* which has proved their value from the days of the Nore to the days of the Princess Royal and the Marlborough, *cum multis aliis*. In regard of the officers, their number is so lamentably small and disproportionate, that it is necessary to wait until officers are relieved off guard before the number required for the indispensable boards, committees, and courts can be assembled; it is no uncommon thing to see a battalion at drill with one solitary subaltern as its whole contingent of officers. The Chatham division marched into the country a short time ago with one officer alone—*the Adjutant*—there not being, on that morning, *one other officer off duty*. The proportion of non-commissioned officers is equally inadequate, and we have witnessed a company, even a battalion, at *drill*, without one single officer or non-commissioned officer. H. M. S. Ariadne has a complement of about 70 marines, with one officer. Supposing the marines of three ships of that class were landed under fire, there would be 210 men men in action with three officers to lead them, provided the three officers remained unhurt: the office-clerks and staff non-commissioned officers are taken from the companies' strength, instead of providing extra ones for those situations. That renders the promotion very slow, and tends to create great discontent among the men. With respect to the proportion of officers, as compared with other corps, we see that in the Royal Engineers, about 16,000 strong, there are 16 generals, 16 colonels, 41 lieut.-colonels; they have 2nd captains, *i.e.*, two captains to each company, and all the subaltern officers are lieutenants. Whereas, in the Royal Marines, with 17,000 men (and 1000 more to be added), there are but 10 generals, 10 colonels, and 19 lieut.-colonels; they have no 2nd captains, and one-third of their subaltern officers are 2nd lieutenants; the disproportion with regard to the Royal Artillery is enormous.

The money granted by the country for the retiring allowances of the Royal Marines is *partly unabsorbed*, and an addition of 10 or even 5 generals, as they are in simple justice entitled to, would not cost the country any great sum, and would cause the promotion of the same number of old officers who have served faithfully for periods, varying from 35 to 27 years; but did it cost the country a little extra money, why should the Royal Marines be the sufferers? Is the Duke of Somerset made acquainted with such a state of things?

It would be well for the Royal Marines were there at the Admiralty an army officer of rank and influence, whose advice and suggestions respecting this neglected corps would meet with due attention from the First Lord, who, like the rest of the Board of Admiralty, must necessarily be ignorant of military matters.—I am, sir, respectfully yours,

Plymouth, Feb. 4, 1860. HOARY CAPTAIN.

THE CHINA EXPEDITION.

The last Indian Mail gives some further particulars respecting the composition of the expeditionary force. The following are the regiments selected:

EUROPEAN TROOPS.

No. 7 Battery, 14th Brigade Royal Artillery.
Cavalry (not detailed).
Her Majesty's 1st (King's) Dragoon Guards—200 men and horses.
23rd Company Royal Engineers.
A and K Companies Sappers and Miners.
Her Majesty's 3rd (East Kent, or Buffs) Foot.
Her Majesty's 6th (Royal 1st Warwickshire) Foot, 1st Battalion.
Her Majesty's 8th (King's) Foot, 1st Battalion.
Her Majesty's 31st (Huntingdonshire) Foot.
Her Majesty's 37th (North Hampshire) Foot.
Her Majesty's 44th (East Essex) Foot.
Her Majesty's 56th (West Essex) Foot.
Her Majesty's 60th (King's Royal) Rifle Corps, 1st Battalion.
Her Majesty's 66th (Berkshire) Foot.
Her Majesty's 67th (South Hampshire) Foot.
Her Majesty's 73rd Foot.

NATIVE TROOPS.

Artillery Company 5th Battalion Artillery (Golundauze).
1st Supplemental Company (Golundauze).
Irregular Cavalry (not detailed).
Five Battalions Infantry, including 15th Regiment Punjaub Infantry (each 800 strong.)
3rd Regiment Native Infantry (1000 strong).
5th Regiment Native Infantry (1000 strong).

The details of the European Cavalry and Native Irregular Cavalry to be furnished by Bengal are not yet known. It is reported that Major-General Sir J. Michel, K.C.B., temporarily commanding the Malwa division, is to command the Bombay column.

The force above enumerated will number not fewer than 20,000 men. Of the five battalions native infantry supplied by Bengal four are to be composed of volunteers from Punjabi regiments, and one of volunteers from Hindostani regiments. Each man is to volunteer under his hand or seal, and for two years. The battalions, with the 3rd and 5th Native Infantry, will enjoy the usual privileges of foreign service. A due proportion of native commissioned and non-commissioned officers will be attached to each, in eight companies, and the following European officers:—A commandant, second in command, adjutant, interpreter and quartermaster, surgeon or assistant-surgeon, eight officers doing duty, and an apothecary. A general order enters fully into further conditions of the special service. We mention last a very important regulation. To secure uniformity of ammunition, the native force is to be armed with the smooth bore musket, such as is used by the regiments of Bengal and Madras Native Infantry now serving in China. Corps now armed with rifles are to have them exchanged, before embarkation, for the musket. It is to be hoped we shall not find the Chinese better armed than ourselves.

SOLDIERS' FOOD.

(From the *Militär Zeitung* of January 8.)

"*Pour bâtir l'edifice d'une armée, il faut se souvenir que le ventre en est le fondement.*" This saying of Frederick the Great, Prussia's king and general, will justify the following observations on the high importance to be attached to the food of the soldier. The stomach exercises a powerful influence on all human relationships. This is as incontestable as the fact that eating and drinking keep body and soul together. With the help of nutritious food man is enabled to perform extraordinary feats, even to command nature.

After showing that the same axiom is applicable to the vegetable as well as to the animal kingdom, even influencing the feelings of the brute creation towards their masters, the writer exclaims, "Can we wonder then that daring and pusillanimous, strong and weak, brave and cowardly nations exist, according to the manner in which they are fed."

The writer then quotes England as an example, alluding to the muscular powers of our boxers, jockeys, divers, foot-racers, acrobats, &c., who have gone through training on a fixed system of food, and he then brings the point to bear on the food of the soldier. He says:—

"If we consider the means to attain the desired end, by examining the food as provided to the soldiery, we must, first of all, inquire into the meat, bread, vegetables, and manner of preparation of the same. And here the *quantity* no less than the *quality*, as well as the manner of its preparation, must not be overlooked.

As regards quantity, the Austrian soldier receives daily rations of—bread, 26 oz.; beef, 10⅔ oz.; peas or beans (dry), barley, &c., 8 oz.; heiden-grütze, 6½ oz.; rice, 6 oz.; meal, 10⅔ oz.; potatoes, 1 lb.; salt, 1 oz.; lard, ¾ oz.; onions, ⅜ oz.; and pepper, ⅓ oz.

In this average table of fare the greatest change in the food and economy is looked to, as the soldier has to pay for the cooking of it. When in campaign, each soldier receives ½ lb. of meat, 10 oz. wheat-meal, 6 oz. rice, 1 oz. salt, 1 pint wine.

Let us compare this with the rations of the other armies of Europe:

TROOPS OF THE GERMAN CONFEDERATION: Bread, 64 oz.; meat, 16 oz.; meal, 16 oz.; salt, 2 oz.

FRENCH TROOPS: Bread, 68 oz.; meat, 23 oz; salt, 1$\frac{1}{10}$ oz.; rice, 10⅓ oz.

ENGLISH TROOPS: Bread, 36 oz.; meat, 48 oz.; meal, 12 oz.; salt, 1$\frac{3}{11}$ oz.

RUSSIAN TROOPS: Bread, 70 oz.; meat, 16 oz.; meal, 10 oz.; salt, 1$\frac{1}{10}$ oz.

TURKISH TROOPS: Bread, 66⅔ oz.; meat, 18 oz.; salt, 1$\frac{1}{5}$ oz.; lard, ⅔ oz.; rice, 6 oz.

If we now consider the normal wants for the daily food of a full-grown man, we find, according to Liebig,* a daily consumption of 9 oz. *alluminat*, 2 oz. fat (both fundamental meat stuffs), 20 oz. meal-starch (contained in bread and vegetables), and 1 oz. salt.

This is exceeded only in a higher degree in the English Army, and the abundant provision of beef for the English soldiers, as, indeed, in England, generally is most praiseworthy. Animal food is much easier of digestion than vegetable food; this is why English soldiers in every portion of the world, though of proportionably a slim and delicate build, go through immense fatigue without detriment to their health. According to the statement of an English surgeon, the average measurement round the chest of the English soldier is 31 inches. The usual physical strength, combined with so small a measurement is according to the opinion of the Prussian military surgeon, Dr. Hildesheim, so seldom deemed sufficient for service in the Prussian army, that men of such chest dimensions are scarcely ever admitted. We thus learn on the one hand, that ample animal food will enable men of lesser physical strength to undergo military fatigues; and that consequently a soldier is all the stronger and more enduring in proportion to his original strength, and to the nourishment he receives. For poor food will gradually effect the same results in powerful men which, in the long run, weak individuals, even with the most nourishing food, cannot avoid—sickness and unfitness for duty.

The influence of nourishing food is most distinctly to be seen in taking the whole population of different states.

In England, on the average, each person consumes 10 oz. meat per diem; whilst in Germany and France, the average does not reach more than from 4 to 6 oz.

We also know that the average length of life in England is 40 years; in Germany and France, not more than 30; that in England, annually, the deaths do not average 1 in 45·50; whilst in Germany and France, 1 in 40 annually dies.

After pointing out the results of nourishing food on the general health of the men, preventing sickness and fever, diarrhœa, &c., the writer insists that a longer time than from four to six hours ought not to elapse between the meals A longer period upsets the gastric juices, and the fluids of the stomach acquire an unhealthy formation, which may become the foundation of serious disease of the stomach.

As regards the *quality* of the food, it is the duty of the army-surgeons to examine it and report upon it. It is a special point that there should be a constant variety in the food. Uniformity is in this particular detrimental. Experience shows that even animals, if always fed with the same substances, speedily decline and die.

Man stands in need of a much higher degree of variety in food. The conformation of his teeth, and the formation of his digestive organs, incline him to the enjoyment of the vegetable as well as of the animal kingdom.

Finally, the greatest care and attention ought to be paid to the cooking of the soldiers' food.

On this point the writer is engaged upon a work founded on experience, in which he will endeavour to point out the fallacies of the present system of cooking the soldiers' food.

* *Chemistry in its Application to Physiology.*

THE NAVY.

ADMIRALTY, FEB. 4.—APPOINTMENTS.—Chief-Engineers W. Eyres (1856) to the Edinburgh, 60, screw steam-ship, on Coast-guard service at Leith; and J. M. Smith to the Cumberland, 70, at Sheerness, for service in the Challenger, 21, screw steam-corvette, at Sheerness.

Acting Third-Class Assistant-Engineers, J. Fraser to the Dorris, 32, screw steam-frigate, Mediterranean Station; J. Gellatly to the Caradoc, 2, paddle-wheel steam-vessel, Mediterranean station; J. Turney to the Osprey, 4, screw steam-sloop, Mediterranean station; W. Lawson to the Assurance, 4, screw steam-sloop, Mediterranean station; W. B. Trenwith to the St. Jean d'Acre, 101, screw steam-ship, Mediterranean station; J. Cameron to the Renown, 91, screw steam-ship, Mediterranean station; A. Forrest to the Orion, 91, screw steam-ship, Mediterranean station; J. Galbraith to the Brunswick, 80, screw steam-ship, Mediterranean station; D. M'Intyre to the Racoon, 22, screw steam-corvette, Mediterranean station; B. Park and E. M'Leish, to the Victor Emanuel, 91, screw steam-ship, Mediterranean station.

FEB. 6.—Lieutenants B. J. Cooper (1856) to the Trafalgar, 90, screw steam-ship, with the Channel squadron; H. C. Lees (1856) to be additional to the Chesapeake, 51, screw steam-frigate, East India and China station; W. H. Phipps (1846) to the Mersey, 40, screw steam-frigate, with the Channel squadron; D. Walker (1850) to the Queen, 86, screw steam-ship, at Sheerness; and T. T. Phillips (1854) to the Forte, 51, screw steam-frigate, at Sheerness.

Midshipman L. Ching to the Fawn, 17, screw steam-sloop, at Sheerness.

FEB. 7.—Commander H. M. Elliott (1856) to be inspecting commander of the Coast Guard, vice Commander C. M. Luckraft, appointed to the Hastings, for service of the Royal Naval Reserve.

Chief-Engineer B. Greetham (1855) to be additional to the Castor, 36, at Chatham, for service of the Royal Naval Reserve.

Midshipman R. P. W. Powney to the Mersey.

Third-class Assistant-Engineer T. Scott (a) to the Alecto, 5, paddle-wheel steam-sloop, at Woolwich.

Acting Third-class Assistant-Engineers J. M'Arthur to the Nile, 90, screw steam flag-ship at Devonport; and J. Russell to the Fisgard, 42, at Woolwich, as supernumerary.

Naval Cadet T. E. Miller, to the Emerald, 51, screw steam-frigate, at Devonport.

FEB. 8.—Second-Class Assistant-Engineers, E. T. Read to the Hogue, 60, screw steam-ship, on coast-guard service at Greenock, for service in the Goshawk, gun-boat; G. Hunt to the Hogue, for service in the Harpy, 1, paddle-wheel steam-vessel, at Woolwich; and H. T. Iles to the Forte, 51, screw steam-frigate, at Sheerness.

Acting Second-Class Assistant-Engineer H. Knight to the Hawke, 60, screw steam-ship, on coast-guard service on the coast of Ireland, for service in the Magpie gun-boat.

Acting Third-Class Assistant-Engineer J. Bolton to the Hogue, for service in the Harpy.

FEB. 9.—Commander Oswald Borland to the Centurion; Lieut. G. P. Heath to the Blenheim, additional, for services in the Coast-guard; Lieut. Lord F. N. Conyngham to the Algiers; Lieut. J. G. C. Evered and Lieut. N. B. Smith to the Conqueror; Lieut. C. R. K. Smyth to the Trafalgar; Lieut. F. W. Wilson to the Royal Albert; Lieut. William Clark to the Sanspareil; Lieut. Frederick Hammond to the Donegal; Lieut. Vincent Kilcourcie, to the Hero; M. C. C. Roberts, midshipman, to the Neptune; William Ellis (B), master, to the Trafalgar; Thomas J. Whillie, master additional, to the Asia, for the Colossus; George H. Beaton, first-class assistant-engineer, to the Fisgard, for charge of the machinery of the Cormorant; John H. Binns, second-class assistant-engineer to the Majestic, for service in the Dapper; William V. C. Farror, paymaster, to the Cumberland; and Samuel H. Sadler, paymaster, to the Centurion.

Alacrity, 4, Commander Baird, at Devonport, was taken into dock on Tuesday to make good defects prior to her departure for the Mediterranean.

Alecto, paddle, Commander Raby, having received the whole of her crew, is ordered to leave Woolwich to-day for service at the River Plate.

Arethusa, 50, sailing-ship, is ordered to be brought round from Devonport to Chatham, to be lengthened and converted into a screw-steamer. She is to be taken into the dock now occupied by the Severn, 51.

Ariadne, 26, screw, Captain E. W. Vansittart, got under weigh on Tuesday morning from Spithead, and after making two runs to the eastward of the Warner, proceeded to the measured mile in Stokes Bay to test her altered screw. Four runs were made with very good results, but during the last two runs the wind had veered from W.N.W. to W., and freshened considerably, and the trial was in consequence again deferred. Even under these unfavourable circumstances the mean of the four runs gave the ship a slight increase of speed over that of the last trial, and also a great decrease in the vibration. As the trial is intended to test the comparative merits of the Ariadne's screw with its leading corners on and off, it is necessary that both trials should take place under as similar circumstances of wind and weather as possible.

Arrogant, 47, Commodore William Edmonstone, left at Ascension, December 27, by the Vesuvius, captured on the Line an empty brigantine, which was sent to Sierra Leone, in charge of Lieutenant Allen C. Adams.

Bacchante, 51, screw, in the steam-basin at Portsmouth, has been removed from the south to the north quay for the purpose of taking on board her guns, shot, and other heavy weights.

Barossa, screw-frigate, will be launched at Woolwich on the 10th March.

Brilliant, 20, Captain Gardner, commissioned at Chatham for the service of the Naval Coast Volunteers, has a large number of shipwrights, carpenters, plumbers, painters, and labourers employed on her.

Brunswick, 80, screw, Captain Erasmus Ommaney, is ordered home from the Mediterranean.

Bulldog, 6, paddle, is removed from the old ship basin at Portsmouth to the steam-basin, and berthed alongside the south quay, to prepare for service.

Coquette, 4, gun-vessel Commander the Hon. F. A. Foley, arrived at Spithead on Thursday evening from the Mediterranean.

Charybdis, 21, 400 horse-power, has proceeded from Folly Point, Chatham, to Sheerness, to be attached to the first division of the steam reserve in ordinary to that port.

Collingwood, 80, sailing-ship of the line, which has been sent from Portsmouth to Chatham to be cut down and converted into a screw-steamer, is ordered to be removed from Chatham to Sheerness for that purpose.

Coquette, 4, screw steam gun-vessel, Commander the Hon. Fitzgerald A. Foley, is also expected from the Mediterranean.

Greyhound, 17, Commander Sullivan, having embarked supernumeraries, left Plymouth Sound on Monday, under canvas, for Portland.

Himalaya passed Malta on the 25th ult., to Alexandria, with artillery for China.

Hind, tender to the Russell, 60, sailed for Falmouth on Sunday, with stores from the Devonport dockyard and the Gun-wharf.

Howe, this noble vessel, which was laid down during the Russian war, and partly built by superannuated shipwrights, employed during the then existing pressure to increase our navy, will be launched at Pembroke on the 1st of next month. The Howe, when launched, will be the finest line-of-battle ship afloat.

Liffey leaves Malta for Corfu.

Majestic, 80, Captain Mends, from Sheerness for Liverpool, put into Plymouth Sound on Wednesday through stess of weather and defective condition of valves.

Mersey, 40, Captain Henry Caldwell, C.B., has arrived at Portland from Portsmouth.

Niger, Captain P. Cracroft, on the 4th of December, was at Nelson, all well, having recently arrived from Auckland. While at Auckland, the inhabitants invited the officers to a series of entertainments, and Captain Cracroft and the officers had given a theatrical entertainment and ball on an expensive and extensive scale in return, which went off to the gratification alike of the entertainers and entertained. It is expected that the Niger, on her return to Sydney, will receive orders to return to England to pay off.

Nile, 90, Captain Barnard, fitting at Plymouth for the flag of Sir Alexander Milne, K.C.B., was taken out of No. 3 dock at Keyham steam-yard, Plymouth, on Tuesday, and placed under the sheers in the basin, for the purpose of receiving the heavy portion of her main shaft; her top-sail yards are crossed. She has been very fortunate in obtaining her complement within one month from the date of her commission. Her crew are all men-of-war's-men from ships recently paid off.

Orion is refitting at Malta.

Osprey, 4, screw, Commander the Hon. J. Bloomfield, is ordered home from the Mediterranean.

Princess Royal, 91, screw, has been placed in No. 2 dock at Portsmouth, to complete repairs.

Prometheus, 5, Commander Hollinsworth, left Plymouth Sound on Sunday for the West Coast of Africa.

Queen, 86, screw, Captain Charles F. Hillyer, has been officially inspected at Spithead by Rear-Admiral the Hon. George Grey, who proceeded to Spithead on board Her Majesty's paddle-steamer Fire Queen.

Ranger, screw-vessel, recently launched at Deptford, having been fitted with her engines and machinery by the contractors, Messrs. Rennie, proceeded down the river on Tuesday on a trial trip. The result was entirely satisfactory as proving her capabilities for speed. The Ranger is the first of a new class of small screw-vessels between a gun-boat and a despatch-vessel. She is to be completed at Woolwich.

Renown left Malta for Gibraltar on the 27th ult. Her mainmast is defective.

Royal Oak, one of the 91-gun line-of-battle screw-steamers ordered to be commenced at Chatham, is to be of the following dimensions:—Length between perpendiculars, 252 feet; length of keel for tonnage, 213 feet 9¼ inches; extreme breadth, 58 feet; breadth for tonnage, 57 feet 2 inches; breadth moulded, 56 feet 4 inches; depth in hold, 25 feet 6 inches; burthen, 3715 62-94 tons; horse-power, 800.

Severn, 51, screw-frigate, at Chatham, which has been some time in dock converting from a sailing-ship to a screw-rigate, was undocked on Tuesday, and will be taken too Sheerness to be fitted with her engines and machinery.

Surprise, 4, screw, Commander Lord Edward H. Cecil, is ordered home from the West Coast of Africa.

Tribune, 31, screw, Captain G. T. P. Hornby, is ordered home from Vancouver's Island.

Trident.—Notice is given in the *Gazette* that preparations are now being made for the intended distribution of proceeds received and tonnage bounty awarded for the schooner Lydia Gibbs, captured on the 29th May, 1858, by Her Majesty's ship, Trident. Due notice will be given by future advertisements of the date proposed for the commencement of distribution; and, at the same time, the amount of an individual's share in the respective classes will be announced.

Undaunted, 51, being built at Chatham, has had an additional number of hands placed on her, in order that she may be completed and ready to be launched during the present year.

Vesuvius, 6, flag of Commodore Charles Wise, from the West Coast of Africa, arrived in Plymouth on Monday, and brought passenger Mr. Wotton, paymaster of the steam-sloop Renard, who comes home invalided. The Vesuvius was commissioned April 11, 1857, and has made the following captures:—October 9, 1857, the brigantine Bremen, taken off Snake's Island, on the south coast; October 14, 1857, two launches, with 102 slaves on board; and July 12, 1859, two falook vessels, with food and plank for slave purposes. During her commission the following officers have been removed:—Lieutenant Henry Hand, Additional-Lieutenant Constantine J. O'D. Allingham, Additional-Lieutenant Henry C. Wogan, Assistant-Surgeon Thomas W. Hughes, and Assistant-Paymaster Edward A. Burniston. The following deaths have occurred:—James Pemberton, A.B., of fever; Thomas Anderson, A.B., who fell from aloft; William Warner, first-class boy, who fell overboard; and Mr. Wheeler, Assistant-Engineer from the Spitfire, and James Best, both of whom died on the passage home. The Vesuvius is coming round to Woolwich, where her crew will be paid off.

Virago, from the westward for the river, in coming into the Downs during the night of Sunday last, with a hulk in tow, got in contact with a Dutch brig, at anchor, carried away the latter's foremast, and did other damage.

WOOLWICH.—Mr. Goldrack, modeller at the gun factories department at the Royal Arsenal, has been superannuated, after 45 years' Government service, on a pension of 150*l.* per annum. The new tower at the main entrance of the Royal Arsenal in Beresford Square having been completed, the bell formerly used in the laboratory department, and which bears date 1690 (the year in which it was cast), has been affixed, and is of excellent tone. The large Russian bell taken from Sebastopol is now in use at Sir William Armstrong's rifled ordnance department. The branch railway connecting the Royal Arsenal with the North Kent Railway, near the Plumstead station, has been completed, and will be of the utmost advantage for the conveyance of heavy goods and munitions of war direct to various military home stations.

Two serious accidents have occurred to workmen employed in Chatham Dockyard: the first to a hired shipwright, named Broughton, employed on board the screw-steamer Bulwark, 91, who had his leg frightfully smashed by a baulk of oak timber falling upon it; the other accident also happened to a hired shipwright at work on the screw-corvette Orpheus, 21, who, while shaping a piece of timber with an adze, cut his leg so severely as nearly to sever it. Both the unfortunate men were promptly conveyed to Melville Naval Hospital, and attended to by the surgeons at that establishment.

The construction of another gun-vessel is to be immediately proceeded with at Pembroke; she is to be called the Nimble, and is to be built in the same shed and from the same lines as the Espoir, recently launched from No. 6 slip. The Nimble will be the third of these fast despatch vessels built at Pembroke, and the following will be her chief dimensions:—Length between perpendiculars, 145 ft.; ditto of keel for tonnage, 127 ft. 10 in.; breadth, extreme, 25 ft. 5 in.; ditto for tonnage, 25 ft. 1 in.; ditto moulded, 24 ft. 6 in.; depth of hold, 13 ft. She will be fitted with engines of 80-horse power.

The King of Sweden and Norway has awarded a medal to Commander Montagu O'Reilly, R.N., in acknowledgment of his services in heaving off the rocks, last October, in Gibraltar Bay, the Swedish corvette Ornën (Eagle), and the Admiralty have sent out this decoration to the Commander-in-Chief in the Mediterranean for presentation.

The water was admitted on Monday into the old ship basin at Portsmouth, and three out of the four vessels in the docks connected with the basin were undocked, viz.:—Nelson, 91, screw (converted), Stromboli, 6, and Bulldog, 6, both paddle-steamers. The Prince Regent, 90, and the Vigilant, 6, screw, will both be admitted into the basin to-day at high water, and placed in dock; the former for conversion to a screw, and the latter for some slight repairs, &c. The Nelson and Bulldog remove round to-day from the ship to the steam basin.

One of the lanterns composing Mr. H. Ward's apparatus for marine signals, called the "ocean marine telegraph," was again tested at Woolwich on Monday evening, in the presence of Commodore-Superintendent the Hon. James R. Drummond, C.B., Commander Edward Hawker, and other officials, by desire of the Lords of the Admiralty, preparatory to its being appropriated for the service of Her Majesty's ships of war. The lantern, fitted with the improved lever system of working the signals from the deck of a ship, is of quadrilateral shape, exhibiting an equal light to the four points of the horizon. This was hoisted at the masthead of Her Majesty's ship Fisgard. The steam-tug Bustler, having Mr. Thomas, Mr. Hall, and other naval officers on board, got under weigh and proceeded down the river to carry out observations and report on the effect. The lights were pronounced to be exceedingly good, and were easily distinguished from the ordinary signal lamps at present in use, among which the lantern was placed. A stiff breeze was blowing at the time, but the wind did not interfere with the thorough working of the apparatus, which was perceptible on board the Bustler until the bend of the river obstructed the sight. A further trial will be made in a few days with the complete set of three lanterns. The Commodore expressed himself extremely gratified with the invention.

Two despatch gun-boats, named the Pennan and the Steady, were launched on Wednesday from the ship-building yard of Messrs. W. C. Miller & Son, Sefton Street, Liverpool. Their dimensions are:—Length between perpendiculars, 145 feet; length for tonnage, 127 feet 10 inches; extreme breadth, 25 feet 4 inches; breadth moulded, 24 feet 6 inches; depth of hold, 13 feet; tonnage, 425 tons; draught of water when fully equipped, 9 feet 3 inches forward, and 11 feet 6 inches aft. The engines, of 80-horse power, will be supplied by Napier, of Glasgow. They are to carry each one 95-cwt. pivot-gun and four 24lb. carronades, and are to be rigged as three-masted schooners. The launching was very successfully accomplished, and the beautiful model of the two vessels was much admired by professional men who were present. Messrs. Miller have also on hand two more gun-boats, to be named the Heron and Dotterel, of 267 tons each, which are intended to be more heavily armed than those just launched.

The Admiralty regulations for the augmentation of the Navy, by which an unlimited number of first-class lads has been hitherto admitted on board the receiving ship Fisgard, at Woolwich, were yesterday recalled, the admission of all classes to be reduced to 20 per week henceforth.

According to letters received by the last Peninsular mail, the following ships were at Gibraltar, viz., Marlborough, Agamemnon, James Watt, Victor Emmanuel, Cæsar, Doris, Cadmus, Scylla, Coquette, Quail, Mohawk, and Redpole.

Mr. Stewart Harvey, R.N., F.R.G.S., left Southampton by the Peninsular and Oriental steamer, on Saturday last, for Malta, to join the flag-ship of Admiral Rodney Mundy.

There are now 4 fine sailing-frigates, viz., the Phœbe, 51, the Sutlej, 51, the Severn, 51, and the Phaeton, 51, being converted into screw ships.

From the monthly return of H.M. ships and vessels which are complete, and of those which are being brought forward,

Digitized by Google

the following are mentioned as receiving their machinery :—Victoria, 121, Prince of Wales, 131, Duncan, 101, and Nelson, 90, at Portsmouth; the Rodney, 90, at Chatham; the Waterloo, 90, and the Irresistible, 80, at Sheerness; and the Royal William, 90, at Devonport.

The following ships are in the steam basin at Portsmouth :—Victoria, 121, screw; Duncan, 101, screw; and Nelson, 91, screw; receiving their machinery, Queen Charlotte, three-decker, fitting out for Excellent; Bacchante, 51, screw, taking on board her heavy weights; Hornet, 17, screw; Ariel, 9, screw; Bulldog, 6, paddle; Bee, steam tender to Excellent, and a screw gunboat, completing repairs to hull and machinery. The Vigilance screw, and Alban paddle, taking out boilers for repairs; and the Firebrand, 6, paddle, Commander Bruce, completing repairs to hull and machinery. At Spithead are the Queen, 86, screw, Capt. Charles F. Hillyar; Diadem, 32, screw, Capt. Cockburn; Ariadne, 26, screw, Capt. E. W. Vansittart and the Prussian frigate, Thetis, and schooner Frauenlob.

In the course of last autumn the Lords of the Admiralty drew the attention of their colleagues at the Treasury to the necessity of keeping up a number of gun-boats available for the protection of the shores and the various mercantile ports of the country *en cas de besoin*, and to the growing demands for such gun-boats in the colonies. The Surveyor of the Navy stated that of the original number of gunboats—161—38 had been sent abroad, and accordingly suggested that so serious a deficiency should be supplied as soon as possible, by ordering, in addition to the 18 boats of 80-horse power then (September, 1859) being built, 20 of 60-horse power, of about 268 tons, and of an improved design, the cost of which would be 206,000*l*. (134,000*l*. for hull, and 72,000*l*. for machinery). The Lords of the Treasury were pleased, in October, to authorise the Admiralty to commence forthwith the construction of 10 additional gun-boats.

There are several surveys now in progress, as follows :—Home Surveys.—North Sea and East Coast; Devon, Cornwall, South Coast; Bristol Channel; Mull and Argyleshire; Skye and Inverness; Sound of Harris; East Lock, Tarbet; Antrim and Down; Kerry, West Coast; the Channel Islands. Foreign Surveys.—The Coast of Syria; the Greek Archipelago; the Cape Colony; Torres Strait, Australia; China Sea; Coast of Tartary; Vancouver's Island; West India Islands; Bay of Fundy; and the Gulf of and River St. Lawrence.

COAST GUARD OFFICE, Feb. 9.—APPOINTMENTS.—Inspecting-Commander—Commander Hugh M. Elliot, to Weymouth Division, vice Luckraft, appointed to Castor, additional for service in Hastings.

THE RECENT "SCREW" TRIALS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The "screw" trials of the Mersey and the Ariadne have attracted considerable attention in the Service, but not more than a subject of such vital importance as the speed of a ship of war deserves. One of the prime qualities of a steam ship of war is celerity of movement; for of two vessels, the equals of each other in every other respect, the one possessing the greatest speed has a decided advantage over the other, and in a contest is most sure to win. Speed is also intimately connected with, and has reference to, the use of the guns, by which alone, as the means, are the instruments of power by which important results are to be accomplished. To place a ship's battery in the presence of an enemy's, or beyond his reach, in the shortest possible time, and to use it with the greatest possible effect, are a few of the advantages to be derived by mere speed. And to this end we must work, and the measured mile in Stokes Bay will be, as it ought to be, a great test, not only of the ability of our naval architects, but of the merits of rival "screws."

But, sir, it is desirable not only to know how fast our war ships can steam, but also how long they can steam, or in other words, how many days coal they can stow away. Coal is fast assuming an importance in warfare at sea, equal to powder. Even with the utmost economy our lines-of-battle cannot stow away more than a few days fuel, whether steaming at full speed or expansively. So that exhaustion of coal on the eve of battle during a protracted conflict, or from any other contingency, would be a disaster of the greatest magnitude.

I happen to know that our gallant neighbours the French are bestowing considerable attention upon the structure of their ships of war to enable them to carry a large allowance of fuel, and it is asserted by the Imperial authorities that their type ship the Napoleon can stow away ten days consumption at full speed of 12¼ knots an hour. If this statement is true, and there seems no reason to doubt it, our warlike neighbours possess a secret it would be as well if our shipwrights knew.

We undoubtedly have some very fine ships in the Navy of the 121 gun class, but they carry only 8 days coal. The Renown is a remarkable fine ship, and steams 12 knots an hour, but the 91 gun class carry upon an average only 6 days coal. The frigate class, of which the Imperieuse is a type-ship, carry 8¾ days coal, and lastly the heavy ordnance frigates, like the Diadem, carry only 6 days coal. Can it be that we are behind our neighbours in this important particular?

Again, another consideration intimately connected with the "measured mile" test, is the uniform rate of speed required in a screw fleet. We have been building new ships for years past without adapting their horse-power to their broadside force and their displacement. Thus the Royal Albert, 131, has engines 500 horse-power, and her displacement is 5572 tons. The Marlborough, 130, engines 800 horse-power, displacement 6000 tons. The Renown, 91, engines 800 horse-power, displacement 4890 tons. The Princess Royal, 91, engines 400 horse-power, displacement 4916 tons.

If horse-power indicates speed, then it is evident that the different velocities of the above ships would prevent them from acting in a combined fleet with full effect. The Renown and the Marlborough would be retarded by the Royal Albert and the Princess Royal, and the squadron would be deficient in that most important quality—speed. It is evident, therefore, that in a fleet, no matter how numerous, the speed of the whole line of battle should be as nearly uniform as possible, for if the fleet acts in unison, the speed of the whole is the speed of the slowest ship.

If you think the above remarks upon the coal stowage and uniform rate of speed in our ships of war (subjects now receiving great attention in the dockyards of our great ally) worth noticing, I shall be obliged by their insertion in your admirable paper. Yours obediently,

Portsmouth, Feb. 9. AN OLD "SCREW."

UNIFORM OF THE ROYAL NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Is it the custom for officers of the Royal Navy to wear uniform that denotes their rank? Marry is it; but (as it appears) a custom more honoured in the breach than in the observance; to wit, surgeons in the Navy rank with majors and lieutenant-colonels in the Army, but wear the same uniform as lieutenants in the Navy, who rank only with captains. Masters of the fleet and inspectors of steam-machinery, wear the same uniforms as commanders, though they only rank with lieutenants.

Assistant-paymasters rank with mates; assistant-surgeons and second-masters' mates rank with lieutenants in the Army; assistant-surgeons with lieutenants and captains, and second masters with ensigns; in essentials they all wear the same uniform; second-masters and midshipmen rank with ensigns in the Army; second-masters, as shown above, wear the same uniform as mates; but midshipmen the same as masters' assistants, who have no rank at all.

Assistant-engineers have all the same nominal rank, but wear three distinct uniforms. Warrant-officers rank with second-masters, but wear no appropriate uniform to denote that rank.—I am, sir, your obedient servant,

SCRIBE.

THE NAVY ESTIMATES.

The Navy estimates for 1860-61 were published on Thursday. The grand total sum required to be voted for the ensuing financial year is stated to be 12,802,200*l*., against 11,775,718*l*., thus exhibiting a net increase of 1,026,482*l*. There is an increase on all the items except No. 8 (wages to artificers at home), No. 11 (new works, &c., in the yards), No. 14 (half-pay).

The effective services take 10,971,102*l*. out of the grand total of 12,802,200*l*. The items are—1. Wages to seamen and marines, 3,476,757*l*. 2. Victuals for the same, 1,458,087*l*. 3. Admiralty-office, 160,280*l*. 4. Coast-guard Service, Royal Naval Coast Volunteers, and Royal Naval Reserve, 287,725*l*. 5. Scientific Branch, 64,322*l*. 6. Establishments at home, 174,378*l*. 7. Establishments abroad, 30,953*l*. 8. Wages to artificers at home, 1,440,681*l*. 9. Wages for the same abroad, 63,686*l*. 10. Naval stores for building and repair of ships, 3,204,434*l*. 11. New Works, &c., in the yards, 444,049*l*. 12. Medicines and medical stores, 73,000*l*. 13. Miscellaneous services, 92,750*l*.

Half-pay figures for 691,262*l*.; military pensions, &c., for 488,806*l*., and civil pensions and allowances for 173,030*l*. For the Army Department (conveyance of troops) the sum of 478,000*l*. will be asked.

The naval force will consist of 66,100 seamen and boys in the fleet and Coast-guard service; 18,000 marines and 1400 civilians in the Coast-guard service—making a grand total of 85,500 men.

30,530*l*. is asked for bounty money, &c. to volunteers into the "Royal Naval Coast" service, and 100,000*l*. for annual "retainers" to volunteers into the "Royal Naval Reserve," conduct money, expenses of billeting, and other expenses. The Coast-guard service, properly so called, will cost 149,068*l*. The gross total for this service, the Royal Naval Coast Volunteers, and the Royal Reserve, is, as already stated, 287,725*l*. 9500 men are to be employed in the Coast-guard service. 20,000*l*. is provided as bounties for seamen who will volunteer into the Royal Navy ("wages" branch); and 20,800*l*. for good conduct pay to petty officers and men after certain periods of service. There will also be "half" bounty and gratuitous issues of clothing and bedding to seamen and boys, besides tobacco and soap.

The navy proper will include 54,000 officers, seamen, and boys, to be employed in the "fleet;" 2000 to be employed in surveying, troop, and store-ships, and 2000 boys to be trained in training-ships.

UNITED SERVICE INSTITUTION.—At the evening meeting, on Monday, of the members of this institution, in Whitehall-yard, Captain Wheatley, R.N., read a very interesting paper on "A new system of building and arming ships of war, and the advantages of this improvement," in the presence of a number of distinguished and scientific gentlemen, there being in the audience, among others, Major-General Sir B. T. Phillips, Sir James Tyler, Major-General Ingram, Colonel Bowater, Colonel Whitelock, Count Platen, Captain Fishbourne, R.N., C.B. (who occupied the chair), Captain R. Collinson, R.N., C.B., Captain Nollish, R.N., Captain Beamish, R.N., Captain Howes, R.N., Mr. Stirling Lacon, H.E.I.C.S., and Captain Tyler, R.E. Captain Wheatley takes for the model of his ships the fast-sailing vessels of the Indian seas, which are built very fine fore and aft, and resemble in form the yacht America. He proposes to propel ships with paddle and screw combined, and to arm them with two guns of the calibre of 16 inches, carrying a round solid shot weighing upwards of 400 lb., or a bolt of 1000 lb. to be propelled by a charge of 76 lb. of powder. The fore and aft parts of the ships are to be coated with plates of iron of sufficient thickness to resist cannon shot, which would rebound from the sloping bows without penetrating. Six of these smaller ships, Captain Wheatley believes, would be more than a match for three times the number of three-deckers or large frigates; and, even allowing the latter to have greater speed, they would be inevitably destroyed before they could come to close quarters with the fore-and-afters, which during the chase would always have their guns bearing with most advantage on the enemy, whilst the latter would be unable to fire any of their heavy guns. Some dissent was expressed to the gallant officer's views.

A large number of men belonging to the various East India depôts at Chatham garrison have recently volunteered for the Army Hospital Corps, to which branch of the service they have been transferred.

THE MILITIA.

2nd Royal Lanarkshire Militia—Captain Walter Brisbane Parth to be Major, vice Harrington, resigned.

Artillery Regiment of Royal Lancashire Militia—Edward James Passmore, Gent., to be Second Lieutenant, vice Robert Hale, promoted.

King's Own Light Infantry Regiment of Militia—George Powell Pemberton Pigott, Gent., to be Ensign, vice Chittenden, retired.

1st or Royal East Middlesex Regiment of Militia—Edward Steele, Gent., to be Ensign, vice M'Gregor, promoted; John Peters Charles Lowder, Gent., to be Ensign, vice Blyth, promoted.

Northamptonshire Militia—Thomas Hungerford Powell, Esq., late a Captain in the 54th Regiment of Foot to be Captain, vice Henry Minshull Stockdale, resigned; William Robinson Rose, gen., to be Lieutenant, vice Hewett Linton, resigned.

Shropshire Regiment of Militia—Job Henry Kinchant, Gent., to be Lieutenant, vice Pelham, promoted.

2nd Royal Surrey Regiment of Militia—Captain James Pope, from half-pay Staff Captain, to be Adjutant, vice De Teissier.

Queen's Own Royal Regiment of Staffordshire Yeomanry Cavalry—Lieutenant John William Sneyd to be Captain, vice Davenport, deceased; John Hardy, Gent., to be Lieutenant, vice Des Vœux, resigned; Colin Campbell, Gent., to be Lieutenant, vice Sir William Pilkington, Bart., deceased; John De Heley Mavesyn Chadwick, Gent., to be Lieut., vice Peel, resigned; the Hon. Albert Sutherland Leveson Gower, commonly called Lord Albert Sutherland Leveson Gower, to be Cornet, vice Ridgway, resigned; the Hon. Alexander Victor Paget, commonly called Lord Lord Alexander Victor Paget, to be Cornet, vice Lord Henry Paget, promoted; the Hon. Henry Anson Cavendish to be Cornet, vice Kynnersley, promoted.

MEMORANDUM—Queen's Own Royal Glasgow Yeomanry Cavalry—Lieutenant John Middleton has resigned his commission, and the resignation has been accepted.

Royal North Lincoln Militia — Ensign Walter James Tweed to be Lieutenant, vice Owsten, promoted; Feb. 3.

West Kent Regiment of Yeomany Cavalry—Lieutenant and Adjutant Thomas Royall Silver to serve with the rank of Captain; Feb. 4.

4th or Royal South Middlesex Regiment of Militia—John Cooper FitzMaurice, Captain, Bengal Army, to be Captain, Vice Blencowe, resigned; Jan. 28.

Royal Glamorgan Light Infantry Militia—Lieut. Henry Adrian Burrowes to be Captain; Feb. 4.

Durham Artillery Militia—Thomas James Cunninghame to be Second Lieutenant, vice Quayle, resigned: Feb. 8.

West Essex Militia — Harry Charrington Fisher to be Lieutenant, vice McKenna, resigned; Feb 1.

West Essex Yeomanry Cavalry—Major George Palmer to be Lieutenant-Colonel; Captain John Watlington Perry Watlington to be Major, vice Palmer, promoted; Lieutenant George Palmer, jun., to be Captain, vice Watlington, promoted; Charles Lawrence Ind, Gent., to be Cornet; Feb 1.

1st Regiment of the Duke of Lancaster's Own Militia—Charles William Powis, Gent., to be Ensign; Feb. 4.

2nd Regiment of the Duke of Lancaster's Own Militia—Ensign Henry Currey to be Lieutenant; Feb. 4.

Fifeshire Militia Artillery—Thomas Mackinlay, Gent., to be Second Lieutenant, vice Stamford Robert Lumsdaine, promoted; Jan. 19.

MEMORANDUM.—Worcestershire Militia—Her Majesty has been graciously pleased to accept the resignation of the commission held by Lieut. Edward James Pasmore in the above regiment.

In the House of Commons the other evening, Mr. Sidney Herbert made some explanations regarding the disembodiment of the Militia. He referred to his statement last year in moving the army estimates, that in his opinion a large and continuous embodiment of the militia in times of peace was radically wrong in principle. It was unwise to anticipate the resources which ought to be kept in reserve for periods of emergency. Holding that opinion, he followed the course that he had announced, viz., that of gradually disembodying the militia regiments in proportion as the regular troops were available for taking their place. This operation was rendered very uncertain, owing to the requirements of India and to the demand upon our regular force caused by the recent unfortunate calamity in China.

His Royal Highness the Duke of Cambridge, attended by the Assistant-Adjutant-General, inspected the division at Aldershot on Wednesday last. The troops had received orders to be ready to turn out at half-past 8 A.M., and at 9 o'clock the 1st Brigade, under the command of Lord William Paulet, C.B., consisting of the 1st Battalion 11th Regiment, commanded by Colonel Moore; 2nd Battalion 19th Regiment, commanded by Major Bates; 58th Regiment, commanded by Colonel Bridge; and the Royal Elthorne Militia, commanded by Major Grange, was moved up to the Brigade parade ground in the North Camp, and formed up in a mass of contiguous quarter-distance colours. The Duke arrived shortly afterwards, when the officers and colours were called to the front, and a royal salute given. The colours of the regiments being lowered, with the exception of the 2nd Battalion 19th Regiment, which is still without its colours. The 19th Regiment was then put through the bayonet exercise by Ensign Read, the Adjutant, and their performance of this exercise elicited the entire approval of the Duke. The regiments afterwards marched past in quick time, and returned to their quarters. The regiments in the South Camp were then similarly inspected, the Duke expressing his disapproval of the loose drill so much a dvocated by civilians. It is as absurd as it would be disadvantageous to make the British soldier a weak copy of the French Zouave: a nation should fight according to its own peculiar genius.

Mrs. Hodson, widow of Major Hodson, of Hodson's Horse, had this week the honour of presenting to Her Majesty, in person, two swords, one of which belonged to Jehan Geer, A.D. 1605, the other to Nadir Shah, and were obtained by Major Hodson from the King of Delhi.

VOLUNTEERS.

THE CUSTOMS VOLUNTEERS.—A public meeting of the "Customs Volunteer Corps" was held in the long room on Thursday evening pursuant to notice. Three additional ensigns were appointed, by vote of the effective members present, when Messrs. Eden, Hamel, and Cope were elected. The first-mentioned is a relative of various officers in Her Majesty's military and naval services, who bear that name, and he has been "*under fire*" several times. Into his arms fell the first sailor shot on board the Terrible, man-of-war, while before Odessa; he wore on his breast two medals. A resolution was moved and seconded, that a new rule should be issued, allowing the friends and relatives of effective members to join the corps upon being recommmended by three members, but on the vote being taken, the resolution was lost by a small majority. However, after a resolution to the effect that *sons and brothers* should be admitted, was carried by an overwhelming majority, which will likely cause the original resolution to meet with a successful introduction upon a subsequent occasion, which is much to be desired, for there are numbers of most respectable persons connected by business with the customs, such as Custom House agents, merchants, Custom House clerks, and the officials at the Docks, who would be most eligible persons, and whose employers would no doubt greatly aid the treasury of the corps by donations, subscriptions, &c. The question of uniform was discussed, and it was concluded that the uniform worn by several members should be in the interim adopted on trial, accepting at once as unexceptionable the dark grey as the colour of tunic and trousers, while the question of ornaments upon the belt, relief of the black facings by lace or braid of scarlet, &c., could be attended to afterwards. The button adopted is to be lettered with the initials, "H. M. C. R. V.," that is, "Her Majesty's Customs Rifle Volunteers." The cap is to have a star of Brunswick in front, and a plume may be afterwards added.

LONDON RIFLE BRIGADE.—On Saturday the London Rifle Brigade mustered in great force at the Guildhall. At three o'clock about 600 of the corps marched to the London Bridge Station, and proceeded by rail to the Crystal Palace grounds, where they were put through the various evolutions, which were executed with considerable efficiency, and showed the great care that had been taken in drilling them. The volunteers were headed by the band, which has recently been increased in number, and was most efficient. On Her Majesty's approval of the appointment of the Duke of Cambridge to the colonelcy of the brigade, it is expected that the corps will be marched up to the Horse Guards for his Royal Highness's inspection.

A considerable section of the London Rifle Brigade mustered in Guildhall for drill on Tuesday evening, under the command of Lieutenant-Colonel Hicks, who stated that he had received a very flattering letter from Colonel M'Murdo, Inspector of Volunteers, which he thought it his duty to communicate to the corps. The letter was handed to Lieutenant T. D. Sewell, who read as follows:—"The lieutenant-colonel commanding has much pleasure in publishing the subjoined letter, which has been this day received from Colonel M'Murdo, the Inspector of Volunteers, and feels convinced that this brigade will continue to deserve the approbation of that distinguished officer:—'Colonel M'Murdo, Inspector of Volunteers, presents his compliments to the officer commanding the London Rifle Brigade, and having observed that corps in march on Saturday evening last, at half-past 6 o'clock, as it passed along London-bridge, he thinks it due to the members who compose it to express the high opinion he entertains of their efficient and soldierlike appearance. A tolerably accurate estimate of the state of discipline existing in a regiment can generally be made by observing it on an ordinary march (perhaps more so than on parade), and the example of perfect steadiness and formation on this occasion, when the evening was dark, and the thoroughfare on the bridge sufficient to distract and confuse older soldiers, was very creditable, and promises to confirm the most favourable expectations which have been formed of the present important movement.'" It is perhaps hardly necessary to add that the volunteers received this communication with cheers, or that they felt highly elated at such an opinion of their proficiency from a high military authority. Mr. Edward Mappin, of the firm of Messrs. Mappin Brothers, King William Street, has expressed his intention to present (this year) a silver cup, five-and-twenty guineas, as a prize to be shot for, and a similar presentation every succeeding year; the arrangements to be confided to the Lord Mayor and Council.

LONDON IRISH.—On Wednesday night a meeting was held at Myddleton Hall, Islington, for the enrolment of members in that and the adjoining districts, on behalf of the London Irish Rifle Volunteers. The meeting, which was numerously attended, was presided over by Mr. W. Fleming Gardener, one of the local committee. Mr. Dempsy, the hon. secretary, apologised for the absence of the Marquis of Donegal and other members of the council, and observed that he could assure the meeting the noble marquis took the most lively and active interest in the organisation (hear, hear). This the marquis had done from the beginning of the movement, he (the marquis) being the first to head the list of council, which now numbered some sixty of the nobility and gentry of Ireland (applause). The council were exceedingly anxious to meet the views of the corps in the most liberal spirit; and with this view they had at once adopted various alterations in the uniform, as recommended by the effective members, which gave general satisfaction (hear, hear). The council had also resolved to give the corps a voice in the nomination of officers, and a general meeting of the whole body was announced to be held on Thursday evening, at Hungerford Hall, to enable the corps to nominate gentlemen for the consideration of the council on Saturday next (hear, and cheers). After some further explanations from the secretary, several gentlemen addressed the meeting, and a number of new members enrolled themselves. The proceedings then terminated.

LONDON SCOTTISH.—A general meeting of the members of this corps was held at the hall of the Scottish Hospital, in Crane Court, Fleet Street, on Saturday night, for the piurpose of discussing several matters. Lord Elcho in the chair.

His lordship having briefly opened the business of the meeting, a long discussion ensued as to the pay and conduct of the sergeant at the head of the drill, which resulted in his lordship saying emphatically, that what he had done in the matter, already well known to them, he had done for the best. His lordship then went into detail as to the uniform, cloth, accoutrements, &c., connected with the corps, and paid a warm tribute to the assistance which they had received from the managers of the Oriental Bank, who had shown great anxiety in promoting the interests of the corps.

A discussion of some two hours' length followed on the question of the election of officers, the following rules being those bearing on the subject:

Rule 10. "A council shall be formed, consisting of the field-officers, captains of companies, and adjutant, likewise of a certain number of honorary members of the corps chosen or re-elected by the members at the annual general meeting, provided always that the number of members of council so elected in no case exceed the number of captains. The council to meet at least once a month. The senior officer to preside and have a casting vote."

Rule 11. "The appointment of all officers is vested by Act of Parliament in the lord lieutenant, subject to the Queen's approval. The commanding officer will propose gentlemen to the lord lieutenant for commissions, as officers, after consultation with the council, and after having submitted the names to a general meeting of the members of the corps," *who shall be entitled to exercise a veto on each name so submitted.* (The words in italics are omitted by the War Office.)

The following address in connection with this subject had also been presented:—

"*The London Scottish Volunteers.—To the Acting Committee.*—The undersigned members observing that other corps elect their officers, respectfully request that a meeting of the corps be convened on an early day, to take into consideration the mode in which officers should be nominated in this corps, and to secure to themselves the natural privilege of election."

The result of the discussion was Lord Elcho's declaration that he declined in any way to help to cancel the nominations which he had already sent in. His lordship added that he had the pleasure of informing them that they were now a battalion of five companies of one hundred each, with a lieutenant-colonel at its head, and he was proud to add in his own person (cheers). After more discussion, the following resolution, moved by Mr. Robertson, and seconded by Mr. Bonham, was carried by a considerable majority:—"That a committee be formed to draw up a memorial to the lord-lieutenant, expressing the desire of the members of the corps to have a voice in the nomination of officers."

The meeting shortly after separated at a late hour.

ST. PANCRAS AND NORTH MIDDLESEX RIFLE BRIGADE.—The services of this corps have just been accepted by Her Majesty, and an intimation of the fact was made on Monday evening to the members on drill at the Vestry-hall. The first company is already formed, and its officers will have been elected by ballot by this evening. There are a sufficient number of enrolled effective members to form two other companies, and steps will shortly be taken for that purpose. *Negociations are, moreover, in progress for an* amalgamation of the corps with that belonging to University College.

TOWER HAMLETS ROYALS.—On Tuesday evening a numerously attended public meeting of the inhabitants of Limehouse and the surrounding district, was held at the National School-rooms, Featherstone Buildings, Limehouse, for the purpose of promoting the formation of this corps. The meeting was presided over by the Hon. George Byng, M.P. Among those present on the platform were George Frederick Young, Esq., Charles Jones, Esq., William Cotton, Esq., A. S. Ayrton, Esq., M.P., and many other gentlemen connected with the neighbourhood. The resolutions were passed unanimously, and a committee was appointed for the purpose of collecting subscriptions in order to form the corps, and to carry out the objects contemplated by the movement.

WEST MIDDLESEX RIFLES.—A strong muster of the members of the above corps met at head-quarters, Lord's Cricket Ground, on Tuesday evening, and marched, under the superintendence of the Adjutant, to St. John's Wood Barracks, for parade, headed by the band of the Coldstream Guards. It being the first appearance of the corps in marching order, it caused no little excitement to the inhabitants of St. John's Wood and its vicinity; and the steady, soldier-like appearance of the whole body elicited marks of approbation along the whole line of route. On reaching the barracks, they were marched into the riding-school, which has been brilliantly lighted with gas, by the Government, and granted for the weekly parade of the West Middlesex Rifles; and after an hour's active drill and instruction in battalion movements, the manual and platoon exercise, &c., they were once more formed into column and marched back to head-quarters. A Volunteer band, in connection with the corps, has been established, and, it is anticipated, will be ready to accompany the enrolled members in their march to and from parade every Tuesday evening. The number of members enrolled each week is steadily on the increase, and the drills being fixed to suit the convenience of members generally, both at head-quarters and the Portman Barracks, as also at Notting Hill, it is anticipated the corps will speedily double its present four companies.

BERKSHIRE.

READING RIFLE CORPS.—This corps had a field-day on Monday, and as the weather was beautifully fine the concourse of people attracted to the drilling-ground was very great. There were present the officers of corps established in Newbury, Windsor, and several other towns. The members of the Corps assembled on the ground at 2 o'clock, and marched thence, preceded by a band, to the Corn-Exchange, in the market-place, to take the oath of allegiance. Captain-Commandant Sir Paul Hunter, and all the officers of the corps were present, When the Captain-Commandant intimated that all were ready to take the oath of allegiance, the Mayor addressed the corps in appropriate terms, and gave his opinion that the movement was calculated to confer great benefit on the country. Sir Paul Hunter thanked the Mayor and Corporation for the kind manner in which they had received the corps, and stated that he expected the Lord-Lieutenant of the county (the Earl of Abingdon) would have been present, but his lordship, at the last hour, had sent to state that he was unable to be among them. His lordship had also conveyed the intimation that Major Loyd Lindsay, who distinguished himself at the battle of the Alma, and who wore on his breast the Victoria Cross, had been appointed colonel of the Berkshire regiment, the number raised in the county being now sufficient to render necessary the appointment of such an officer. (Cheers.) The oath of allegiance was then administered in groups, and the proceedings occupied nearly an hour. A banquet took place shortly after 5 o'clock in the town-hall. The chair was occupied by Sir Paul Hunter, who was supported by Lieut.-Colonel Sir Charles Russell, Major Court, Mr. R. Palmer (late M.P. for Berks), the Mayor of Reading (Mr. H. A. Simonds), Mr. J. Andrewes (the late mayor), Messrs. Darler and Exall (aldermen of the borough), Captain Lang (Royal Berkshire Militia), Captain Purvis, Major Montresor, Mr. R. Gibson, Mr. H. Burr, and about 160 other influential residents in the town and neighbourhood. The loyal and patriotic toasts were duly honoured, Lieut.-Colonel Sir C. Russell and Captain Layton, of the Royal Navy, severally responding to the toasts of "The Army" and "The Navy." Sir C. Russell proposed "Success to the Reading Volunteer Corps." Sir P. Hunter responded to the toast, which was cordially received. The health of "The Members for the County and Borough" was proposed by the chairman, who coupled with it the name of Mr. Robert Palmer, of Holme Park, for 34 years one of the representatives of Berkshire in Parliament. Among the other toasts proposed were "the Bishop and Clergy of the Diocese," responded to by the Rev. R. Mant, "the Lord-Lieutenant," "the Mayor and Corporation of Reading," &c.

CHESHIRE.

NORTH CHESHIRE.—On Saturday a meeting was held of the members of the Sale and Ashton Company, which is now complete, and only waits the sanction of the lord-lieutenant (the Marquis of Westminster) for enrolment. Mr. Matthew Curtis was called to the chair, and, after some preliminary business, the members proceeded to the election of officers. The lieutenant and ensign appointed by the subdivision (Mr. Alfred Watkin and Mr. John Cunliffe) placed in the hands of the meeting their trust, but were unanimously elected for nomination, as captain and lieutenant respectively, Mr. James Frodsham, of the 1st company of the 6th Lancashire Regiment, was elected ensign. Captain Watkin nominated and offered for the approval of the meeting the non-commissioned officers, and also a committee to carry out the non-military business of the corps Full companies have been formed at Altrincham and Bowdon, as well as at Northen, Timperley, and Knutsford; and at Lymm they hope soon to announce completion. It is intended that the various companies shall form a battalion, and have a general muster on Saturdays. The central committee have already selected a ground near the Bollen, below Dunham Park, for the erection of butts and a parade ground; and it is hoped that during the summer the North Cheshire men will be able to offer themselves in friendly rivalry with their Manchester brethren. The uniform adopted is a grey, with black braid in the front, dark green cuffs, collar, and stripe on the trousers; with cap and shako. Only officers to wear the chain and whistle.

EASTERN COUNTIES.

At Sudbury 43 effective members have been obtained; at Saxmundham, upwards of 60; at Cambridge, 100; and at March, 55. A sixth company has been formed at Norwich, but it is not proposed to enrol more than 500 men for the battalion. At Eye about 100 effectives have been enrolled; and at Woodbridge, Dereham, Halesworth, Harwich, and other towns, satisfactory progress is being made.

ESSEX.

9TH ESSEX (SILVER TOWN).—On Saturday this corps assembled at the Railway Terminus, North Woolwich, and, headed by the very excellent band, proceeded to the works of Messrs. W. Silver, where the deputy-lieutenant of the county (Gurney Fry, Esq.) administered the oath of allegiance to them. The ceremony occupied about two hours, the number of volunteers being nearly 200, wholly composed of the members of Messrs. Silver's establishment. The corps was under the command of Hugh A. Silver, Esq., who is the captain elect, and, considering the short time they have been in training, they presented a very steady and soldier-like appearance. The proposed dress, which will be presented gratuitously to the corps by Messrs. Silver and Co., consists of a dark grey, with black facings. The oaths having been administered, the corps was put through its various exercises, and great satisfaction was expressed by all present.

HAMPSHIRE.

SOUTHAMPTON.—The Southampton Rifle Volunteers have made wonderful progress in their drill. Late on Tuesday No. 2 and 3 companies, commanded by their Captains, Le Feurre, and Alges, marched from their drill room, headed by their fine band, through town, and the towns-people were perfectly surprised at their very great advancement. The six companies are now perfect in the amount of men for each company, and are all well up in drill. The 2nd and 3rd are a little a-head of the other companies, from the great attention of their officers, and the good, kind feeling existing amongst the men "determined to do their work." The corps as yet has not been recognised by the Government.

KENT.

WOOLWICH ARSENAL.—A difficulty of an extraordinary nature, and which threatens to counteract the progress of the Volunteer movement at the Royal Arsenal, has occurred. It appears that various artillery and rifle companies have been formed in the Royal carriage and laboratory departments, and the officers were elected at meetings of the members, Colonel Talbot, R.A., being commandant of the whole force. On Wednesday last a deputation consisting of Colonel Talbot and others, waited upon the lord-lieutenant of Kent, Lord Sydney, for the purpose of presenting the

Digitized by Google

names of the officers elected by the companies; but his lordship objected to some of the first lieutenants on the ground that they are not salaried officers at the Royal Arsenal, but entered in the books at a certain sum per hour wages. In consequence of this decision, the men of two companies resolved to resign, but at a meeting subsequently held it was arranged that another attempt should be made to induce the lord-lieutenant to recommend the rejected parties for commissions. The officers objected to are highly responsible foremen, &c., at 150*l.* per annum, but this payment is calculated at per hour, and hence the objection.

West Kent.—Cadet Corps.—A new feature in connection with the Volunteer Rifle Movement has been brought forward in the 1st company of West Kent Volunteer Rifles, on the suggestion of Major Scott, for a volunteer cadet corps, to consist of boys from nine to seventeen years of age, who will be required to find a cap and rifle according to the pattern, and pay a nominal sum of 1*s.* per quarter towards the expenses of drill sergeants, &c. The first meeting to receive the names of those desirous of joining the new corps is fixed for Saturday next.

The 3rd company of the Kent Artillery Volunteers assembled at the Pavilion Hotel lawn, Folkestone, on Sunday morning last, being their first public appearance in their uniform. The company were inspected and put through several manœuvres, after which the whole, headed by the band of drums and fifes, marched to the parish church and attended public worship. It is proposed that a dress drill be held on every Thursday evening, and a Sunday chuch parade once a month.

Chatham.—The artillery corps formed at Brompton now numbers nearly 60 members, and arrangements have been made for the drills to be regularly proceeded with, under the direction of the non-commissioned officers of the garrison. At a special meeting of the members, held on Monday evening last, Mr. J. C. Beveridge was unanimously nominated captain of the corps.

LANARKSHIRE.

Glasgow.—From returns published (says the *Glasgow Mail*) it would appear that the total volunteer rifle force formed in the city amounts to an effective strength of 4460, of which 2910 are self-supporting members, and 1550 artisans. To this we may add the estimated strength of the companies in the process of formation at 1100—making the total rifle force at 5560; and, adding again the artillery force, which numbers 620 men, we have a total volunteer force in the city of 6180. In addition to the above, there are various drill classes throughout the city in a forward and flourishing condition, representing a trained but un-uniformed force of about 500 men—making in all of men trained to serve as defenders of our country a body of 6680 men in this city.

LANCASHIRE.

Manchester.—There was the usual musters of the members of the 1st and 2nd Regiments of Manchester Volunteer Rifles at the Infirmary on Saturday. The members of the 1st or 6th Lancashire Regiment assembled at two o'clock, and formed to the sound of the bugle. They marched on the Stockport Road as far as Heaton Chapel. Information has been received from Government that 366 stand of arms are ready for this regiment, and it is expected they will be received shortly. The 2nd Regiment mustered at a quarter past two o'clock, and was inspected by Adjutant Bathurst, afterwards marching to drill at Belle Vue. The 3rd Regiment numbers nine companies, and the drilling goes on satisfactorily.

WARWICKSHIRE.

Birmingham Volunteer Rifle Corps.—At a meeting of the committee of the above corps, held on Friday night last in Birmingham, Sir John Ratcliff, Knt., late mayor, presiding, Mr. Charles Ratcliff, brother of Sir John, said he held in his hand a list of persons who were anxious to join the corps, and of whose qualification he had no doubt. It was his intention to form a company from amongst them, and he should have great pleasure in fully equipping a company of one hundred men, who would advance 1*l.* each towards the cost. Indeed, they had already cheerfully consented to do so. This announcement was received with much satisfaction, and with reference to the proposal, it was moved by Mr. Mason, seconded by Mr. Dixon, and carried unanimously, "That the best thanks of the committee be presented to Mr. Charles Ratcliff for his kind and liberal intentions, as specified in his communications now made; and that the commanding officer of the Birmingham Volunteers be informed that 100 men, approved of by the committee of the Rifle Corps Association, are now ready to be sworn in as another company of the Volunteer Force." So liberal an offer is worthy of imitation on the part of other gentlemen of fortune and position, especially as it is estimated that 1000*l.* per year, exclusive of outfits, will be required to maintain in full efficiency a force as large as the Birmingham corps.

1st North Riding of Yorkshire Artillery Volunteer Corps—Thomas Chaloner, Esq., Captain R.N., to be Major-Commandant; George Newcomen, Esq., Lieutenant R.N., to be Captain; Richard Heselton Gilbert, Gent., to be First Lieutenant; Arthur Henry Turner Newcomen, Gent., to be Second Lieutenant.

Oxfordshire Rifle Volunteers, 2nd Corps—Henry Atkins Bowyer, Esq., late of the 14th Light Dragoons, to be Captain of the 1st Company.

7th Lancashire Artillery Volunteers—Pryce Bowman Hamilton, Gent., to be First Lieutenant; William Rawson Bowman, gent., to be Second Lieutenant.

29th Lancashire Rifle Volunteers—George James Lennock, Esq., to be Captain; Thomas Fair, Gent., to be Lieutenant; William Elsworth Stevenson, Gent., to be Ensign; James Ainley Mouncey, Gent., to be Hon. Surgeon.

32nd Lancashire Rifle Volunteers—William Walker, Esq., to be Captain; George Henry Garratt, Gent., to be Lieutenant; Frederick Allender, Gent., to be Ensign.

33rd Lancashire Rifle Volunteers—Francis Preston, Esq., to be Capt.-Commandant; James Henry Cunliffe, Esq., to be Captain; William Willmott Mawson, Esq., to be Captain; Pearson Biggs Ferguson, Gent., to be Lieutenant; Wheatley Kirk, Gent., , to be Lieutenant; Joe Taylor Fisher, Gent., to be Lieutenant; Sidney Thomas Jewsbury, Gent., to be Ensign; Thomas Harrison Kirkman, Gent., to be Ensign; Joseph Stephen Blair, Gent., to be Ensign.

22nd Lancashire Rifle Volunteers—Edward Brailsford Bright, Esq., to be Captain; Lawrence Hodson Parr, Gent., to be Lieutenant.

4th Lancashire Artillery Volunteers—Henry Duckworth, Gent, to be First Lieutenant; James Foster Watson, Gent., to be Second Lieutenant.

3rd Company of the Hampshire Rifle Volunteers—George Foster St. Barbe, Esq., to be Lieutenant; John Edmund Delap Wilson, Gent., to be Ensign.

4th Company of the Hampshire Rifle Volunteers—Charles Edward Davison, Esq., to be Captain.

11th Company Kent Rifle Volunteers—The Rev. Thomas Sellwood Stephens, M.A., to be Hon. Chaplain.

2nd Company of Staffordshire Rifle Volunteers—Samuel Palmer Goddard, Esq., M.D., to be Hon. Surgeon.

12th Company of Staffordshire Rifle Volunteers—John Nock Bagnall, Esq., to be Captain.

1st Sutherland Rifle Volunteer Corps—The Most Noble the Marquis of Stafford to be Major-Commandant.

3rd Company of Sutherland Rifle Volunteers—Charles Hood, Esq., to be Captain; George Lawson, Gent., to be Lieutenant; John Dudgeon, Gent., to be Ensign.

Renfrewshire Volunteer Rifles—10th Company (Greenock Highlanders)—James Johnston Grieve, Gent., to be Captain; Daniel Maclean, Gent., to be Lieutenant; John Rennie, Gent., to be Ensign.

11th Company (Greenock Highlanders)—Colin Campbell, Gent., to be Captain; Thomas Ballantine, Gent., to be Lieutenant; Allan Weir, Gent., to be Ensign.

12th Company (Greenock Highlanders)—James Steele, Gent., to be Captain; Dugald Ferguson, Gent., to be Lieutenant; Donald Macfarlane, Gent., to be Ensign.

12th Aberdeenshiee Rifle Volunteers—William Keith, Esq., to be Captain-Commandant; Robert Abernethy, Esq., to be Captain; Lessel Stephen, Esq., to be Lieutenant; William Duthie, jun., Esq., to be Lieutenant; John Moir Clark, Esq., to be Ensign; Joseph Rothery Cornwell, Esq., to be Ensign.

1st Company of Kincardineshire Artillery Volunteers—William Thomson to be Second Lieutenant, vice Tindal, resigned.

1st Kircudbright Artillery Volunteers—John Shand, jun., M.D., to be Captain.

1st East York Artillery Volunteers—Burlington company—The Rev. James Thompson, clerk, to be Honorary Chaplain; Edward Samuel Brett, Esq., to be Honorary Surgeon; Jan. 7.

Bungay Rifle Volunteers—John Margitson, Esq., to be Captain; William Mann, Esq., to be Lieutenant; Philip Salter Millard, Esq., to be Ensign; Feb. 1.

South Middlesex Rifle Volunteer Corps—Major the Viscount Ranelagh to be Lieutenant-Colonel; Jan. 30.

London Scottish Rifle Volunteer Corps—Major the Hon. Francis Charteris, M.P., commonly called Lord Elcho, to be Lieutenant-Colonel; Jan. 30.

Queen's Rifle Volunteers—The Hon. Hugh Lupus Grosvenor, M.P., commonly called the Earl Grosvenor, to be Lieutenant-Colonel; Jan. 30.

Glamorganshire Rifle Volunteers—12th Company—James Ward Russell, Esq., to be Captain; Robert Jones, Gent., to be Lieutenant; Richard Ball Collins, Gent., to be Ensign; Feb. 7.

13th Company—Thomas William Booker, Esq., to be Captain; Evan Williams David, Gent., to be Lieutenant; John Partridge Booker, Gent., to be Ensign; Feb. 7.

Cambridge University Rifle Volunteers—Edmund John Mortlock, Esq., B.A., to be Supernumerary Lieutenant; Feb. 6. John Frederick Hardy, M.A., to be Supernumerary Lieutenant; Feb. 7.

10th Surrey Rifle Volunteers—Marcus Sharpe, Esq., to be Captain-Commandant; Benjamin Glover, Esq., to be Captain; Henry Hersee, Esq., to be Lieutenant; William Darnell, Esq., to be Ensign; Robert Knewstub Richmond, Gent., to be Ensign; Feb. 7.

7th Surrey Rifle Volunteers—Sir Charles Tilson Bright to be Captain; Edward Moseley, Gent., to be Lieutenant; Feb. 7.

5th Essex Rifle Volunteers—Charles Caper, Esq., to be Major-Commandant; Jan. 9. George Ramond Birt, Esq., to be Captain; John Hyslop Gordon, Esq., to be Captain; John Hawke, Esq., to be Captain; George Corby, Esq., to be Captain; Richard Phillips Drew, Gent., to be Lieutenant; George Edward Banes, to be Lieutenant; Andrew Chalmers, Gent., to be Lieutenant; James Buckle, Gent., to be Lieutenant; Richard Thomas Barnett, Gent., to be Ensign; William Anderson, Gent., to be Ensign; Alexander Stewart, Gent., to be Ensign; John Henry Thurgood, Gent., to be Ensign; Philip Humbley Banks, Gent., to be Surgeon; Jan 30.

15th Lancashire Rifle Volunteers—John Baron the younger, Gent., to be Ensign; Jan. 31.

31st Lancashire Rifle Volunteers—John George Blackburne, Esq., to be Captain; Hilton Greaves, Gent., to be Lieutenant; William Blackburne, Gent., to be Ensign; Samuel Harris Armitage, Esq., M. D., Honorary Surgeon; Feb. 1.

Haverfordwest Volunteer Rifle Corps—Xavier de Castanos Royds Peel, Esq., to be Captain; Feb. 4.

Renfrewshire Volunteer Rifles—3d Company—Ensign James Anderson MacKean to be Lieutenant, vice Carlile, resigned; Robert Bowman Stewart, Gent., to be Ensign, vice MacKean, promoted; Feb. 8.

9th Company—John Stirling Napier, Gent., to be Captain; John Salmond, Gent., to be Lieutenant; John Starke, Gent., to be Ensign; Feb. 6.

14th Company—Lieutenant William Carlile, of the 3d Company, to be Captain; Andrew Miller, jun., Gent., to be Lieutenant; Robert Peacock, Gent., to be Ensign; Feb. 8.

18th Company—James Miller, Gent., to be Captain; Duncan McIntyre, Gent., to be Lieutenant; Andrew Dunn, Gent., to be Ensign; Feb. 6.

Lanarkshire Artillery Volunteers—6th Company—William Holms, Esq., to be Captain; Duncan McFarlane, Gent., to be Second-Lieutenant; Feb. 6.

8th Company—William Houldsworth, Esq., to be Captain; William Brand Field, Gent., to be First Lieutenant; James Gilchrist, jun., Gent., to be Second Lieutenant: Feb. 2.

Lanarkshire Rifle Volunteers—14th Company—George Guttridge Cunniss, Esq., to be Captain; Thomas Reid Kerr, Gent., to be Lieutenant; Robert Maclean Black, Gent., to be Ensign; Feb. 2.

33rd Company—Thomas Wingate, jun., Esq., to be Captain; James Pinkerton Frazer, Gent., to be Lieutenant; John Heugh Hewitt, Gent., to be Ensign; Feb. 6.

39th Company—John Burns, Esq., to be Captain; Robert Duncan Skeoch, Gent., to be Lieutenant; John Hatt Noble Graham, Gent., to be Ensign; Feb. 6.

43rd Company—John Alexander, Esq., to be Captain; John Campbell, Gent., to be Lieutenant; Daniel Cunninghame Warnock, Gent., to be Ensign; Jan. 31.

Glasgow Northern Battalion—Lieutenant George Anderson to be Captain, vice J. F. Jamieson, promoted; Ensign William Simpson to be Lieutenant, vice G. Anderson, promoted; Patrick Thoms Hendry, Gent., to be Ensign, vice W. Simpson, promoted; Feb. 7.

19th Corps (Glasgow 2nd Northern Battalion)—John Auchinvole, Gent., to be Ensign; Feb. 6.

Ayrshire Artillery Volunteers—2nd Company—Henry James, Gent., to be Captain; Alexander Fullarton, Gent., to be First Lieutenant; William Macrorie, Gent., to be Second Lieutenant; Jan. 31.

1st Company of Inverness-shire Artillery Volunteers—William Fraser Tytler, Esq., to be Captain; Donald Davidson, Esq., to be First Lieutenant; Robert Carruthers, Esq., to be Second Lieutenant; Feb. 4.

2nd Company of Inverness-shire Artillery Volunteers—Eneas W. Mackintosh, Esq., to be Captain; John B. Falconer to be First Lieutenant; John Hendrie to be Second Lieutenant; Feb. 4.

In the House of Commons this week, Captain Gray asked the Secretary of State for War if it was the intention of Government to place the adjutants of volunteer corps (who had been in the regular army) on the same footing as those of the Militia, in regard to their time of service in such corps, counting as line service towards that which entitled them to retiring allowance. Mr. S. Herbert said that the regulations were still under consideration, and would shortly be published.

Some discussion took place in the House of Commons on Thursday evening respecting the delay at the War Office respecting the official completion of the commissions of Volunteer officers, and a question was asked by Major Sibthorp, "whether officers who had been elected by Volunteer corps, and approved of by the lord-lieutenants of counties, but who had not received their commissions from the War Office, would be allowed to attend Her Majesty's levee on the 7th of March." Mr. S. Herbert, in reply, said that Her Majesty had arranged that she would receive, at a court to be held for that purpose, all those officers who had been recommended to lord-lieutenants, and approved by them, and whose names had been approved by the Queen, without waiting for the further formalities. He regretted that there had been any delay in the transmission of commissions. It should be recollected that certain preliminaries had to be complied with. The first requisite was the number of men to form the company. Then the practice-ground must not only be selected but approved by a competent officer; and from the immense number of practice-grounds now to be examined, it was not easy at once to attend to that duty. Again, the correspondence on this subject was not direct with the volunteers, but passed through a third channel. Some allowance must also be made for the enormous and sudden increase of business which the volunteer movement had created at the War Office. When he came into office there were about twenty papers weekly on which decisions had to be taken. Last week the number of papers received was 620; the number dealt with and completed was 621; and the number of letters written besides was 467. Obviously this was a very large business; it had been done before by persons who had been remunerated; but he might safely say that there hardly ever was a business of so much magnitude undertaken for the first time, and conducted with so little complaint, as this business had been conducted by the noble lord to whom he had entrusted it, Lord De Grey and Ripon. And he might say that noble lord had conducted that business with courtesy and satisfaction to every one concerned. All he could say was, that every effort would be made to expedite these matters as quickly as possible; and he trusted that when the great pressure of the moment had passed away there would be no ground for complaint.

We understand that a Rifle Volunteer Ball is to take place on the evening of the 7th of March, the day on which Her Majesty will hold a court specially for the reception of the officers of the Volunteer Corps of London and the different parts of the kingdom. The ball is to take place in the New Floral Hall, adjoining the Royal Italian Opera, Covent Garden, and will be under the immediate patronage of Her Majesty the Queen.

VOLUNTEER UNIFORMS AND THE INCOME-TAX.

9th February, 1860.

Copy of Correspondence respecting the deduction for Expenses incurred by Volunteers in the purchase of Uniforms, Arms, or Accoutrements, &c., in estimating the amount of profits for assessment to the Income Tax.

Letter to the Right Hon. Sidney Herbert, Secretary of State for the War Department.

10th January, 1860, 23, Bedford Row, London, W.C.

Sir,—I beg to solicit your attention to the subject of this letter, which, when the magnitude of the questions it may involve are anticipated, becomes of importance.

As a member of a Volunteer Rifle Corps I am anxious to be relieved from paying Income-Tax upon money expended for uniforms, accoutrements, and fees.

I beg most respectfully to petition for the exercise of your influence to the purpose of obtaining exemption from income tax for profits expended for the necessaries of a Volunteer.

Personally I am devoting both money and time, which I can hardly afford, for the sake of making myself able to bear arms efficiently, and not for amusement or gratification, but

Digitized by Google

under a sense of public duty. In this circumstance, therefore, my desire appears but just and reasonable.

I am, &c.,
(Signed) GEO. L. PURCHASE.

Reply to the above :—

War Office, 17th January, 1860.

SIR,—I am directed by Mr. Secretary Herbert to acknowledge the receipt of your letter of the 10th instant, suggesting that the money expended upon the accoutrements of a Volunteer should not be subjected to Income-Tax, and to inform you, in reply, that he has no power to accede to your request. I am, &c.,
(Signed) DE GREY AND RIPON.

Letter to the Income Tax Commissioners, Somerset House.

27th January, 1860.

GENTLEMEN,—I beg most respectfully to put a question, to which I trust you will give a definite answer.

Is the portion of profits or income expended for the uniforms, arms, and accoutrements (or any of them) of a Volunteer in Her Majesty's service, and as fees for admission and subscription to a Volunteer corps, exempt from Income-Tax? I am, &c.,
(Signed) GEO. L. PURCHASE.

Reply to the foregoing :—

Inland Revenue, Somerset House, London, W.C.
2nd February, 1860.

SIR,—In reply to your letter of the 27th ult., I am directed by the Board of Inland Revenue to state that it is presumed that what you desire to know is, whether or not the expenses incurred by Volunteers in the purchase of uniforms, arms, or accoutrements, &c., are admissible as deductions in estimating the amount of profits for assessment to the Income-Tax. If so, I am to inform you that such expenses are not admissible as deductions. I am, &c.,
(Signed) THOMAS KEOGH.

VOLUNTEER CLOTHING.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A letter, signed "Volunteer," which appeared in *The Times* of Tuesday, and which in every respect corroborated my communication of last week, has been met by a very able reply on the part of Messrs. Isaac and Campbell, the army tailors, who describe the letter of "Volunteer" as "a tissue of charges utterly without foundation." If this description applies to statements of "Volunteer," so does it to mine, and I shall consider it a great favour if you will permit me to dissect the counter-statement published by Messrs. Isaac and Campbell.

They assert that they "successfully competed with others for the production of clothing for the Volunteers." I know nothing of this competition, and having made inquiries at one of the leading tailoring firms in London, I find that my ignorance in this matter is shared by the very men who ought to have been among the competitors. Perhaps Messrs. Isaac and Campbell will inform the world of the names of the firms who sent in "samples of cloth, and patterns of clothing and accoutrements."

Messrs. Isaac and Campbell dwell with satisfaction on their "having been honoured by the commands of a large proportion of the Rifle and Artillery Regiments of Volunteers;" but they forget to state that full three weeks elapsed between the decision of the Committee and the publication of that decision, and that during this interval, "samples of cloth and patterns of clothing and accoutrements" were shown by Messrs. Isaac and Campbell to the committees of various corps, as the very things which had been decided on by Government.

Messrs. Isaac and Campbell admit that the cloth and the cloak of the uniform, which has been officially recommended, are registered; the latter by themselves, the former by the manufacturer whom they have specially retained. It appears that neither belt nor buttons have been registered by them; but, Colonel Evelyn has registered a set of accoutrements, of which Messrs. Isaac and Campbell are sole licensees. There is a distinction in this, though not a difference. But they add that there is a distinct understanding that no royalty shall be charged to Volunteer corps. Royalty is charged on manufacturers who bargain for a licence to make a patented article. Customers never pay a royalty, but simply an enhanced price. If I purchase one of Brown's patent chains, I pay no royalty to Messrs. Brown, and yet the chain is a good deal dearer than it would be if every manufacturer were at liberty to make it.

But then Messrs. Isaac and Campbell assure us that though a number of indispensable items in the Government uniform are patented, and though by some fortunate accident they are the patentees or sole licensees of all of them, the public have no reason to complain. Their charges are far from extortionate, viz., a blouse tunic, trousers, forage cap, and accoutrements complete, for 2*l.* 15*s.* 9*d.* If they will but further assure the public, not that they can supply *a* blouse tunic, &c. &c.; but that *the* set of uniform on view at the War Office, and bearing their name, united to that of Lord Elcho, is to be obtained from them at the modest price they quote, then I admit the public, while it still considers them as monopolists, will not complain of a monopoly which bears so gently upon its pockets. But even then, you, sir, in conjunction with the Editor of *The Times*, will have conferred a great benefit upon the public; for the publication of my letter and that of "Volunteer" has effected a considerable reduction in the price of the model uniform, which about eight days ago was quoted at 4*l.* 4*s.*, *exclusive* of the patent cloak or great coat. A LOOKER-ON.

PAYMASTERS FOR RIFLE VOLUNTEER CORPS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Probably you are aware that in the arrrangement of the various regiments, or corps, of Rifle Volunteers, there are not, as yet, any commissions granted to "Paymasters." Now the inquiry may be made—What can a paymaster have to do in a corps of volunteers who require no pay? Permit me, sir, to reply to this question. There has been an immense amount of work in making all the preliminary arrangements for each company of Volunteers throughout the kingdom, and there will, of course, continue to be a large amount of business matters to attend to constantly in connection with every volunteer corps. There is all the correspondence to write, the management of the funds of the corps to attend to, all subscriptions to receive, and all payments to drill-sergeants, &c. &c., to make; and, in fact, all the actual business work, which must be done by somebody. Now, up to the present time this office of secretary and treasurer combined has been filled, with very few exceptions indeed, gratuitously (involving the sacrifice of much valuable time, the exercise of no little patience, and the incurring no little trouble), by some one gentleman connected with each corps; and in several instances the person so officiating bears, by *per*mission of the lord-lieutenant of the county to which he may belong, the title of "honorary paymaster." This, however, is not a *com*mission; and my object in requesting a few lines of your space is respectfully to suggest that the gentlemen to whom I have alluded should be *commissioned* as "Paymasters" to the various regiments or corps. Unless there is some very strong reason against this proposition of which I am ignorant, I think and believe all the officers of Rifle Volunteer Corps will agree with me, that it is very desirable that the important and continued gratuitous services rendered by honorary paymasters should be recognised by the powers that be, by granting commissions to them. In the event of active service (and how soon that may be no one can foresee), paymasters will then of course be also more especially required. Surgeons to volunteer corps can only be required in the event of active service, yet they receive commissions now.—Your obedient servant,

February 8, 1860. A VOLUNTEER.

THE EYE-CLOSING QUESTION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—"A Captain of Rifle Volunteers," writing to you from Liverpool on the 23rd ult., asks what is done in the army with recruits who cannot close the left eye without closing the right?

You, by the note you appended to his letter, seem to misunderstand his question, and your correspondent "Medicus," in your paper of the 4th inst., tries to be professionally facetious on the subject.

Will you allow me to inform "A Captain of Rifle Volunteers" that the failing is by no means an uncommon one, and the remedy is to tie a handkerchief or wear a patch over the left eye at aiming drill, when the recruit will, in nearly every case, soon acquire the power of closing the left eye firmly, and aiming steadily with the right.

Lytham, Feb. 6. Your obedient servant, P. L.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street (North), Strand, London, W.C.
[Late "Household Words" Office.]

THE ARMY PRINTING OFFICE, 102 & 114, HIGH STREET, PORTSMOUTH.—HENRY LEWIS.—Company Ledgers, Pay Books, Order and Day Books, Defaulter Sheets, District and Garrison Forms.

MR. ALBERT SMITH with his CHINA REPAIRED and MONT BLANC REVISITED, 1859. Every Night (but Saturday) at 8, and TUESDAY and SATURDAY Afternoons at 3 o'clock. Stalls 3*s.*, which can be taken at the Box Office, Egyptian Hall, daily, from 11 till 5; Area 2*s.*, Gallery 1*s.*

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s.* ELSTON, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

MAPPIN'S DRESSING CASES & DRESSING BAGS.—MAPPIN BROTHERS guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' Gentleman's Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l.* 4*s.* Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l.* 12*s.* Mappins' Travelling Dressing Bag for Ladies, 4*l.* 4*s.* The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. MAPPIN BROTHERS, 67 and 68, King William Street, London Bridge, E.C. Manufactory, Queen's Cutlery Works, Sheffield.

HERALDIC STUDIO, 4, OLD CAVENDISH STREET, W.—New Designs for Monograms and Armorial Bearings in every style. Arms, Crests, &c., found by sending Name and County. Sketch, 3*s.* 6*d.* Paintings, Seals, Dies, and every kind of Engraving, in a superior style, by D. T. BAKER.

N.B. Mr. BAKER's ten years' connection with the Heralds' College guarantees correctness and excellence of execution.

"EASTWARD HO!" and "HOME AGAIN," are at the Exchange Rooms, Nottingham.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; it is as harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured permanently the moment it is touched by the dye. In cases at 5*s.* 6*d.*, 10*s.* 6*d.*, and 21*s.* at UNWIN & ALBERT'S, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye.

BANDMASTER.—A NATIVE OF GERMANY, who has served eight years in that capacity in an English Regiment, is now OPEN TO AN ENGAGEMENT. The highest testimonials.—Address C. W. F., Post Office, South Camp, Aldershott; or Messrs. BOOSEY & SONS, Holles Street, W.

BANDMASTER.—WANTS A SITUATION, a GERMAN BANDMASTER of the highest testimonials as to character and competency, whose regiment will shortly be disembodied. He can bring the principal part of the Band with him.—Letters addressed to A. B., care of Messrs. BOOSEY & SON, 28, Holles Street, London, W., will have immediate attention.

NOTICES TO CORRESPONDENTS.

"ONE WHO HAS SERVED AGAINST THE REBELS" is informed that no arrangements have as yet been made regarding the distribution of prize, and that the lists of Indian medallists are not as yet confirmed.

"HUSSAR." You may compete for admission to the senior class at the Staff College next year, should there be a vacancy. The nomination would take place in December. There were three such vacancies this year, and one or more may generally be expected each year.

A Correspondent, who alleges that he has been defrauded of a large sum of money by a peer of the realm, who is also lord-lieutenant of a county, calls our attention to the unfitness of one who is guilty of dishonesty to have the patronage of appointing Volunteer officers, and suggests that the lord-lieutenant may be actuated by corrupt motives. It would be better for our Correspondent, C. C. B., who writes from Exeter Barracks, to state his case in a court of justice.

It is not in accordance with law or etiquette for the eldest son of a deceased officer to wear a British medal either on his right or left breast.

Our Correspondents are requested to make their communications as brief as possible.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not authenticated by the name of the writer, given in confidence to the EDITOR.

The EDITOR begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, FEBRUARY 11, 1860.

In another column will be found a very clear and useful circular by Colonel James Conolly, on the drill which should be adopted by Volunteer Cavalry. It is a force which we should much wish to see largely introduced into this hippodamic country. The Duke of Manchester and some other noblemen and gentlemen have taken a zealous part in promoting the formation of cavalry corps among the Volunteers; but for some reason or other their success is not so great as those who can appreciate the greatness of the services such forces could render in the contingency which the Volunteer movement is intended to meet could desire. It seems to be imagined that the *beaux jours* of cavalry have gone never to return, and that riflemen, Armstrong guns, and loose order, are to have it all their own way in battle—that the days of Montecuculi, Turenne, and, above all, of Marlborough—who made great use of their horse to change the retreat of an enemy into a route, and to secure the victory by tremendous charges in the swell of battle, have passed away. The result of the actions in the Italian campaign have led to the same belief, which was in some degree perhaps initiated by the unimportant part played by our cavalry in the Crimean war, except when Scarlett charged and the Light Brigade was gloriously lost at Balaklava. But the uses of cavalry are immortal as war itself—as long as war is waged on land, so long must cavalry be of great advantage, even though their special powers may not be developed for years together. Above all, in a maritime country invaded by a large regular army, powerful in guns and infantry but weak in horse, as a force under such conditions would necessarily be, cavalry would prove invaluable if they never did more than keep a watch—sustain a constant line of vedettes—menace flanks and rear—destroy supplies—escort and convoy provisions—warn the inhabitants and cut up stragglers, and interrupt communications. The French, impressed by the fact that though cavalry manœuvres and drill require modification, cavalry itself is indispensable, have issued instructions for new modes of formation, and for giving to man and horse united that power of individual action (which is miscalled loose order) possessed by the foot soldier under their new system. In fact, since 1815, European cavalry has not been engaged in battle, whilst infantry and artillery have not only been tested, but exposed to such changes, that the old forms of cavalry combination are now impracticable. The intimate fusion of the three arms has ceased. The independent action of cavalry becomes more necessary, and with the view of showing how it should be accomplished, the circular to which we call attention claims the consideration of Volunteers, whose numbers we hope to see greatly increased before the year has closed.

We have heard it stated that the Second Lieutenant-Colonels of the regiments proceeding to China are about being reduced to half-pay on their quitting the Indian establishment; and that it is in contemplation to allow regiments in India in future only one Lieutenant-Colonel. As regards the latter portion of the rumour, we have only to say that we doubt very much if four field officers be more than sufficient for a

Digitized by Google

regiment serving in a climate where so many officers are obliged to be on leave for sanitary reasons, and where in many cases regiments are split up into wings and detachments. We do trust the question will be reconsidered before a step is taken which appears to be suggested by no consideration save one of indiscriminating economy. Whatever opinion may be entertained on this point, there can, at all events, be little doubt that the moment when a regiment is proceeding on active service in a climate, and under circumstances, more than usually unfavourable to Europeans, does not present a very happy opportunity of diminishing its strength of field-officers; and we can hardly conceive anything more opposed to common sense, as well as to justice, than the presumed determination to which we allude. We trust to find that the statement is incorrect. It so happens that some of the Second Lieutenant-Colonels of regiments going to China are among the best officers of their rank in the Army, and we hope they will not be taken from their respective corps just at the moment their presence with them is most to be desired.

We have much pleasure in announcing that William Hickman, Esq., will be Secretary to Admiral Bruce, the new Commander-in-Chief at Portsmouth.

The Military Organisation Committee of the House of Commons will be re-appointed in a few days, and it is rumoured that the Chairman, Sir James Graham, has framed an elaborate report to be submitted to it, involving very considerable changes in the administration of military affairs.

The Navy Estimates, of which we give the leading items in another column, will be moved by Lord Clarence Paget in the House of Commons on Monday evening.

There is considerable difficulty experienced in determining the merits and claims of the various medical officers of the Army, who might be considered eligible to succeed the late deeply-regretted Director-General. It is understood that Dr. Taylor was summoned from Chatham, and that Dr. Gibson was ordered up from Aldershot by telegraph, when the news of Dr. Alexander's death reached the authorities.

Our leading contemporary announced in the early part of the week that Major-General Sir James Scarlett was about to succeed Sir George Wetherall as Adjutant-General at Head-Quarters. The statement does not rest on good foundation. Sir George Wetherall, we have reason to believe, will continue for some time longer in the office of Adjutant-General inasmuch as the Duke of Cambridge is very anxious to have the benefit of his services in arranging whatever new measures the Government may adopt respecting the re-organisation of the Indian Army. We may also contradict the statements which have appeared regarding Lord Seaton's successor in the Irish command, nothing having yet been settled upon the subject.

The Army Estimates have been laid upon the table of the House of Commons, but are not yet printed. We have good reason to anticipate that the total sum required will be a little over 14,000,000*l.*

The *Moniteur de la Flotte* (Feb. 9), in announcing that the command of the Chinese expedition has been given to "a general officer of the grade of vice-admiral," in consideration of the important part to be played by the fleet, which "will consist of 60 ships of war," observes that no other power has ever assembled such a numerous fleet in those distant waters. Our excellent contemporary may be correct, but assuredly our Government will not permit the French to give a numerical superiority to their contingent of the expedition by sea. Our allies may take as much as they like of the glory, but they must not get more than their share of the solid advantages. It is absolutely necessary that for every French pendant there should be at least one English whip flying, even though we admit that many of the "*bâtimens de guerre*" of our allies are little iron gunboats.

We understand it is in contemplation to form an additional military district in England, comprising some of the Midland Counties.

The increase of the Infantry, which we have already announced, will, we believe, consist of the augmentation of each of the regiments at home to 1200 rank and file.

Captain Eager, of the 40th Regiment, has been appointed a Deputy Assistant-Adjutant-General, and is attached to Colonel M'Murdo, Inspector-General of Volunteers.

A contemporary announces that Major-General John Eden, now commanding the Cork district, will have the Colonelcy of the 34th Regiment, vacant by the death of General Sir Thomas Makdougall Brisbane, but we believe that no recommendation has been yet made to Her Majesty upon the subject.

Colonel M'Clenesty, who has just been appointed a Major-General on the Staff in India, will proceed to the Madras Presidency, relieving Major-General Craigie.

It is stated, and we believe with good reason, that Colonel Sir John Douglas, K.C.B., of the 79th Highlanders, will succeed Colonel M'Cleverty as Assistant-Adjutant-General at Edinburgh.

The arrangements respecting the new Inspecting Field Officers are as follows:—Colonel Campbell goes to York, succeeding Colonel Franklyn. Colonel Brunker goes to Belfast, replacing Colonel Hamilton, who succeeds Major-General Pole, at Glasgow. No successor to Major-General Drought, at Cork, has yet been appointed, and it is rumoured that the office will not be filled up, the duties being delegated to the Assistant-Adjutant-General of the district.

DRILL FOR MOUNTED VOLUNTEER RIFLEMEN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In a paper, dated 13th ult., I embodied some changes in the organisation of our Yeomanry, which struck me as calculated to improve the efficiency of that force, as well as to benefit the new corps of mounted Volunteers, which are now being raised. I did not think it probable that any *entire* Yeomanry Regiment would adopt my plan; but that they would each (according to their strength) furnish one or more squadrons of picked men as Mounted Riflemen, and that these squadrons should be drilled so as to act singly, or in company with those of the neighbouring counties.

A system of formation and manœuvre is now proposed for their use by which our present Cavalry drill regulations are very much shortened and simplified. In this system there is but little of my own—it was submitted almost entire in 1848 to the then Inspector-general of Cavalry by Colonel Ainslie, now of the 14th Light Dragoons, who had seen it practised by a brigade of French cuirassiers.

The squadrons are formed in single rank.

They are divided into four equal divisions, which are designated, when in line, "Right Division," 2nd, 3rd, and "Left Division." When in column, "Leading Division," 2nd, 3rd, and "Rear Division. An officer, or non-commissioned officer, leads each of them.

The men are told off by files from the right of each division.

Although a prescribed order of squadrons is observed at the usual assemblies, yet in manœuvre this is laid aside, and the designation of the squadrons will change with the situation in which they are thrown. This rule applies equally to divisions. Thus squadrons and divisions are always in their natural order, and cannot be considered invented. Both file invariably from the right, unless otherwise directed, and all formations are executed in the manner prescribed for right in front.

Columns being always right in front, the left is the "pivot flank," the right is termed "reverse flank." This can be changed, without creating confusion, at the discretion of the commanding officer; to change covering or dressing, he has merely to give the words "base right" or "left," or "eyes right" or "left."

The base for covering is also placed invariably on the left, unless the contrary is specially ordered.

The close column is suppressed, and a column at division distance substituted; counter-marching is hereby avoided, and squadrons reverse their front by the simple "wheel about" of divisions, as they do when in line.

Whenever practicable, movements and changes of formation will be executed "by divisions."

Increasing the front from divisions to squadrons, and diminishing it from squadrons to divisions, is executed on the same principle as "by troops" in our present Cavalry drill. In the former case, the word is, "By the left form squadron;" and in the latter, "Advance by divisions from the right," when halted; "By the right form divisions," when on the move.

Objections are made to the suppression of all movements "by threes" on the score that, when acting dismounted, the "centre by threes" should be prepared to hold the horses of the other two. I maintain that more is gained in simplifying the drill for Volunteers than is lost by diminishing the number engaged on foot; besides, a man holding two horses is utterly helpless, while with only one he can make some defence, and this is an important consideration for troops who must in general act independently, and at a distance from their main body.

By the system here projected all inversion is abolished; and, about a dozen manœuvres being all that a corps of Volunteer mounted riflemen would require, it is presumable that the period of instruction will be materially shortened.

To conclude with "skirmishing." This important part of the Volunteer's duty I propose to assimilate, as far as possible, with the infantry practice; and here come into play the intelligence and activity of the picked men whom we may hope to see forming these corps, for very much must be left to their own discretion.

The supports are equal in number to the men skirmishing.

The skirmishers are in pairs; they exercise their own discretion when engaged with an enemy, as to being both mounted or dismounted at the same time, or as to one holding the other's horse. On no account must they ever be both unloaded at the same moment.

An accurate line of skirmishers is no object, so long as individual men do not endanger themselves by getting too forward: each pair will take advantage of all cover within their reach.

The Reserves to the mounted riflemen will be the Yeomanry or regular forces with which they are acting.

In this sketch much detail, such as distances, intervals, posts of officers, &c., has been omitted, as well as a specification of the requisite evolutions, and it is merely submitted as groundwork for the drill of a force which I hope soon to see in full activity.

JAMES CONOLLY,
Lieut.-Colonel, Assistant-Adjutant-General.

Portsmouth, 7th February, 1860.

FALMOUTH.

The port of Falmouth may be considered as one of the most important in England: it is situated near the mouth of the British Channel, and is accessible at all hours of the tide for ships of the greatest burthen, and as a harbour of refuge is well known to all navigators, for during some heavy gales, above 150 ships have been known to find shelter in its waters. Yet, strange to say, but little attention is paid to its security in a military point of view, for though there are some heavy batteries at its mouth, they are not adapted to the present improvements in navigation; as they are only placed immediately at the mouth, a fast-going steamer could easily run the gauntlet and get within them, where they would be comparatively safe, as once passing up there would be only one or two guns that could be brought to bear upon the water towards Truro, where it is very deep; as opposite the village of St. Just, there is sufficient water to float a line of battle-ship, and the harbour is capacious enough to hold almost any number of ships that could easily be collected. And as there are very extensive docks now in course of construction, they make this harbour of more consequence than ever, for not only will ships be able to find shelter as heretofore, but also docks and every convenience for repairs. Yet, strange to say, this harbour is badly guarded, as the works are quite inadequate for the purpose. We will endeavour to point out the cause of their insufficiency, and propose a remedy.

On the western side of the harbour stands the ancient castle of Pendennis, at an elevation of upwards of 300 feet; the old keep is surrounded by some weak walls, on which about 10 or 12 guns are mounted, 6 of which are 56-pounders, but so elevated above the water as to be of little use. At the foot of the hill is a battery close to the water, of 8 24-pounders, and about half way up the hill, another "en barbette" of 7 32-pounders. A site for a new battery nearer the point was proposed by the late Lord Raglan, when Master-General of the Ordnance, and a sum of 4000*l.* was granted for it, but though about 700*l.* was expended, the work was stopped, and what was done with the balance remains to be accounted for; there, however, the unfinished work stands; a little more laid out upon it would make it a most efficient work, and as the guns could be sunk in such a manner that only their muzzles would be exposed, it would be next to impossible for them to receive any injury from ships. Some on the Armstrong principle would be most serviceable, as they would be able to give full effect at their longest range. All these, however, would only serve to keep ships at a distance, and be a guard before they came to the entrance. Though we have not quite done with Pendennis yet, we may as well mention the old castle of St. Mawes; it stands on the opposite shore, the eastward, and is about a mile across the mouth of the harbour; there is a very heavy battery, nearly on the level of the water, which would cross the fire from the other guns, and make it very dangerous for ships trying to force their way in; but supposing them to effect this, there is nothing of consequence in the way of land defence to prevent them going up the water to near Truro, or land at Falmouth and destroy the docks now in course of construction.

There are some guns, and embrasures for others, on the works surrounding the old castle; but they stand so high above the level of the water that there would be some difficulty to depress them, so as to bear upon a ship running pretty close to the land on Pendennis side; indeed, in some parts, from the formation of the hill, it could not be done; so unless there were some ships in the harbour, there would be but little difficulty in landing troops, supposing the impediments at the mouth to be overcome, which, if attempted by two or three steamers at once, some of them might get through unscathed before the guns would be ready to fire upon them a second time. Yet there is a remedy for this, by simply erecting a strong battery upon Trefusis Point, which lies immediately opposite the entrance, and would have a direct command of any ship coming off the entrance of the port, as they must sail directly up under fire of Trefusis before they could go either to the right or left to proceed either against Truro or Falmouth.

In former times there was a battery on the point of Pendennis, looking into the harbour, which might be repaired at a small expense, and guns placed upon it, which would fire across the harbour, and follow with their shot ships which might pass towards Trefusis.

Having said so much of the main harbour, it is necessary to observe that to the westward of the promontory on which Pendennis Castle stands, there is a bay which shoals its water gradually from twenty fathoms, and a landing could be effected by boats at any point along the shore of this bay below Gyllyndune; and as the isthmus which connects Pendennis Hill with the main land is not much more than a quarter of a mile across, and the new docks are situate just within, a few boats might land their crews, and, dashing over it, get at once to the docks and town of Falmouth, for the guns within the Castle are so much above the level of the sea, that they could not be brought to bear upon the bay within some hundred yards of the shore. A battery ought to be constructed near the bottom of the hill, for just above the level of the water there are the remains of an old one still extant, which, if repaired, would be of the greatest utility in defending the ground near the proposed docks.

Some heavy guns have lately been mounted in the castle, but to put this place in a proper state of defence, the battery proposed by Lord Raglan should be immediately completed, as well as one on Trefusis Point; both of these are imperative if it is intended to put this important harbour into a proper state of defence, which is now of greater consequence than formerly on account of the new docks, which add greatly to the importance of Falmouth, as they will cover a space of about 140 acres.

Should the number of guns be increased, it will be necessary to enlarge the barrack accommodation, for there is not near enough for the artillerymen necessary to work the guns. At St. Mawes, for instance, there is only room for thirty men, not two to a gun, and at Pendennis, with the greatest squeezing, it would be very difficult to find space for 200 men, which would be in the same proportion of men to a gun, and this would leave no room for infantry or any other garrison.

THE PURCHASE SYSTEM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Experience has taught me that there are few questions upon which much may not be honestly said on both sides, and the purchase question is certainly not one of them. I trust you will allow me to offer some remarks on the observations which you have lately published in support of that question against the attack which is about to be made on it by Sir de Lacy Evans.

You urge, in the first place, that its abolition will materially deteriorate the pecuniary value and prospects of the profession of arms in this country; secondly, you express your opinion that it will be impossible, without it, to obtain officers sufficiently young to discharge their duty in the superior grades with advantage to our military character as a nation.

With regard to your first objection, I would remark that nobody has ever proposed to abolish the existing system without taking due care of existing interests. In discussing this point, therefore, we need only look to the effect which abolition of purchase may have on the pecuniary position of officers now about to enter the army.

From a return made by the Horse Guards in 1857 to the Royal Commission on Purchase, it appeared that in 1856 the officers of the Cavalry, Guards, and Line had paid for their commissions in money, 4,742,280*l.* This money had been paid as caution money, as it were, and the portion contributed by each officer would be repaid to such of them as retired from the Service before attaining the rank of General; but it would be lost altogether to the families of those who died of climate, fatigue, or disease, whilst serving their country.

It is clear, therefore, that the annual interest of this sum—as long as the purchase system endures—is to be deducted from the pay of the officers of the Guards, Cavalry, and Line. At 4 per cent. it amounts to 189,691*l.* a year.

Now, if the purchase system be abolished, and the pay of the Guards, Cavalry, and Line remain what it is, the officers of these corps will be exempted from an annual deduction from their pay to the above amount.

In saying this, I am understating the advantage which it will be to them in a pecuniary view, for I take no account of their losses by death whilst holding commissions; nor do I reckon the loss of interest on the large sums which are now invariably paid in the Guards and Cavalry, and generally in the Line—above regulation.

Ex. gr. A lieutenant-colonel of Cavalry receives 1*l.* 3*s.* per diem pay—419*l.* 15*s.* a year. He pays for his commission (see Mr. Hammersley's evidence before the Royal Commission on Purchase) 12,000*l.* On that sum he loses all interest as long as he holds his commission, and if he dies, his family lose the principal. At 4*l.* per cent. the interest on 12,000*l.* is 480*l.* a year, so that a lieut.-colonel of Cavalry, under the existing system, serves, not only without any pay at all, but actually at a loss to himself of about 60*l.* a year.

If the purchase system be abolished, and if he attains his rank without money investment, by seniority, or by selection, it is clear that he will be in a better pecuniary position than he now is, by 480*l.* a year.

Such a change as this, when carried out, can scarcely be said to be likely to deteriorate the value and prospects of the profession of arms in England.

Now comes the next point, whether it will be possible, without purchase, to ensure to our army a supply of officers of high rank in the vigour of their age.

Let me first ask: *Has this object been attained by the purchase system?* Had we not numbers of lieut.-colonels commanding regiments of sixty years and upwards in 1853; before the Crimean war began? Were not our lieut.-generals, on an average, seventy years of age each? Is it not, therefore, clear, that their ages were regulated during the long peace, not by the purchase system, but by the law of nature, which prescribes three-score years and ten as the utmost age to which it is given to man to attain?

All the armies of Europe dispense with the purchase system, and yet contrive somehow to obtain officers sufficiently young to command them, and command them well. Our Engineers, our Artillery, our Marines dispense with it, and are nevertheless just as efficient as the corps which enjoy its alleged advantages. It must be admitted, however, that it is an object of paramount importance to ensure valid officers, and that if they could not be ensured without the maintenance of the purchase system, it might be reasonable to maintain it. But does anybody—do its most earnest advocates—ever propose to extend its advantages to the corps which do not already participate in them? We are now endeavouring to amalgamate the Indian army with our own—it is said to be the dearest wish of the Court and of the Horse Guards that the two armies should be made one—what is the main obstacle to the consummation of their wishes? The purchase system. And why is it not proposed to extend the purchase system to the Indian army, and so remove this obstacle, if it is really believed that the advantages of that system are so great? If this is not done, if it is contemplated that the two armies should be amalgamated, retaining the purchase system in one half, and rejecting it in the other—is it supposed that the half which retains the purchase system will be more efficient than the half which rejects it? Why should it be rejected by any portion of our Army, if it is believed that its introduction would make that portion more efficient? Why should it be retained in any portion of our Army, if it is believed that it can be rendered efficient without it?

I do not say that it has no advantages. Every system, the most absurd, the most corrupt, has some. Lord Fitzroy Somerset told the Commission on Military and Naval Promotion, which sat in 1840, that the old-fashioned plan of giving commissions to children in arms was not entirely disadvantageous, inasmuch as it also gave us young colonels and generals. Yet surely nobody would wish now to see it revived for that consideration. To my mind, the very few advantages which we derive from the purchase system are overwhelmed by its manifold evils, excluding as it does from the military service of the country the whole of the middle classes, and the most ambitious and worthiest of the lower classes.

I am, sir, your humble servant,

AUDI ALTERAM PARTEM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I perceive you are an advocate for the continuation of the practice of trafficking in commissions in the Infantry and Cavalry, on the plea of securing officers of rank, at an age when their mental and physical powers were not impaired by years. You suggest, however, that this practice should not extend beyond the rank of captain. Now, see the effect of this limitation. A youth having attained his subaltern's commission in the Guards, may, after five years, purchase his company, which gives him the rank of lieut.-colonel in the army, and if he have head-quarter interest, he may be sent to command a regiment of the Line, having qualified by his five years' service in London and Windsor. This privilege, you will observe, is not extended to the rest of the Army. It is true, notwithstanding all the advantages previously obtained by purchase, there were not more than one or two exceptions in the Crimean campaign of general officers under the age of sixty, and some even of seventy, or thereabouts. By the order of November, 1854, by which periodical brevets were abolished, lieut.-colonels of three, but now of five, years' standing (by brevet or otherwise) become full colonels, and are eligible to be brigadier-generals. By the novel custom, too, of granting brevet rank of one step for distinguished services in the field, the evil of protracted promotion by succession, as in the Engineers, the Artillery, and Marine corps, till a late period in life is removed. I find, on referring to the case of the late Sir Henry Havelock, that, for want of means to purchase, his juniors stepped over his head, till he obtained his captaincy at the age of forty-two, after twenty-three years' service, solely in consequence of death vacancies in his regiment in the field. He obtained his brevet majority for his services in the Affghan campaign, and subsequently his brevet lieut.-colonelcy in the following year (1844). The order of Nov. 1854 made him a full colonel, which entitled him in 1857 to a brigade command in Persia, and subsequently led to the glorious campaign of Cawnpore and Lucknow, where he died in his sixty-third year.

Almost all the generals who served in the late Indian campaign would, under the former system, have still been colonels. The difficulty of providing general officers in the prime of life has thus been effectually removed. It is true that complaints are sometimes made of recommendations for brevet rank being abused by the generals in command; but the order of 1854, which accorded this boon, also required (as in the case of the Victoria Cross) that the specific services performed should always be stated in the *Gazette*, to prevent the occurrence of this abuse. This privilege was largely exercised in the late war in India with respect to the Company's officers at the recommendation of generals commanding, whereby regimental captains and majors succeeded from one grade to another by distinguished service to the rank of generals. In the gradation corps of the British army Her Majesty exercises this right to a greater extent by raising to any grade the officers whom she sees fit to honour. As, for instance, in the case of Major Sir W. Williams, Baronet of Kars, to the rank of major-general, and the command of the Artillery in Woolwich. She can also elevate to the rank of full colonel in the Army any officer of whatever grade, by conferring on him the honour of aide-de-camp to Her Majesty.

The order of 1854, therefore, has at one fell swoop done away with the inconvenience of tardy promotion, when it can be removed by good service in the field. Let Parliament now put a finishing stroke to the corruption, the intolerable hardship, and immorality of supersession by army purchase, where both parties are obliged to declare solemnly that the regulation price of a commission *only* has been paid, when it is well known to the higher authorities themselves that the assertion is untrue; and that, in any other case, would render the individual incapable of holding Her Majesty's commission at all.

No such habit prevails in any other service except in the British Infantry and Cavalry. It is, as Lord Palmerston has said, the relic of the corruption which prevailed in the reign of Charles II., when the present army was first raised. So corrupt, indeed, were those times, that one of his lordship's own ancestors lost a high appointment (I believe Chancellor of the Exchequer) by being outbid by some other wealthier individual. Now this is the precise state in the army at this moment. A junior captain offers so high a price for the majority, that none above him can afford to purchase.

We might learn something from the several military powers of Europe which would be important. In France, every officer must either have been educated at a military college, and have passed an examination, or he must have served for some time in the ranks. As the annual conscription, however, demands a high price for exemption, scions of the first families in France enter the ranks, from whence they may rise to the highest grade by successive distinguished services.

In Prussia, no substitutes are permitted in the annual conscriptions, with the exception of princes and foreign ambassadors. All must serve one year in the ranks if without pay, and are then eligible for commissions; while all others must serve for three years, when they are transferred to the Landwehr, or home fencibles. In Austria, princes of the blood even are not exempt from serving in the ranks.

In Russia, no officer can join the army but through the imperial military schools—which the pupils enter at twelve, and are eligible at eighteen for subalterns' commissions. They undergo annual examinations, are posted in each class according to proficiency, and are eventually posted to the branch of the service for which they are best qualified. Their future promotion is graduated by succession, unless for distinguished services. Todleben, the young Russian officer, who undertook to defend Sebastopol, was only a Lieutenant of Engineers, but was subsequently raised to the rank of general; nor could the defences have been constructed so rapidly nor so scientifically as they were, unless every officer of a working-party had studied his profession at a military academy.

I do not deal with the question of hereditary rank being desirable in the Army to command respect, because we do not find it all essential. It is enough if the officers of the Army are derived from a grade of society accustomed to command either domestics or labourers of all classes, and the men belong to that order of society who are, from circumstances, willing and used to obey their masters in civil life.

I trust, therefore, that Sir De Lacy Evans will never cease his efforts in Parliament to effect the abolition of supersession in the Army by the aid of the longest purse.

Clayton, Sussex. JOHN BRIGGS, Lieut.-Gen., M.I.

THE INDIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—You very justly remark in the leading article of THE ARMY AND NAVY GAZETTE of the 21st of January, that "the position of the Indian Army is one of the most painful in which a body of men can be placed;" but few, except those intimately connected with that force really know exactly where the grievance lies, and what the jealousies and heart-burnings of the Indian officer really are. Many understand that dissatisfaction proceeds from some general or indefinite feeling of insecurity, or from disappointed hopes, but scarcely any know what the circumstances are that give them such uneasiness, and which will lead to evil results if not quickly and fairly attended to.

I will endeavour to state some of the feelings of a large class of Indian officers, by telling you what one of them wrote to me. "I judge," he said, "my future fate, by the appearance of facts as they *now* exist, not on Parliamentary statements, guaranteeing my advantages, rights, allowances, and covenant with the old East India Company. I know that but a small body of the members know anything about India at all, and that even fewer care anything about the Indian army—out of the way, out of sight, out of mind. I see every day Royal officers holding the staff appointments that were considered the sole rights of Indian officers when I entered the service, and which were considered by me as the recompense for devoting my youth and energies to a life of exile in a most infernal climate amongst a set of savages,* with the chances of ill health or death, beyond those that I should have had, were I a Royal officer, that could make up by the bracing air of England or Canada, the enervating influence of the tropics.

"I fully believe that the intention of Government is to cut my pay and allowances in whatever way they can, as well as to make my living much more expensive, by taxing almost every European article upon which I depend for existence or comfort. I can consequently make *nothing* to retire on, if I live out my service time, and the pension will not keep me without. The officers of my regiment will give nothing for my step, if I retire, first because they all feel that the insecurity of the present time will not allow them to purchase an advantage that might turn out a bad investment; and secondly, because they all want to go themselves.

"I perceive, likewise, the chances of detached command are gone from me for ever, because the large body of Royal officers at the present time in India always furnishes a distinguished individual, whose purchased promotion puts him far over the heads of many a long-service man, and entitles him at once to the position, pay, honour, and responsibility of expeditionary forces, brigades, field detachments, &c., &c. No matter what is to be done, or however much tact or experience is necessary to conduct the operations for which such a force is embodied, he has only to exist, and to be able to write a dispatch, plenty of subordinates can be had amongst Indian officers to make up the experience and do the working detail. Again, I know that if ever I have the luck to be mentioned for distinguished conduct or gallantry, that in the first place if I am not a captain the mentioning officer might spare himself the trouble of writing, for all the good he might do me; or, supposing I had my company, my chances of brevet are a good deal smaller than those of a Royal. I have no friends or connections at home to make interest for me; even should I live to get brevet promotion, the circumlocution and difficulty necessary to push any application on my account "through where it has to go"—a wonderful journey, through all sorts of military authorities, secretaries, ministers, &c., beset with delays and perils—is so great, that before its ultimate arrival at the Horse Guards it becomes an old business of an Indian officer far away, with none to back it, or push it into the *Gazette*; it is stale, and out of date; added to which, if the brevet really occurs, by long delay half the pleasure of such promotion is gone.

"I am likewise excluded from all staff appointments in England or any other place but India, because I belong to the Indian, not the 'Regular Army,' although the Royals, considering it an injustice that they should not have a share of the best things in India, received their share from Government directly.

"I know that if an Indian climate does not suit me I

* We hope our excellent friend does not regard all the people of India as a set of savages. He probably alludes to some Hill Station? [ED.]

Digitized by Google

cannot exchange into one that does, contented as I might be to make some sacrifice to do so. I must soldier there or leave the profession I have followed from my youth, which I am very fond of, and to which I have devoted all my talents and energies for ever.

"I fully understand, moreover, that the position of an Indian officer at the present time is by his Royal brethren in arms considered as a sort of second chop, and very inferior militia, footing; and that, although there may be clever, gallant men—possibly gentlemen—in that out-of-the-way sort of service, they cannot be allowed to imagine that they are in any way in the same position or on an equal footing with the Royal Army.

"And lastly, I feel so very confident that the Service I have been in all my life—the regiments whose name I have been proud of, and whose glories I have shared, and the brother officers with whom I have lived and fought—are all doomed to be expunged in the most economical manner possible, either by a quiet system of 're-adjustment,' or a bold, sweeping stroke of power, that I candidly believe the sooner I can afford to cut the concern the better; if not for my pocket, at least for my pride."

Thus, wrote an Indian officer: some may give no credit to his feelings; others care little what he feels; but I sincerely trust you will give this letter the publicity of your GAZETTE, that at least the public may know something about the feelings of those men, whose gallantry and devotion during the last three years have been as conspicuous as ever; in whom they have occasionally taken interest, and who deserve a better fate than to be "improved pretty smartly from the face of all creation."

Again hoping that your influence may be exerted to prevent Her Majesty's Indian Army from becoming Her Majesty's noble army of martyrs, I remain, yours faithfully,

SPEAK-OUT.

THE PROSPECTS OF THE INDIAN NAVY.

Rumour has it that H.M. Indian Navy is not to exist much longer,—in fact, that it is to be abolished; option being given to the officers to join the Royal Navy, taking their places according to the dates of their commissions, or to accept the pension which will be offered to them. If the duties now performed by the Indian Navy can be better or more economically performed by the Royal Navy, or if it be proved to be more desirable for the public good that all naval affairs in the East, the guardianship of the Indian seas, the survey of those seas and the transport of troops across them, together with the management of the naval dockyards and arsenals should be placed under the direct control of the Admiralty, then the mere convenience or inconvenience of a small body of individuals must not be permitted to obstruct a measure of general benefit. Still such a measure should be carried out with a minimum of inconvenience to the sufferers; and should any radical change be made in naval matters at present administered by the Secretary of State for India, it will greatly depend upon the terms offered to the officers of the Indian Navy, and more especially upon the manner in which the scale of proposed pension is regulated, whether justice, as far as is compatible with the contemplated change, be attained.

To the officers of the Royal Navy the new arrangement would be a considerable advantage. The absorption of 68 lieutenants into a body of 3400 other grades in proportion would in no way be felt, while on the other hand there would be more ships to be commissioned, more appointments to be made, and thus an enlarged field opens for enterprise and distinction.

Not so with the Indian Navy officer, he has served say fifteen or twenty years in the East, and has acquired an intimate knowledge of the coasts of the Indian Empire and the intricate navigation of the Persian Gulf and Red Sea; his service has extended to the Chinese waters; he is acquainted with the languages, and more particularly with the customs and peculiarities of the various nations and tribes to be met with from Singapore to Suez: in short, he is a man of some value in the East, but he is unknown in the West. He has grown up under the eye of the government in India, but he has scarcely been heard of at the Admiralty. Moreover, in India the number of naval officers is so small that the Government is only too glad to keep them fully employed, but at the Admiralty the number is so great that two-thirds are kept on continuous half-pay. And on the half-pay list will the Indian Navy officer be shelved and die, who accepts the alternative of joining the Royal Navy.

But this fifteen or twenty years' servitude in the East has been passed in the drudgery of the service, and this change catches him and blights all his prospects just as he is about to reap some fruit of his labour, and to receive some rather more adequate compensation than the mere pittance upon which he has hitherto been existing. Is it fair at this period of his service to give him the half-pay which the joining the Royal Navy would certainly involve, or is it just to dismiss him with a small pension to which he would have little or no opportunity of adding by his own exertions? For though an experienced naval officer may be a valuable man in his own sphere, he is of but very little value in any other.

Pensions in the Indian Service are regulated by length of service in India, a certain period of residence in a tropical clime, entirely exclusive of any time spent in Europe, being exacted before pension is granted; but no officer is called upon to accept his pension as soon as it is due, or to relinquish the more lucrative appointments to which his long standing may entitle him. But in the extraordinary case of a pension being from necessity forced upon an officer still able and willing to do good service, it can no longer be equitable that the rate of pension should be decided by the term of residence in India, for then anyone who in accordance with the regulations may have been allowed a furlough to Europe, would incur a serious loss from having accepted that to which the very conditions of the Service gives him a perfect right; and in the same way any one who through certified ill-health may have been obliged to seek relief in England would undergo a heavy and enduring penalty for having succumbed to the climate in which it was his misfortune to serve.

If, then, the officers of the Indian Navy *are* to be pensioned, the scale of the pension to be offered must be regulated by the period which may have elapsed since their first joining the Service, and its rate should be some remuneration not only for their length of service, but for their utter loss of prospects, and in this regard it should certainly be considered in a liberal spirit.

J. H.

MILITARY PUNISHMENTS AND MILITARY DISCIPLINE.

(*Continued from page* 28.)

In our impression of the 14th ult., we broached the subject of military punishments, and brought before our readers the origin and intention aimed at in the institution of military prisons. In our present number we purpose resuming the inquiry by submitting to their notice and consideration the discipline enforced in these establishments; the penalties inflicted upon those who, under the sentences of courts-martial, become their occupants, and the effect which these different punishments produce upon the moral and physical powers of the individual. We shall premise our observations, however, by recapitulating the nature of military offences, and their special character, because in our former communication we stated that they were delinquencies which in civil life would hardly be regarded as crime; and as our views as to the soldier and his morality might be looked upon as partial, we shall (in order to show how little real vice does exist in the Army) tender in detail a list of the offences for which the soldier is generally tried. They are these, viz.—"absence without leave," "breaking out of barracks," "desertion," "disrespect," "drunkenness," "forcing a sentry," "ill-treating a horse, or destroying arms," "insubordination," "losing and selling clothing and accoutrements," "neglect of duty," "overstaying furlough," "quitting a post whilst on duty," "sleeping upon sentry," "theft," and "violence to his superiors." Now for all such offences (with the exception of theft) there is hardly a police court in the United Kingdom in which the civil delinquent would not escape with a half-crown or five-shilling fine. Not so the soldier. He, on the contrary (tried under military law) receives a far different sentence, viz., imprisonment with hard labour for a period of from one month to six, during which time he is subjected to "periodical loss of bed," "shot drill," "stonebreaking and picking oakum," "restricted diet, and total silence."

Such may seem to be an undue degree of severity, but it is necessary. Discipline demands it, and discipline is but another term for "the general good." We would ever enlist public sympathy for the soldier, but it must be for the good man. Let *his* condition be improved; make the Army an honoured, as well as an honourable profession— make it popular with the people, by rendering it a desirable investment for the youth of the country—do this, we say, on the one hand for the good man, but, on the other, let a stringent and deterring line of policy be exercised towards the bad. We are no maudlers in sentiment. We would treat the soldier well, but, if he will not reciprocate, then let him take the consequence, and feel sharply the personal inconvenience which his conduct brings upon him.

Of the punishments attached to military imprisonment, the first that awaits him is loss of bed. For the first seven nights after admission he has to lie upon a board, with a rug and blanket over him in winter, and a rug only in summer; and, so long as he remains in the third class, he has to undergo this ordeal every alternate night, and when raised to the second class, every third night. This deprivation of bedding, especially during the winter months, is very severely felt. Let any individual who doubts it just compare the difference of his own feelings the day after having had to pass the night without taking off his clothes, from that which he experiences after having been comfortably sleeping in his bed, and he can then judge of the effect which the withdrawal of bed for seven consecutive nights must exercise upon the person subjected to it, the vast discomfort it must produce. Such is its practical effect: the loss of his bed, after a hard day's work, is irksome in the extreme. Prior to the introduction of this system, of sleeping as on guard, the soldier whilst in prison was absolutely in this respect better off than his comrade at the regiment; but now the case is widely different, and the loss of bed is so severely felt that every conceivable excuse is made by the prisoner with the view of endeavouring to obtain it, and the morning sick list of a military prison is by its numbers quite sufficient to inform the medical officer on his arrival whether it is "*beds in or out.*" Whilst, then, the deterring influence of this punishment is very great, it is satisfactory to know that no injurious effect has ever been traced to its adoption. There is no amount of hard labour that the soldier would not undergo sooner than be subjected to it, and in this way the loss of bed has the salutary effect of giving an increased value to class promotion, by which he can obtain it.

The next punishment to which the inmate of a military prison is submitted is hard labour. This consists of shot-drill and working at the pump, with the addition of stone-breaking and oakum picking, as supplemental employment. Now as to shot exercise, a few words may be specially said upon it, because its practice has been objected to. This we believe to have been the result of misconception; and to have arisen solely from ignorance of the real state of the question by those who have advocated useful occupation instead.

(*To be continued.*)

FRENCH NAVY.

The corvette La Cordeliere, commanded by M. Fleuriot de Langle, having "peeped into" Bombay on 25th Dec., just to see how things were going on there, has sailed to have a look at Muscat,

The Ville de Nantes and the Bayard are receiving their engines, and preparing for sea at Cherbourg.

The frigate *blindée* La Normandie, at the same port, is being prepared with all speed.

Lieutenants Dol, De Saisset, Brosset, Salmon, Bohie Dervarannes, James, Peyron, Racand, and Jurin have been named to command the 10 first portable gun-boats, which will be carried to China on board the steam-transports. Several of these officers were engaged before Sebastopol and in the Black Sea. The rendezvous of the expedition is Hong Kong.

THE STAFF COLLEGE.

The annexed General Order has been issued from the Horse Guards, dated the 23rd ult., in reference to the Staff College:—

"The accompanying revised regulations for the Staff College having been approved by Her Majesty, are promulgated for the information and guidance of the officers of the army.

"It is now well understood that only one officer can be spared from a battalion at a time for the purpose of studying at the College; but this will not necessarily prevent a battalion from sending more than one to compete at an examination if circumstances admit of their absence from their regiment.

"The principle under which officers are allowed to enter the Staff College being that of pure competition, it follows that candidates who may be found qualified at any examination, but who, from want of a sufficient number of vacancies, cannot thus be admitted, will not have any claim to subsequent admission without undergoing another competitive examination.

"By order of his Royal Highness the General Commanding-in-Chief, G. A. WETHERALL, Adjutant-General.

"Horse Guards, S.W., Jan 23."

"The following regulations for the Staff College are substituted for those of the memorandum of the 17th of December, 1857.

"1. The Staff College is open to officers of all arms of the service, and consists at present of 30 students, in the proportion of 25 from the Cavalry, Guards, and Line, to 5 from the corps of the Royal Artillery and Royal Engineers; admission to the College being determined by a competitive examination.

"II. No payment is required from students to the funds of the college.

"III. The qualifications requisite for admission are—1. A previous service of not less than three years exclusive of leave of absence. 2. A certificate from his commanding officer that the candidate is an intelligent, active, zealous, and well-conducted officer, and thoroughly acquainted with all his duties. 3. The candidate, if not a captain, to have passed the examination for a troop or company. 4. A medical certificate of good health and fitness for the active duties of the staff.

"IV. Commanding officers of regiments will in every case forward applications for admission to the Staff College, through the general officer in command, to the Adjutant-General. If the commanding officer of the regiment, or the general officer commanding, cannot recommend the application of any candidate, the grounds of objection to be distinctly stated.

"V. The competitive examination for entrance to the Staff College comprises the following subjects, the relative values of each at the examination being shown by the number attached to it:—

	Marks.		Marks.
Mathematics	1200	Hindostani	300
Military History 600 }	900	Fortifications...	600
,, Geography 300 }		Military drawing	300
French...	300	Geology	300
German...	300	Chemistry	300

"In mathematics 400 marks are allotted to arithmetic, the first four books of Euclid, and algebra, including questions producing simple equations; and of this number at least 250 must be obtained for qualification. Every candidate must take up either the French, German, or Hindostani language for qualification; the qualifying *minimum* is, in French 150 marks, in German or Hindostani 100 marks. The remaining subjects, as well as the higher portions of mathematics may be taken up or not at the option of the candidate, the marks gained therein being reckoned in determining his position in the list of competitors. No candidate, however, will be allowed to count marks in any subject left optional, unless he obtains at least one-sixth of the number allotted to it. In regard to military history, early notice will on each occasion be given of the special campaigns on which questions will be set at the next ensuing examination."*

"VI. The examination of officers, serving in the United Kingdom, for entrance to the Staff College, is held in London about the month of July, under the direction of the Council of Military Education. In the case of officers serving abroad, the examination of such as shall be allowed to compete are conducted by means of the same printed questions as are set for the examination of candidates in London. Those questions are to be answered in writing in the presence of a board of officers, which will be appointed by the general officer in command, and which will certify that the candidate has obtained no assistance from books or help of any kind in the examination.

"VII. The college course of study commences annually on or about the 1st of February. The transmission of the printed examination papers to stations abroad is so arranged that the merits of the candidates may be decided upon in time to admit of those who are successful joining the Staff College by the 1st of February next ensuing.

"VIII. The following are the subjects of instruction at the Staff College, viz.:—Mathematics,—the *minimum* course will embrace this subject up to Elementary Mechanics, inclusive†; French. German, and Hindostani; Fortification and Artillery; Topographical Drawing, Military Surveying and Sketching; Reconnaissance; Military Art, Military History, and Geography; Military Administration, including the Organisation and Equipment of Armies in the field; Military Legislation; Elements of Natural Philosophy; Chemistry and Geology, as applied to the Military Sciences; exercise in composition will be afforded to the students during the whole course of instruction in writing memoirs or essays on the subjects of the course; and Riding.

"IX. The course of study occupies two years, which period is not to be exceeded, except in cases of illness, and then only with the sanction of the General Commanding-in-Chief. The yearly course is divided into two terms—viz., from the 1st of February to the 15th of June, and from the 15th of July to the 15th of December, the intervening periods constituting the vacations.

* This rule will not be carried out till the examination of July, 1861.

† A syllabus of the *minimum* course of mathematics will be forwarded to any officer, on application to the Council of Military Education, 1, Whitehall-yard.

Digitized by Google

"X. As officers may be expected to join the College, with very varied degrees of attainment, provision will be made to enable any student who may be well prepared in any particular subject, to attend more especially to other subjects in which he may feel himself deficient. If, for instance, the student should come to the College previously well instructed in mathematics, he will be enabled to direct his attention principally to military sciences or to languages, in lieu of mathematical studies.

"XI. During the whole course, monthly reports of the application and progress of each student will be forwarded for the information of the Council of Military Education. Examinations are held at the end of every half-year; the summer examination being conducted by the Professors of the College, and the winter examination by examiners, independent of the establishment, under the superintendence of the Council of Military Education. The winter examination at the termination of the first year of the student's course is probationary, and any students who may appear unlikely to qualify themselves for the final examination at the close of the second year will be removed. Should, however, any marked case of deficiency or neglect be brought under the notice of the Council of Military Education at any half-yearly examination, or at any other period, such student will be also liable to removal.

"XII. The following are the marks allotted to each subject at the final examination, with the obligatory *minimum* attached to each :—

	Maximum No. of Marks.	Obligatory Minimum.
Mathematics*	600	300
Fortification and Artillery	600	300
Military drawing and surveying ...	300	350
Reconnaissance	400	
Military art, history, and geography ...	600	300
Military administration and legislation	600	300
French, German, Hindostani, or any other modern language in lieu of one of them	400 each	200 in one language.
Chemistry	300	—
Geology	300	—

"In languages not obligatory, and in chemistry and geology, the candidate will be expected to obtain at least one-third of the marks allotted to those subjects, in order to count in the examination.

"In the examination great stress will be laid on original composition, in whatever language the candidates take up.

"Officers desirous of showing their proficiency in other languages, in addition to the three which are allowed to be taken up for the competitive examination, may be examined therein, and a special report of their qualifications will be made to the General Commanding-in-Chief; but they will not be allowed to count any marks thus gained in determining their position in the order of merit.

"XIII. Any officer may, with the sanction of the General Commanding-in-Chief, compete at the annual final examination, without previously passing through the College; and, further, any officer who desires to enter the College for one year only, will be permitted, if there be a vacancy, to present himself at the first annual examination of the junior division of students (who will then have completed their first year), and, if qualified, may join the College accordingly. In each case the qualifications noted in Paragraph III. (above) will be required. Any officer at the College, although of the junior division, may compete at the final examination of the senior division.

"XIV. After the final examination in the Council of Military Education will draw up and submit for the consideration of the General Commanding-in-Chief a list of the successful candidates arranged according to merit, with a special report of those who particularly distinguished themselves, whose names will be also mentioned by the Council in its annual report.

"XV. Officers who shall have passed their final examination at the Staff College will be attached to each of the arms successively in which they have not previously served. They will be required to attend drills, parades, and field days, and they will avail themselves of every practicable means of making themselves generally acquainted with the discipline, interior economy, field movements, and duties of those arms; and certificates to this effect will be forwarded to the Adjutant-General by the officers commanding the corps to which they may have been attached. It is presumed a period of four months with each arm will be the utmost that will be reqnired in this respect.

"XVI. The regulations relative to the qualifications of officers for direct Staff appointments will continue in force until the system which has been above detailed shall have fully come into operation; and the examinations referred to in that order will be conducted under the direction of the Council of Military Education.

"Officers, however, who have attained the rank of lieut.-colonel will be exempted from the operation of that order.

"As soon as the college shall be in a position to supply all vacancies in the Staff of the army, no officer will be appointed to the Staff who shall not have passed the final examination of the college, with the exception of those who attained before the 1st of January, 1860, the rank of Lieutenant-Colonel, and in every case excepting officers of proved ability in the field.

"XVII. Although the course of mathematics at the College has been limited to that amount of knowledge which is considered essential to complete the education of the Staff Officer, it is probable that many officers may desire to pursue their mathematical studies to a much higher point; and any candidates, therefore, who shall have proved their fitness for employment on the Ordnance Survey, or in the Topographical Department, by superior progress in the science of geology, as well as topography, will be named in the annual report of the Council of Military Education to the Secretary of State for War, as deserving of employment in those services. By command,

"G. A. WETHERALL, Adjutant-General."

* In this subject one-third of the marks previously gained at the first year's, or probationary, examinations, will be added to those gained at the final examination, and count, therefore, towards obtaining the obligatory minimum.

THE SIKH SOLDIERY.

THE ARMY AND NAVY GAZETTE of the 28th January contains the serious news of disaffection among our Sikh troops. This news is the more grave that we can only in part estimate the danger that threatens us. By some chance, some treachery in the enemy's camp, we obtain a partial glimpse of the truth; and if we have succeeded in obtaining more, the probabilities are that Government has stepped in and closed the door to public inquiry. Possibly, we cannot afford to publish our sores. It may be argued, and not altogether without justice, that mutiny is infectious enough without our spreading the disease; that the malcontents of central India need hardly be placed in communication with our disaffected outposts between Oude and Nepaul; and, lastly, that by placing the mutineers now scattered over India *en rapport*, we should give a new head to the combination we have but just crushed. Sedition advances slowly where it gropes in the dark; it neither sees to the right nor to the left what it has passed, nor what still lies before it; and with all Asiatics, cautious and timid by nature, it is precisely this darkness and the imaginary dangers that surround it which stands between the discontented of one hundred and fifty millions of men and certain success. The natives of India, with a just appreciation of the national character, are slow to trust each other; and it is to this distrust that we owe much of our own safety. Our *taboo* in the East is the pass that insures the respect and commands the confidence of every ill-wisher to the British Government, and hence the danger of our standing forward to brand all those whom we have reason to suspect or fear. Publicity of this nature is simply injurious to ourselves.

Such are some of the reasons that appear to us to account for the very meagre accounts which have reached us regarding the recent military disclosures in India; but whilst admitting their justice, when applied to India, we cannot see why, at this distance from the scene, the public in England should be treated like Sikhs and Rohillas. We care nothing for the King of Delhi, and less for Gooroo Nanuck. Beefsteaks we are partial to, and cold pork is our delight. Why, then, this mystery in the good city of London? *We* pay the soldiers who hold in the palm of their hands the "brightest jewel" in the British crown, and we therefore venture to think ourselves entitled to know what those soldiers who hold nothing in their hands but a sword, and that immediately and unpleasantly over our heads, are about. How, otherwise, are we to understand our real position in India; how reform, reorganise, or repair the blunders of the past.

Unfortunately, it is not the first time that a rumour affecting the loyalty of the Sikh soldier has reached our ears. So far back as December, 1857, our own Sikhs were found plotting against us, and this, actually within a short distance of Delhi, and only three months after the capture of that rebel city. Similar disclosures, coming from time to time, have served to warn us that, what was possible to the Poorbeah, may be possible to the Sikh. Without being alarmists, we do not pretend to the blind faith of the late Company's Bengal commanding officer, who denied that his sepoys had mutinied, "although, no doubt, they were serving against us at Delhi." That the Sikh has done the state good and eminent service, no one will deny; that, as a body, these troops are well-affected to the Government, we as little question; and, having freely conceded this, let us add one word of advice to Lords Canning and Clyde; reward these men freely for past services, give them pay, extra regimental colours, permission to march off with the right leg, or even to clean those terrible heads of hair; but do not trust them overmuch; do not place yourselves within their power; and, above all, let them feel themselves as holding a secondary place in the military organisation of India; for, as they are indubitably the best soldiers of that vast continent, so are they the most dangerous.

We shall return to the consideration of this important subject.

THE DEFEAT OF THE WAGHERS.

The following account of an expedition against these people has been altered and abridged from the *Bombay Times* :—

The *prestige* of our arms, which had been somewhat damaged (reasonably or unreasonably) by our heavy losses at Beyt, and the escape of the Waghers from both that place and Dwarka, has been completely restored by the successful storming of the Waghers' Fort on the Ubhpoora, resulting in the thorough disorganisation of, it is to be hoped, their main body. In a former overland summary we noticed the disembarkation of the 1st Grenadier Regiment at Porebunder, with the 11th, 14th, and 17th Regiments Native Infantry, Major Honner commanding the whole force. Before attacking, Major Honner wisely resolved to secure the passes by which the Waghers, when driven from the fort, would probably attempt to sneak off, in accordance with their usual tactics. On the 16th December, therefore, Captain Walker, with 126 Grenadiers, was posted in ambush eight miles on the right of the hill, at the base of which Major Honner had encamped. Lieutenant Pym, also, with about 120 sabres, was posted at about the same distance from the centre, in Captain Walker's rear. At 4 A.M. on Sunday, the 18th, the columns marched from their respective bivouacs, and clustered round the base of the mountain. At dawn 3 guns, the pre-concerted signal, were fired from the fort at Moorpoor, six miles distant, and the word was given to march. Lieutenant Lewis gallantly led the ascent with 118 men. The enemy's third shot struck him in the chest. Ensign Bell was now to the front, and manfully struggled up the hill for an hour and a half, when the fire from a hidden breastwork knocked over 22 of his men—7 killed. The work was subsequently turned, and the brave little band went ahead without further serious opposition. On the left of this party Major Honner himself tugged up the hill with 200 Grenadiers to take a ruined fort half way up the mountain. The advance of this force took the opponents of Ensign Bell and Captain Hill in the rear. Three times attacked, but never checked, the men steadily advanced, until, after a pull of nearly four hours, the enemy's fort on the summit was captured (the Grenadiers climbing in at one of the low bastions), with but 2 men wounded: 70 men, women, and children were captured. Beyond the ruined fort the ascent had been almost perpendicular, Major Honner wisely avoiding the pathway, and thus saving his men. The fort taken was the north fort, besides which there were a centre fort, containing the tanks and huts, and a south fort. From the latter hundreds of families were streaming out, protected by a fire of matchlockmen, "who stood quietly looking at us, but beyond our fire (common muskets.)" The next attack was from the other side of Moorpoor, and consisted of 4 mountain train guns, manned by Golundauze and 6 or 7 Grenadiers, and each gun attended by 100 of the 14th Native Infantry, the whole under Captain Hill. The ascent of the hill up which these guns were dragged was difficult even for empty-handed men, and the feat that was achieved in getting them into position cannot be overrated, especially as their passage was somewhat hotly contested. Still further to the left were posted Lieutenant Hallett with 50 Grenadiers, under Lieutenant Maunsell of the 11th, with 40 of his men. They were to assist the Joonaghur Seebundee in taking the Dantal hill, 12 or 14 miles from the Ubhpoora. The Seebundee, however, fought shy, greatly to the disgust of their master and his minister. In mounting the Dantal, under fire the whole way, a matchlock ball fired from the highest peak of the Dantal, 600 yards distant, struck and lodged in a telescope slung at Lieutenant Hallett's back. The extreme left attack was conducted by Captain Anderson, with 250 of the 11th Native Infantry. This attack became mixed up with Lieutenants Hallett's and Maunsell's. The fire of the Arabs and Waghers holding the Dantal being hot on the 11th, Major Honner despatched 4 guns and 100 men, under Captain Hill, to a ridge in their rear, to draw of their fire. The Dantal was eventually taken by a splendid rush, in which Captain Anderson pistolled two of the enemy himself. He was shot through his clothes, and lost 4 killed and 14 wounded. The endurance of the 11th was something wonderful. They marched 45 miles in 31 hours, next day started again, were under arms for 20 hours, and marched equal to 60 miles! By 3 or 4 o'clock in the afternoon all was over at headquarters, the enemy stealing away through the jungle. It was now that they fell into Captain Walker's ambush, that officer grabbing nearly 500. The whole operations are a model for bush fighting. Major Honner's forethought in posting Captain Walker and Lieutenant Pym; his care not to expose his men in the ascent more than was unavoidable; the support sent to the 11th, and his refusal to permit pursuit, that would in all probability have ended disastrously, mark the qualifications a commander so situated should possess. The force engaged numbered 1058 men, besides the artillery. We lost 12 killed and 44 wounded, 4 of the latter having since died. No officer was killed. The killed and wounded of the enemy may amount to 25, the disproportion being fully accounted for by the natural obstacles with which the force had to contend.

A COMMON SOLDIER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As it seems to be very generally doubted that the remarkable paper on "The Army," in *The Constitutional Press Magazine* for February, is really written by one who has been in the ranks, will you allow me to state through your columns that that very terse and clever article *is* from the pen of a "late common soldier."—I am, sir, your obedient servant,

EDITOR, CONSTITUTIONAL PRESS MAG.
50, Conduit Street, Hanover Square, Feb. 7, 1860.

RIFLE PRACTICE RETURNS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Having seen it stated in *The Times* and other papers, that the Royal Engineers are at the head of the rifle practice returns this year, will you inform me if those returns have as yet been made public?

Last year I think they were published in several papers; and I would suggest your doing so now, if you have space, as I know soldiers of the good-shooting regiments are always proud to see the place they occupy on the list, whilst those who have not shot so well try to get their regiment into a better position next year.—Your obedient servant, P. L.

OFFICERS OF VOLUNTEER CORPS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—We are told that a soldier *is* useless unless he implicitly obeys his officers, and that the best and steadiest troops will be unsteadied by incompetent and undecided commanders; if so, what appearance will the Volunteers present, if officered in such a manner. No officer should have the command of a company till he has perfected himself in every portion of the drill requisite for an officer, and obtained a certificate of competency from some adjutant to that effect.

We Volunteers are anxious to be of use in time of need: we shall always be led by our respective officers, and if we know some of them are not equal to a few ordinary movements, how can we be expected to depend upon them in the time of danger, in the face of an enemy?

Let us have the right men in the right places, and we will soon become fit for duty.—I am, sir, yours, &c.,

L. R. B.

THE VOLUNTEER MOVEMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Pray pour a rattling volley about the ears of those obstructives, whether at the War Office or elsewhere, who just now impede the progress of the Volunteer corps. Some of these gentlemen exercise their ornamental functions with grace and celerity, but there are others who having a fancy, or perhaps a command of a yeomanry or militia regiment, snub the Volunteers. Our corps is well up in drill and rifle movements, but we have no uniform, no colonel, no captain, nothing but "effectives." Indeed, there appears to be no chance of our getting either our officers or our uniform in time to obey the summons of her Majesty to attend her *levée* on the 7th of next month. I for one have no desire to offer an insult to my sovereign by not attending at her *levée*; but unless we get gazetted and receive our uniform in time, our absence will have the appearance of inattention and want of courtesy.—Yours obediently, QUICK STEP.

ON THE EFFICIENCY OF THE MILITIA FORCE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It is generally understood that various plans for adding to the efficiency of the militia force of the country are now under the consideration of the Government. One plan involves the re-construction of regiments in certain districts, where it is considered that counties, by themselves, are unable to supply a battalion of 500 men. This, of course, only means that, *when* the present quotas were fixed, these counties were so considered. Now the only plan known to have been devised on this head is what the late militia commission recommended, namely, to amalgamate the quotas of two or three counties, as they at present stand, in one battalion, Nearly all the Welsh counties, as well as several in England, are affected by this plan. Amalgamation has, of course, the effect of destroying the *esprit de corps* of a county regiment, and is confessedly a step which would not be taken except in cases of necessity. Now, before any wholesale amalgamation is decided on, there is a point which ought to be looked to; this point is, the present quotas supplied by counties should be re-considered, and alterations should be made where they may be required. The position of many districts in England and Wales, as regards population, has widely changed since the present numbers were fixed. It is easy to arrive at the true state of the case, statistics of population are always available, and the "statistics" of every militia regiment, its strength, number of recruits, absentees from training, or on embodiment, &c., are all accurately known at the War Office. It is unnecessary here to mention the names of counties referred to. In more than one instance, especially in Wales, regiments, limited in numbers to less than 500 men, are not only filled with a good class of volunteers, but, for some time past, have had to stop recruiting, and reject men wishing to join, of however good class these volunteers may be, because the authorities do not allow any regiment to exceed its quota, even on paper. Owing to increase of population, and decrease of emigration, especially in mining and manufacturing districts, instances of the kind we have given could, no doubt, be multiplied. On the other hand, some counties have had their quota fixed at so high a standard, that their regiments either cannot keep up their numbers at all, or else enrol a very inferior class of men, such as those who fill the columns of the Police Gazette, and live on feloniously-received bounties. This is clearly proved, when at training, a regiment of 800 or 1000 men can only muster 200 to 500. This evil, however, we may expect to be rectified by degrees as population increases; but it is impolitic and unfair to deprive a county, which is well able to keep up a battalion of 600 or 700 strong, of the opportunity and credit of having a regiment of its own, merely because the *present quota* happens to be fixed at less than 500 men, and because amalgamation may be the plan which has been proposed. We believe it will be found that many, if not *most*, of the present "four company" regiments might easily be expanded into "six company" regiments; since counties which were considered able to keep up an establishment of from 420 to 450 men, some eight or ten years ago, can now generally supply at east 550 to 600.

Another subject, which may be referred to, is the appointment of officers as adjutants of militia regiments. It is unnecessary to describe particularly the irregularities which have crept in under the present system of making these appointments. One plan by which some good, it appears, might be gained is the following:—Let adjutants of militia constitute a kind of "distinct staff corps," which would of course include all officers at present serving; let all future appointments to the corps be made by the Secretary for War, who would have a list at the War Office (as is now done in the case of paymaster of the regular service) of those officers, in or out of the regular army, who were desirous of obtaining adjutancies, and were qualified by service and professional knowledge for this "staff corps." *All* appointments, as vacancies might occur, should be made directly from this list. The adjutants (who now hold "Queen's commissions") should also have the honorary rank of captain in the army, to be converted, after, say ten or twelve years' service, into that of brevet-major. This brevet rank might be allowed to carry with it a small additional rate of pay, 2*s.* or 3*s.* a-day, and after this they might be allowed to proceed by brevet to the rank of lieut.-colonel on retirement, *without extra* pay or allowances. No good point can be said to be gained by the present system of placing all patronage as to the appointment of adjutants in the hands of the commanding officer of a regiment and the lord lieutenant of a county, who have already all the appointments to other commissions. What is here said on the subject of *rank* is, of course, merely suggestive. The formation, as a branch of the regular service, of a "staff corps" of militia adjutants would probably prove highly beneficial. No practical inconvenience would be found to arise from their possession of recognised rank in the army. Other suggestions may hereafter be made on subjects connected with the efficiency of the militia our "constitutional force." We ought to secure some method of having a force for duty without, as at present, recklessly turning adrift at intervals formed soldiers, in the officers and men of embodied regiments, while disembodied corps are left, year after year, with no further knowledge of their duty than is picked up in a twenty-one days' training. To reconsider, however, with a view to increasing the present quotas in the case, *especially* of regiments of four companies is, just now, one of the most important subjects to be attended to. To avoid amalgamation by a judicious increase, where it seemed to be justified, would be an extremely popular measure in the regiments and districts affected, and would also add considerably, without additional expense, to the available force for home defence.

R. C. R.

ROYAL GEOGRAPHICAL SOCIETY.—Evening meeting, Monday, the 13th inst., at 8·30, P.M. Papers to be read: 1. "China; Notes of a Cruise in the Gulfs of Pe-che-li and Leo-tung in 1859;" by Mr. Mickie; communicated by John Crawfurd, Esq., F.R.G.S. 2. "Africa; Discovery of a New River flowing to the East in Lat. 17° 30′ S., Long. 19° 0′ E.;" by C. J. Anderson, Esq. 3. "Proposed Expedition up the Congo;" by Capt. N. B. Bedingfeld, R.N., F.R.G.S.

THE LATE LAND TRANSPORT CORPS.—In the House of Commons the other evening, Mr Pollard Urquhart called the attention of the Secretary of State for War to the case of certain officers of the Army who, after having volunteered into the Land Transport Corps, did not receive the promotion that was granted to others who were similarly engaged in the same service, on the ground of their names having appeared in "general orders" as appointed until further orders. As far as he could learn, the circumstance arose from a mere verbal error, and the highest military authorities had admitted the claims of the officers he had referred to. It was a case of extreme hardship, and he hoped justice would be done without delay. Mr. Herbert replied that a committee of that House had sat, before which was brought the case of certain officers who had entered the corps under very peculiar circumstances, and who at the conclusion of the Crimean War were dismissed from that service. The committee went carefully through the matter and divided the cases into certain classes, making recommendations as to the manner in which those different classes should be treated by the Government. The War-office, then presided over by his predecessor, applied to the Treasury for the funds requisite for carrying out those recommendations; and after a good deal of correspondence all the claims were satisfied which came before that committee. That corps was raised on the understanding that it was only to be continued during the Russian War, and engagements for two years with very high pay were given in certain instances. On the return of peace it became necessary to dissolve the corps; but the case of those officers to whom a committee of that House recommended that compensation should be paid differed from that of those officers of whom the committee took no notice, and with respect to whom it made no recommendation. Among others, there was the case of men who had given up situations in the Civil Service which carried the right to a pension, and who, when they lost their position in the Land Transport Corps, were left without the expectation either of the pension which their civil situation would have given them, or of the half-pay which military employment conferred. There were other cases to which he need not particularly refer, but the position of those gentlemen was this, that they were appointed "until further orders." The hon. member had quoted a letter from Colonel Wetherall to show that these gentlemen were to be treated in the same manner as the others. But in this Colonel Wetherall was entirely wrong, for the arrangement was only a provisional one, and he could have no means of knowing what course the government would ultimately take. To illustrate how little claim existed on the part of the officers in whose favour the committee did not report, he would mention a single instance. Lieutenant Delamere, a very respectable person, was an ensign in the 21st Regiment of Foot, when he joined the Land Transport Corps, of which he was made a captain till further orders. He, however, still remained on the strength of his regiment, so much so that he actually received promotion in it during the time he was acting as captain in the Land Transport Corps. He became a lieutenant and was sent back to his regiment. He stands in no worse position than anybody else; he gained his promotion. But to make him a captain over the heads of all the other officers, who were constantly under fire and in the trenches, while he was not, would surely be very unjust. The House of Commons, therefore, having given this subject its best consideration, and the recommendations of the select committee having been adopted—in carrying out which, indeed, the Government had gone even further than its own sense of justice might, perhaps, have induced it to go,—he thought they could not now re-open the question of the claims of these officers.

We have before alluded to the dreadful mortality on board the ship Accrington, which left Liverpool for India last September with the wives and families of soldiers. The subject was brought before Parliament on Thursday evening, and the Under-Secretary for the Colonies, Mr. C. Fortescue, gave some explanations of this most lamentable case. He said that when this vessel arrived at Pernambuco, a great mortality was found to have taken place amongst the children. The captain, who had been accused of being guilty of great cruelty and oppression, was dead, as well as the mate, and there was reason to suspect that these persons had been poisoned by the cook, or by some other person on board. With respect to the mortality which had taken place among the children, a full and searching inquiry must be instituted. With reference to the deaths of the captain and mate, the consul had set on foot a full inquiry, as the charge amounted to one of murder. He would add one word with regard to this lamentable occurrence. He would beg to remind the house on behalf of the Emigration Commissioners, that the Accrington was not one of the ordinary emigration vessels in charge of the emigration commissioners. It was chartered to carry the families of soldiers to India, the duty being undertaken by the emigration commissioners at the request of the War Department. In all cases the emigration commissioners exercised their authority as to the selection of emigrants taken on board, and the limitation of the number of children. In this case they had no such discretion, and out of 67 deaths which had occurred 60 were those of children under four years of age. Consequently, no *prima facie* blame attached to the emigration commissioners.

Colonel Macmurdough, Inspector of Volunteer Rifle Corps, is about to visit Liverpool in the course of the present week, on a tour of inspection.

When Sir Colin Campbell, now Lord Clyde, was Inspector-General of the Forces in this kingdom, he was entertained to a sumptuous *déjeuner* by the officers in garrison in Athlone, but he partook of none of the rich wines which the hospitality of his military entertainers provided for him, preferring to quench his thirst with humble ale, giving as a reason for his choice of this economic drink, that until it was recognised as the drink at mess, officers with limited means would always be in difficulties; and when he saw such wines before him as Burgundy and Champagne, he did not wonder at the innumerable complaints against officers by tradesmen, for the non-payment of their bills. He would, therefore, wish to see a plain and substantial mess, such as young gentlemen were accustomed to partake of at home with the family circle.

NEW ZEALAND.

Accounts have just been received from Auckland, stating that a French transport from New Caledonia, with invalids, &c., lately entered that harbour during the night, and the inhabitants had a very strong suspicion that this unexpected visit was for the purpose of examining the defences of the town and neighbourhood. Like all French vessels employed in carrying troops and stores, she had a full complement of naval officers and seamen, who were thus gaining experience in their profession ready to be turned to useful account at some future period. Fortunately, H.M.S. Niger, Captain Cracroft, was lying in the harbour ready to pay due honour to our ally, and if she had arrived only a few hours earlier, her captain and officers would doubtless have been welcome to a ball and theatrical entertainment, which were given on board the Niger, to the Governor and the *élite* of the New Zealand metropolis.

Telegraphic communication with India will soon be very nearly completed. The line from Kurrachee to Muscat was laid with perfect success on the 17th of January. Mr. Newall started from Muscat (to lay the line to Aden) on the 21st. The distance from Kurrachee to Muscat is about 458 nautical miles. The next section, from Muscat to Hallani, will be 490 miles, and the third, from Hallani to Aden, 730 miles. Should the submersion of the cable be unattended with mishap, it is hoped that the line from Aden to Kurrachee will be thrown open for public use in about six weeks' time. There will then be uninterrupted telegraphic communication between Alexandria and all parts of India. The cable has one conducting wire.

On Thursday evening, in the House of Commons, Mr. O'Brien asked the Secretary of State for War whether it was true that the troops forming the expedition to be sent from India to China were to be armed with the smooth-bore instead of the rifled musket. Mr. S. Herbert said that, as regarded the troops which constituted the expedition to China, those troops would be armed with the Enfield rifle. All battalions of European troops which went from India would also be armed with the Enfield rifle. But, as he understood the general order, the case was this—that native troops had almost universally not been armed with the rifle, but there had been made for them a weapon of lighter construction and of smooth bore. He had no doubt, therefore, that all the native forces would be armed with the same weapon.

The Secretary for India has announced that the distribution of the Indian medals has commenced, and accounts for the delay up to this by saying that the Nominal Rolls have only just been received from India, and that the question of clasps for particular services was not yet quite settled.

The question of compensation for losses during the Indian mutiny is in the hands of a commission whose report will be final. The payments are likely to be made about May next.

The Lucknow prize money amounts to 143,000*l.*, and steps are being taken for its distribution among those entitled to receive it.

The annual ball of the Royal London Yacht Club came off on Monday night with *éclat* at Willis's Rooms, King Street, St. James's. There were over 400 ladies and gentlemen present. Dancing commenced at ten o'clock to Coote and Tinney's band, and was kept up till twelve, when the dancers adjourned to supper, which was presided over by the commodore, Mr. Andrew Arcedeckne.

A Parliamentary return was printed on Tuesday, at the instance of Mr. Williams, showing the number of persons flogged in the Navy in the year 1858, by which it appears that 47,646 persons had rendered themselves liable to corporal punishment; that 997 were punished by the infliction of 1230 lashes, of which 784 were inflicted by courts-martial, and 213 by other authority. The highest number of lashes given in any one case was 50, and the lowest 3.

RAILWAY EXTENSION TO SOUTHSEA BEACH AND PIER.—A deputation consisting of Sir James Elphinstone, M.P. for Portsmouth, the Mayor of that borough, Sir John Simeon, Bart., Mr. R. W. Ford, Mr. Hood, C.E., Mr. Leacock, and Mr. Galt, had an interview with the Duke of Somerset and Lord Grey de Ripon, representing the Admiralty and War Departments, for the purpose of submitting to their lordships a plan of a very short but very much needed railway, to connect the existing terminus at Landport, as well as the dockyard, with the beach at Southsea. The deputation was introduced by Sir James Elphinstone, who explained the nature of the project to their lordships, who appeared to feel the necessity of a more rapid communication with the Isle of Wight than the present accommodation is capable of affording. This has long been acknowledged, and last session of Parliament the corporation of Portsmouth endeavoured to obtain a Bill for making a railway from the terminus to Victoria Pier, but the application was refused as the proposed rail would seriously interfere with the line of fortifications. Independent of that weighty objection the Lords of the Admiralty would not sanction any scheme that threatened to increase the sea traffic at the Victoria Pier, fearing that from its position at the throat of the harbour it might cause inconvenience to her Majesty's ships of war entering or departing therefrom. On that occasion, however, the Admiralty at the conclusion of their official report, stated, "That a packet Station on the shore of Southsea Common, would prove more commodious in many ways, and might be conuected by a railway running from the present terminus along the foot of the glacis at a much less expense." The necessary measures have now been adopted for carrying out the views suggested by the Admiralty, and it is now proposed to run a viaduct on light iron columns and girders, varying in height with the undulations of the glacis, and to be so constructed as to be removable or destroyed in an hour. The viaduct will not interfere with the lines of fortifications; indeed the suggestions of the Admiralty have been respected, even to the most minute point. It is almost unnecessary to allude to the manifest advantages which must result from this short but useful extension. The public departments will be much benefited, as the line will offer increased facilities for shipping and unshipping stores, and materials of war, outside the harbour, and by relieving the confined area of the dockyard of the necessity of embarking and disembarking troops, and for similar purposes.

NEW LIFE-BOATS.—Some interesting experiments have been made in the canal at Limehouse with five life-boats, built by Messrs. Forrestt for the Royal National Life-boat Institution, the Spanish Government, and for an Australian colony, in the presence of the officers of the above institution, Mr. Zulueta, Mr. Harro, and other gentlemen. One of the life-boats for the Spanish Government is of a large size, being 35 feet long, and is intended for some exposed stations on the coast of that country. The other two life-boats for the Spanish Government are of a similar character, but of a smaller size, being 25 feet long. This is a most important advance in the cause of humanity, and worthy in every way of the imitation of our Admiralty. It is generally known that the National Life-boat Institution has sent some working drawings on a large scale of its plan of life-boats to all European and other maritime nations, and also to some of our colonial governments. Life-boats have been built by Messrs. Forrestt for the Governments of Russia, Prussia, Portugal, and Spain, and for several of the colonial governments. In the builders' yards one was struck with the large fleet—upwards of twenty life-boats—that were on the stocks. A considerable proportion of them are the orders of the National Life-boat Institution. Some of the boats are the munificent gifts of private persons, who had given them appropriate names, such as the Good Deliverance, the Joshua, &c. When it is remembered that last year alone upwards of 1600 poor shipwrecked persons met with a watery grave on the shores of the United Kingdom, it will be readily admitted that this is not the time when the philanthropic efforts now making to provide life-saving means should be allowed for one hour to be relaxed.

We learn by telegraph that Tetuan has been taken by the Spaniards after the battle which was fought on the 4th. Eight hundred large tents, forming the five encampments of the enemy, the artillery, camels, and all other equipages of the Moorish army have been taken. The brothers of the Emperor took to flight. Two summonses have been sent to the enemy to surrender Tetuan within 24 hours, a deputation from the city came into the Spanish camp to beg for mercy, as the Mussulmans had commenced to pillage and slaughter the town. The division of General Rios entered the place without any opposition, and was received with manifestations of joy. Immense popular rejoicings are taking place at Madrid.

Obituary.

Captain Moorsom, R.N., died on Saturday last at his brother's house at Brighton. Captain Moorsom had been in a very weak state of health for some time, and resigned the command of the Diadem about four months ago, so that this event was not altogether unexpected, though very sudden, arising from the rupture of one of the vessels of the heart. Captain Moorsom was within a few days of 44 years of age. He entered the Navy at 14. Although he obtained the "gold medal" of his year at the Naval College, he was not made lieutenant till seven years after he had served his full time as mate, and then his hope of further promotion appeared so small that he was frequently on the point of quitting the Service. The invention of his "shell," however, brought him into notice. He served in the first Chinese war, and soon after the breaking out of that with Russia, being then a post-captain, he was appointed to the Firebrand, whose commander had been killed at the mouth of the Danube. He never joined that ship, but was employed on shore with Captains Lushington, Keppel, Peel, and Hay, in the Naval Brigade. He had a large share in the organisation of that force, and was the only officer, we believe, with one exception, who served with it through all the bombardments until it was broken up at the fall of Sebastopol. Captain Moorsom was a C.B., a Chevalier of the Legion of Honour, and had the Order of the Medjidie, together with, of course, the Chinese, Crimean, and Turkish medals. He gave his invention of the "shell," or more properly "percussion fuze," to the Government, and it has been for some years adopted in the Service. He wrote a treatise on the "Manœuvring of Steam Fleets."

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ARCHDALE—Feb. 2, at Orleigh Court, Bideford, the wife of Captain Audley Archdale, of a daughter.

BAKER—Dec. 13, at Bolarum, near Hyderabad, the wife of Richard Dufrere Baker, Esq., Madras Horse Artillery, of a daughter.

BRETT—Dec. 20, at Lucknow, the wife of Captain Brett, Rifle Brigade, of a daughter (prematurely), which survived its birth only a few hours.

COLLINS—Feb. 5, at No. 17, St. James's Terrace, Winchester, the wife of F. Collins, Esq., M.D., Staff Assistant Surgeon, of a son.

CONWAY-GORDON—Feb. 6, at Southview Lodge, Southsea, the wife of F. I. Conway-Gordon, Esq., 5th European Bengal Regiment, of a son.

DREW—Feb. 4, at Gayton Lodge, Luton, near Chatham, the wife of Captain Drew, Adjutant 3rd Depôt Battalion, of a daughter, stillborn.

DU CANE—Feb .1, the wife of Major Du Cane, R.E., of a daughter.

GOULBURN—Feb. 6, at 32, Grosvenor Place, the wife of Colonel Goulburn, of Betchworth House, Surrey, of a son.

HALL—Dec. 23, at Lucknow, the wife of Major G. W. M. Hall, commanding 4th Irregular Cavalry, of a daughter.

HARRISON—Feb. 6, at Salisbury, the wife of Captain R. S. Harrison, R.M. Light Infantry, of a daughter.

KINGSCOTE—Feb. 4, at 34, Charles Street, Berkeley Square, London, the Lady Emily Kingscote, of a daughter.

MITFORD—Feb. 5, at Malvern, the wife of Captain H. R. Mitford, prematurely, of a daughter, stillborn.

MURRAY—Dec. 28, at Ajmere, Rajpootana, the wife of T. Murray, Esq., M.D., in Medical Charge, Mhair Regiment, of a son.

POGSON—Dec. 9, at Rajkote, the wife of Captain John Pogson, 17th Regiment, Bombay N.I., of a daughter.

PROWER—Feb. 3, at Dover, the wife of Major Prower, of Purton House, Wilts, of a daughter.

TAYLER—Feb. 3, at Upway Rectory, Dorset, the lady of Captain R. N. Tayler, of a daughter.

TOWNSEND—Feb. 3, at 11, Burlington Street, Bath, the wife of Lieut. John Townsend, R.N., of a son.

RINGER—Feb. 2, at Clifton, Gloucestershire, the wife of Charles Ringer, Esq., Captain C. B. Rifle Corps, of a son.

SIMMONDS—Feb. 8, at Upper Seymour Street, Hyde Park, the wife of Richard Simmonds, Esq., Paymaster, R.N., Admiralty, Coastguard Office, of a son.

MARRIAGES.

ASHBURNHAM — FOLEY — Feb. 8, at St. George's, Hanover Square, by the Rev. H. Howarth, Major-General the Hon. Thos. Ashburnham C.B., to the Hon. Adelaide Georgiana Foley.

BEETSON—REID—Feb. 2, at No. 16, Westbourne Park, London, by the Rev. William Chalmers, of the Marylebone Free Church of Scotland, George Beetson, Esq., late Superintending Surgeon of the Madras Army, to Jemima Reid, fourth daughter of James Reid, Esq., Surgeon, of the same Presidency.

BUCHANAN—PITTOCK—Feb. 4, at St. James's Church, Westbourne Terrace, by the Rev. T. H. Tait, incumbent of Mollington, Oxon, Robert Buchanan, Esq., son of the late Major James Buchanan, to Clara, only child of the late William Pittock, Esq., of The Croft, Hastings.

BURGESS—SNOWDEN—Jan. 5, at the Cathedral, Bombay, by the Rev. Ward Maule, Assistant-Chaplain, Charles John Burgess, Lieutenant H.M.'s 46th Regiment, to Georgina, second daughter of T. H. Grove Snowden, Esq., of Ramsgate, Kent.

DOUGLAS—BAXTER—Feb. 7, at the parish church, Mancetter, by the Rev. Dudley Somerville, M.A., Chaplain to the Forces, Stephen Francis Douglas, Esq., Commander R.N., second son of the late Captain W. H. Douglas, R.N., to Mary Louisa, eldest daughter of Stafford Stratton Baxter, Esq., of Mancetter Manor.

FOSTER—MATHIAS—Feb. 7, at Harford Church, near Ivy Bridge, South Devon, by the Rev. R. P. Cornish, incumbent of Ivy Bridge, assisted by the Rev. H. Cottle, rector of Harford, Frederick A. Foster, Esq., Royal Marine Artillery, to Ellen Gertrude, eldest daughter of Lieutenant-Colonel Wm. Mathias, 3rd Royal Lancashire Militia, late of the 52nd Regiment.

OLDFIELD—BULLEN—Dec. 29, at St. James Cathedral, Mauritius, by the Lord Bishop, assisted by the Rev. P. Pennington, M.A., Military Chaplain, Edwin John Oldfield, Esq., Captain 2nd Battalion 5th Fusiliers, eldest son of the late Edwin Oldfield, Esq., Llandulas, N.W., to Mary, youngest daughter of Robert Bullen, Esq., of Mauritius.

OWLES—JOHNSON—Dec. 1, at St. John's Church, Calcutta, by the Rev. J. Richards, M.A., Alfred J. Owles, Esq., of the 6th Dragoon Guards, youngest son of Mr. Jno. Owles, Trinity Street, Bungay, to Mary, eldest daughter of the late John Johnson, Esq., surgeon, Baltinglass, Ireland.

SPENS—WRIGHT—Feb. 2, at Frome, by the Rev. William Wright, curate of Kensington, brother of the bride, T. A. Spens, Esq., 3rd Bombay Cavalry, to Maria, youngest daughter of the Rev. G. N. Wright, of Coedy Celyn, Denbighshire, and Frome.

WARRE—COOPER—Feb. 7, at All Saints' Church, Leamington, by the Rev. Luke Fowler, M.A., Arthur, second son of John Ashley Warre, Esq., M.P., to Laura Frances, eldest daughter of Edward J. Cooper, Esq., of Markree Castle, county of Sligo.

WHITLOCK—LAWFORD—Dec. 15, at Madras, Captain William H. Whitlock, 5th Madras Native Infantry, and second son of Major- General Sir George C. Whitlock, K.C.B., to Margaret Louisa, eldest daughter of Lieutenant-Colonel Edward Lawford, Madras Engineers.

WOLFE—FITZHERBERT—Feb. 6, at Walcot Church, Bath, by the Rev. Beresford Harris, Chaplain to Her Majesty's Forces, Chichester, Maynard Wolfe, Esq., Captain Royal Artillery, to Geraldine, younger daughter of Robert F. Fitzherbert, Esq., of Ravenscourt Park, Hammersmith.

DEATHS.

CARVELL—Jan. 30, at Orme Square, London, aged 23, after a short and severe illness, deeply regretted, Henrietta, the dearly beloved wife of H. de Wolfe Carvell, Esq. (late 2nd W. I. Regiment), and dearly loved and only daughter of Michael Winoter, Esq., of Lima, Peru, and Bayswater Terrace, London.

CULHANE—Dec.'10, on his passage to the Cape, on board the E.I.S. Marlborough, William Culhane, Esq., Surgeon, R.N,, of H.M.S. Sapphire.

DIXON—Jan. 30, at Southampton, Major-General Matthew Charles Dixon, retired full pay, Royal Engineers, aged 69.

ELWOOD—Feb. 8, aged 79, at his residence, Clayton Priory, Sussex, Colonel Charles William Elwood, on the retired list Hon. E.I.C.S., and Magistrate and Deputy-Lieutenant for the county of Sussex, deservedly beloved and deeply regretted by his family and friends.

HACKETT—Jan, 31, at Parsonstown, Adam Hackett, Esq., late H.M.'s 38th Regiment.

HARNETT—Dec. 2, Mrs. Harnett, aged 73; and on Feb. 1, her youngest son, Captain Edward Harnett, aged 33.

MANNING—Feb. 2, at Pimlico, Henry Manning, second son of the late James Manning, Lieutenant R.N., aged 47.

MARRIOTT—Dec. 22, at Azimghur, N.W.P. Bengal, Amy Ada Blanche Cavendish, the dearly beloved wife of Randolph Marriott, Esq., Bengal Civil Service, and daughter of General G. Murray, aged 25 years 6 months and 2 days.

MOLESWORTH—Feb. 3, at 7, Norfolk Terrace, Westbourne Grove West, Mary, relict of the late Major-General Arthur Molesworth, E.I.C.S.

MOORSOM—Feb. 4, at No. 6, Vernon Terrace, Brighton, Captain William Moorsom, R.N., C.B., aged 44.

POGSON—Dec. 17, at Rajkote, Anne, the beloved wife of Captain John Pogson, 17th Regiment, Bombay N.I., aged 29.

REEVES—Jan. 31, at Vostrsberg, county Cork, aged 19, Conway Richard Dobbs Reeves, Ensign 58th Regiment, second son of the late William M. Reeves, of Vostersberg.

WADE—Jan. 4, at Sawergaum, India, after twelve days' illness, beloved by his brother officers, Mark Farley Wade, Esq., Lieut., Her Majesty's 28th Regiment.

WEBB—Jan. 30, at the Bridge of Allan, N.B., Janet Carruthers, relict of the late Captain William Morse Webb, of the Bombay Artillery.

WILLIAMS—Feb. 2, at 16, Athenæum Street, Plymouth, George Herbert, son of Commander George Bell Williams, R.N., aged 1 year and 8 months.

Advertisements.

V. R.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.—HER MAJESTY'S GOVERNMENT

having, with the sanction of Parliament, determined on establishing a Reserve Volunteer Force of Seamen trained to the Use of Arms:

THIS IS TO GIVE NOTICE,

That any Seaman possessing the following qualifications may be inrolled as a Royal Naval Volunteer in the Reserve Force, and will thereupon be entitled to the advantages and be subject to the obligations mentioned below:—

QUALIFICATIONS FOR THE RESERVE.

1. A Volunteer must be a British subject:
2. He must be free from infirmity:
3. He must not be over thirty-five years of age:
4. He must within the ten years previous to his joining the Reserve have been five years at sea, one year of that time as an A.B.

ADVANTAGES OF THE RESERVE.

1. A Volunteer will at once receive an annual payment or retainer of 6*l*., payable quarterly:

2. He will, if he fulfils his obligations and is in the Reserve the requisite time, receive a pension of not less than 12*l*. a year whenever he becomes incapacitated from earning a livelihood, or at sixty years of age if not previously incapacitated:

3. He may elect either to take the whole pension himself, or to take a smaller pension for himself during his life, and to allow his wife a pension after his death, for the remainder of her life:

4. He will not, on account of belonging to the Reserve, forfeit any interest in any Friendly or Benefit Society:

5. His travelling expenses, to and from the place of drill will, when necessary, be provided:

6. He will, during drill, receive, in addition to the retaining fee, the same pay, victualling, and allowances as a seaman of the fleet, according to his rating:

7. He will, if called out on actual service, receive the same pay, allowances, and victuals, and have the same prospect of promotion and prize money, as a continuous service seaman of the fleet, according to his rating, and he will on joining receive the same clothing, bedding, and mess traps:

8. He will, if wounded or injured in actual service, receive the same pension as a seaman in the Navy of the same rating:

9. He will be eligible to the Coast Guard Service and Greenwich Hospital:

10. He may quit the Reserve, if not at the time called out for actual service, at the end of every five years; he may also quit it, when not called out, on paying back the retainers he has received; or, without payment, if he passes an examination as a Master or Mate, and obtains bonâ fide employment as Master or Mate.

OBLIGATIONS OF THE RESERVE.

1. A Volunteer must attend drill for twenty-eight days each year; he may do so, so far as the convenience of the public service will permit, at a time and place convenient to himself; but he cannot in any case take less than seven days' drill at any one time:

2. He must not, without special permission, proceed on a voyage that will occupy more than six months:

3. He must appear before some Shipping Master once in every six months, unless he has leave to be abroad longer, and he must report every change of residence, and employment:

4. In order to earn a Pension he must continue in the Reserve as long as he is physically competent to serve, and he must also have been in the force fifteen years if engaged above thirty, or twenty years if engaged under thirty. In reckoning this time actual service in the fleet will count double:

5. Volunteers may be called upon for actual service in the Navy by Royal Proclamation. It is intended to exercise this power only when an emergency requires a sudden increase in the Naval Force of the country:

6. A Volunteer may in the first instance be called out for three years. If there is then actual war, and he is then serving in one of Her Majesty's ships, he may be required to serve for two years longer; but for the additional two years he will receive 2*d*. a day additional pay:

7. Volunteers when on drill or actual service will be subject to Naval Discipline:

8. A Volunteer who fails to fulfil the obligations of the Reserve will forfeit his claim to Retainer and Pension, and if he fails to join when called out for actual service may be treated as a Straggler or Deserter from the Navy.

The Inrolment commenced on 1st January, 1860.

Full Information and detailed conditions may be obtained on application to the Shipping Master at any Port in the United Kingdom, or to the Officers of Customs in the Channel Islands and Isle of Man.

V. R.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.

LEAVE FOR LONG VOYAGES.

Special Leave for Voyages exceeding Six Months will be granted to ALL VOLUNTEERS on the following Conditions:—

1. The Leave is to be for one ship, and for one voyage only at a time, and to be renewed for each voyage. The ports or countries at which the ship is to touch must be all specified, or if any of these are not specified the voyage must be limited by the articles to twelve months.

2. The Volunteer must have completed his twenty-eight days' drill for the year before the Leave will be given.

3. On an emergency the Reserve may be called out for service at home or *abroad*. If the Volunteer is then abroad, he must, if summoned, join any of H. M. ships abroad; under the same penalties, in case of refusal, as in case of refusal to join in the United Kingdom.

4. The arrears of retainer due will be paid on the Volunteer's return in the ship for which Leave is given.

5. The Admiralty reserve power to withhold this Leave if at any time on an emergency the Volunteers are required for the defence of the country. They also reserve power to withhold the Leave at the end of each Volunteer's first five years of service, when he may, if he pleases, quit the force.

6. Subject to these reservations, it is the intention of the Admiralty to grant Leave upon the above conditions for the first five years of the service of each Volunteer who joins the Reserve under the present Regulations.

AGE OF ADMISSION. During the year 1860 the age of admission will be extended from 35 to 40.

*** *For further Information apply to a Shipping Master.*

Board of Trade,
Whitehall, S.W., 12th December, 1859.

CRYSTAL PALACE.—POULTRY SHOW.

THE GREAT WINTER SHOW OF POULTRY AND PIGEONS will be held THIS DAY, SATURDAY the 11th, and on MONDAY, TUESDAY, and WEDNESDAY, the 13th, 14th, and 15th FEBRUARY, in the North Wing adjoining the Tropical Department.—Admission, including all the attractions of the Palace, Saturday, Half-a-crown; children under 12, 1*s*. Other days, 1*s*.; children, 6*d*. Season Tickets free.

CRYSTAL PALACE.—A GRAND CONCERT

will be given on SATURDAY NEXT, the 18th FEBRUARY, at which Mdlle. Piccolomini will make her first appearance on her return to England. The vocalists will include Signor Belart, Signor Aldighieri, Signor Gilardoni, and Mdlle. Piccolomini. The Crystal Palace Orchestra, considerably increased for this occasion, will be conducted by Signor Arditi and Mr. Manns.—Admission by Season Tickets (now on sale at 10*s*. 6*d*. each, available to the 30th April, 1860), or on payment of Half-a-crown; children under 12, 1*s*. Reserved Seats, Half-a-crown extra. Tickets at the Crystal Palace, S.E., and 2, Exeter Hall, W.C. Open at Ten. Concert at Three.

UNITED SERVICE INSTITUTION, WHITEHALL YARD, S.W.

LECTURES AND EVENING MEETING.

Monday, February 13th, at Three o'clock, (Lieut.-Colonel J. P. Kennedy)—The necessity for, description, extent, organisation, and cost of, National Defensive Measures.

Friday, February 17th, at Three o'clock, (Mr. R. Pritchett)—The Costumes of the British Army from the earliest periods.

Monday Evening, February 20th, at half-past Eight o'clock, (Mr. W. Heinke, Associate Inst. C.E.)—Heinke's Diving Apparatus and Lamp.

By order of the Council,
B. BURGESS, Captain, Secretary.

THE SOCIETY FOR THE ABOLITION OF FLOGGING IN THE ARMY AND THE NAVY.

Lord Viscount RAYNHAM, Treasurer.

BANKERS—The London and County Bank.

COMMITTEE.

Alderman Salomons, M.P.	David Cooke, Esq.
A. R. Bristow, Esq., M.P.	J. Fox, Esq.
John Locke, Esq., M.P.	W. G. Goulburn, Esq.
Robert Goodfellow, Esq.	J. Beal, Esq.

London: EDWARD MOXON & Co., 44, Dover Street, W.

NEW FIRST-CLASS NEWSPAPER FOR THE COLONIES.

"THE ENGLISH MAIL," a Newspaper specially prepared for Circulation throughout Australia and New Zealand. Published in time for despatch by the Mails which leave England (*via* Marseilles) for Australia on the 18th of every month.

The want of a well-edited and first-class newspaper for the Australian colonies—one which shall give the news of the month, Domestic, Commercial, and Foreign, easily arranged in the order of its significance and occurrence, and clearly condensed for its ready perusal by colonists eager to know what is going on at home—has led to the starting of *The English Mail.*

To the Australian colonists *The English Mail* cannot fail to be of the greatest service. It claims to be their "reporter," as it were, to note and impartially record all events of public interest relating to Australia, occurring in this country. Special reports of Meetings of Banks, Mining and Insurance Companies, Postal Communication, Mail Service, &c., will find a place in its columns; and it enjoys the advantage of an exclusive connection with the "General Association for the Australian Colonies," established at the Australian and New Zealand Rooms, Jerusalem Coffee House, Cornhill.

Although *The English Mail* is specially intended for Australian circulation, yet owing to the general character and perfect arrangement of its Miscellaneous News, it has found readers elsewhere—in India, China, Canada, and the Cape of Good Hope, and even at home—and it may fairly be considered as *the Englishman's Newspaper Abroad.*

Arrangements have been made to ensure an ample distribution of the paper throughout the various townships in each of the Colonies, as well as at home; and with the assurance of an extensive circulation, it is confidently recommended as a most valuable medium for Advertisements, *Home* and *Colonial.* Price 8*d.* (Postage to Australia *viâ* Marseilles, 3*d.* extra).

SUBSCRIBERS' NAMES for copies of *The English Mail*, intended for transmission to Australia, must be sent not later than the day previous to publication; and must be accompanied by Postage Stamps for the full price of the paper (either with or without postage).

ADVERTISEMENTS will be received up to the evening of the 15th of each month. The charge for six lines is 3s. 6d.; 6d. a line after.

Office for Advertisements and Subscriptions, No. 1, St. Bride's Avenue, Fleet Street, E.C.

London: WILLIAM CLOWES & SONS, Military Publishers, 14, Charing Cross, S.W.

BIBLIOTHEQUE DES CHEMINS DE FER,
OR,
RAILWAY EDITIONS, at 1s. and 2s. the volume.

From the *Saturday Review.*

"An excellent series of books, which of late has received some very interesting additions."

"In *Christine*, by M. L. Enault, are some very beautiful creations of character. This book makes us wish for more from the same pen."

"The *Vierge du Liban* is a kind of Oriental Jeanne d'Arc, which M. Enault's fertile imagination has pictured to us with great power."

"The *Martyr de Chaumelles*, by M. Goudall, is a very touching picture of rustic life, not as seen from the idyllic point of view, but as shrouded in the ignorance and degradation we so often find among our agricultural population. It is very forcibly written, and the interest is well sustained."

"M. Laboulaye has collected, under the head of *Souvenirs d'un Voyageur*, a series of exquisite tales, which originally appeared in the *feuilletons* of the *Journal des Débats.* We find it hard to persuade ourselves that the narratives which the *Voyageur* has put together from *souvenirs* of Italy and Germany are not literally true, instead of being mere *nouvelles*, the creation of an elegant mind and kindly nature—so simple and truthful is the calm pathos which warms up every page."

"*Une Maîtresse de Louis XIII.*, by the veteran Saintine, the author of *Picciola*, is a very amusing book, and, in spite of its title, is by no means unfit for that shrine of purity and tea-trays—the drawing-room table."

"That *Maurice de Treuil* should remind any one of the *Newcomes* is in itself no small compliment to the author. Unlike Mr. Thackeray's novel, however, it deepens in pathos and interest to the end. It is thoroughly worth reading—French in all but vice. M. Achard has the talent of observing and noting down the little circumstances of daily life—the inexhaustible and terrible power of minute torture and constant irritation which uncongenial persons have the power of inflicting on each other in domestic life."

"As may be inferred from the title of M. Laboulaye's new tale *Abdallah*, it is a '*conte Arabe*,' a '*tradaction d'un original inconnu.*' Even if we regard it simply as a *postiche* of Eastern literature, we should call it extremely clever. How much more, when to this merit are added singular beauty of style, unexceptionable morality of teaching, and considerable interest of story."

Complete Catalogues furnished on application.

HAYDN'S DICTIONARY OF DATES.

Comprehending Remarkable Occurrences, Ancient and Modern—the Foundation, Laws, and Governments of Countries—their Progress in Civilisation, Industry, and Science—their Achievements in Arms—their Civil, Military, and Religious Institutions—the Origin and Advance of Human Arts and Inventions, with copious details relating to the BRITISH EMPIRE.

THE WHOLE COMPREHENDING A BODY OF INFORMATION, CLASSICAL, POLITICAL, AND DOMESTIC, FROM THE EARLIEST ACCOUNTS TO THE PRESENT TIME.

NINTH EDITION, revised and greatly enlarged,

BY BENJAMIN VINCENT,

Assistant Secretary and Keeper of the Library of the Royal Institution of Great Britain.

In this Edition about Five Hundred new articles have been inserted; a very great number of articles have been re-written; and in order still more to adapt the work to educational purposes, numerous biographical, geographical, literary, and scientific details have been supplied.

*** "A volume containing upwards of 15,000 articles, and, perhaps, more than 15 times 15,000 facts. What the London Directory is to the merchant, this Dictionary of Dates will be found to be to those who are searching after information, whether classical, political, domestic, or general."—*Times.*

Just published, fcap. 8vo. cloth, price 5s.

CURIOSITIES OF WAR, AND MILITARY STUDIES.

By THOMAS CARTER, Adjutant-General's Office.

OPINIONS OF THE PRESS.

"A very entertaining volume, evincing great research. It is surprising what a fund of incidents and facts the author has brought together, and placed before us in an attractive form. The work is just the one suited to a soldier, inasmuch as it may be taken up to wile away an hour, and laid down at any moment, without losing its thread, or weakening its impressions."—*United Service Magazine.*

"Second to none of its class in merit, 'Curiosities of War' teems with authentic anecdotes of the British army. We recommend our readers to buy the book, the perusal of which will endear yet more the British army to every Englishman. The author has done both the service and the public a favour, by the publication of the 'Curiosities of War.'"—*Standard.*

London: GROOMBRIDGE & SONS, 5, Paternoster Row, E.C.

Just published, fcap. 8vo. cloth, 3s. 6d.

HANS BUSK'S NEW WORK.

Price 2s. 6d., Mounted, and in Case,

HANS BUSK'S TABULAR ARRANGEMENT OF THE "COMPANY DRILL," embracing the latest Regulations for the Line, Militia, and Volunteers.

*** Each evolution is here arranged in so lucid a manner as to be intelligible at a glance. The use of this admirable table will save many weary hours in the drill-yard, and will materially lessen the labour of instructions. A copy should be attached to every orderly room, and attentively studied both by officers and privates.

London: ROUTLEDGE, WARNE, & ROUTLEDGE, Farringdon Street, E.C.

MR. W. H. RUSSELL'S NEW WORK.

In 2 vols. post 8vo. 21s. cloth.

MY DIARY IN INDIA. With Tinted Illustrations. The Sixth Thousand, now ready.

"We commend 'My Diary' freely to our thoughtful countrymen. It is far more important in a political and prospective sense than as a record of personal adventures, or a series of photographs of Indian warfare. It has both of these attractive features: but its views of our Indian policy are the grounds on which we regard it as so important to the English public."—*Times.*

London: ROUTLEDGE, WARNE, & ROUTLEDGE, Farringdon Street, E.C.

OVERLAND ROUTE.

ROYAL NAVAL AND MILITARY ACADEMY, GOSPORT.

PATRONS:—

Her Most Gracious Majesty the QUEEN.
His Royal Highness the PRINCE CONSORT.

At every Examination for Naval Cadetships since May, 1857, Pupils from this Establishment have taken the first or second places. Those Pupils who have entered the Army and Military Colleges have been equally successful.—Applications to be addressed to the Rev. E. BURNEY, M.A., Gosport.

ROYAL NAVAL ESTABLISHMENT,

EASTERN PARADE, SOUTHSEA.

CONDUCTED BY Mr. THOMAS EASTMAN, R.N.

MR. EASTMAN offers advantages which cannot be obtained in Establishments for general education, since he receives Naval Pupils only, whom he instructs in the courses exactly required.

Pupils are taught Steam and Rigging, the latter from a model of a line-of-battle-ship, 24 feet in length.

346 Gentlemen have passed as Naval Cadets, and upwards of 250 as Marine Cadets, &c.

Eastern Parade is situate a few yards from the beach and Southsea Castle, commanding close and uninterrupted views of the Channel, the Isle of Wight, and Spithead.

☞ A seaman rigger is attached to the Establishment.

NAVAL CADETS.

Reduction of Examination and Age. New Regulations for Entry into Her Majesty's Service.

MESSRS. GALT & CO., Portsmouth, will be glad to forward, on application, the New Admiralty Regulations and other information necessary for passing the R.N. College.

Outfitters by appointment to H.S.H. the Prince of Leiningen.

NAVAL CADETS.

OF THE 50 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, on the 13th December, SIXTEEN were from the Establishment at NORTH GROVE HOUSE, Southsea, viz., Messrs. Moysey, Dicken, Eyres, Mandeville, Clark, Gataker, Steavenson, Lang, English, Tyler, Greenway, Ranking, Wood, Burt, Brereton, Wallace. 11 Cadets passed from the Establishment in September, and 11 others last June.

N.B. Twenty candidates out of seventy were rejected in December, 1859.

W. JOHNSON, Naval Instructor; W. BELL, Chaplain; J. A. BURROW, Chaplain and Naval Instructor.

ROYAL MILITARY ACADEMY, WOOLWICH, S.E.

At the late Competitive Examination for admission to the Royal Military Academy, Woolwich, held on the 4th—16th ultimo, the following successful Candidates were *exclusively* prepared in all their subjects (Mathematics, French, Drawing, English, and the Experimental Sciences) in Mr. R. B. DE BURGH'S Military Establishment, Dublin—

Mr. William J. Galway.	Mr. Robert A. Livesay.
Mr. Jeffery L. Morgan.	Mr. Carlile Greer.

Mr. Galway obtained 4432 Marks and the Tenth Place; and Mr. Morgan 4108 Marks, and the Fourteenth Place, the number of Candidates being 120.

All Mr. De Burgh's Pupils were successful, and all those who passed from the University of Dublin had been under his tuition.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—At the late Competitive Examination, Mr. H. Hardinge obtained the SECOND PLACE on Marks less by 32 than those of the First. Mr. *Hardinge* was the only Candidate from Mr. De Burgh's.

Mr. DE BURGH is assisted by eminent Masters in Classics, French, German, Drawing, &c., prepares Resident and Non-Resident Pupils for all the Military Examinations. References to the Parents of present and former Pupils include the following:—Right Hon. and Rev. the Lord Bishop of Meath; Right Hon. Joseph Napier, Dublin; Ven. the Archdeacon of Meath; Colonel Lake, C.B., Dublin Castle; Colonel Morgan, R.A., St. Helen's, Swansea; Colonel KNOX, J.P., Brittus Castle, Thurles, &c.

Kingstown, Co. Dublin, February 11th, 1860.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.

—This Establishment, exclusively military, prepares candidates for the Examinations of the Staff College, Woolwich, Direct Commissions, Sandhurst, and Addiscombe. At three Competitive Examinations for the Staff College, officers who had read at this Establishment have twice come out first on the list.

Apply to Captain LENDY, Sunbury, S.W.

OXFORD MIDDLE-CLASS EXAMINATIONS

MOUNT PLEASANT HOUSE, SUNBURY, MIDDLESEX, S.W.

Two pupils from this Establishment attained distinction at the above Examination (see *The Times*, August 5th); one of these was third in order of merit out of 423 senior candidates in the first division for languages—Greek, Latin, French, and German. There are now a few VACANCIES in this Establishment, which is healthfully situate, about 15 miles south-west of town, and is easily accessible either by omnibus or by railway.—For terms, &c., address to Mr. UNDERWOOD, Mount Pleasant House, Sunbury, Middlesex, S.W.

SOUTHLANDS, BATTERSEA.

Woolwich and Addiscombe Competitive Examinations.

MR. SHERRAT has at present several Vacancies. Reference permitted to the friends of Pupils who were successful at the recent Examinations. At that for Addiscombe a Pupil of Mr. SHERRAT'S was first.

EDUCATION.—BRIGHTON.

FRENCH, GERMAN, AND CLASSICAL SCHOOL, 15, Eaton Place, Kemp Town.

PRINCIPAL—MR. L. W. SCUDAMORE, B.A.

Pupils prepared for the Army, Civil Service, Oxford and Cambridge Examinations, &c. French and German constantly spoken. Terms moderate. References to the friends of pupils, many of whom have taken high places at the above Examinations.

Entrance fee, 10*s.*; Annual Subscription, 1*l.* 1*s.*; Honorary Member's Annual Subscription, 2*l.* 2*s.*; or Life Subscription, 10*l.* 10*s.* The ammunition is provided for the members from the funds of the corps, free of extra expense. The Book of Rules and List of Members, price 6*d.*, can be obtained of the Secretary or the Drill Instructor at Head Quarters. Subscriptions and Donations received by the Bankers, Sir S. SCOTT, Bart., & Co., 1, Cavendish Square, W.; or the Secretary, Mr. G. MARRINER, 33, Welbeck Street, W.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor, 57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

COLT'S NEW SPORTING SHOT GUN.—"NEW GUN. — Colonel Colt has invented a Revolving Shot Gun. Upon a late trial of this valuable gun, at a distance of 30 yards, it put 175 pellets in a circle of 12 inches diameter, penetrating 75 sheets of ordinary brown paper, the Shot used being No. 6 Shot, 1¼ ounces and 2 drachms of powder to each charge. The Gun is a Five-Shooter."—*Times.*

COLT'S NEW PISTOL CARBINE.—The advantages of this Breech Attachment to Colt's 7½ inch Repeating Pistol, and its superiority over all others for military and sporting purposes, will be easily understood and appreciated, combining, as it does, *all* the advantages of both Pistol and Carbine, into either of which it can be *instantly* converted.

COLT'S RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

COLT'S REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.

11, Strand, opposite Trafalgar Square, W.C.

CAPTAIN NORTON'S GOSSAMER CARTRIDGES are found superior for use, in either breech or muzzle-loading guns, *also* for the Enfield rifle. Can be had at LEETCH'S Patent Gun Factory, 29, Great Portland Street, Regent Street, London, W.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.

Apply to B. DE LA COUR, 327, High Street, Chatham.

THE NEW REGULATION BRIDLE.

A. DAVIS, MILITARY SADDLER, 33, Strand, W.C., and at Aldershot Camp. Officers about to join their Regiments or proceeding abroad can be supplied at short notice with the Regulation Saddlery Outfit of the best quality at the lowest prices. Militia Officers, Cadets, Surgeons, &c., are requested to apply to A. DAVIS for an Estimate for Complete Regulation or Private Outfit in Saddlery.

TO OFFICERS IN HER MAJESTY'S ARMY AND NAVY.

MATTHEW WILDSMITH having been favoured with the patronage of many Gentlemen in Her Majesty's Forces has paid special attention to the production of a BOOT that should combine strength with ease and comfort. He is now happy to announce that he has succeeded in obtaining a leather specially prepared which he can with confidence recommend for military use, being light in weight, pliable, and very durable. Indian and Foreign Orders executed with despatch.—1, Sherard Street, Regent Street, W., rear of County Fire Office.

FOR CORRECT FAMILY ARMS, CREST, OR PEDIGREE, send name and county and 7*s.* 6*d.* to J. LOCK'S City Heraldic Office, 2, Old Jewry, London, E.C., and in a few days you will receive a neat drawing of your Arms, &c., in Heraldic Colours, to be engraved on Seal, Ring, or Family Plate. On y parle Français, Italien, Allemand, et Hollandais. Wedding orders executed. Stamped envelopes and paper. Embossing presses and dies.

GOLD WATCHES, CHAINS, AND JEWELLERY, best quality, at moderate prices, at HASELDINE'S (Successor to Young), 3, Coventry Street, Haymarket, W. Diamonds, Pearls, and Plate purchased or exchanged.

CHAMBERLAIN'S ROYAL PORCELAIN WORKS.—Admission of Visitors to the Works to be had on application at the Show Rooms, from 9 A.M. to 6 P.M. each day, except Saturday from 9 A.M. to 2 P.M.—W. H. KERR & Co., "Proprietors," Worcester, successors to Messrs. Flight, Barr, & Co., and Messrs. Chamberlain & Co.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

ELKINGTON & CO. desire respectfully to call the attention of Regimental Messes requiring PLATE to their Manufactures, which may be obtained in great variety from their establishments.

LONDON: 22, Regent St., W., and 45, Moorgate St., E.C.
DUBLIN: College Green.
LIVERPOOL: Church Street.
Manufactory and Show Rooms, Newhall Street, Birmingham.

Estimates, Drawings, and Prices sent free by post. Replating and Gilding as usual.

THE VICTORIA CROSS, OR NEW ORDER OF VALOUR.—The miniature Victoria Cross, made from the Gun-metal taken at Sebastopol, can only be obtained at C. F. HANCOCK'S, Jeweller and Silversmith to the principal Sovereigns and Courts of Europe. P.S. The Miniature Medals of the ORDER OF THE BATH, LEGION OF HONOUR, MEDJEDIE, with all the different clasps; also all the Miniature INDIAN MEDALS to the present time, with their clasps, bars, and ribbons, including the CRIMEAN, FRENCH, SARDINIAN, and CAFFRE.

38 & 39, Bruton Street, W.; and 152, New Bond Street, W.

THE NEW INDIAN MUTINY MEDALS.

MESSRS. E. & E. EMANUEL, Goldsmiths to the Queen, Portsea and Portsmouth, have the honour to announce that they are prepared to supply Miniature Copies of the above, with Bars and Brooch complete, registered and free by post; as also the New Miniature Medal for Persia, and the Miniatures to every British and Foreign Order and Medal.

Portsmouth, January 2, 1860.

TO VOLUNTEER RIFLE CORPS.

BOOSEY & SONS' MILITARY BAND INSTRUMENTS, Reed and Brass, as well as Bugles, Drums, and Fifes, have been used and approved of by almost every regiment in the service, at home and abroad. Those regiments that contemplate the formation of a band, are invited to apply to the firm, who will be happy to recommend them competent bandmasters, and render any further assistance that may be required.

BOOSEY & SONS, Holles Street, London, W.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLF & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Old Bond Street, W., one door from Piccadilly.

COLOURED FLANNEL SHIRTS. SOLD BY THRESHER & GLENNY, 152, STRAND, W.C.

THE GORGET SHIRT, Jos. FRYER & Co., Patentees. 6 for 42*s.* Next door to the Haymarket Theatre, S.W.

HUGHES' "RIFLEMAN'S" Thrice Shrunk, Coloured FLANNEL SHIRTS; also their ANGLO-PARISIAN A 1 SHIRTS, 27*s.*, 33*s.*, 39*s.*, 45*s.*, per half-dozen; and FASHIONABLE COLLARS, 8*s.* 6*d.*, 9*s.* 6*d.*, 12*s.* 6*d.*, per dozen, are unrivalled. Samples with infallible measuring instructions forwarded. Army, Navy, and General Outfitters, at SHIPPING PRICES, for India, China, Australia, &c. 203, Regent Street, W.

RIFLE CORPS.—The MATERIALS recommended by Government MAY BE SEEN at Messrs. NICOLL, Army Depot, Regent Street, London, W. As every suit of uniform will be made from measures taken by skilled foremen, gentlemen are requested to call there in preference to making appointments to be waited on at their own homes. Cash payments being required, the best articles are produced for very moderate prices.—H. J. & D. NICOLL, 114, 116, 118, 120, 142, 144, Regent Street, W.; 22, Cornhill, E.C.; and 10, St. Ann's Square, Manchester.

4*s.* 6*d.* per dozen Imperial Pints.
2*s.* 9*d.* ditto Imperial half-pints.

Messrs. HARRINGTON PARKER, & Co., also supply ALLSOPP'S ALES in Casks of 18 Gallons and upwards. 5½ Pall Mall, S.W., Dec. 31, 1859.

PARISIAN PAPER HANGINGS AND INTERIOR DECORATIONS, at JACKSON & GRAHAM'S, 35, 37, and 38, Oxford Street, W.

SUPERIOR BEDSTEADS, BEDDING, AND CHAMBER FURNITURE.

JACKSON & GRAHAM respectfully inform the public that they have largely extended this department of their business by devoting three spacious show-rooms (each 120 feet long) exclusively to the display of Bedsteads of various woods, with furniture en suite, of a superior class, together with Brass and Iron Bedsteads of every size and description. Illustrated price-lists of Brass and Iron Bedsteads and Bedding may be had on application.—Show-rooms, 35, 37, & 38, Oxford Street, Preston Place, and Newman Yard, W., adjoining.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND, the Proprietors,

JAMES COULSON & Co.,

Beg to intimate that their only London Depôt is at No. 46, PALL MALL, S.W.,

A few doors West of the Army and Navy Club.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especiallly for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. CARR, Chemist, 171, High Holborn, London, W.C., in bottles, 1*s.* each.

CONDY'S PATENT FLUID, OR NATURAL DISINFECTANT,

Not only deodorises but disinfects perfectly, and DESTROYS FOR EVER the cause of infection. Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease, and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

Patronised and reported upon by the Board of Health and all the most eminent medical men of the day most satisfactorily.

Sold in Quart Bottles, 4*s.*; Pints, 2*s.*; Half-pints, 1*s.*; and in bulk, 10*s.* per Gallon. Sold by all first-class Chemists.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can testify that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

ARTHUR HILL HASSALL, M.D.,
Analyst of "The Lancet" Sanatory Commission, Author of "Adulterations Detected." "The Urine in Health and Disease," &c.
Wimpole Street, 20th January, 1860.

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious Vinegar, ensure purity, and effect a saving of 50 per cent. See Report of Dr. Letheby, City Officer of Health; Dr. Hassall, *The Lancet* Commission, and others. Sold by the Trade, in bottles, labelled and capsuled. Wholesale 63, King William Street, London Bridge, E.C. Sample for Six Quarts, to any Railway, for 3*s.* 6*d.*, P. O. O. or Stamps.

GLENFIELD PATENT STARCH, used in the Royal Laundry, and pronounced by Her Majesty's Laundress to be the Finest Starch she ever used. Sold by all Chandlers, Grocers, &c., &c.

WOTHERSPOON & Co., Glasgow and London.

GLYCERINE SOAP, unscented, natural colour, in 1*s.* packets, the pleasantest and best soap for the skin. Price's non-guttering bed-room candles, in boxes 1*s.* and 3*s.* Candlesticks, 1*s.* and 2*s.* 6*d.*

PRICE'S Patent Candle Company (Limited), London.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle, Cottage Gardener*, and *Field*. In boxes 1*s.*, 3*s.*, 10*s.* 6*d.*, retail of all Nursery and Seedsmen. Wholesale of PRICE'S Patent Candle Company, Limited.

THE GUINEA COAL COMPANY'S WALLSEND COALS, One Guinea per ton "All the Year Round."—Address, HORATIO MORGAN, 17, Wellington Street North, Strand, W.C. (next door to the Office of this Paper).

FOREIGN CABANAS CIGARS.—To Noblemen and Gentlemen.—A Gentleman going abroad wishes to DISPOSE OF the above CIGARS and a few Kings of the choicest picked Havana Leaf. They were imported in 1855, and have a rich mellow flavour. Price, to effect an immediate sale, 1*l.* 6*s.* per lb. They are not to be matched under 3*l.* 3*s.* One pound sample can be had on application to E. ARCHER, 37, York Street, Portman Square, London, W.

TEETH REPLACED, DECAYED TEETH RESTORED.—Mr. A. ESKELL, Surgeon Dentist, supplies patented Incorrodible Teeth without extracting Teeth or stumps, on his never-failing and painless principle of Self-adhesion; rendering detection impossible. Articulation and mastication guaranteed. Decayed Teeth rendered insensible to pain, and stopped with his Osteoplastic Enamel—of the same colour as the Teeth, permanently useful, and lasting unchanged for years, (a most important discovery in Dental Science!) Loose Teeth fastened, &c. Hours, Ten to Six. Consultation free. Charges strictly moderate. 314, Regent Street (opposite the Polytechnic), W., and Bennett's Hill, Birmingham.

GAY & SONS' DRESSING-CASES are the best and most reasonable.

113, High Holborn, W.C. Established 1820.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street North, Strand, in the county of Middlesex.—SATURDAY, February 11, 1860.

"SAD was the day, and luckless was the hour," for both War Office and Admiralty when the Chancellor of the Exchequer clapped the saddle on the right horse, and announced that the income-tax was in reality a war-tax, and that its rise or fall must be for the future dependent upon the yearly average of martial enthusiasm as collected from the most authentic sources in the country. Who would have believed that Mr. Gladstone could have been so treacherous as to conceal within his acquiescence to this year's enormous expenditure for warlike purposes, such a deadly stroke at future pop-gun pastimes. It is now certain that we shall have to fight the tax-paying masses long before we are invaded by the "Gauls," and no tricolor or oriflamme that ever floated in the breeze will animate its followers to combat with half so much fervour as the cry of "tenpence in the pound!"

It is a serious question for the Army and Navy. If we do not keep up the war-taxes as at present, what is to become of them? It is unnecessary to speak of the hard-working portion of either Service, for they are not concerned; but if there is no superabundance of money there will be no jobs—no jobs, no abuses; and if there are no abuses, there will be no commissions or committees paid for inquiring into the working of the State machine (in this respect only a self-supporting one), and hosts of meritorious officers will sigh in vain for their guinea a-day and travelling expenses.

The battle is not very far off. The tenpence is only asked for one year, and it is not difficult to foretell the result in 1861; it would be therefore but kind to forewarn those who live upon the crumbs that fall from such richly-furnished tables that a day of "great tribulation" is at hand, and that they had better carry off all they can at once. There are a few enthusiasts who still cling to the remnant of a hope that ten millions are to be spent on the fortifications of places incapable of defence, and a larger number who are bent upon providing harbours of refuge in all sorts of impracticable places for ships incapable of using them in the finest of weather; but these are mere hallucinations, and can only be attributed to that excess of enthusiasm which invariably follows a leaky bag, and is best exemplified by the conduct of the mudlark at Greenwich scrambling for halfpence in the mud at low water. As the income-tax is in future to be considered the gauge of our warlike tendencies and expenditure, it is quite clear that the more we indulge the one the more closely we must investigate the other; and in this respect the Chancellor of the Exchequer has done us infinite service—for the country will now watch the two great war departments with greater jealousy than ever.

They will be bold men who undertake to move the Army and Navy Estimates next year. There will not even be a joint in their armour left unsearched, nor a precedent of antagonistic nature undiscovered. Contracts for clothing, boots and bashibazouks will be hurled at the head of the War Office, and the Admiralty will be twitted with the lengthenings, conversions, failures, and ultimate disappearance from human sight of those frigates which seem to have been set up in frame, and then taken to pieces, for reasons similar to those which induced our captains in the war time to employ the seamen in polishing shot and then blacking them.

No one ever yet has objected, and no one ever will object, to such an annual expenditure upon either Army or Navy as will keep both in a condition to ensure the independence of Great Britain. It will be against unnecessary and reckless expenditure that protests will be made, and it will be wise for the department to reform themselves from within before they meet with a rough shaking from without. To do them justice they seem well inclined to take the initiation; and the speech of Lord Clarence Paget in moving the Navy Estimates appears to inaugurate a new era, inasmuch as he has boldly avowed his intention to remain a naval reformer, notwithstanding he is in office. With these views we cordially welcome the prospect of a commission of inquiry into the expenditure of our dockyards, to be moved for by Mr. Jackson in the House of Commons, and we trust it will be confided to men altogether unconnected with such establishments, either in the past or the present. If such an inquiry be delegated to master-shipwrights or Admiralty nominees, the report will be discredited, because the jury will have been packed.

"Protection, formerly sitting in high places, has since taken refuge in holes and corners," and as it is now about to be ejected from these hiding-places, it is much to be hoped that profuse expenditure may follow so good an example. If such a result ever takes place it will be mainly owing to the clear and unmistakeable terms in which Mr. Gladstone propounded his financial views, and related the income-tax to those most answerable for its extent. Let those who are thus now responsible remember the bold advice once given by the Speaker of the Commons to his Sovereign, and when they can present themselves to the public purged of the drone-like matter that clogs their vitality, they will be met with the unanimous applause of a grateful nation, and deserve the long sought for but never yet merited compliment,—that which has been ~~voted~~ liberally has been spent wisely.

A generally well-informed contemporary announced last evening that Sir John Pennefather would be transferred from the 46th Regiment to the 22nd, in succession to Sir William Napier, and that Major-General the Honorable Charles Grey would be appointed to the vacant Colonelcy of the 46th. The first portion of the statement is likely to prove correct, for no officer could be so appropriately made Colonel of the 22nd as Sir John Pennefather, under whom the regiment so nobly acquired its Indian honours. As regards the appointment of General Grey we have some reason to know that our contemporary is misinformed. General Grey is Equerry to her Majesty. Though he commanded the 71st Light Infantry for some years, he was not fortunate enough to see active service; and his employment has been for a very long time that of a courtier rather than a soldier. At the present moment, when public attention is wholesomely directed to military patronage, and when the office of Commander-in-Chief is under the consideration of a parliamentary committee, an appointment like that of General Grey would be a kind of death-warrant for the Horse Guards. Personally we have not a word to say that is not in favour of the general, but we are sure that when Her Majesty desires to reward an esteemed member of her household she will do it in some more appropriate way than one involving the exclusion of old and gallant officers who have fought and bled for the country all over the world, and to whom, in the ordinary course of events, Nature is not likely to permit more than a brief enjoyment of the honours and rewards they long since so richly earned. The appointment of General Grey would be the deliberate misapplication of funds granted by Parliament as rewards for distinguished services, and the Commander-in-Chief is not likely to incur so grave a responsibility. Not long since we expressed our impartial opinion of the manner in which the Duke of Cambridge has exercised his patronage in this respect since his accession to the command of the Army. Notwithstanding some three or four names that rather grate against one's ideas of gallant service, we believe it to have been on the whole fair; and we are sure that so great a blot as the appointment of General Grey to a colonelcy—so utter a denial of claims arising from service in the field—will not be allowed to tarnish his Royal Highness's administration of his high office.

We announced some weeks since that the Minister of War, the Commander-in-Chief, and the Treasury, were in communication respecting a plan for the reduction of cavalry commissions to infantry prices, and the abolition of the stoppages for forage now made from cavalry officers. The execution of the plan was delayed by various impediments; but we believe we may state that it is now in a fair way of being carried out, and will very shortly be officially promulgated. Henceforward all cornets appointed to the cavalry of line will receive two chargers for regimental purposes from the Government, and these chargers will be maintained at the public expense. The rate of purchase of commissions will be precisely the same as in the infantry. As regards officers now serving in the cavalry, they will be allowed the full prices paid for their commissions, and those who have not purchased will be entitled to the usual allowance for their service—at the rate of 100*l.* per annum—on selling out. We trust this step may be the means of recruiting the commissioned ranks of our cavalry regiments, and inducing young gentlemen to select that once favourite but now disregarded branch of the army. We fear, however, that other causes tend to render the cavalry unpopular. During the last few years they have got harder work, fewer honours, and comparatively less remunerative pay than the rest of the service. The preliminary examination has a very deterrent effect upon the candidates; and the extravagant style of living in many regiments upon their fathers. The expenses to be complained of are not generally speaking what are called regimental expenses, but they arise very often from causes which are nevertheless within the power of a good commanding officer to remove; and we trust as it has been found impossible to induce rich men to enter dragoon regiments in sufficient numbers, that the less wealthy class of gentlemen to whom the door is now open will preserve the efficiency and military prestige of that splendid body, the British Cavalry.

FLOGGING IN THE ARMY AND NAVY.

In the House of Commons on Thursday this subject was again brought forward by Mr. W. Williams, who contended that the system was one of unmitigated brutality, and instanced cases in which ordinary cruelty of the punishment was much aggravated by the physical condition of the persons to whom it was administered. He moved for returns of the number of men in the Army, Militia, and Navy flogged during the year 1859, with the names of the commanding officers in whose regiments or ships the punishment had been inflicted.

Colonel North complained of the names of officers being brought forward in connection with the infliction of this punishment, who had no power to remit or interfere with it.

In the course of the discussion that followed the representatives of the naval and military departments spoke. Lord C. Paget was afraid that this punishment could not be wholly done away with; but the authorities of the army and navy had done everything they could, by means of classifying the characters of men, to diminish its infliction. In the fleet the number of these punishments was only three per cent. It was proposed to bring in a bill to improve the naval code of discipline. Mr. Herbert contended that the army in this country was composed of a more exceptional class than that of which other armies were composed, and they required a more rigid and exceptional treatment. It was not the fact that corporeal punishment was not applied to civilians, for it had been made the penalty in certain cases by recent statutes. He did not mean to say it was right that it should be so, but that it was not peculiar to military life. He read a letter from an experienced officer of police, in order to show that the army exercised a great reformatory influence in this country; many of the idle and dissolute of a town, who had passed a period of time in the service, on their return home proving steady and well-conducted. He wished to see corporeal punishment reduced to a minimum, and he believed that it would follow the diminution of degrading punishments in civil life; and a great step had been made in that direction by the recent regulations on the subject, while there was every disposition on the part of the Commander-in-Chief to diminish punishments of that nature.

Mr. Williams having declined to omit from the returns the names of the officers by whose directions the floggings were administered. Lord C. Paget moved the omission of those words, and his amendment was carried by 124 votes to 46.

THE ARMY.

5th (Royal Irish) Lancers, under the command of Lieut.-Colonel Sullivan, have moved from Newbridge to Dublin for embarkation for Liverpool, and are on their way to the camp at Aldershot:—Two troops on Tuesday arrived in Dublin and embarked next day; two troops on the 15th embarked on the 16th inst.; two troops on the 16th to embark on the 17th; and two troops and head-quarters, being the last division, on the 18th to embark on the 20th inst.

17th Lancers. The depôt, consisting of one captain, two subalterns, nine sergeants, and 138 rank and file, has left Canterbury, to be quartered at the Maidstone cavalry barracks.

ROYAL ARTILLERY.—The additional brigades of Royal Artillery recently ordered to be raised are being rapidly filled up, and a large number of soldiers discharged from the East India Company's service have joined the regiment. In consequence of the number of recruits now quartered at the Artillery Barracks, two batteries have been stationed at the huts on the common, which now afford excellent accommodation for the troops. The standard has been raised to 5 feet 6 inches for recruits under 19 years of age, and 5 feet 7 inches for those above 19. A number of non-commissioned officers are now under a course of instruction at the school of gunnery, Shoeburyness.

The non-commissioned officers of Royal Artillery stationed at Woolwich, gave their annual ball last evening, at the Crown and Sceptre Tavern, Greenwich. Invitations were sent to numerous officers of the Royal Marines, Guards, and other corps.

ROYAL ENGINEERS.—Orders have been received at the head-quarters of the Royal Engineer establishment, Chatham, directing the officers and men of the Royal Engineers composing the expedition intended to be despatched to New Zealand to be prepared to embark on the 28t inst. Captain H. T. Siborne, R.E., in command of the A troop of the Royal Engineer Train, at Brompton Barracks, Chatham, having been appointed to the staff of the Inspector-General of Fortifications, Horse Guards, will be succeeded in his command of the troop by Captain R. W. Duff, R.E. We are sorry to announce the death of Major Barry, R.E., at Cape Coast Castle on the 17th of December.

Orders have been received at the Royal Engineer Establishment for Lieutenant H. A. Gun, R. E., to proceed from Brompton Barracks to Devonport, for duty, with the commanding royal engineer at that station.

10th Regiment, 1st Battalion, under the command of Lieut.-Colonel Norman, were exercised last week at Devonport in embarkation drill. The battalion arrived at Keyham Dockyard at 1·30 P.M. precisely. The battalion was then divided into wings, the right moving to the western steps, and the left to the southern, where they at once embarked (having been previously told off into boats' crews) in 14 men-of-war's boats, which had been provided by the chief naval authorities. In 26 minutes from the time the first man stepped into the boat the whole right wing were seated at their mess tables on board Her Majesty's ship Clarence, in Hamoaze. The left wing was some minutes longer, as there was only one set of stairs at their point of embarkation. The battalion disembarked in two divisions, the left on the beach at Mount Wise, where the whole were landed together in 2 minutes 25 seconds; the right at the victualling-yard. Disembarking from the deck of Her Majesty's ship Clarence in the boats occupied an average time of 2 minutes 20 seconds per boat.

30th Regiment. A draught of 40 men have left Parkhurst, Isle of Wight, for Portsmouth, to embark on board the Irish steam-packet for Dublin, on their way to the Curragh to join the regiment.

36th Regiment. On Tuesday last Sergeant-Major Bradish, having completed his term of service in the 36th Regiment, and being about to enter on an engagement with the 3rd Royal Surrey Militia, had the high compliment paid him of receiving from his officers, at the hands of Lieutenant-Colonel Hort, commanding, an elegantly finished and valuable silver teapot, in testimony of their appreciation of his long and meritorious services.

47th Regiment. On Tuesday Captain J. M. Stratton, with six subalterns and 200 rank and file of the 47th Regiment, left Deptford Dockyard for Colchester, being relieved by Captain John G. Tredinnick and a similar number of officers and rank and file of the Donegal Militia.

60th Rifles. 4th Battalion moves from Waterford and Kilkenny to Dublin, to be stationed.

84th Regiment. Lieutenant and Adjutant Lambert of this regiment, while engaged in superintending the drill in Sheffield barracks on Friday week, suddenly fell down and expired. He had served with the regiment in Havelock's column, and obtained the Victoria Cross for his gallantry. Lieutenant Lambert rose from the ranks.

95th Regiment. By the last files of papers from Bombay we have received an account of the presentation of colours to the 95th Regiment, stationed at Neemuch in Central India, by Major-General Sir John Michell, K.C.B, commanding the Malwa Division. The interesting ceremony took place on the 17th December last, in the presence of the whole garrison, which consisted of a portion of the 8th Hussars, the 1st Bombay Lancers, the 1st Battery 2nd Battalion Bombay Artillery, and the 13th Regiment Bombay N.I. After the new colours were consecrated by the Rev. J. Wilson, Military Chaplain, in an impressive prayer composed for the occasion, Sir John Mitchell addressed the gallant regiment, and adverted at some length to the good and valuable services it had rendered the State, not only during the Crimean War, in which it had gallantly carried the old colours at the battles of Alma and Inkermann—at the former of which, according to the official returns, the 95th suffered more severely than any other corps of the British Army, having no less than 18 officers killed and wounded, (6 killed and 12 wounded) out of 28 officers present with it in that action (the 23rd Fusiliers lost 12 killed and wounded), and at Inkermann 4 killed and wounded out of 8 present in the field—but also during the recent Indian campaign, which we cannot sum up in shorter terms than by copying a paragraph in the Farewell Order by the Brigadier, when the 95th was about to be separated from "Smith's Brigade" to proceed to Quarters, which stated that the regiment had been —"18 months on active field service, under the command of 4 general officers, that it had *marched* 3000 miles, and had *encountered the enemy* 14 *times*." The officers of the regiment entertained Sir John Michell, his Staff, and the heads of departments at dinner, and the rejoicings were kept up by a grand ball the following evening at their mess-house, to which all the *élite* of the station were invited.

Rifle Brigade. The detachment of the 4th battalion, which has been under orders to embark at Portsmouth on the 20th inst., on board the Indiana for Malta, has received counter-orders, and will now proceed on that date by the mail steamer from Southampton.

3rd Depôt Battalion. Authority having been received from the Horse Guards to distribute prizes to the best shots of the 3rd Depôt Battalion, at Chatham, the whole of the troops composing the battalion were accordingly drawn up on parade, under command of Major Elgee, when the names of 38 men entitled to prizes were called over by the adjutant, and were presented with prize badges, according to merit. The following were the best shots of companies, viz., Sergeants Barton, Norton, and Ward; Privates Lloyd, Regan, Walsh, Burton, O'Den, Precious, and Cotton being best shots of battalions. The remaining 28 receive 1*d.* per day, the former receive 2*d.* per day.

14th Depôt Battalion. On Wednesday evening last the sergeants of this battalion assembled in their mess-room, to present to Colour-Sergeant Mansfield, Paymaster's Clerk, Drum-Major Wagstaff, and Colour-Sergeant Hennessey, a splendid gold ring each, on leaving the battalion. The souvenirs were presented with an appropriate speech by Sergeant-Major Thompson, who alluded to Sergeant Mansfield's long service in India and elsewhere, and to the energetic way in which Sergeant Hennessey always performed any duty entrusted to him. The gallant conduct of Drum-Major Wagstaff while serving in the Crimea was also alluded to. In one of the sorties made by our side, one poor fellow, shockingly wounded, was left lying in an exposed position in advance of the trenches, and swept by the enemy's works. The cries of the poor fellow led the officer in charge of the guard near at hand to call for a volunteer to bring him in. Drum-Major Wagstaff started up, leaped the parapet, and in a few moments spent by his comrades in breathless suspense, appeared again, bearing the poor fellow safely on his back, while the Russian shot and shell fell thickly around him. He was one of the first to get the gallant conduct medal and gratuity, and wears besides the Crimean medal with four clasps—that for good conduct, and the Sultan's. Suitable replies were made by the gallant sergeants, and the remainder of the evening passed away in a pleasant and jovial manner.

The Government is about to purchase an extensive piece of land on the south side of Shooter's Hill for the purpose of constructing fortifications, which, it is said, will be earthworks, to be mounted with Armstrong guns.

An average number of 45 of Sir W. Armstrong's 12-pounder guns are now turned out for proof at the Royal Arsenal, and the manufacture of 25-pounder guns will now be commenced. A large number of these guns will be forwarded for the additional defences at Dover, Ramsgate, and other coast stations.

The Adjutant-General has issued the following return of pensioners discharged since the commencement of the Russian war for loss of limb (average age 26 years):—Loss of both legs, 5; left arm, 22; right arm, 97; one leg, 151—total, 375. Characters:—Good, 318; indifferent, 46; bad, 11—total, 375.

The gentlemen cadets of the Royal Military Academy have resumed their studies after the Christmas vacation, and a class has been formed of those who obtained admission as a result of the last competitive examination. In consequence of the large number of commissions awarded at the termination of the last session, the following gentlemen cadets have been promoted from the theoretical to the practical classes, and will be the next to receive commissions in the Royal Artillery or Royal Engineers:—Messrs. C. O'Connor, H. Fowler, J. D. Bowley, J. H. Urquhart, H. H. Baker, M. T. Sale, C. Jones, C. Cunningham, H. W L. Hine, W. A. W. Orange, B. R. Greig, C. D. Smith, H. A. Barker, L. Downes, J. W. Fuge, A. B. Brown, J. W. Bernard, F. A. Hand, W. A. Cook, T. M. Cruttwell, H. H. Browne, A. E. England, E. H. Holley, R. J. Hezlett, J. B. Ormsby, F. Fitzroy, F. H. W. Milner, R. Walkley, R. D. E. Lockhart, W. G. Mulloy, G. A. French, T. Wood, J. F. Jenkin, T. M. Hitchin, F. Galloway, M. M. Lane, F. C. Nicolas, P. F. Blackwood, J. A. Campbell, A. B. Davis, C. Kirkwood, T. F. Glancy, J. A. Kelso, A. Warry, S. Gardiner, W. H. Wright, P. R. Barber, H. R. Y. Browne, A. C. Smith, A. C. Ward, A. H. Kildahl, E. G. B. Gattey, H. Knollys, J. E. Toller, C. W. Thomson, P. Lewis, J. T. Greenfield, F. W. Carey, F. H. E. Day, F. W. Nind, W. H. M. Duthie, W. A. Day, A. H. Maclean, G. C. H. Parlby, E. Woolcombe, and C. J. M. Prother.

General Lord Seaton, G.C.B., left town a few days since for Dublin to resume his duties as commander of the forces of that district.

CHATHAM GARRISON.—The several corps in garrison at Chatham, including the Royal Engineers, and the Engineer Train, have been marched into the country around Chatham on different days during the past week, in order that the officers and men might make themselves acquainted with the positions each corps will occupy on the next occasion of the garrison being formed into an army of observation under the command of Major-General Eyre, commanding the district.

Mr. Abel, who is connected with the Government laboratory at Woolwich Arsenal, has commenced a course of lectures to the officers and men of the Indian engineers at the Royal Engineer establishment, Chatham, on subjects connected with engineering.

The following officers have joined their respective corps at Chatham garrison:—Capt. and Adjt. L. Sidebottom, 1st Depôt Battalion; Capt. M. P. Macqueen, 91st Regiment; Lieut. S. T. Sargent, 43rd Light Infantry; and Ensign B. J. A. Monsell, 73rd Regiment.

A party of officers from the Staff College have arrived at Chatham, and have been engaged for several days in making a *reconnaisance* of the country around that garrison, in order to report upon the best works of defence desirable to be erected in that locality, and also the advantages which the neighbourhood possesses for the encampment of a large body of troops. The officers engaged on this duty have inspected the various parts of the garrison, together with the several works of defence erected, all of which have been carefully examined.

WAR-OFFICE, PALL MALL, FEB. 14.

34th Regiment of Foot—Major-General John Eden, C.B., to be Colonel, vice General Sir Thomas M. Brisbane, Bart., G.C.B., deceased.

6th Regiment of Dragoon Guards—Cornet Robert Stewart Blackett has been permitted to retire from the Service, by the sale of his commission.

11th Light Dragoons—George Andrew Coventry, Esq., Paymaster of the Royal Sussex Militia, to be Paymaster, vice Erskine, transferred to a Depôt Battalion.

16th Light Dragoons—William Alexander Battine, Gent., to be Cornet, without purchase.

17th Light Dragoons—Cornet John Illidge Fraser, to be Lieutenant, by purchase, vice the Hon. William Henry Curzon, promoted.

Royal Artillery—The commission of Veterinary Surgeon James Lambert to be antedated to the 12th of October, 1857.

1st Regiment of Foot—Ensign John Stansfeld, to be Lieutenant by purchase, vice Hill, promoted.

16th Foot—Ensign George Lee Le Mesurier Taylor, to be Lieutenant, by purchase, vice Anderson, who retires.

20th Foot—Lieutenant Joseph Cooke Cox to be Instructor of Musketry, vice Captain O'Niell, who resigns that appointment.

24th Foot—Ensign Charles A. Hewitt to be Lieutenant by purchase, vice Ogilvy, who retires; Ensign William Malo de Rune Barclay, from the 11th Foot, to be Ensign, vice Hewitt.

25th Foot—Major Patrick Robertson, from a Depôt Battalion, to be Major, vice Pitcairn, who exchanges; Ensign Louis Jones Lambert to be Lieutenant, without purchase, vice Terry, promoted; Ensign Fowell Buxton Johnston to be Lieutenant, without purchase, vice Lambert, whose promotion on the 13th January, 1860, has been cancelled. The promotion of Ensign F. B. Johnston, on the 9th January, 1860, as stated in the *Gazette* of the 3rd February, 1860, has been cancelled.

47th Foot.—Ensign Frederick George Berkeley to be Lieutenant, by purchase, vice Meyer, who retires.

49th Foot.—Lieutenant Edward Mackay to be Adjutant, vice Cahill, promoted to an unattached company.

63rd Foot—Lieutenant Charles Colquhoun Pye to be Captain, by purchase, vice Bennett, appointed Adjutant of a Depôt Battalion; Ensign George Wyatville Wynford Knapp to be Lieutenant, by purchase, vice Pye.

71st Foot—Ensign Henry Brooke Wilson to be Instructor of Musketry.

82nd Foot—Quartermaster R. P. Brooks, from a Depôt Battalion, to be Quartermaster, vice Connor, who exchanges.

86th Foot—Ensign George Edward Anstruther Hilliard to be Lieutenant by purchase, vice Mackenzie promoted; Herbert Charles Boulcott, Gent., to be Ensign, by purchase, vice Hilliard.

99th Foot.—Brevet-Lieut.-Colonel Henry James Day to be Lieut.-Colonel, without purchase, vice Brevet-Colonel Smyly, retired upon full pay; Captain Charles Blamire to be Major, without purchase, vice Day; Lieutenant G. Robert Stewart Black to be Captain, without purchase, vice Blamire.

1st West India Regiment—Ensign George Lidwell Harnette, from the Cape Mounted Riflemen, to be Ensign, vice Plunkett, promoted.

Cape Mounted Riflemen—Charles St. Clair Pote, Gent., to be Ensign, by purchase, vice Harnette, appointed to the 1st West India Regiment.

DEPÔT BATTALION.

Major Andrew Pitcairn, from the 25th Foot, to be Major, vice Robertson, who exchanges.

Paymaster George Pott Erskine, from the 11th Light Dragoons, to be Paymaster, vice Young, who retires upon half-pay.

Quartermaster John Connor, from the 82nd Foot, to be Quartermaster, vice Brooks, who exchanges.

BREVET.

Brevet-Col. Philip Smyly, retired full-pay, 99th Foot, to be Major-Gen., the rank being honorary only.

Captain Edward John Ellerman, of the 98th Foot, to be Major in the Army.

The under-mentioned promotions to take place consequent on the death of General Sir Thomas Makdougall Brisbane, Bart., G.C.B., Colonel of the 34th Regiment, on the 27th of January, 1860:—

Lieut.-Gen. Edward Buckley Wynyard, C.B., Colonel of the 58th Foot, to be General.

Major-General Sir Henry Robert Ferguson Davie, Bart., to be Lieut.-Gen.

Brevet.-Col. Charles Stuart, half-pay Ceylon Rifle Regiment, to be Major-Gen.

Lieut.-Col. William Devenish Deverill, of a Depôt Battalion, to be Colonel.

Brevet-Major William Frederick Harvey, half-pay, Unattached Staff Officer of Pensioners, to be Lieut.-Colonel.

Captain Edward Henry Fisher, Royal Artillery, to be Major.

THE VICTORIA CROSS.

WAR OFFICE, FEB. 17.

The Queen having been graciously pleased by a Warrant under her Royal Sign Manual, bearing date the 13th of December, 1858, to declare that non-military persons who, as Volunteers, have borne arms against the mutineers, both at Lucknow and elsewhere, during the late operations in India, shall be considered as eligible to receive the decoration of the Victoria Cross, subject to the rules and ordinances already made and ordained for the government thereof, provided that it be established in any case that the person was serving under the orders of a General or other officer in command of the troops in the field when he performed the act of bravery for which it is proposed to confer the decora-

Digitized by Google

tion;—Her Majesty has accordingly been pleased to signify her intention to confer this high distinction on the undermentioned gentleman, whose claim to the same has been submitted for Her Majesty's approval, on account of an act of bravery performed by him in India, as recorded against his name; viz.:

Mr. William Fraser M'Donell, of the Bengal Civil Service, Magistrate of Sarun.—For great coolness and bravery on the 30th of July, 1857, during the retreat of the British troops from Arrah, in having climbed, under an incessant fire, outside the boat in which he and several soldiers were, up to the rudder, and with considerable difficulty cut through the lashing which secured it to the side of the boat. On the lashing being cut, the boat obeyed the helm, and thus thirty-five European soldiers escaped certain death.

Her Majesty has also been graciously pleased to signify her intention to confer the decoration of the Victoria Cross on the undermentioned officers and private soldier, whose claims to the same have been submitted for Her Majesty's approval, on account of acts of bravery performed by them in India, as recorded against their several names, viz.:—

56th Bengal Native Infantry—Captain William Martin Cafe—For bearing away under a heavy fire, with the assistance of Privates Thompson, Crowie, Spence, and Cook, the body of Lieutenant Willoughby, lying near the ditch of the Fort of Ruhya, and for running to the rescue of Private Spence, who had been severely wounded in the attempt.

1st European Bengal Fusiliers—Lieut. Francis David Millett Brown, for great gallantry at Narrioul, on the 16th Nov., 1857, in having, at the imminent risk of his own life, rushed to the assistance of a wounded soldier of the 1st European Bengal Fusiliers, whom he carried off, under a very heavy fire from the enemy, whose cavalry were within 40 or fifty yards of him at the time.

10th Regiment (1st Battalion)—Private Denis Dempsey. For carrying, at Lucknow, on the 14th of March, 1858, a powder bag through a burning village, with great coolness and gallantry, for the purpose of mining a passage in rear of the enemy's position. This he did, exposed to a very heavy fire from the enemy behind loopholed walls, and to an almost still greater danger from the sparks which flew in every direction from the blazing houses. Also for having been the first man who entered the village of Jugdispore on the 12th August, 1857, under a most galling fire. Private Dempsey was likewise one of those who helped to carry Ensign Erskine, of the 10th Regiment, in the retreat from Arrah, in July, 1857.

THE ARMY ESTIMATES.

The army estimates for the ensuing financial year are divided into six parts:—viz., forces, civil establishments, supplies, works and buildings, educational, and non-effective. These six classes are subdivided into twenty-three parts, on each of which a distinct vote will be taken.

The gross sum required for defraying our military expenses for the year 1860-61 is 14,842,275*l.*—viz., 12,707,652*l.* for effective, and 2,134,623*l.* for non-effective services, being an increase of 1,982,978*l.* upon the estimates of the last year. This increase is on the following items:—Effective service, for pay and allowances of land forces, 775,162*l.*; land forces and miscellaneous charges, 136,423*l.*; departments of the Secretary for War and of the General Commanding in Chief, 10,630*l.*; manufacturing establishments, military store-keepers, barrack-masters, lodging money, rents, &c., 14,965*l.*; wages of labourers, &c., 194,843*l.*; provisions, forage, fuel and lights, barrack furniture, bedding, &c., 184,293*l.*; warlike stores for land and sea services, 1,020,763*l.*; fortifications, 196,783*l.*; educational and scientific branches, 5340*l.* The increase on last year's estimates for non-effective services is 2,954*l.*—namely, rewards for military service, 20*l.*; and superannuation allowances, 2934*l.* There is a decrease under the following heads for effective services,—embodied militia, 260,000*l.*; volunteer corps, 20,000*l.*; clothing and necessaries, 108,000*l.*; civil buildings, 29,457*l.*; barracks, 125,885*l.* The decrease under non-effective services is as follows:—Pay of general officers, 207*l.*; pay of reduced and retired officers, 13,345*l.*; widows' pensions and "compassionate" allowances, 1393*l.*; pensions and allowances to wounded officers, 310*l.*; in-pension, 96*l.*; out-pension, 485*l.* The items themselves figure for the following amounts:—Land forces pay and allowances, 4,499,636*l.*; miscellaneous charges for land forces, 698,792*l.*; embodied militia, 300,000*l.*; volunteer corps, 68,000*l.*; departments of the Secretary of State for War and of the General Commanding-in-Chief, 196,224*l.*; manufacturing establishments, military storekeepers, barrackmasters, lodging money and rents, &c., 374,005*l.*; wages of artificers and labourers, 944,371*l.*; clothing and necessaries, 342,000*l.*; provisions, forage, fuel, lights, barrack furniture, bedding, &c., 1,281,077*l.*; warlike stores for land and sea service, 2,163,388*l.*; fortifications, 645,355*l.*; civil buildings, 206,500*l.*; barracks, 707,607*l.*; educational and scientific branches, 275,697*l.* The non-effective items are—Rewards for military service, 25,390*l.*; pay of general officers, 75,660*l.*; pay of reduced and retired officers, 492,357*l.*; widows' pensions and "compassionate" allowances, 184,523*l.*; pensions and allowances to wounded officers, 44,123*l.*; in-pensions, 30,638*l.*; out-pensions, 1,144,895*l.*; superannuation allowances, &c., 136,837*l.*

The number of men to be actually voted by the House is 143,362, being an increase of 20,707 upon the number voted last year, but in reality being only an increase of 6,456, owing to "transfers" from India and other augmentations, adding 14,251 men more than voted, and which raised last year's forces to 136,906 men. The composition of this force may be thus distributed: Staff officers of all ranks, 1121; cavalry officers, 681; infantry officers, 5357; non-commissioned officers of all services, 10,972; rank and file, cavalry, 11,529; and infantry, 113,702—giving a total of 143,362 men, with 14,632 horses. Her Majesty's forces in India, classed separately, include men of all ranks, viz.:—Royal Horse Artillery, 622, with 600 horses; cavalry of the line, 7243, with 6472 horses; Royal Artillery, 4860, with 2288 horses; infantry of the line, 66,282; Army Hospital Corps, 634 depots of regiments in India stationed in Great Britain, 13,420, with 350 horses, giving a total of 92,490 with 9710 horses, making the gross total of Her Majesty's forces (143,362+92,490) 235,852, with a total of 24,342 horses.

The administration of martial law costs the country 59,312*l.*, being an increase of 9013*l.* upon last year; the movement of troops is also in advance of last year by 16,000*l.*, and figures for 145,000*l.* Divine service is to cost 2597*l.* more than formerly, and will be performed for 44,963*l.* The cost of medals for military rewards is put down, as before, at 3,000*l.* Gratuities to soldiers discharged by indulgence, and as rewards for meritorious conduct, figure for 9000*l.*

The German military settlers at the Cape of Good Hope cease to draw 18,133*l.*, as they did last year from the estimates.

The pay of the General Commanding-in-Chief is 9*l.* 9*s.* 6*d.* per diem, or 3,458*l.* 7*s.* 6*d.* per year; the Military Secretary receives 2000*l.* per annum; the Inspector-General of Fortifications, 1500*l.*; the Secretary of State for War, 5000*l.*; and the Under Secretary, 2000*l.* The expenses of the War-Office consume 171,396*l.*, being an increase of 9510*l.* upon last year, while the Commander-in-Chief's-Office appears for the comparatively modest sum of 10,462*l.*

MILITARY RANK, &c.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your paper of the 4th inst., as well as the tone of public feeling on such matters, warn us that important changes are impending over the military profession in this country.

A modification of the purchase system is certain to take place before long, and its total abolition will, doubtless, follow at no distant period. How these changes may be best worked out must be a question very constantly in the minds of the higher military authorities at this moment.

I put forward the following observations as tending, may-hap, to throw some light on the subject, and to help to remove, however imperfectly, some of the difficulties which beset it.

It is clear that the abolition of purchase, whether wholly or in part, must cost the country something considerable, for it is admitted on all sides that vested interests must be cared for. If, therefore, we do away with purchase, an opportunity must be afforded for all who choose to avail themselves of the privilege, and who are entitled to it, to sell out without detriment to their interests. For this purpose some scale or rate must be decided on for each rank, and the opportunity afforded must be promptly accepted or declined. If promptly accepted, it cuts at the root of private traffic or arrangement in the transaction, and the claims of the officer so accepting his retirement are set at rest for ever by the sum he receives from Government; if, on the other hand, the officer declines the proposal, and prefers adhering to the profession in which, whether by money, long service, or severe service, he has attained his standing, some equivalent must, in justice, also be given him for resigning for ever the right or the privilege to dispose of his commission.

A change of system need entail little difficulty as regards the *first* appointment to the profession. Let the commission, as well as of course all existing ensigncies, be a lieutenancy, given without purchase, and paid at six shillings and sixpence a day. This will meet, in a modified way, the crying grievance of the present ill-paid ensigncy.

After seven years in the rank of subaltern, dating from first appointment, let there be an increase in daily pay of one shilling and sixpence. This will bring the pay of the subaltern officer of seven years standing to eight shillings a day, and, if purchase is to be abolished by degrees, it will make the officer less inclined to pay—at all events *over* regulation—for his captaincy. The system of purchase now existing would thus be discouraged.

Work the present arrangement for promotion from the company to the field rank till time develops a better, but abolish, as has been frequently suggested, the post and title of major. Do not let there be any longer one rate of pay for the senior major of a regiment, and another for the junior. Do away with the anomaly of the "non-effective allowance." Make every existing regimental major a lieutenant-colonel with seventeen shillings a day, and, after seven years' service in that rank, or after a shorter period if holding superior rank by brevet for good service, let him have a pound a day. If the chances of the Service, or his own merits noting him out for selection for such, place him in command of a battalion, his pay will of course be increased by the "command allowance" of three shillings a day.

Here, again, will be met in a modified way the grievance so long felt, and so often expressed by military men, of the insufficiency of pay allowed to the officer commanding a battalion.

It will be seen that the foregoing observations, or suggestions for alteration in the plan of promotion, do not at all affect the subsequent promotion to the higher grades as laid down by late royal warrant.

To turn to another subject, but of a kindred nature, I would remark that the plan of retaining lieut.-colonels in command of regiments for any length of time seems to jar with that now about to be more rigidly enforced—of removing officers of like rank in the Service from their staff appointments after five years' employment in them. It is worth consideration whether it would not be found to the benefit of the Service, and to the more effectual discouragement of the purchase system, if there were some fixed limit to the term of an officer's tenure of office at the head of one regiment. I remember to have thrown out the suggestion of a limitation service to seven years in this capacity in a number of the *United Service Magazine* for 1856.

Drumreagh, Dungannon, Feb. 14. R. W. L.

THE ROYAL MARINE LIGHT INFANTRY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—There is an error in the letter of a "Hoary Captain" respecting the state of the Royal Marines, which appeared in your admirable paper of last Saturday. The Royal Engineers number but *about* 6000 men.

Your correspondent should also have stated that, out of the 10 Generals, one is the Deputy-Adjutant-General; and that, of the 10 colonelcies, one is now and has been vacant for some time. The way it is found expedient to officer the three seniorily is this:—Royal Artillery, 200 men, 36 generals, 31 colonels, 64 lieut.-colonels; Royal Engineers, 6000 men, 16 generals, 15 colonels, 42 lieut.-colonels; Royal Marines, 17,000 men, 10 generals, 9 colonels, 17 lieut.-colonels; and other officers in the same extraordinary disproportion. I have the honour to be, with great respect

Brompton, Feb. 12th. Yours, SENEX.

THE INDIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A great deal is written about the advantage of officers feeling that their prospects are confined to India alone, which feeling it is alleged causes them to devote all their energies to the acquirement of local knowledge, and to the study of the native character, habits, and languages, and that it is this feeling that has produced such men as Sir H. Lawrence, Edwardes, Chamberlain, Hodson, &c., but it seems to be overlooked that such knowledge of the natives, their habits, languages, &c., is only essential for those commanding native troops, or holding civil or political appointments, and that it is by no means *necessary* for the officers of European troops, and therefore no argument in favour of a local army of Europeans, though often strongly urged as such. Moreover, the necessity of having some native subsidiary army is denied by few, and such army would afford ample school for the production of the requisite number of officers for staff situations, requiring knowledge of the country, its inhabitants, and languages, as also for civil or political appointments, who, when selected for such duties, might be struck off the effective strength of their regiments, and made into a staff corps. As to the feeling of inferiority and subsidiary nature of such a force being degrading to its officers, this would not be the case were the pay of its officers made somewhat higher than that of those of the line, and such staff appointments as above mentioned filled only from its ranks, while it was rendered optional to exchange out of it at any time, for then only such men as were fond of the country and confident in their ability to pursue a successful career in it, from their acquaintance with the habits and languages of its inhabitants, or compelled by the necessity of having a family to provide for, to regard India as their home, would remain in the native force, which would thus always furnish plenty of good men on whom the Government could depend, either for the command of native troops or to discharge the duties of civil or political appointments. The additional European regiments added to Her Majesty's Line to enable them to furnish the number required for India, together with such a native force as it may be considered advisable to keep up, will thus furnish a choice to both sections of the Indian army—to those who like the country for its advantages of better pay and appointments, and to those who, though loving their profession, find after a few years' service in India that neither their tastes nor constitutions are adapted for the long term of exile usually requisite to attain distinguished position and high pension in the East. To both, with the privilege of exchanging, will the offer practically be made, "*Utrum horum mavis accipe.*" The alleged difficulty of effecting an equitable exchange with regard to the Military and Orphan Funds is a mere matter of £ *s. d.*, to be settled between the exchanging parties themselves with the actuary and medical adviser of the Funds. H. D.*

Junior United Service Club, Jan. 23.

INDIAN PRIZE-MONEY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In an edition of your GAZETTE, dated February 4th, there were two letters concerning the non-distribution of prize-money to the troops (Queen's and Company's), who were engaged in the suppression of rebellion and mutiny in India.

In perusing the various daily periodicals we learn that the subject of the "Delhi Prize-Money" is already under consideration in the Houses of Parliament; but nothing has been mentioned regarding the same due to the Bombay troops, who were engaged in Rajpootana and Central India.

When I was one of a force serving under General Roberts, in Rajpootana, we captured one entrenched village (Rewa), and two fortresses (Awah and Kotah).

For the first engagement we received as prize-money Rs.1 4 0, value 2*s.* 6*d.* For the latter two we were promised, in an order issued by General Roberts, that everything captured, not Government property, should be sold for the benefit of the troops engaged. If this order has been acted upon, why have not the proceeds been accounted for ere this?

There has within the last six months been some ten or twelve thousand troops discharged from the Indian Army. Most of these men are entitled to both medal and prize-money. The majority of them are long ere this scattered in different parts of the world, pursuing their various avocations. Before I left the ship on which I arrived at Gravesend, we were told (on inquiry) by the Government authorities sent there to discharge us that no doubt we should obtain both medal and prize-money some day. But when? Will it ever fall to our lot to touch that gold for which we have so hardly laboured? I hope (should this meet the eye of a comrade who perhaps has fought side by side with me) that he will also claim his rights.

To say the least, we have been treated very shabbily for the hardships we have undergone. I would write more lengthy on the subject, only being aware that you cannot spare too much space in the columns of your valuable GAZETTE, I refrain from doing so. Trusting you will insert this with a view to its meeting the gaze of those whom it may concern, I subscribe myself, yours gratefully,

A TOPE WALLA.

The *Sierra Leone Advertiser* records the death of Geo. Lattie Lawson, late chief of Little Popoe, well known to the naval and mercantile commanders on the coast. Though he died on the 3rd of June, the natives, according to custom, did not divulge his death till several months afterwards.

* The right of holding staff appointments will henceforth be claimed by officers of the European regiments of the army in India, and it certainly seems desirable that they should be required to speak the language of the country in which every Englishman is more or less a part of a political system. Is it certain the high rate of pay will be continued?—[ED.]

THE NAVY.

ADMIRALTY, FEB. 11.—APPOINTMENTS.—Rear-Admiral of the Blue the Hon. Sir H. Keppel, K.C.B. (1857), to be Commander-in-Chief on the Cape of Good Hope station, vice Rear-Admiral the Hon. Sir F. W. Grey, K.C.B., whose period of service has expired.

Lieutenant G. Stratton (1849) to the Eagle, 50, on coast-guard service at Milford Haven.

Second Master T. R. T. Quin to the Forte, 51, screw steam-frigate, Sheerness.

Paymaster C. E. P. Hall (1851) to the London, 90, screw steam-ship, Mediterranean station.

FEB. 13.—Commanders J. W. Whyte (1855) and E. F. Dent (1857) to be Inspecting-Commanders of the coast-guard, vice Grylls, deceased, and Clarke, whose period of service has expired.

Feb. 14.—Second Master J. Symon to the Himalaya, screw steam store-ship, for particular service.

Assistant-Paymaster W. E. Chown (1854) to the Cornwallis, 60, screw steam-ship, on coast-guard service in the Humber.

Acting Third-Class Assistant-Engineer A. H. Symes to the Fisgard, 42, at Woolwich, for service in the Monkey, steam-tug, at Woolwich.

FEB. 15.—PROMOTION.—Engineer R. Gill, promoted to Acting Second-Class Assistant-Engineer in the Tribune, 31, screw steam-frigate, Pacific station.

APPOINTMENTS.—Paymaster F. W. S. Ponsonby (1855) to be Secretary to Commodore Dunlop, at Jamaica.

Assistant-Paymaster W. B. Risk (1858) to the Forte, 51, screw steam frigate, at Sheerness.

Acting Assistant-Surgeons J. Brown to the Donegal, 101, screw steam-ship, at Liverpool; and R. J. M'Morris to the Forte.

Clerk W. H. E. Mitchell to the Forte.

Assistant-Clerks L. H. Edwards to the Sanspareil, 70, screw steam-ship, at Devonport; and E. B. Cornish to the Forte.

FEB. 16.—PROMOTIONS.—Engineer H. Woolley, promoted to be an acting first-class assistant engineer in the Cordelia, 11, screw steam-sloop, Australian station.

Assistant-Paymaster E. H. Stanton (1846), to be paymaster of the fourth class, and additional of the Wellington, 72, at Devonport.

Alacrity, 4, Commander Baird, having been thoroughly repaired, left Plymouth Sound on Tuesday for the Mediterranean.

Alecto, 5, commissioned by Commander Raby, on his removal from the Weser (unsuccessfully fitted out and despatched for the River Plate), sailed from Woolwich on Saturday for service (it is stated) on the west coast of Africa. The whole of the available officers and crew belonging to the Weser were transferred to the Alecto, the complement having been made up to 100 of all ranks, and, although the transfer commenced as recently as the 27th ult., the ship was in complete readiness for sea on Thursday week.

Arachne, 18, sailing sloop, Commander John E. Montgomerie, is hourly expected to arrive at Spithead from the West Indies.

Arethusa, 50, has arrived at Chatham from Devonport, to be taken into dock and converted into a screw steamer.

Ariadne, 26, screw, Captain Vansittart, will be unable to resume her experimental trials at the measured mile in Stokes Bay before the 20th inst., owing to the tides.

Arrogant. Lieutenant C. C. Adams, of this ship, died at Sierra Leone on the 13th of January. The Vice-Admiralty Court at Sierra Leone had condemned the brigantine El Rosarito, which had been detained by the Arrogant, when near the line, on her way to Ascension. She is said to be a fine craft.

Asia. In Portsmouth harbour on Monday an accident occurred, nearly attended with a loss of life. A man-of-war's boat was leaving the Asia steam-guardship, for the Duke of Wellington, lying up the harbour, and, before getting clear of the ship's lee, hoisted the lug sail. On clearing the bow of the ship the whole force of the squall, which was at that moment rushing down the harbour, struck the boat's sail, and instantly capsized her. Four of the six men in the boat got on her keel, and held on until a boat came to their rescue. The two remaining men were picked up out of the water at the same time by a boat which had put off from the Asia on witnessing the accident.

Buffalo was at Lagos on the 10th inst.

Bulwark, 91, now building at Chatham dockyard, is to be of the following large dimensions:—Length between perpendiculars, 252 feet; length of keel for tonnage, 213 feet 9¼ in.; extreme breadth, 58 feet; breadth for tonnage, 57 feet 2 inches; breadth moulded, 56 feet 4 inches; depth in hold, 25 feet 6 inches; burthen, 3,715 62-94 tons. She is to be supplied with engines of 800 horse-power.

Carnatic, old 72, has undergone a thorough repair at the Messrs. White's building-yard at Cowes, and was towed into Portsmouth Harbour this week.

Cossack was at Carthagena at the departure of the last West India Mail.

Dasher, 2, paddle, Commander G. Hore, has arrived at Portsmouth from the Channel Islands, to repair defects, and to store and provision.

Dee, paddle store-vessel, Master-Commanding Pullen, is now receiving machinery and boilers at Woolwich for vessels fitting out at the western yards.

Diadem, 32, screw, Captain H. Cockburn, was to have sailed from Spithead for Portland on Saturday, but was detained, upwards of 150 of her crew having broken their leave of absence. There would appear to be something radically wrong somewhere in the relations of our seamen to the fleet, and discipline is certainly in a very bad state in some of our ships.

Dryad, 51, workmen are employed in laying down the blocks to receive the keel of this screw frigate, in No. 4 slipway at Portsmouth yard. The greater portion of her keel and floor timbers are in course of preparation underneath the shed alongside the slipway.

Emerald. 51, Rear-Admiral Sir Alexander Milne, K.C.B., returned to Devonport on Friday evening, and on Saturday morning hoisted his flag on board this screw steam-frigate, Captain A. Cumming, which has received her powder. During the day Admiral Milne mustered and inspected the crew of the screw steam-ship Nile, 90. The Emerald will probably leave the Sound for the West India Station to-day.

Espoir, 5, screw, at Devonport, was taken into dock on Thursday to be coppered.

Flying Fish, 6, screw despatch-vessel, Commander Charles W. Hope, at Portsmouth, has been placed in No. 1 dock, to make good some defects to her rudder.

Forte, 51. On Sunday, at 9 A.M., Rear-Admiral of the Blue the Hon. Sir Henry Keppel, K.C.B., &c., hoisted his flag on board the new screw steam-frigate Forte, at Sheerness, which was saluted by the guardship of ordinary, Formidable, 84, Captain-Superintendent Rundle B. Watson, C.B., &c. The Forte has nearly completed her full complement of seamen.

Galatea, 26, screw steam-frigate, in dock, fitting for the first division of the steam reserve at Chatham, is still in the hands of the engineers, who will not have completed her until the beginning of the ensuing month.

Gorgon was at Greytown on the 16th ult.

Hind, steam-tender, to the Russell, coast-guard-ship, at Falmouth, is having defects made good at Devonport.

Louisa, Lieut.-Commander Thomas W. Oliver (tender to Her Majesty's screw steam-guardship of coast-guard, Edinburgh), sailed from Woolwich on Saturday, after repairs, to resume her station at Leith.

Magpie, steam-tender, to the Hawke, flag-ship, at Queenstown, having had her defects made good, and made a satisfactory trial of her machinery, will return to Ireland in a few days.

Majestic, 80, Captain Mends, C.B., left Plymouth Sound under steam on Tuesday for Liverpool.

Mars, 80, screw, Captain J. Strange, has arrived at Spithead, from Portland, for the purpose of giving the crew a run from their respective watches after having been paid down.

Medusa, Commander W. Bowden. An extract from a private letter, bearing date Lagos, Jan. 10, 1860, states—"Her Majesty's steam-vessel Buffalo arrived here this morning from Ascension, and brought orders for us to proceed to England. We sail for Whidah this evening, to send the Falcon to the south coast to relieve the Viper, after which the Viper relieves us, and we expect to anchor at Spithead about the middle of March ensuing." The Medusa is expected to arrive at Woolwich from the West Coast of Africa to be paid off. She has proved one of the most successful vessels of the slave preventive squadron, having captured several prizes, and one of the ships taken having specie on board to the amount of 10,000*l.*

Megæra, screw troop-ship, in No. 8 dock at Portsmouth, is having the surface of her plates on the inside covered with a patent cement, to protect her rivet-heads from the wash of the bilge water and grit when at sea.

Monkey, steam-vessel, with a party of riggers under the charge of Mr. Sallinger, Admiralty pilot, proceeded to Greenhithe on Thursday, for the purpose of adjusting the iron store-vessel Industry, for her voyage to Ascension and Rio de Janeiro.

Orion, 91, will probably remain at Malta until June or July, when it is possible that she may be sent to England.

Pluto has captured a fine slaver prize, the Orion, with between 500 and 600 slaves on board.

Princess Royal, 91. This ship is still in dock undergoing repairs at her stern. Her copper is not ripped off below yet, so that the state of her lower timbers is not known. Considering how recently this ship was launched, and the amount of repairs necessary to render her sound, something more than ordinary is required as an explanation. She has only had one commission, and she is rotten abaft, and very much shaken. After making allowances for the free use of unseasoned timber, which has unfortunately prevailed in our naval yards for some time past, in consequence of the unprecedented expansion of the navy, and consequent demand for timber. Yet some allowance must be made for the "shake" of the screw, if we would account for the serious injury done to her stern. For whatever advantages may be derived from the use of that implement, it no doubt does great mischief to the stern of a ship; indeed, the subject has been mooted by an officer of great ability, and he has suggested the propriety of making a series of experiments to ascertain the effects of long-continued screw-propulsion at full speed, such experiments to be made *à l'outrance* with all classes of vessels, more particularly steam frigates, block ships, and the first ships of the line fitted with screws. These are indications that the results would not be satisfactory; and the Princess Royal is a case in point, and illustrates the gallant officer's opinion; and if so it should be seen by what means this defect may be obviated.

Queen, 86, Captain Charles F. Hillyar, arrived at Portland, under steam, early on Saturday afternoon, from Spithead. On approaching the harbour she saluted the flag of Rear-Admiral Sir Charles Fremantle, which was duly responded to.

Racer was at Port Royal, Jamaica, at the departure of the last mail.

Rhadamanthus, Master-Commander Sturdee, left the steam basin, Woolwich, on Saturday, for Portsmouth and Plymouth, having numerous cases of steam gear for the Duncan, Rinaldo, Sutlej, and Prince of Wales, at Portsmouth, and 40 supernumerary lads and seamen for Plymouth, together with machinery for the Jason, Narcissus, and Howe.

Royal William, 90, screw steam-ship, was placed in No. 4 dock, at Keyham, on Friday.

Severn, 51, screw steamer, has been towed to Sheerness to be fitted with her engines and machinery, which are to be 500 horse-power. She will afterwards return to Chatham to be fitted for the first division of the steam reserve.

Skipjack was at Barbadoes on the 27th of January.

Sprightly, steam-tender, arrived at Devonport on Saturday, and sailed again the following morning for Portland and Portsmouth.

Styx was at Port Royal on the 26th of January.

Vesuvius, steam-sloop, Commodore Wise, which arrived last week from the African station, will, in accordance with Admiralty instructions, be paid off at Chatham yard on Wednesday, the 22nd inst. The officers and crew will share a considerable amount of prize-money, the Vesuvius having been highly successful on the slave preventive service during her short term of commission. The following deaths occurred during the passage home:—James Pemberton, A.B., yellow fever; Thomas Anderson, A.B., by a fall from aloft; Thomas Warren, first-class boy, fell overboard; William Wheeler, Assistant-Engineer of the Spitfire; and James Best.

Vulcan. The following is an extract from a private letter received from Her Majesty's steamer Vulcan, and dated St. Vincent, Cape Verde Islands, Dec. 28:—"We sailed from Dublin on Sunday, the 11th, and it was our intention to call at Madeira for coals, and, as the weather was tolerably fine up to the day previous to the one we expected to make that island, we were all anticipating with pleasure our arrival. On the next morning, however, a heavy gale came on, and the vessel's course was altered to clear the island and some very dangerous rocks in its vicinity. We had been able to get no observations for two days, and by 2 p.m. the wind had increased to almost a hurricane, with a tremendous sea on, the rain pouring down so densely that we could hardly see from one end of the ship to the other. The ship at this time was under storm stay-sails only, and running about 10 knots. All at once the look-out men forward were heard singing out with all their might, and on rushing up with the rest to see what was the matter, there, right ahead of us, at a few hundred yards' distance, rose a perpendicular cliff of between 2000 and 3000 feet in height, surrounded by frightful rocks, over which the sea was breaking with tremendous force. In wearing the ship to rescue her from such a perilous position we passed so close to the rocks that you could have thrown a stone upon them. You may imagine how anxiously we looked out, to see if her head payed off, and how thankful we were on finding that she did so. At night we hove to, as we were uncertain what land it was we had seen, and so nearly run upon. In the morning the wind had somewhat abated, and the sun showing himself for a short time, enabled the master to obtain sights and ascertain our position. The land we saw proved to be Madeira, and it is stated that the water is deep up to the very rocks. All on board agree in stating that our captain and his officers behaved throughout with the greatest coolness and self-possession."

PEMBROKE DOCK.—It is expected the Howe will be ready for launching during the high tides, about the 7th March. Something has gone wrong in the flooring or bottom of a new dock for building, as it has raised several inches; it is supposed the water has forced an entrance somewhere, and caused the stones forming the bottom to rise. Mr. Scamp, the Government Engineer, has been down to inspect it. It has never been used, and a new gun-boat was just commenced to be laid down when the failure was discovered.

In addition to the works completed and those in progress at Chatham, the Lords of the Admiralty have decided on an extension and improvement of the dockyard by means of convict labour, the convicts from the establishment at St. Mary's being employed for that purpose. The improvements contemplated will involve an outlay of 160,000*l.*, a portion of which has been already expended, leaving the sum of 127,000*l.* as still required to complete the works. The repair and improvement of No. 1 dock, together with the river wall at the entrance, is to be effected at an outlay of 4000*l.*, in addition to which the mud which has accumulated in the harbour at the entrance to the docks is to be removed, at an estimated cost of 2000*l.* There are also to be several minor alterations undertaken, including foundations for the new machinery to be erected, the sum required for that purpose being 2000*l.*, exclusive of 1500*l.*, for the erection of new machinery. The total estimated amount required for the works to be performed at Chatham Dockyard for the ensuing year is nearly 30,000*l.*, which sum has been inserted in the Estimates and laid before Parliament.

The lines and drawings for the Belvidere and Royal Oak, two of the new 91-gun screw steamers which the Admiralty have ordered to be laid down at Chatham Dockyard, having been prepared under the direction of Sir Baldwin Walker, Controller of the Navy, the vessels are to be commenced at Chatham forthwith. There are also several other line-of-battle and other steamers now building at that establishment, including the Bulwark, 91; the Atlas, 91; the improved steam-frigate Undaunted, 51; the screw corvette Orpheus, 21; and the Rattlesnake, 20, in addition to which the Rodney, 91, and the Galatea, 26, are in dock fitting for service.

The materials for the erection of the coaling jetty in front of the watering island at Portsmouth Dockyard are being unloaded from a barque in the harbour, and the staff of the contractors are about to commence operations forthwith. The sum allotted for the work in the Navy Estimates for 1860-1 is 5377*l.*, 10,000*l.* having been already voted for the purpose, making the total estimate amount to 15,377*l.*

The water has been again pumped out of the old ship-basin at Portsmouth, and the men in the employ of the contractors have resumed their work in lengthening Nos. 3, 4, and 5 docks, &c.

The following gun-boats now building by private contract at Newcastle-upon-Tyne are to be sent to Woolwich as soon as launched, to be fitted for sea, viz.:—The Cockatrice, the Wizard, and the Britomart. They are each to have a complement of 40 men.

GREENWICH HOSPITAL OUT-PENSIONS.—A vacancy has occurred on the list of officers on the out-pensions of Greenwich Hospital for a commander, value 65*l.* per annum, in consequence of the death of Commander Thomas Cowper Sherwin (1825), and also for a lieutenant, value 50*l.* per annum, occasioned by the demise of Retired Commander Dyer Bond (1834). The above appointments are at the disposal of the First Lord of the Admiralty.

In the course of a discussion on our relations with China in the House of Commons on Monday evening, Sir Michael Seymour, who commanded the naval forces there in 1857, expressed regret at the absence of some documents which, he said, would have enabled the House more completely and impartially to view the subject, which raised a very large question. He adverted to the case of the lorcha Arrow, vindicating his own share in that transaction, and to the operations which followed, up to the capture of the Taku forts in May, 1858. He then proceeded to touch upon his official intercourse with Lord Elgin, observing that he had refrained from noticing instances in which his conduct and character as a naval officer had been in some measure unjustly assailed, and indicating in an unmistakeable manner

Digitized by Google

one publication (Mr. Oliphant's book), some alleged misstatements in which he pointed out. Sir Michael has since moved for the papers on which he rests his justification against the attacks made upon him, but Mr. Oliphant has also come forward to support his assertions, which he says he means to do by official documents, establishing still stronger grounds of accusation against the admiral than he had previously advanced.

On Monday evening, in the House of Commons, Lord J. Browne asked the Secretary to the Admiralty whether any reply had been given to the memorial of the lieutenants of the Royal navy, presented in December last; whether it was the intention of the Board of Admiralty to increase the pay and half-pay of those officers, so as to place them more nearly on a position of equality with the masters and the non-executive officers of the Royal Navy of the same rank; and whether it was intended to allow their service in the coast-guard to count as sea time. Lord C. Paget said the memorial was received and taken into consideration by the Admiralty, although no official acknowledgment was sent. It was not intended to increase the full pay, and when the vote for half-pay was before the House in Committee of Supply he would explain the intentions of the Government with regard to the half-pay of lieutenants on retiring.

The wine and drugs supplied to the Navy were complained of in the House of Commons the other evening by Lord C. Hamilton, who asked the Secretary to the Admiralty whether the attention of the Board had been directed to the quality of the wine supplied to the Navy for medical purposes, it having been described as unfit for the use of invalids, although exempt from duty; and also, whether he could give an assurance to the House that the drugs supplied to the Navy were not of an equally adulterated and deleterious description. Lord C. Paget said the drugs were supplied from Apothecaries' Hall, and were necessarily of the best quality. With regard to the wine no complaints had been received from any of the ships. The statement of the Chancellor of the Exchequer had caused some little sensation at the Admiralty, and therefore they were making some inquiries. The latter part of the noble lord's statement caused a good deal of laughter in the House.

A return has been issued showing the total number of ships afloat or in process of construction to be 666; of these 523 are steam vessels, 67 of which are building or converting. Of the remaining 456 actually afloat, 48 are ships of the line, 25 screw frigates, 9 paddle frigates, 9 block ships, 16 screw corvettes, 45 screw sloops, 24 paddle sloops, 169 screw gun-vessels and gun-boats, 8 screw floating batteries, 18 screw transports, &c., 43 paddle ditto, and 4 screw mortar vessels. Of the 143 effective sailing ships afloat, 15 are ships of the line, 22 frigates, 22 sloops, and 84 mortar vessels and floats.

The number of seamen and marines voted for the service of the Royal Navy in 1760 was 73,000, and the sum of 3,640,000*l.* was granted for their maintenance. The navy at that time consisted of 120 ships of the line, besides frigates, fire-ships, and smaller vessels. The French navy had become so weakened by the war that few ships remained, and consequently only six were taken during the year. In North America, the appearance of the British squadron compelled the French to raise the seige of Quebec, and the whole of Canada came into possession of this country.

Royal Naval College.—The following are the names of the officers now studying at the Royal Naval College, Portsmouth, to pass their final examination for Lieutenants:—Acting-Lieutenants E. S. Mangan, E. W. Thackeray, C. E. Buckle, C. W. Warren, F. G. Gambier. Acting Mates Hardy McHardy, A. J. Dale, W. Parsons, E. G. Harvey, A. Austin, W. M. Bridger, J. E. N. Graham, J. S. Murray, G. N. Keating, C. H. Eden, W. G. Fitzgerrald, and Richard Evans. The following officers are studying at the Royal Naval College, Portsmouth to pass steam examination:—Captains W. H. Dobbie, William M. Dowell, and W. H. Haswell. Commanders S. H. Henderson, F. H. Smith, Hon. W. S. Ward, N. B. Bedingfield, W. C. F. Wilson, H. K. Wrateslau, W. H. Whyte, A. M. Lyons, E. Madden, J. Moresby, A. H. J. Johnstone, J. H. M. Martin, M. E. Smithett, Hon. A. L. Corry, H. D. Grant, and A. J. Thrupp. Lieutenants C. F. Knowles and G. W. Strong. Naval Instructors: The Rev. W. V. Lloyd, the Rev. D. M. Salter, Rev. E. C. Mallard, and the Rev. F. W. Nickoll. The following officers are studying at the Royal Naval College Portsmouth for the Marine Artillery:—Lieutenants R. H. Dwyer, A. G. Anson, K. C. Allen, J. L. Needham, J. Inman, W. G. S. Bickford, J. Lye, E. M. Coates, G. H. Pengelly, Hon. H. Aylmer, W. L. J. Cockcraft, P. O. Connor, A. J. Hill, E. J. Risk, and A. G. J. Hawes.

Nautical Telescopes.—The Admiralty, with the view to secure the most efficient telescope at a low price for the use of the navy, have recently called upon the opticians of London and other parts of England to tender for the supply, each house sending a sample telescope. To each instrument a motto was attached, and in a sealed envelope the maker's name, so that there should be no favouritism. The trials were concluded yesterday, and on opening the envelope to which the motto on the chosen instrument referred, the successful competitors were found to be Messrs. Elliott Brothers, of the Strand.—*Mechanics' Magazine.*

NAVAL RENDEZVOUS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I called your attention, in your impression of the 4th instant, to the want of an office or building of some kind, where seamen and officers could meet with a view of entering the navy. I now see that Sir James Elphinstone, the member for Portsmouth, has very wisely dilated upon the advantages that would be certain to arise to the service if an office for entering seamen for the Queen's ships was opened at each of our chief ports, naval as well as commercial. We recruit for the army, why not adopt a similar method for the navy? The experiment might succeed; but if it failed it would not be so elaborate and expensive as the clumsy expedient of a Royal Commission, nor would it possess the vulgar coarseness of the present pot-house and fife-and-tabor system, which has been well described as the most effectual means of keeping good men out of the Service, and attracting rogues and vagabonds into it.

Yours obediently, A Lieutenant, R. N.

MANNING THE NAVY.

This all-important question was the subject of a long discussion in the House of Commons on Thursday. It arose from a motion of Sir Charles Napier to the effect that the recommendations of the Commissioners on Manning the Navy ought to be taken into consideration by Her Majesty's Government, with a view to carry out the principles of such recommendations. He urged that in the first naval action of the next war, whatever party was successful, both fleets must be nearly annihilated. In such a case, if France brought forward a second fleet, it was admitted by a Government official that Great Britain had not a second one ready also—that is, manned and ready for sea, although there were plenty of ships. None of the recommendations of the commission had been adopted; no increase in the reserve of seamen, the coast-guard or the marines, had taken place. It was said there were 20,000 reserve volunteers and 10,000 coast volunteers; but it would not be easy to say where these men were. There could be no doubt that things could never be set right until the present constitution of the Admiralty was altered.

Mr. Henley, in reference to the scheme for a volunteer reserve of seamen, expressed his opinion that it had failed principally because the regulations and the inducements held out were not plain, simple, and intelligible. What was a sailor to understand by the word "emergency," in which it was stated that the volunteers were to be called out. The number of years of the engagement was anything but well defined. It would have been advisable to have taken all the men that could be got, and not to confine the admission to each locality. All the regulations seemed to be framed in a spirit of distrust of the seamen, which was sufficient to account for any failure of the scheme.

Mr. Liddell, after pointing out certain details in the plan of the naval reserve which might be amended, especially urged the advantage of a nearer assimilation between the navy and the merchant service.

Mr. Lindsay said that it was admitted that the retaining fee for entrance into the volunteer reserve was ample, and yet notwithstanding all the machinery which had been put in motion for carrying it out it had proved a total failure. He had dissented from the recommendations of the commission for manning the navy, and therefore he could not support this motion. His idea of manning the navy was: in the first place, a less number of men would be sufficient to man the ships if the mechanical contrivances for diminishing manual labour which had been adopted in the merchant service had been introduced into the navy, not one of which had been adopted. He wished the number of marines to be largely increased. He desired to break down the barrier between the navy and the merchant service, and to that end he recommended that in the school-ships boys should be trained for both services. He should be glad to see opportunity given to officers of the mercantile marine to enter the navy with the men of any reserve. There ought to be some supervision of the articles of war, which exercised a deterring effect on seamen who might otherwise be willing to enter the navy.

Lord C. Paget did not approve the motion, for the Government were desirous of carrring out the recommendations of the commission. The plan adopted for establishing a reserve had only been in operation for six weeks, and if it should appear to require amendment the Government would be ready to deal with it. The Government were doing all in their power to avail themselves of every suggestion which had been made to them, some of them by Sir C. Napier. With regard to the Marines they required their tour of duty at sea—and no more ought to be enlisted than could be exercised at sea—else they would degenerate into mere landsoldiers. There had been a recent increase of 3000 men to that force. The scheme of entering merchant boys into training-ships was not by any means given up, but it was a question of expense. If due time was afforded, the recommendations of the commission would all be adopted.

A discussion followed, in which Mr. Taylor, Sir J. Elphinstone, Sir M. Seymour, Mr. Bentinck, Admiral Walcott, and Mr. Digby Seymour, took part.

Sir C. Napier said, that although the motion was not objected to, he had no guarantee that the Government would act upon it. He should divide the House.

The Speaker put the question, and there being no dissent, declared the motion carried.

THE NAVAL ESTIMATES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—It would appear that the deeper we dive into the mysterious depths of our dockyard expenditure, the more we are astounded at the all but fabulous sums required to maintain a respectable Navy. If we are to credit Lord C. Paget, the cost of a single line-of-battle ship during one commission was so "tremendous," that it absolutely "thunderstruck" a gallant post-captain. Judging from what we know of captains, the sum must have been prodigious to produce such a disastrous result. It seems, however, that from the day when Admiral Steam twisted his broad black pennant on board a Queen's ship, the nation has never been able to square accounts with him. What with coals, machinery, engineers and stokers (all innovations of his introducing), the demands upon the public purse are so great that it is impossible, according to Lord C. Paget's statement, to grasp at the huge total. The items are so various, and shoot out into such extraordinary channels, that it will take from two to three years' studious research before the national mind can be put in possession of reliable figures. We have no doubt, however, that by patient industry and perseverance his lordship will in due time present us with the "little bill."

In the meantime we are reminded that our dockyard expenditure will not be allowed to flag, and is not likely to be reduced. And, if the cost of a single little cruise of a line-of-battle ship "thunderstruck" a post-captain, a milder form of amazement (differing only in intensity with the difference of the sum expended) has been manifested at the appointments of "Assistants" to the admiral superintendents of our two channel ports at salaries of 800*l.* per annum respectively.

From what I can gather from his lordship's statement, letter-writing is the bane of the Service. Thus a comptroller of the navy, who really ought to superintend the dockyard expenditure, does nothing of the sort—his time is occupied in letter-writing. Again, the superintendents of Portsmouth and Plymouth dockyards are not superintendents, because their whole time is taken up in correspondence, and the result is the appointment of two assistants, at salaries of 800*l.* a year.

Doubtless the labours of "heads of departments" have been increased in the royal yards during the last twelve or eighteen months; but few people seemed to be aware that they were so excessive as to warrant the creation of two such expensive appointments as those above referred to. Indeed, it has been stated upon what is generally admitted to be good authority, that no "memorandum" had been sent to either of the dockyards, asking the opinion of the executive officers upon the subject—a mode of inquiry, I believe, generally adopted, previous to the creation of any new appointments. Consequently the first intimation of the new berths came from Lord C. Paget himself in his speech upon the naval estimates.

It seems to be the province of the noble lord to stagger us all, for it is rumoured in naval circles that a gallant admiral holding an official position of great responsibility was so "taken aback" upon hearing of the intention of the "board" to create the new appointments, that he strongly protested against them as uncalled for, even now that our yards are ringing with naval effort; and that when our exertions are relaxed, and our navy placed upon an efficient scale, the duties of "assistants" to admirals' superintendents will be perfect sinecures. Yours obediently, Discipline.

Portsmouth, February 16th.

THE MILITIA.

Limerick.—The first division of the Limerick County Militia, consisting of 9 officers, 21 sergeants, and 373 rank and file, with women and children, arrived at Cork by steam vessel on the 13th instant, from Portsmouth, disembarked same day, and proceeded to Limerick by rail, where they are quartered in barracks and in billets, preparatory to their disembodiment on the 24th instant.

North Cork.—A division of the North Cork Rifles was to embark at Ayr on Wednesday for conveyance to Cork, *en route* to Mallow for disembodiment. A second division will shortly follow. It is intended to disembody the regiment on the 24th inst.

Monmouthshire Militia—John Finnerty, to be Quartermaster.

Royal Denbigh Rifle Regiment of Militia—Ensign George Henry Rose Briscoe to be Lieutenant; Ensign Jacob William Geoghegan to be Lieutenant; Ensign Hugh Robert Hughes to be Lieutenant.

Forfar and Kincardine Regiment of Militia Artillery—George Frederick Webster, Gent., to be Second Lieutenant, vice Thomas Augustus Forbes Leith, resigned.

2nd Royal Lanarkshire Militia—Lieutenant James Carmichael Robertson, to be Captain, vice Park, promoted.

[The following is substituted for the entry in the *Gazette* of the 7th inst.]

2nd Royal Lanarkshire Militia—Captain Walter Brisbane Park to be Major, vice Harrington, resigned.

Warwickshire Yeomany Cavalry—Cornet John Digby Wingfield Digby to be Lieutenant, vice Wilmot, resigned; John Newdigate Francis Astley, Gent., to be Cornet, vice Digby, promoted; Jan. 13.

Warwickshire Militia—2d Regiment—Lieutenant Bowyer Wenman Cave Brown Cave to be Captain, vice Stratton, resigned; Ensign Harvey Charles Tyson, to be Lieutenant, vice Cave, promoted; Feb. 10.

2d Regiment of the Royal Surrey Militia—Henry Shirley, Gent., to be Assistant-Surgeon; Feb. 14.

Resignations.—3d Regiment of the Royal Surrey Militia—The Queen has been graciously pleased to accept the resignation of Captain Hedworth David Barclay.

2nd Regiment of the Royal Surrey Militia—The Queen was graciously pleased, above two years ago, to accept the resignation of Lieutenant William de Norman and that of Lieutenant Louis Perre Goodchap.

1st or Royal East Middlesex Regiment of Militia—Lieutenant Colonel Thomas St. Leger Alcock to be Lieutenant Colonel Commandant; Feb. 8.

5th Regiment of West York Militia—William Robert Raye, Gent., to be Ensign; Sept. 6.

Denbighshire Yeomanry Cavalry—Cornet James Richardson Barnes to be Lieutanant, vice Attree, resigned; George Edwin Taunton, Gent., to be Cornet, vice Barnes, promoted; Jan. 2.

Haddington, Berwick, Linlithgow, and Peebles-shire Artillery Militia—Major George Logan Home to be Lieutenant-Colonel-Commandant; Feb. 11.

Leicestershire Regiment of Militia—Her Majesty has been pleased to approve of the resignation of Lieutenant Arthur Dixon Rawlins of the commission which he holds in the above regiment.

Leicestershire Regiment of Militia—Her Majesty has been pleased to approve of the resignation by Paymaster William Frederick Perry of the commission which he holds in the above regiment.

Colonel the Hon. John Walpole died intestate and a bachelor. His personal estate was estimated at 30,000*l.*, and the administration has been granted to his sister, Mrs. West, of Leeds, as one of his next of kin.—The will of Major-General Henry Edward Robinson, late of Upper Berkeley Street, was proved in London on the 2nd of February. He has left to his neice, Miss Mary Robinson, who resided with him, all his furniture, plate, ornaments, wines, &c., and 12 shares in the bank of Montreal; also 101 like shares, the interest for herself and two nieces, Catherine and Henrietta Hill, and has left a large number of like shares to his other nieces, a nephew, and to his brother. His property consists principally of investments in colonial securities.

We are informed that the long-sought-for boon of a pension to the widows of warrant officers has at last been granted by the Admiralty. The sum named is 25*l.* per annum.

VOLUNTEERS.

METROPOLITAN.

ADMIRALTY.—The Volunteer Rifle Corps raised at the Admiralty has been recognised as the 34th Middlesex; and the Lord-Lieutenant has approved of Mr. William Willis as captain, Mr. Charles Cox as lieutenant, and Mr. Thomas Gripper as ensign. The Admiralty corps forms one of several raised in the Civil Service, which will eventually be brigaded together.

LONDON IRISH RIFLE VOLUNTEERS.—On Saturday, a special meeting of the council of this corps was held for the purpose of appointing a captain-commandant, subject to the approval of the Lord-Lieutenant, and other business; the Marquis of Conyngham presided, and among those present were the Earl of Arran, Major-General Sir J. Sheil, K.C.B., the Attorney-General for Ireland, the Right Hon. J. D. Fitzgerald, M.P., Major-General Mathews, Mr. Digby Seymour, M.P., Dr. E. Johnson, Mr. Montgomery, Mr. T. A. Denny, Dr. O'Connor, Mr. Morgan J. O'Connell, Mr. James Connell, &c. In consequence of the very warm zeal displayed in the movement by the Marquis of Donegal, who was the first to place his name on the council, which now consists of some sixty of the leading nobility and gentry of Ireland, and who, as chairman of the council, has shown the most lively interest throughout for the success of the organisation, the council determined upon proffering the post of commandant to his lordship. The noble marquis, in reply, stated his willingness to accept the honour, and, at the same time, explained that the regiment which he had commanded for some time past—the Antrim Rifles—was about to be disembodied, and this would enable him to devote his time to the interests and welfare of the corps. Major-General Mathews, upon this, moved the appointment of the Marquis of Donegal as commandant, which was seconded by the Earl of Arran, and carried unanimously, amidst acclamation. A number of nominations of gentlemen for commissions in the corps was then handed in to the council, but their consideration was adjourned for the attendance of the commandant. At the drill in the evening at Hungerford Hall the appointment of the Marquis of Donegal was received with three hearty rounds of cheers.

LONDON SCOTTISH.—On Saturday evening a numerous meeting of the London Scottish corps took place at the hall of the Scottish Corporation, Crane Court, Fleet Street, with a view of considering a communication from the Government relative to the appointment of officers in all volunteer corps. Lord Elcho presided, and after alluding to the satisfactory progress of the corps in drill and numerical strength, proceeded to the discussion of a subject in which the corps felt great interest. It appears that in one of the rules which the corps had unanimously adopted for its internal government the principle of popular election in the appointment of officers was distinctly recognised, but when the regulations came to be submitted to the Marquis of Salisbury, as Lord-Lieutenant of the County of Middlesex, his lordship struck his pen through the recognition of the popular element, and Earl de Grey and Ripon, on an appeal being made to him in his official capacity, supported the course taken by the Lord-Lieutenant. The executive committee of the London Scottish Volunteers, of which Lord Elcho, as the commanding officer, is chairman, then proceeded to elect the officers of the corps, and the names of the persons so chosen have since been submitted to the Lord-Lieutenant for approval. Some dissatisfaction, in the meantime, has been felt by the members. Lord Elcho read to the meeting the correspondence between himself and Earl de Grey. The letter from the latter nobleman stated distinctly that the members of volunteers corps had no real right to elect their officers, the appointment of whom rested entirely with the commanding officers and the lords-lieutenant.

LAMBETH.—The first public meeting of the borough of Lambeth Rifle Corps was held this week at the Horns, Kennington. Mr. W. Williams, M.P., occupied the chair, supported by Mr. W. Roupell, M.P., Mr. F. Doulton, and other influential gentlemen. The chairman said they were called together for the formation of a rifle corps, and he was sure that Lambeth was public-spirited and patriotic enough to have a rifle corps of their own, unconnected with any other locality. Mr. F. Doulton, Mr. Winterbottom, and other gentlemen addressed the meeting in support of the movement; and Mr. J. W. Truman, the hon. sec. announced subscriptions to the sum of 200*l*. He also announced that Mr. Roupell had fully equipped 240 men, and had furnished large and commodious drilling rooms and grounds for the whole corps. Numerous members were enrolled, and the proceedings, which were of the most enthusiastic character, terminated in the usual way with three cheers for the Queen. The room was densely crowded.

ST. GEORGE'S.—On Saturday afternoon a numerous muster of the St. George's, Hanover Square, Volunteer Corps assembled at head-quarters (Burlington House), and from thence marched, under the command of their lieutenant-colonel, the Hon. C. H. Lindsay, to Chelsea Hospital, where they were paraded before Sir Edward Blakeney, the governor of the hospital. The regiment was preceded by their band of eight bugle performers. At a general meeting of the regiment, Mr. Ollivier, the honorary secretary, presented a report, in which he stated that since the last general meeting an increase of no less than 700*l*. had been added to their funds by the augmentation of the honorary list of 200 members, as well as a great number of active members. This corps marched out from Burlington House, Piccadilly, on Thusday morning with Lieut.-Colonel C. H. Lindsay, Major Commandant, at their head, and attended by their band. In their progress they met the Scots Fusileer Guards in Pall-Mall, when the colonel ordered the half in front to present arms, the Guards shouldering arms by companies as they passed. They proceeded along Pall-Mall, Waterloo Place, Regent Street, &c., and returned to Burlington House by ten o'clock to dismiss.

QUEEN'S (WESTMINSTER) RIFLE VOLUNTEERS. — At a general meeting of the effective members of the St. Anne's division on Friday the 10th inst., convened for the purpose of selecting officers for the 1st company, which now numbers 100 members, the following gentlemen were unanimously elected:—Mr. Alfred Shoolbred, captain; Mr. Edwin Cutler, lieutenant; Mr. Frederick T. Shoolbred, ensign. The two first-named gentlemen have served in the Yeomanry Cavalry. The drill of the enrolled members is proceeding in a most satisfactory manner three times a week. The 2nd company is now in course of formation.

WEST MIDDLESEX.—On Wednesday evening a public meeting of the inhabitants of Marylebone was held in the theatre of the Marylebone Literary and Scientific Institution, Edward Street, Portman Square, for the purpose of receiving a report as to the progress of the West Middlesex (late Marylebone) Rifle Corps. Major-General Sir James John Hamilton occupied the chair, and was supported by the Rev. E. J. P. Eyre, the rector, Lord Teignmouth, Lord Radstock, Mr. Alderman Salomons, M.P., Mr. Thomson Hankey, M.P., Sir John Anson, Bart., Colonel Burlton, C.B., Professor Martin, Captain J. T. Johnston, Mr. L. Oliphant, Mr. W. J. Thompson, Captain Compton, Mr. F. H. Bridgman, Mr. J. Tavener, &c. Nearly 100 effectives attended in uniform, and the meeting was an enthusiastic one. The chairman said that the corps had that day received the accession of the company forming at London University College upon condition that there should be no alteration in the present designation of the corps. The gallant chairman then stated that the corps numbered 300 effectives and 200 honorary members, and that the funds were in a most satisfactory condition, and they had a large sum invested in the public securities (cheers). A considerable amount of further subscriptions was announced.

BUCKINGHAMSHIRE.

ETON COLLEGE.—Upon the suggestion of several influential old Etonians, and under the sanction of the authorities of Eton College, a corps of nearly 300 students from the sixth and fifth forms has just been formed for drill practice. They assembled in the quadrangle on Tuesday last for the first time, and commenced in right good earnest under the strict drill of 10 sergeants of the Grenadier Guards, and in the presence of the Duke of Wellington and several officers of the regiments in garrison at Windsor. The costume and general arrangements, as well as the selection of officers, have not been settled, but it is expected the superior officers will be chosen according to their proficiency at a future period.

DEVONSHIRE.

MOUNTED RIFLES.—The following letter has been received by the Lord-Lieutenant of Devonshire from the Secretary for War on the 8th inst.:—"War Office, Feb. 4, 1860,—My Lord,—Having had under my consideration the subject of the formation of bodies of Mounted Rifle Volunteers, I have the honour to inform your lordship that I have decided with reference to the Memorandum of the 13th July, 1859, that in future a company of Mounted Volunteers may be formed of not less than 40, and a subdivision of not less that 20 enrolled members.—I have the honour to be be, my lord, your lordship's obedient servant,—(Signed) S. HERBERT.—The Earl Fortescue, K.G."

DURHAM.
